● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

Indications complémentaires (non auditées)

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

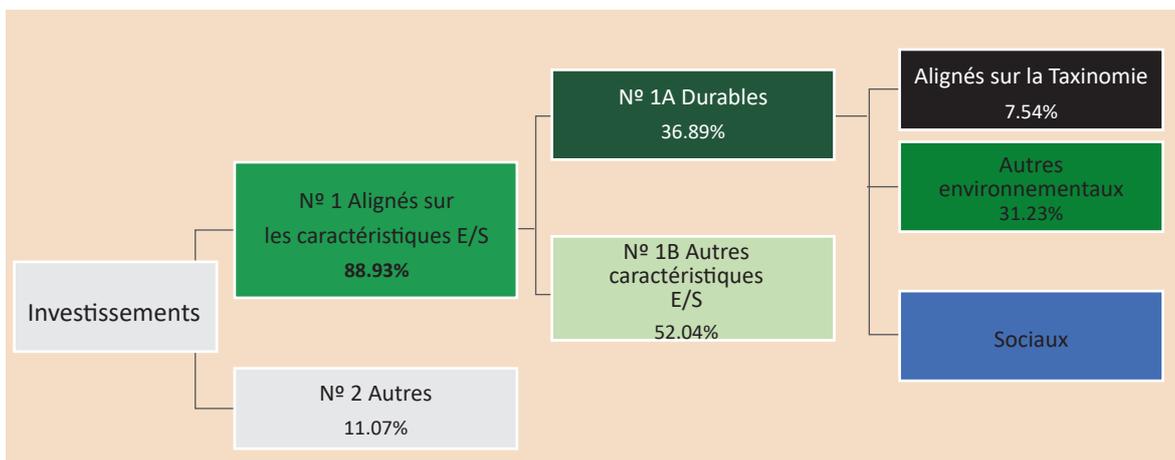

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
AMUNDI EURO LIQUIDITY SRI - Z (C)	Fonds communs de placement	3.10%	FRA

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>Finance</i>	19.37%
<i>Services de communication</i>	17.01%
<i>Consommation discrétionnaire</i>	16.51%
<i>Industrie</i>	16.31%
<i>Biens de consommation de base</i>	13.79%
<i>Services aux collectivités</i>	6.37%

<i>Fonds communs de placement</i>	6.28%
<i>Technologies de l'information</i>	2.58%
<i>Énergie</i>	2.54%
<i>Immobilier</i>	0.20%
<i>Forex</i>	-0.03%
<i>Autres</i>	-0.61%
<i>Liquidités</i>	-0.64%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 7.54% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

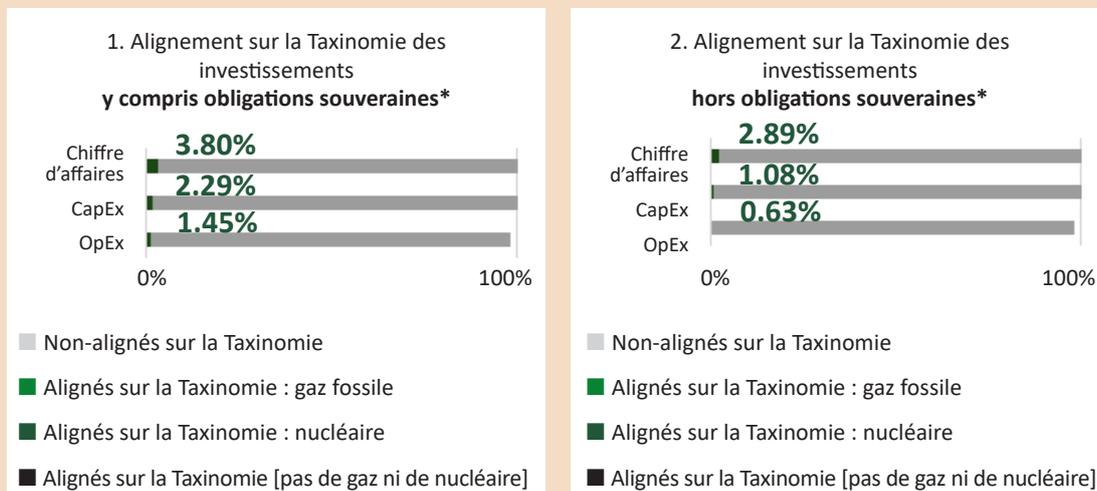

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.09%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **31.23%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte**

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● En quoi l'indice de référence diffère-t-il de l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EURO HIGH YIELD SHORT TERM BOND

Identifiant d'entité juridique :
529900Q3IK91XCA88E07

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S)

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' **39.25%** investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA Q759 CUSTOM INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.34 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.04 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à

G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

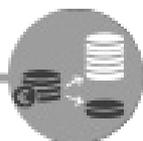

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

Indications complémentaires (non auditées)

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

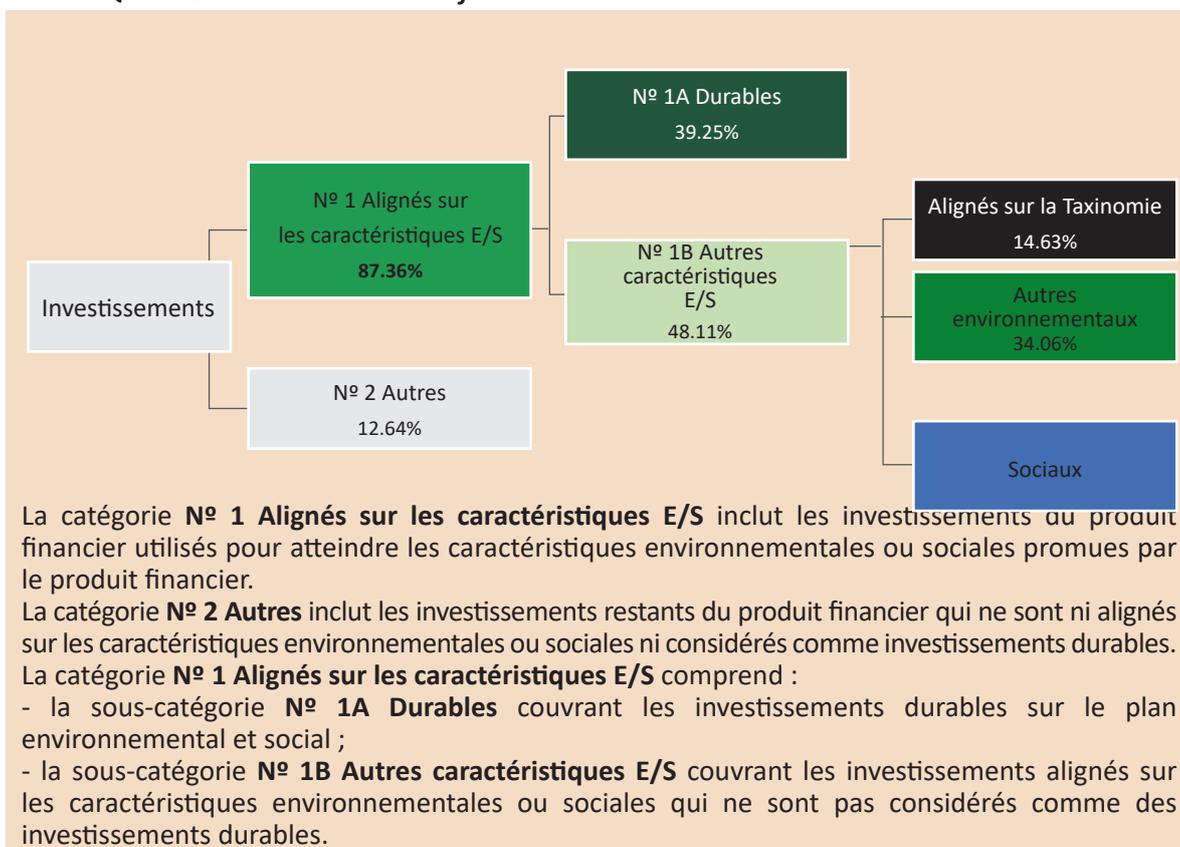

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
AMUNDI EURO LIQUIDITY-RATED SRI - Z (C)	Fonds communs de placement	3.36%	FRA

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Industrie	24.86%
Consommation discrétionnaire	24.15%
Services de communication	17.93%
Biens de consommation de base	11.55%
Services aux collectivités	6.92%

<i>Fonds communs de placement</i>	5.61%
<i>Finance</i>	5.30%
<i>Technologies de l'information</i>	2.26%
<i>Énergie</i>	1.53%
<i>Forex</i>	-0.02%
<i>Autres</i>	-0.24%
<i>Liquidités</i>	0.15%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 14.63% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

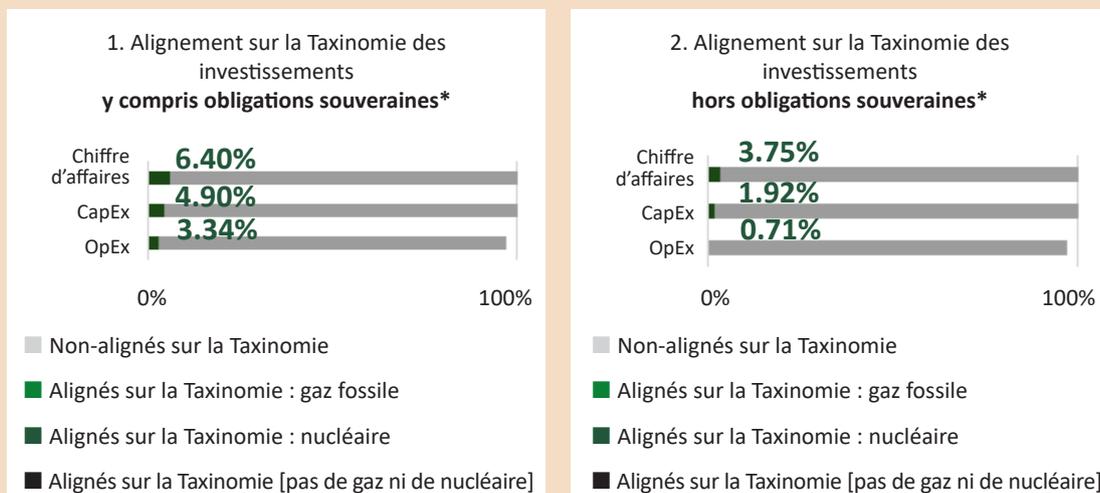

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **34.06%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte**

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS GLOBAL SUBORDINATED BOND

Identifiant d'entité juridique : 549300YM7XSURJOGN349

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <p><input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' 49.98% investissements durables</p> <p><input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> ayant un objectif social</p> <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **30% ICE BOFA CONTINGENT CAPITAL HEDGED INDEX + 15% ICE BOFA PERPETUAL PREFERRED SECURITIES HEDGED INDEX + 37.5% ICE BOFA GLOBAL HYBRID NONFINANCIAL CORPORATE HEDGED INDEX + 17.5% ICE BOFA GLOBAL HYBRID NONFINANCIAL HIGH YIELD HEDGED INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.51 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.50 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

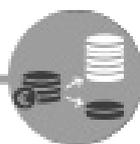

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs

ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

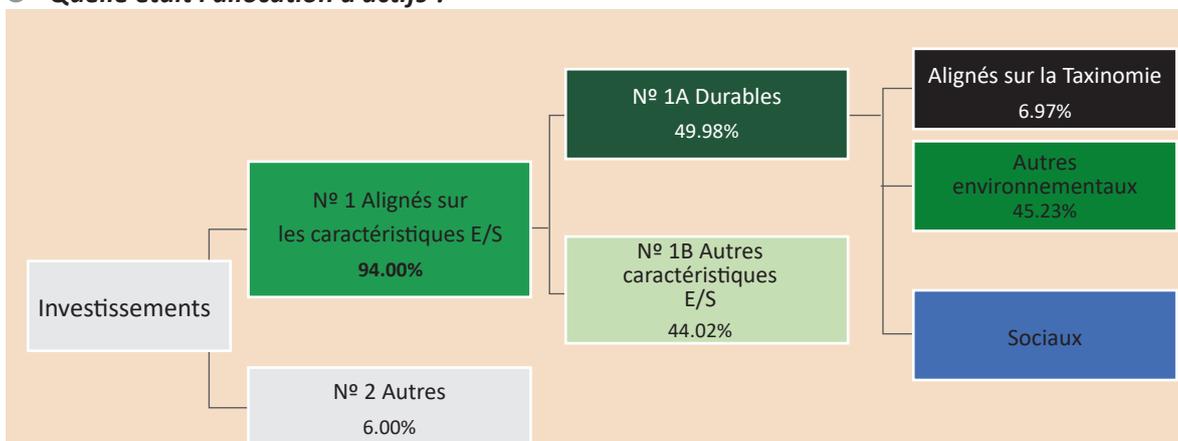

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
SANTAN VAR PERP	Finance	3.60%	ESP

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	71.17%
Services aux collectivités	8.54%
Énergie	8.41%
Biens de consommation de base	3.01%

<i>Industrie</i>	1.43%
<i>Consommation discrétionnaire</i>	1.42%
<i>Fonds communs de placement</i>	1.11%
<i>Services de communication</i>	1.06%
<i>Immobilier</i>	0.55%
<i>Forex</i>	0.17%
<i>Liquidités</i>	2.82%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 6.97% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

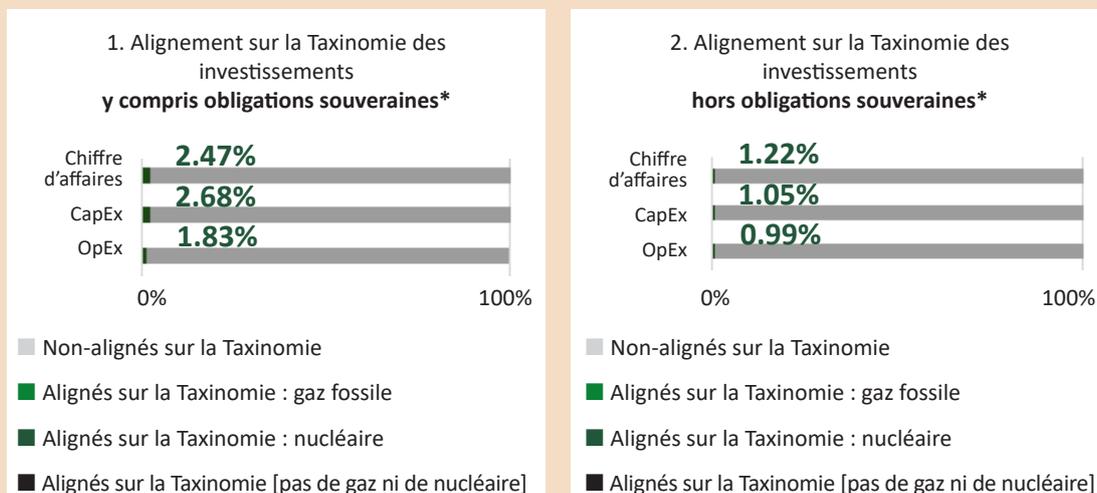

- Oui :
 Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **45.23%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte**

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
PIONEER GLOBAL HIGH YIELD BOND

Identifiant d'entité juridique :
5493001ZUQBXYT5ICJ95

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <ul style="list-style-type: none"> <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' 16.57% investissements durables</p> <ul style="list-style-type: none"> <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> ayant un objectif social <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
--	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG GLOBAL HIGH YIELD**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.09 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.24 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs

environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

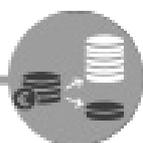

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer

un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

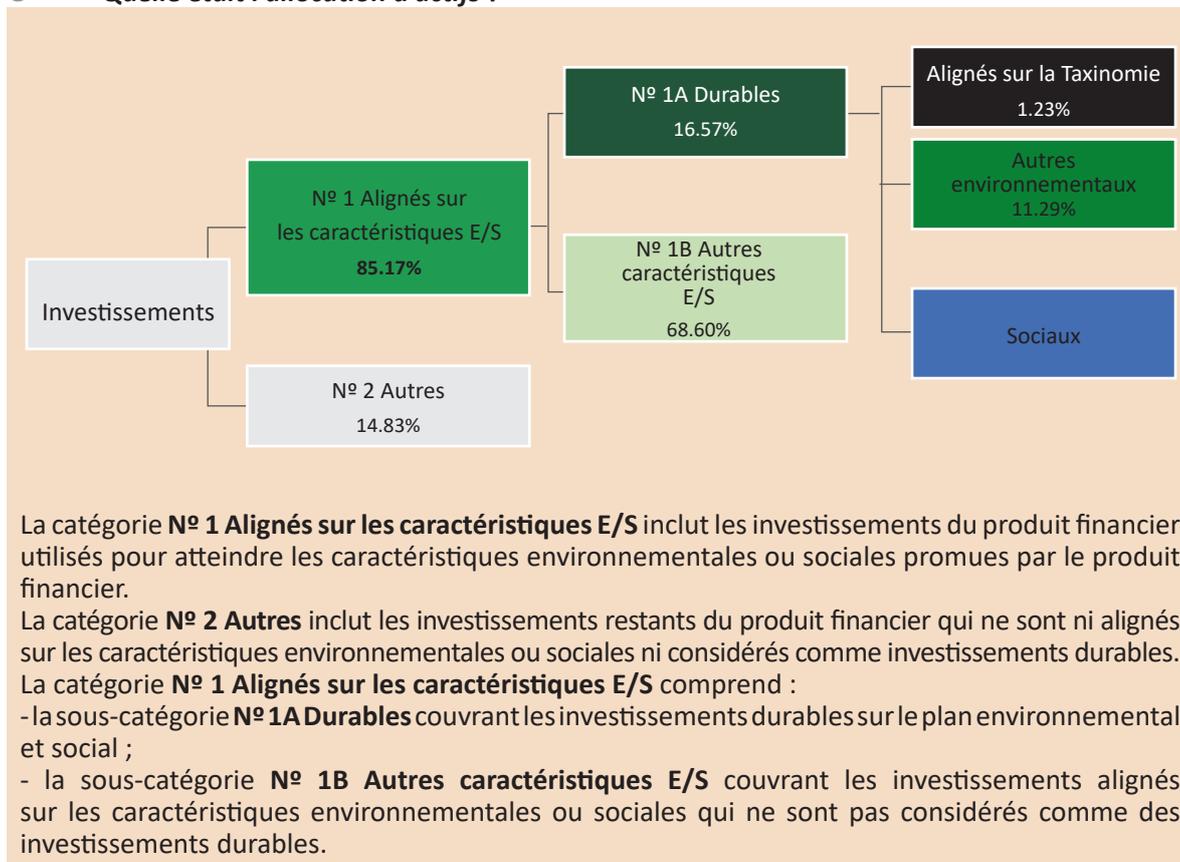

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :
- du chiffre d'affaires pour refléter la part des revenus provenant des

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.23% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

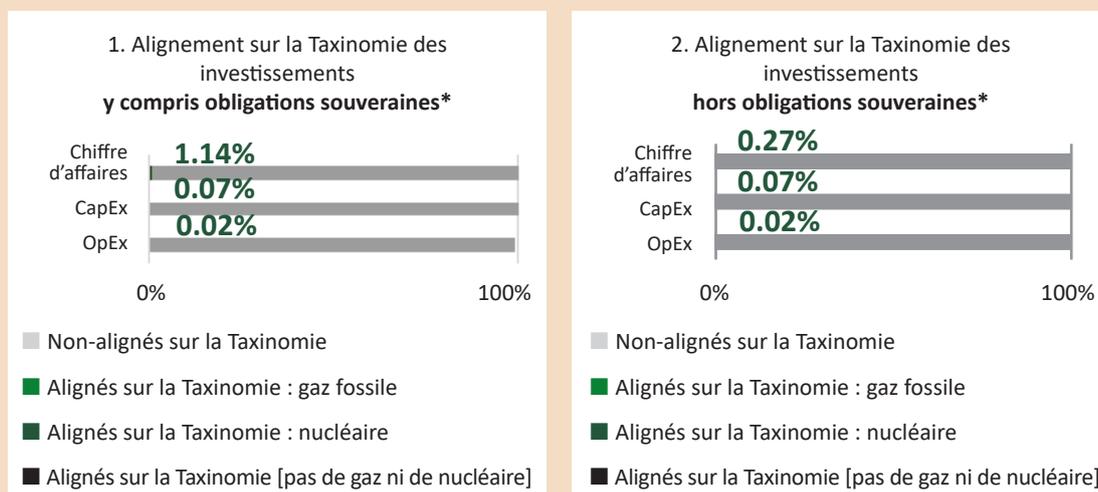

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **11.29%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS PIONEER
GLOBAL HIGH YIELD ESG IMPROVERS BOND

Identifiant d'entité juridique :
213800O2125EN6NGE460

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S)

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' **29.86%** investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - Entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles
 - Exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr)
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Le gestionnaire des investissements a concentré le processus de placement sur les entreprises/secteurs/pays ayant suivi une trajectoire positive en termes de critères ESG au sein de leur activité, ou prévoyant de suivre une telle trajectoire. Le gestionnaire des investissements a identifié des opportunités de placement alignées sur l'objectif de génération d'alpha en se concentrant en particulier sur l'inclusion des entreprises/secteurs/pays qui seront de solides gagnants en termes de critères ESG à l'avenir, qui présentent (ou présenteront) une amélioration favorable du profil ESG, tout en investissant également dans des entreprises/secteurs/pays qui sont actuellement des références en matière d'ESG.

Par ailleurs, le Compartiment a obtenu pour son portefeuille une note ESG qui est supérieure à celle de l'Indice de référence. Le Compartiment a été comparé à la note ESG de son Indice de référence après avoir exclu dudit Indice de référence 20% des titres présentant les notes ESG les plus faibles.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.29 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.29 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour

des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

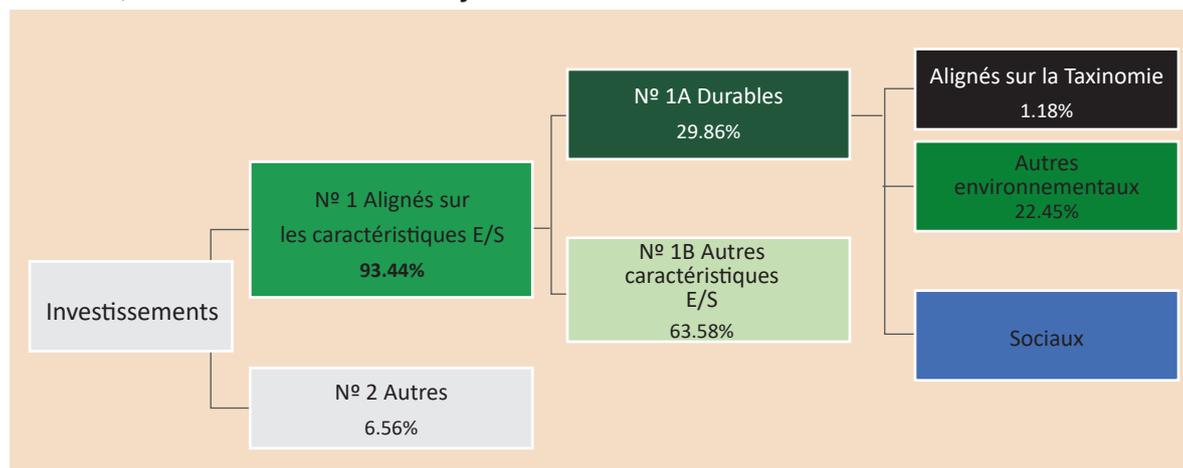

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2022 au 30/06/2023**

Principaux investissements	Secteur	% des actifs	Pays
TBIP USA 25/07/23	Valeurs du Trésor	3.25%	USA
HASI 3.375% 06/26 144A	Immobilier	1.67%	USA

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>Industrie</i>	24.28%
<i>Consommation discrétionnaire</i>	20.29%
<i>Biens de consommation de base</i>	11.58%
<i>Énergie</i>	10.21%
<i>Services de communication</i>	8.94%
<i>Finance</i>	8.83%
<i>Technologies de l'information</i>	5.22%
<i>Valeurs du Trésor</i>	3.25%
<i>Services aux collectivités</i>	3.00%
<i>Immobilier</i>	2.16%

ABS	1.17%
Forex	0.47%
Santé	0.05%
Liquidités	0.55%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.18% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

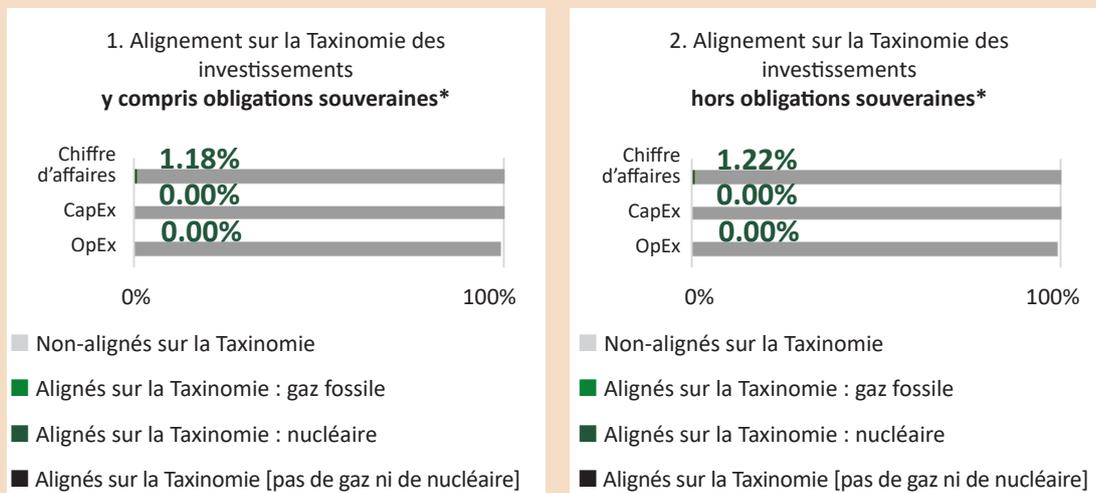

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
 - Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **22.45%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent**

pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS PIONEER US HIGH YIELD BOND

Identifiant d'entité juridique : 5493003QDKL8L48UQW51

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <ul style="list-style-type: none"> <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' 13.08% investissements durables</p> <ul style="list-style-type: none"> <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> ayant un objectif social <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
--	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA US HIGH YIELD INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.22 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.38 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs

importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

Indications complémentaires (non auditées)

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

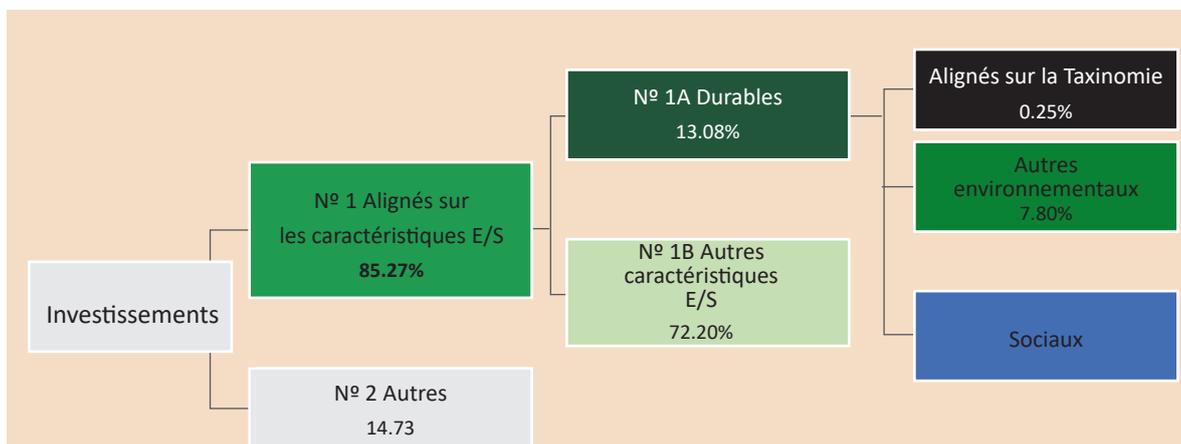

Principaux investissements	Secteur	% des actifs	Pays
BID 7.375% 10/27 144A	Consommation discrétionnaire	1.24%	USA
CHTR 4.75% 02/32 144A	Services de communication	1.17%	USA
DEATIR 8% 02/28 144A	Consommation discrétionnaire	1.09%	USA
SOLEIN 9.75% 11/28 144A	Industrie	1.08%	USA
DKL 6.75% 05/25	Énergie	1.03%	USA
KENGAR 4.875% 09/28 144A	Consommation discrétionnaire	1.03%	USA
F 4% 11/30	Consommation discrétionnaire	1.01%	USA
GALCLD FRN 09/24 144A	Finance	1.00%	CYM
CCO 7.5% 06/29 144A	Services de communication	1.00%	USA

MAGLLC 4.875% 05/29 144A	Consommation discrétionnaire	0.95%	USA

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>Industrie</i>	23.13%
<i>Consommation discrétionnaire</i>	21.29%
<i>Énergie</i>	12.59%
<i>Services de communication</i>	11.01%
<i>Biens de consommation de base</i>	10.45%
<i>Finance</i>	6.01%
<i>Technologies de l'information</i>	3.67%

Services aux collectivités	3.59%
Immobilier	1.41%
Santé	0.84%
Forex	0.17%
Multirisque	0.05%
Autres	-0.14%
Liquidités	5.93%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.25% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

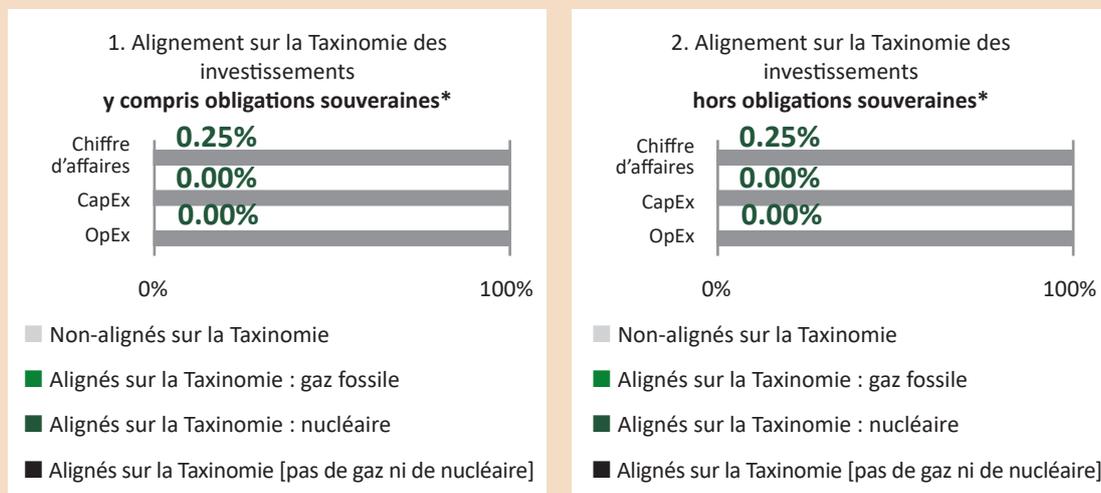

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 7.80% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en

matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EUROPEAN SUBORDINATED BOND ESG

Identifiant d'entité juridique :
2221006F1314ERENWD22

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S)

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' **68.27%** investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG EURO AGGREGATE CORPORATE (E)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.93 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.55 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs

environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

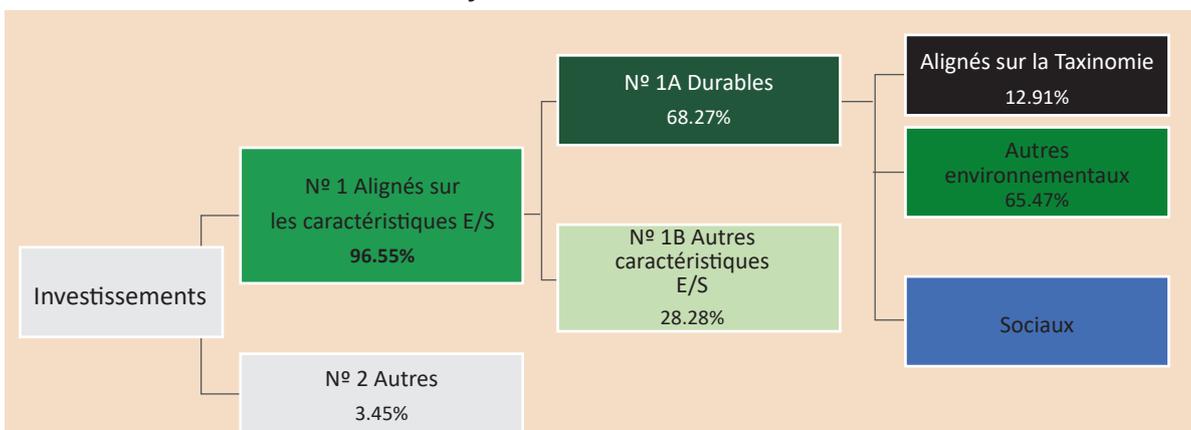

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
AMUNDI EURO LIQUIDITY SRI - Z (C)	Fonds communs de placement	2.87%	FRA
EDF VAR PERP EMTN	Services aux collectivités	2.35%	FRA
BBVASM VAR PERP	Finance	2.00%	ESP

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	72.53%
Énergie	8.92%
Services aux collectivités	7.76%
Fonds communs de placement	4.46%
Services de communication	3.61%

<i>Industrie</i>	1.77%
<i>Immobilier</i>	1.54%
<i>Forex</i>	0.15%
<i>Autres</i>	-0.24%
<i>Liquidités</i>	-0.44%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 12.91% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

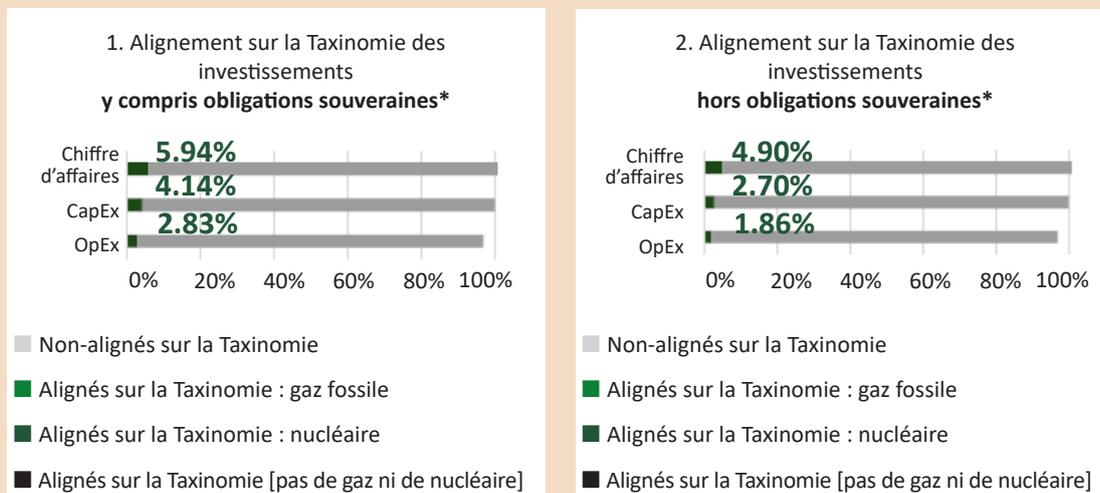

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.42%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 65.47% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent**

pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL AGGREGATE BOND

Identifiant d'entité juridique :
1BXU0IWD1154BQDOY676

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S)

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' **43.14%** investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL + 10% ICE BOFA GLOBAL HIGH YIELD INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.92 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.51 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs

importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

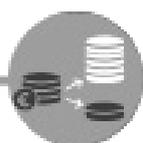

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

Indications complémentaires (non auditées)

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

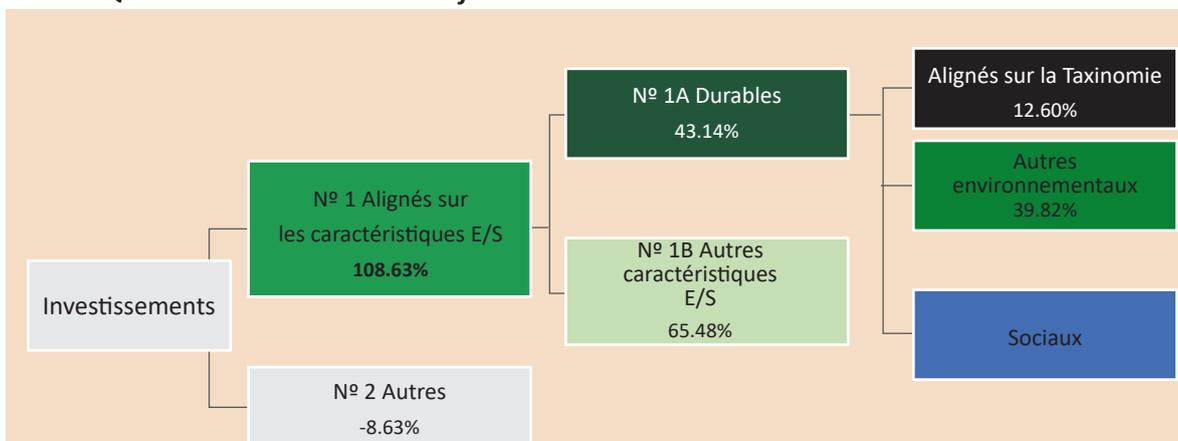

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : **du 01/07/2022 au 30/06/2023**

Principaux investissements	Secteur	% des actifs	Pays
SPAIN 0% 01/27	VALEURS DU TRÉSOR	5.58%	ESP

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
VALEURS DU TRÉSOR	41.46%
Finance	23.79%
Fonds communs de placement	5.27%
ORGANISMES GOUVERNEMENTAUX	3.96%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 12.60% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

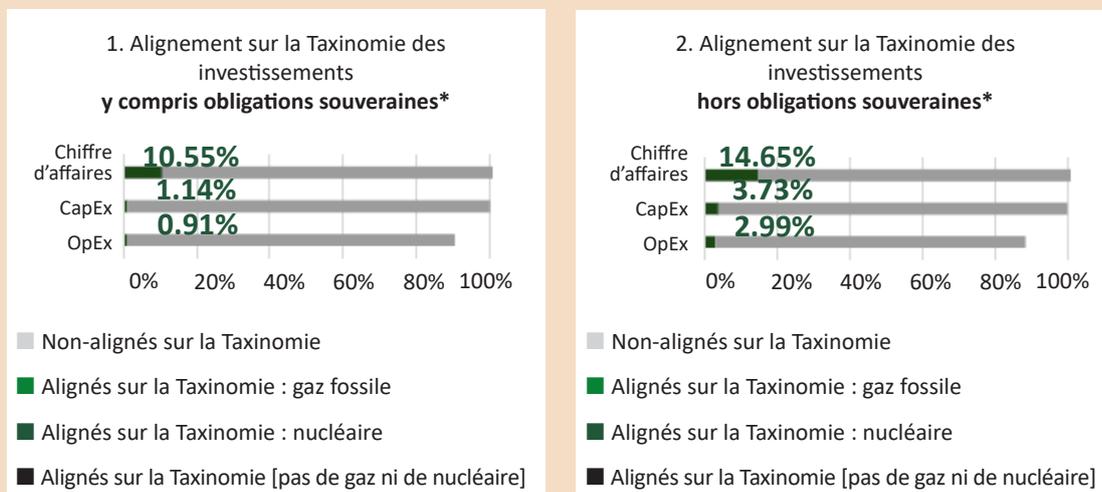

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.13%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **39.82%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS GLOBAL CORPORATE BOND

Identifiant d'entité juridique : XJOH2VT7DMIW80J7DZ04

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <ul style="list-style-type: none"> <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' 43.02% investissements durables</p> <ul style="list-style-type: none"> <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> ayant un objectif social <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
--	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.42 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.03 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs

environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

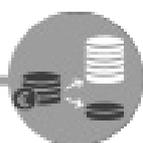

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des

activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

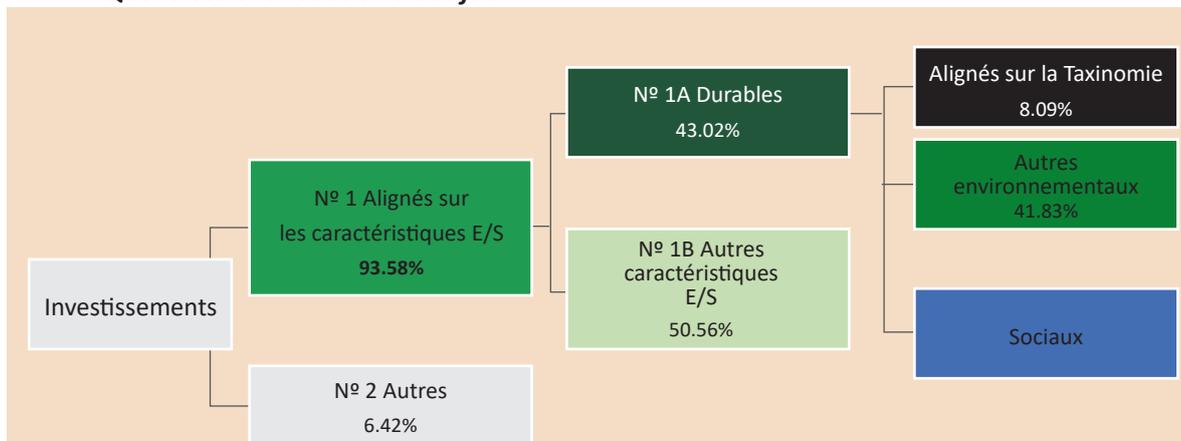

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : **du 01/07/2022 au 30/06/2023**

Quelle était la proportion d'investissements liés à la durabilité ?

● **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>Finance</i>	39.40%
<i>Services de communication</i>	11.04%
<i>Fonds communs de placement</i>	7.95%
<i>Biens de consommation de base</i>	7.38%
<i>Consommation discrétionnaire</i>	6.99%
<i>Services aux collectivités</i>	6.26%

Énergie	5.01%
VALEURS DU TRÉSOR	3.94%
Industrie	3.76%
Technologies de l'information	2.01%
Immobilier	1.74%
Forex	0.41%
Autres	-1.33%
Liquidités	5.39%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 8.09% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

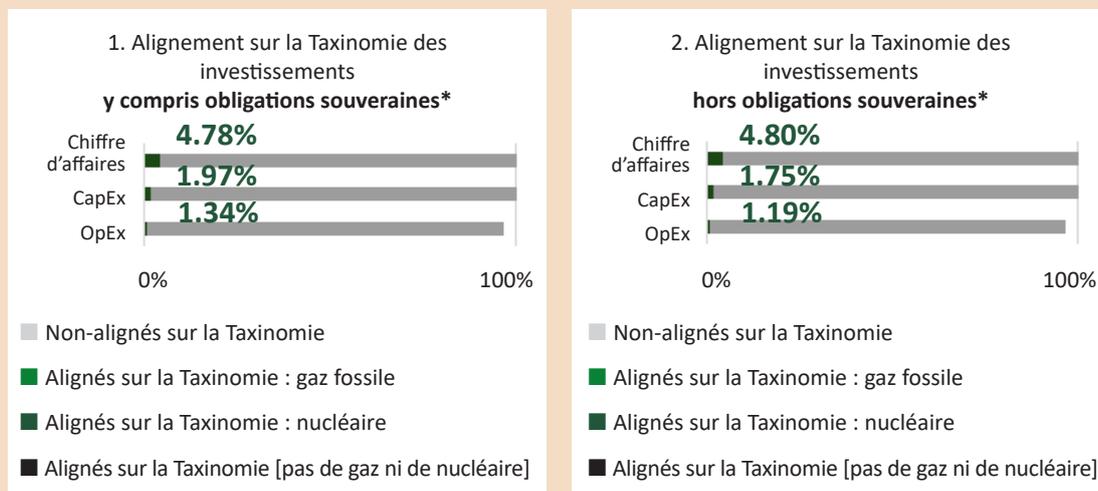

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
 - Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.18%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 41.83% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL CORPORATE ESG IMPROVERS BOND

Identifiant d'entité juridique :
2138002V2U9FP8L55Z17

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S)

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' 57.50% investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - Entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles
 - Exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr)
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Le gestionnaire des investissements a concentré le processus de placement sur les entreprises/secteurs/pays ayant suivi une trajectoire positive en termes de critères ESG au sein de leur activité, ou prévoyant de suivre une telle trajectoire. Le gestionnaire des investissements a identifié des opportunités de placement alignées sur l'objectif de génération d'alpha en se concentrant en particulier sur l'inclusion des entreprises/secteurs/pays qui seront de solides gagnants en termes de critères ESG à l'avenir, qui présentent (ou présenteront) une amélioration favorable du profil ESG, tout en investissant également dans des entreprises/secteurs/pays qui sont actuellement des références en matière d'ESG.

Par ailleurs, le Compartiment a obtenu pour son portefeuille une note ESG qui est supérieure à celle de l'Indice de référence. Le Compartiment a été comparé à la note ESG de son Indice de référence après avoir exclu dudit Indice de référence 20% des titres présentant les notes ESG les plus faibles.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.77 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.03 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau

des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

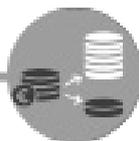

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

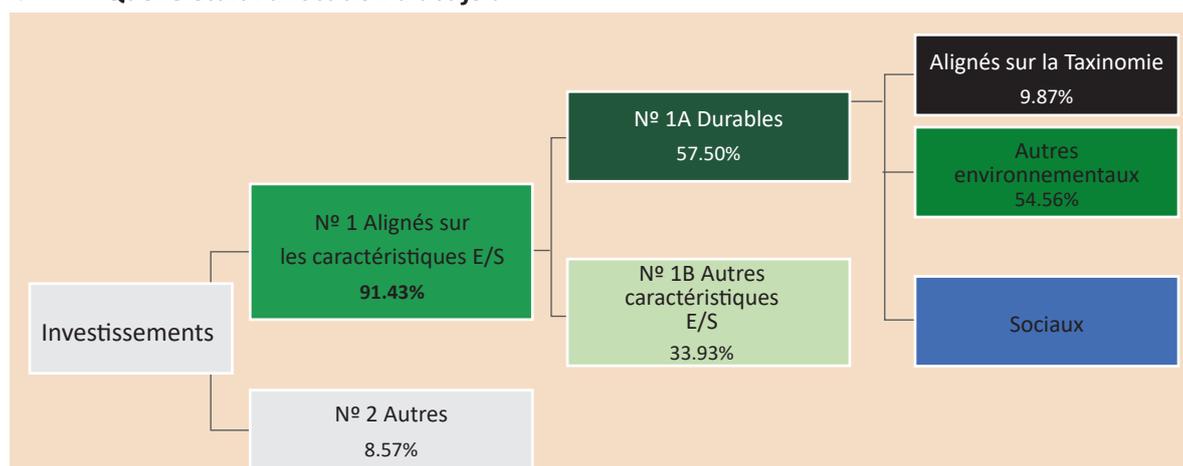

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
ABBV 2.6% 11/24	Biens de consommation de base	1.96%	USA

Quelle était la proportion d'investissements liés à la durabilité ?

Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>Finance</i>	<i>44.62%</i>
<i>Biens de consommation de base</i>	<i>11.32%</i>
<i>Services aux collectivités</i>	<i>9.01%</i>
<i>Services de communication</i>	<i>8.97%</i>
<i>Consommation discrétionnaire</i>	<i>6.41%</i>
<i>Industrie</i>	<i>5.03%</i>
<i>Énergie</i>	<i>3.61%</i>
<i>Immobilier</i>	<i>2.22%</i>
<i>Valeurs du Trésor</i>	<i>1.98%</i>
<i>Technologies de l'information</i>	<i>1.93%</i>
<i>Forex</i>	<i>0.37%</i>
<i>Liquidités</i>	<i>4.33%</i>

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 9.87% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

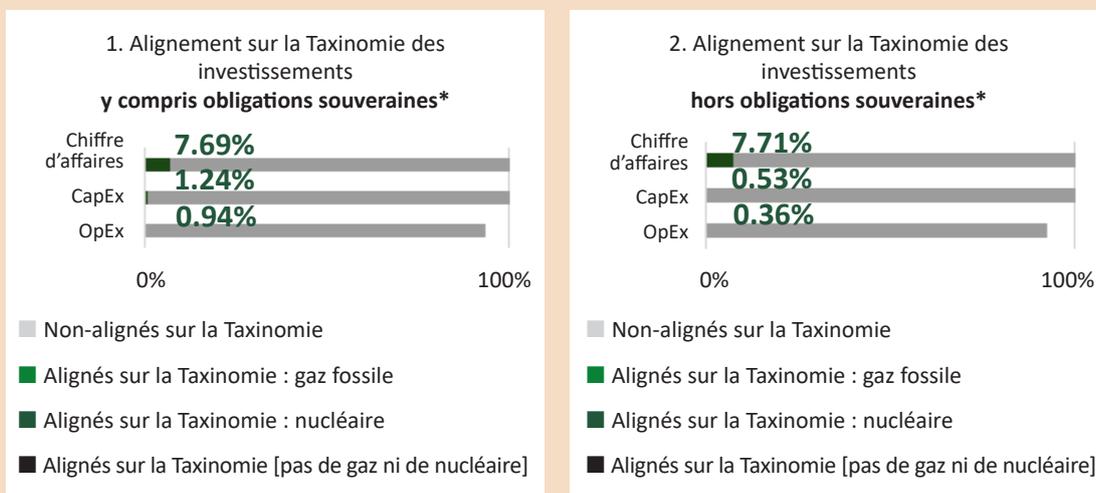

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **54.56%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second

niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS NET
ZERO AMBITION GLOBAL CORPORATE BOND

Identifiant d'entité juridique :
213800ZDJ7583Z2H5G06

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <p><input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' 60.81% investissements durables</p> <p><input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> ayant un objectif social</p> <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales en cherchant à réduire son intensité carbone à travers l'alignement de l'intensité de l'empreinte carbone sur celle de son Indice de référence **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX**.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.52 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.18 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits de l'homme en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **120.64**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **129.04**

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).

- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

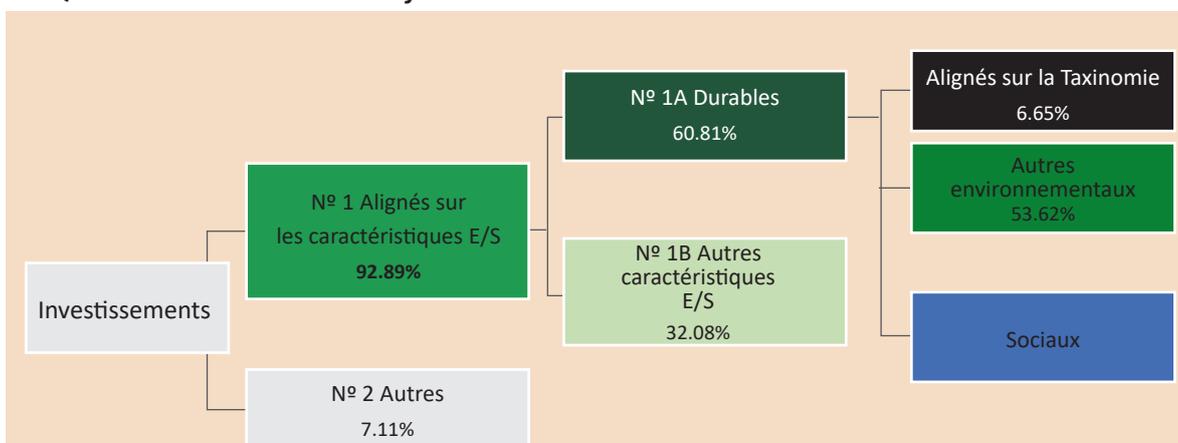

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	37.31%
Biens de consommation de base	14.33%
Services de communication	12.07%
Technologies de l'information	8.50%

Consommation discrétionnaire	8.45%
Industrie	7.13%
Services aux collectivités	5.44%
Immobilier	1.77%
VALEURS DU TRÉSOR	1.50%
Forex	0.54%
Liquidités	3.68%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
 et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 6.65% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

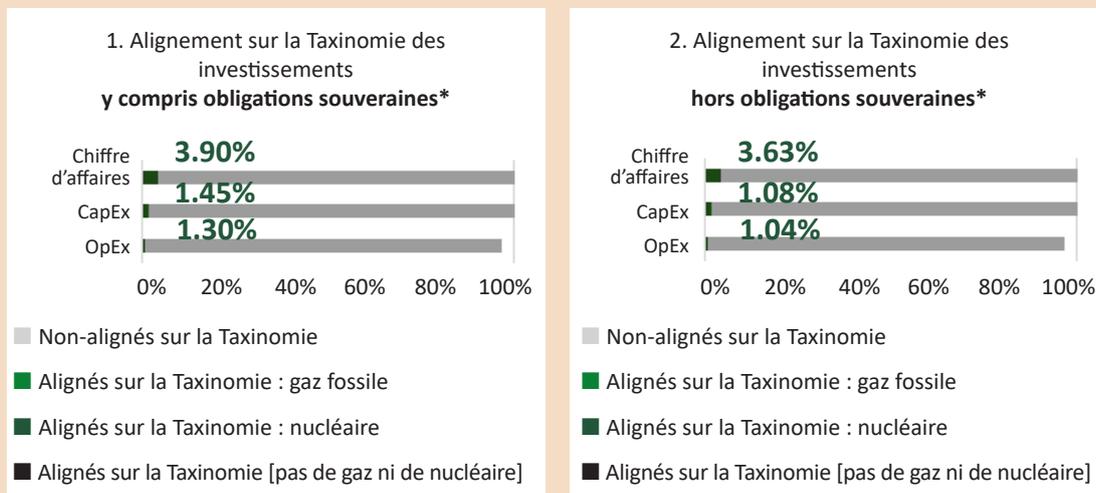

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.08%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 53.62% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la

 sont des investissements durables ayant un objectif environnemental

qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **120.64**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **129.04**

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

● **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI World Climate Paris Aligned Net USD. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **120.64**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **129.04**

● **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Un indice de marché large n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS GLOBAL HIGH YIELD BOND

Identifiant d'entité juridique : 222100AIHPWCQOF6UQ48

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S)

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' **16.49%** investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.10 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.29 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs

importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour

améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

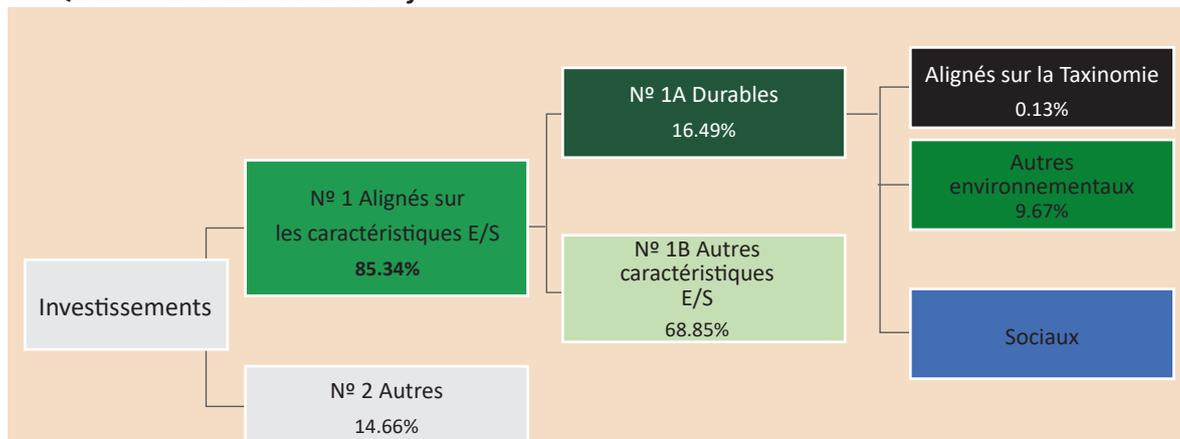

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2022 au 30/06/2023**

Principaux investissements	Secteur	% des actifs	Pays
A-F PIO GL HI YI ESG IMPR BD Z USD	Fonds communs de placement	3.58%	LUX
ABRAGF 11.5 03/02/28 144A	Industrie	1.71%	COL
SIMHBZ 5.2% 01/31 144A	Industrie	1.28%	BRA

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Industrie	24.70%
Consommation discrétionnaire	17.87%
Biens de consommation de base	12.47%
Finance	10.80%
Énergie	10.73%

<i>Services de communication</i>	8.89%
<i>Services aux collectivités</i>	4.57%
<i>Fonds communs de placement</i>	3.58%
<i>Technologies de l'information</i>	3.00%
<i>Forex</i>	1.01%
<i>Immobilier</i>	0.67%
<i>Autres</i>	-0.73%
<i>Liquidités</i>	2.45%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.13% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

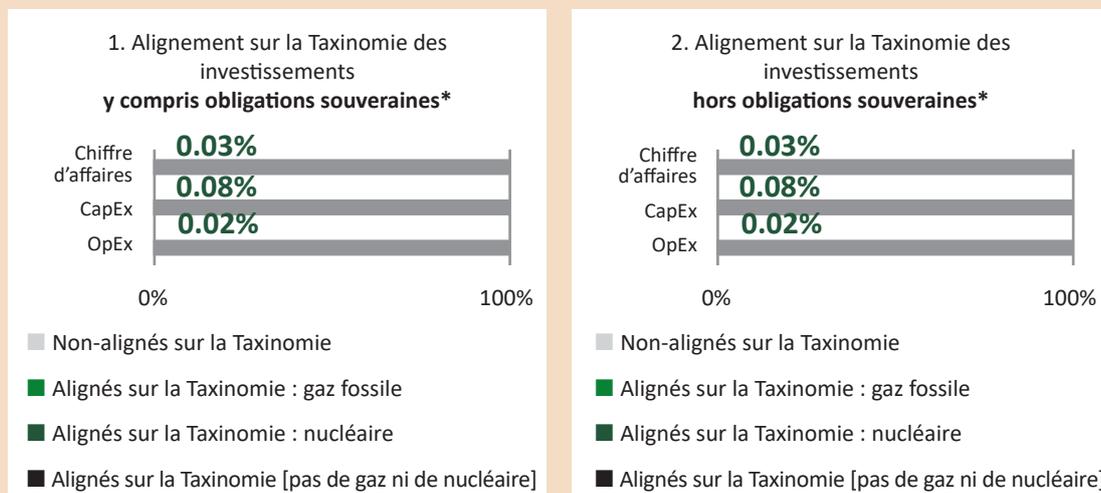

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **9.67%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte**

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS OPTIMAL YIELD

Identifiant d'entité juridique : 549300SEXJO4VZFP0521

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S)

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' **27.43%** investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.09 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de

l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

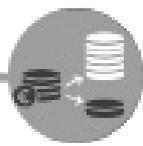

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

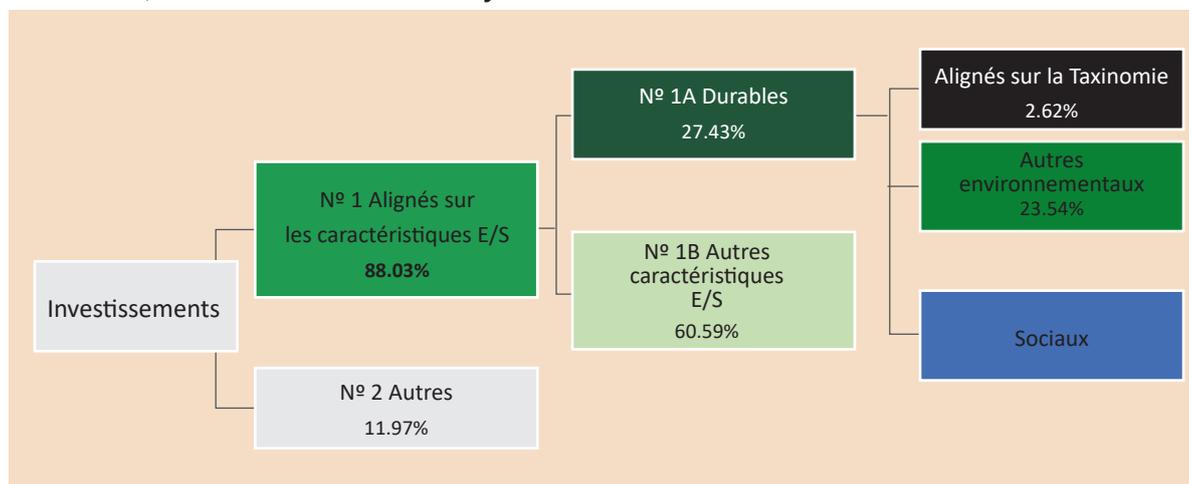

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
AIF - EMG MKT SOVEREIGN BD - H	Fonds communs de placement	4.22%	LUX

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

<i>Secteur</i>	<i>% des actifs</i>
<i>Finance</i>	<i>25.62%</i>
<i>Services de communication</i>	<i>20.27%</i>
<i>Industrie</i>	<i>16.31%</i>
<i>Consommation discrétionnaire</i>	<i>10.91%</i>
<i>Biens de consommation de base</i>	<i>8.74%</i>
<i>Fonds communs de placement</i>	<i>4.22%</i>
<i>Énergie</i>	<i>4.06%</i>
<i>Services aux collectivités</i>	<i>3.96%</i>
<i>TITRES SOUVERAINS</i>	<i>0.98%</i>

<i>Immobilier</i>	0.94%
<i>Technologies de l'information</i>	0.77%
<i>Forex</i>	0.25%
<i>VALEURS DU TRÉSOR</i>	0.00%
<i>Autres</i>	-0.20%
<i>Liquidités</i>	5.25%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.62% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

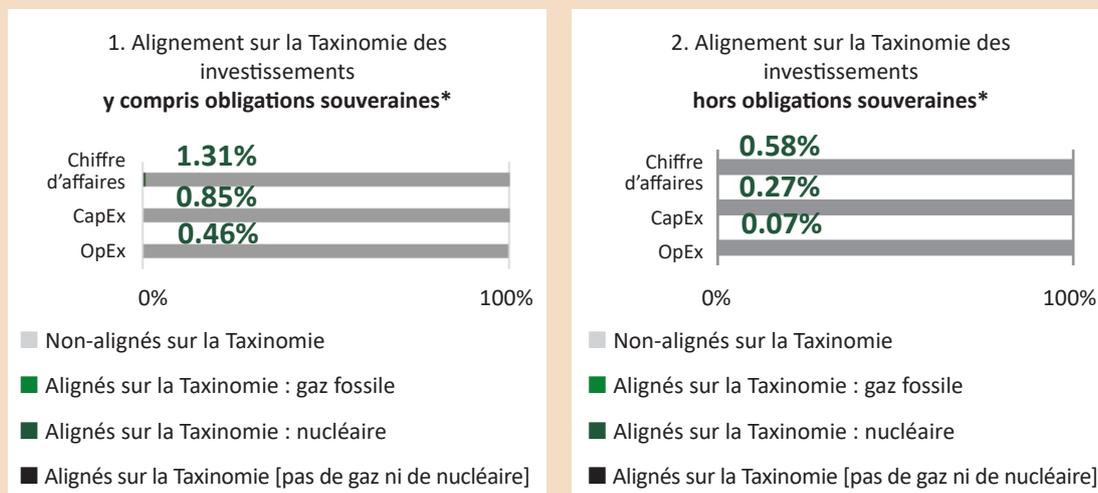

Oui :
 Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **23.54%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte**

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
OPTIMAL YIELD SHORT TERM

Identifiant d'entité juridique :
549300NI6I5JE79M9X21

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <p><input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' 25.63% investissements durables</p> <p><input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> ayant un objectif social</p> <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.17 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements

doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

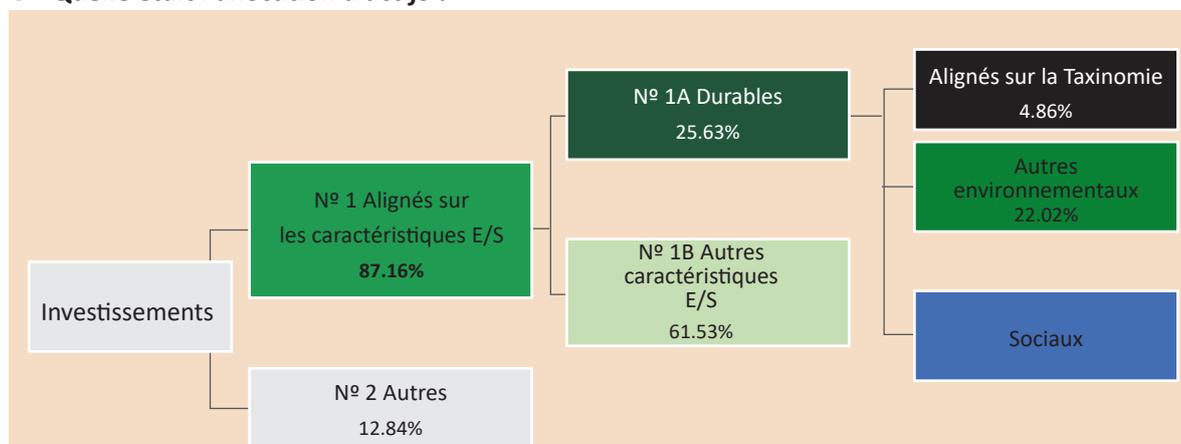

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : **du 01/07/2022 au 30/06/2023**

Principaux investissements	Secteur	% des actifs	Pays
AIF - EMG MKT SOVEREIGN BD - H	Fonds communs de placement	4.11%	LUX
SHAEFF 3.75% 09/26 REGS	Consommation discrétionnaire	2.23%	DEU
UPCB 3.875% 06/29	Services de communication	1.40%	NLD
BERY 1% 01/25 REGS	Industrie	1.39%	USA
AT&T VAR PERP B	Services de communication	1.13%	USA
SOFTBK 4% 07/26	Services de communication	1.12%	JPN
ALTICE 2.25% 01/25 REGS	Services de communication	1.10%	LUX
VKFP 8.5% 06/26 REGS	Industrie	1.07%	FRA

SFRFP 2.125% 02/25 REGS	Services de communication	0.93%	FRA

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	30.83%
Industrie	15.25%
Services de communication	14.97%
Consommation discrétionnaire	12.75%
Biens de consommation de base	7.36%

<i>Énergie</i>	6.48%
<i>Fonds communs de placement</i>	4.11%
<i>Services aux collectivités</i>	2.76%
<i>Immobilier</i>	1.22%
<i>Technologies de l'information</i>	0.57%
<i>TITRES SOUVERAINS</i>	0.40%
<i>AUTORITÉS_LOCALES</i>	0.34%
<i>Forex</i>	0.25%
<i>Autres</i>	-0.21%
<i>Liquidités</i>	5.22%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 4.86% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

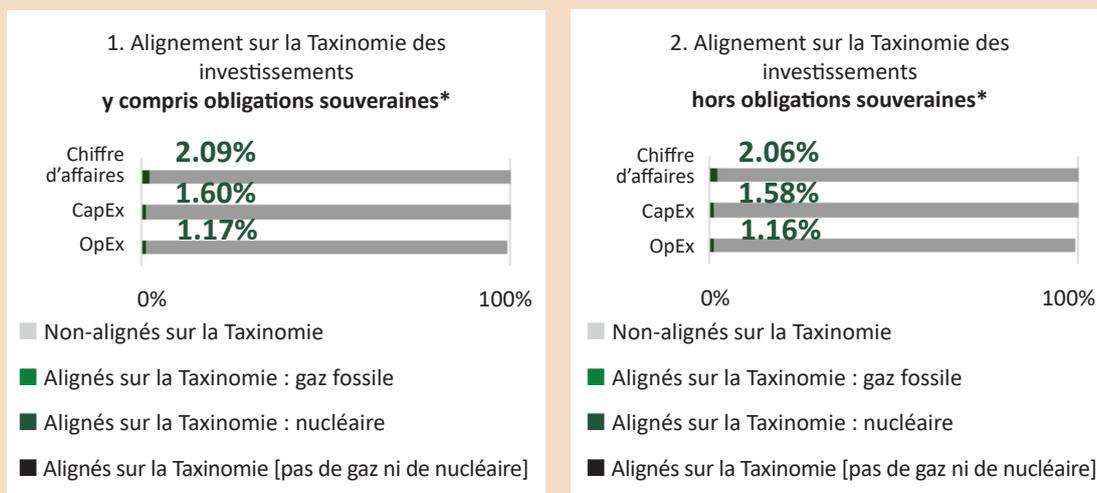

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.25%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **22.02%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Indications complémentaires (non auditées)

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS PIONEER STRATEGIC INCOME

Identifiant d'entité juridique : 5493004ZTK6D21CGCO05

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <p><input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' 12.51% investissements durables</p> <p><input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> ayant un objectif social</p> <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG US UNIVERSAL**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.53 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.38 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs

environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

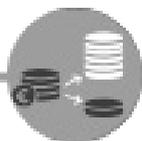

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

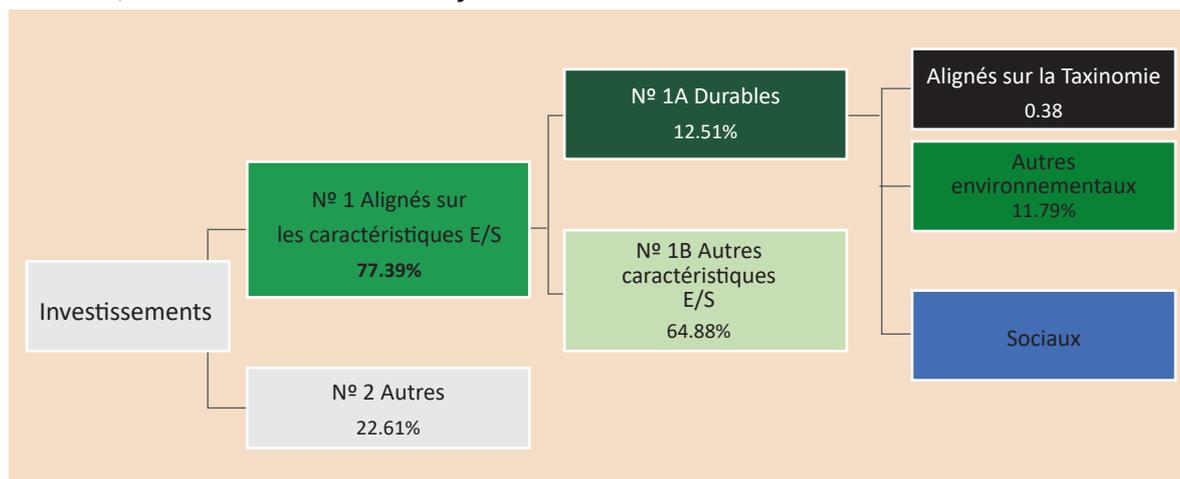

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
US TSY 3% 02/48	VALEURS DU TRÉSOR	6.81%	USA

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>VALEURS DU TRÉSOR</i>	22.56%
<i>SECURITIZED</i>	16.38%
<i>Finance</i>	13.68%
<i>ABS</i>	5.74%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.38% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

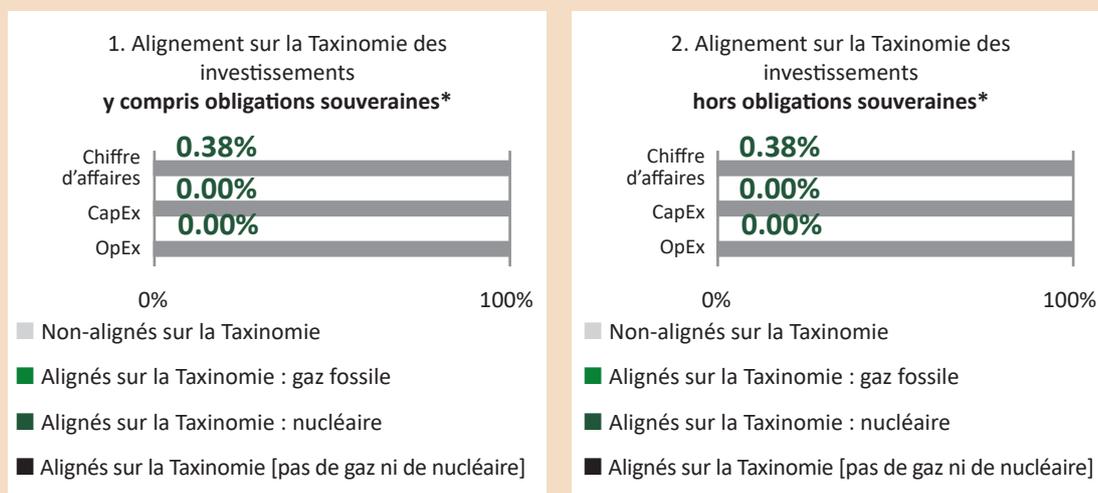

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

 **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **11.79%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période

 **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

 **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUND NET
ZERO AMBITION PIONEER US CORPORATE BOND

Identifiant d'entité juridique :
213800VWP1P2KAFPEU55

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des caractéristiques **environnementales/sociales (E/S)**

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' **35.08%** investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales en cherchant à réduire son intensité carbone à travers l'alignement de l'intensité de l'empreinte carbone sur celle de son Indice de référence **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND**.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.29 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.07 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **67.04**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **90.46**

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

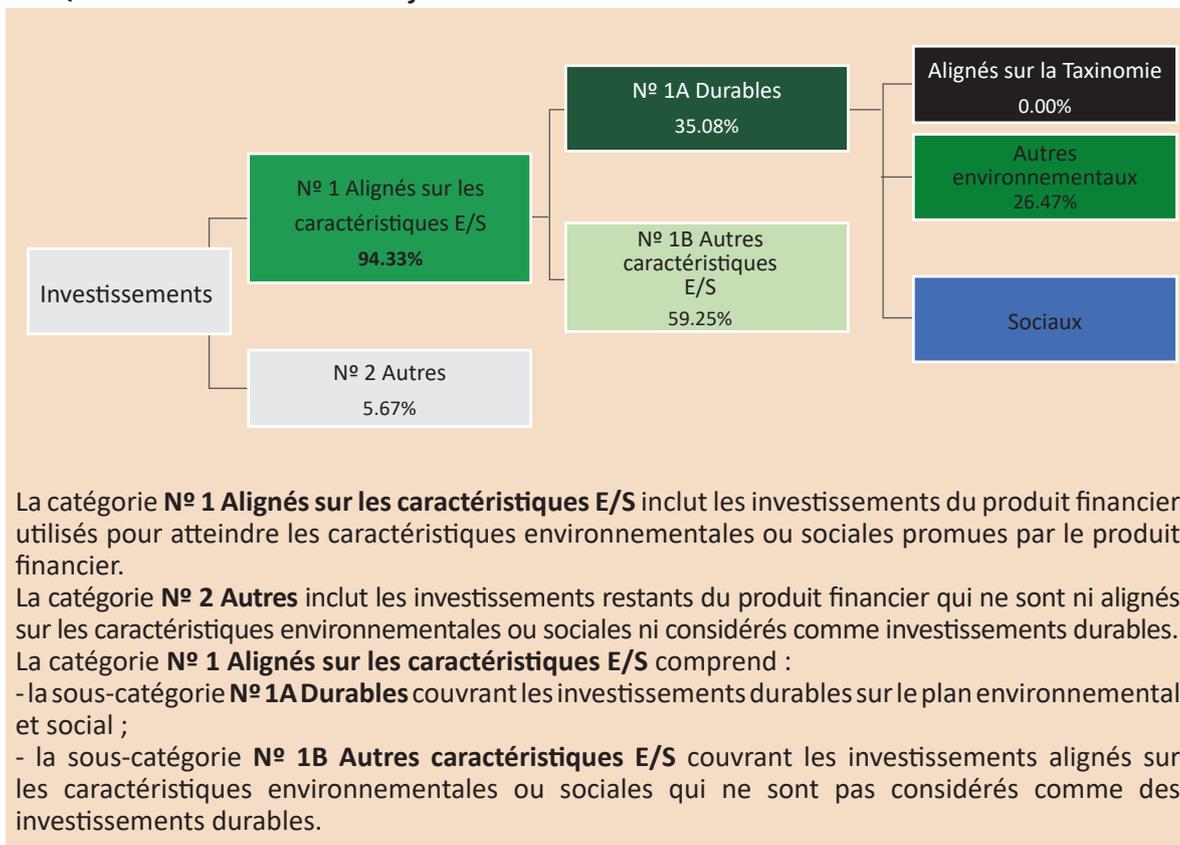

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : **du 01/07/2022 au 30/06/2023**

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement

(CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation

(OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

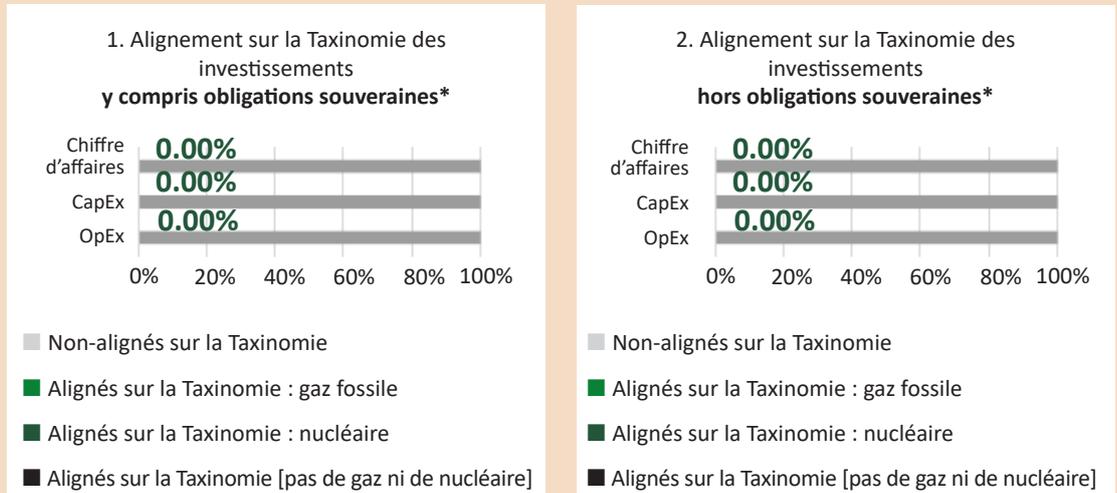

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **26.47%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

● En quoi l'indice de référence diffère-t-il de l'indice du marché général ?

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

● Quelle a été la performance de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 67.04
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 90.46

● **Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?**

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI World Climate Paris Aligned Net USD. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 67.04
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 90.46

● **Quelles ont été les performances de ce produit financier par rapport à l'indice de marché large ?**

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS PIONEER US BOND

Identifiant d'entité juridique :
5493005LBJJ6BWRENA39

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **X** **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <ul style="list-style-type: none"> <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de 12.64% d'investissements durables</p> <ul style="list-style-type: none"> <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> ayant un objectif social <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
--	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG US AGGREGATE**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.60 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.49 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le

cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

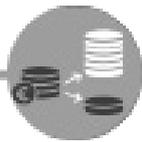

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

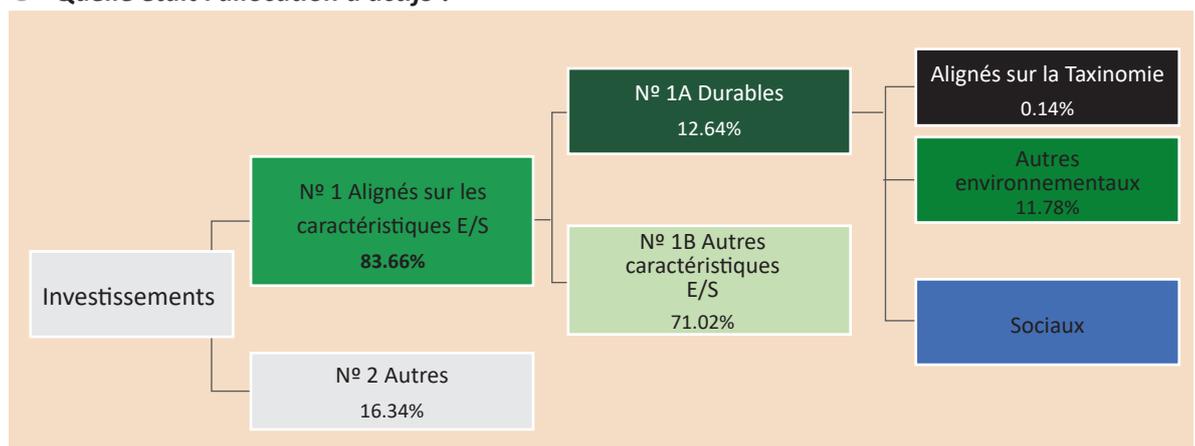

la liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2022 au 30/06/2023**

Quelle était la proportion d'investissements liés à la durabilité ?

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

<i>Secteur</i>	<i>% des actifs</i>

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.14% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?**

Oui :

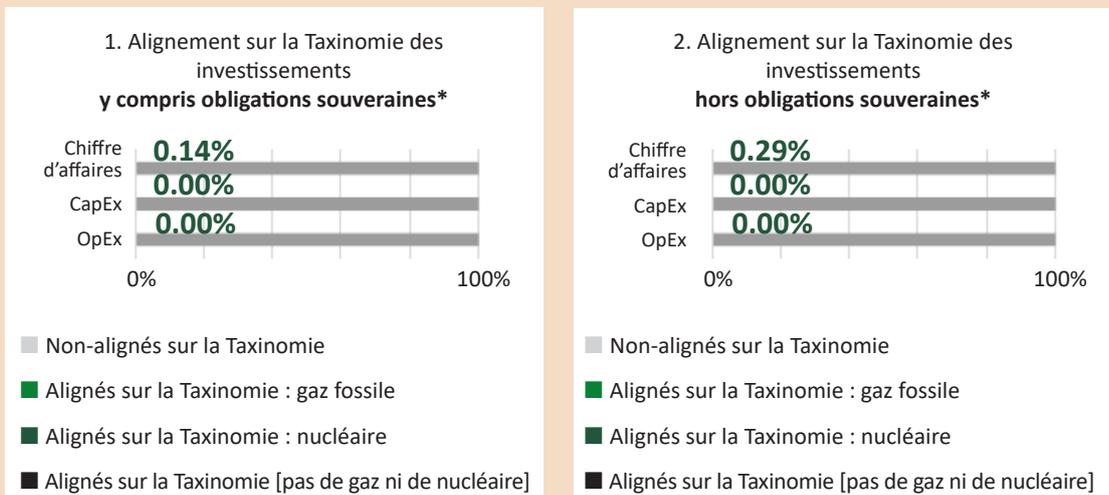

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **11.78%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
PIONEER US CORPORATE BOND

Identifiant d'entité juridique :
222100LE431F865A4S54

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <ul style="list-style-type: none"> <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de 32.10% d'investissements durables</p> <ul style="list-style-type: none"> <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> ayant un objectif social <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
--	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG US CORPORATE INVESTMENT GRADE**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - Entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles
 - Exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr)
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.17 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.24 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits

humains
et à la lutte contre
la corruption et les
actes de corruption.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- **Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?**

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

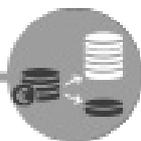

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

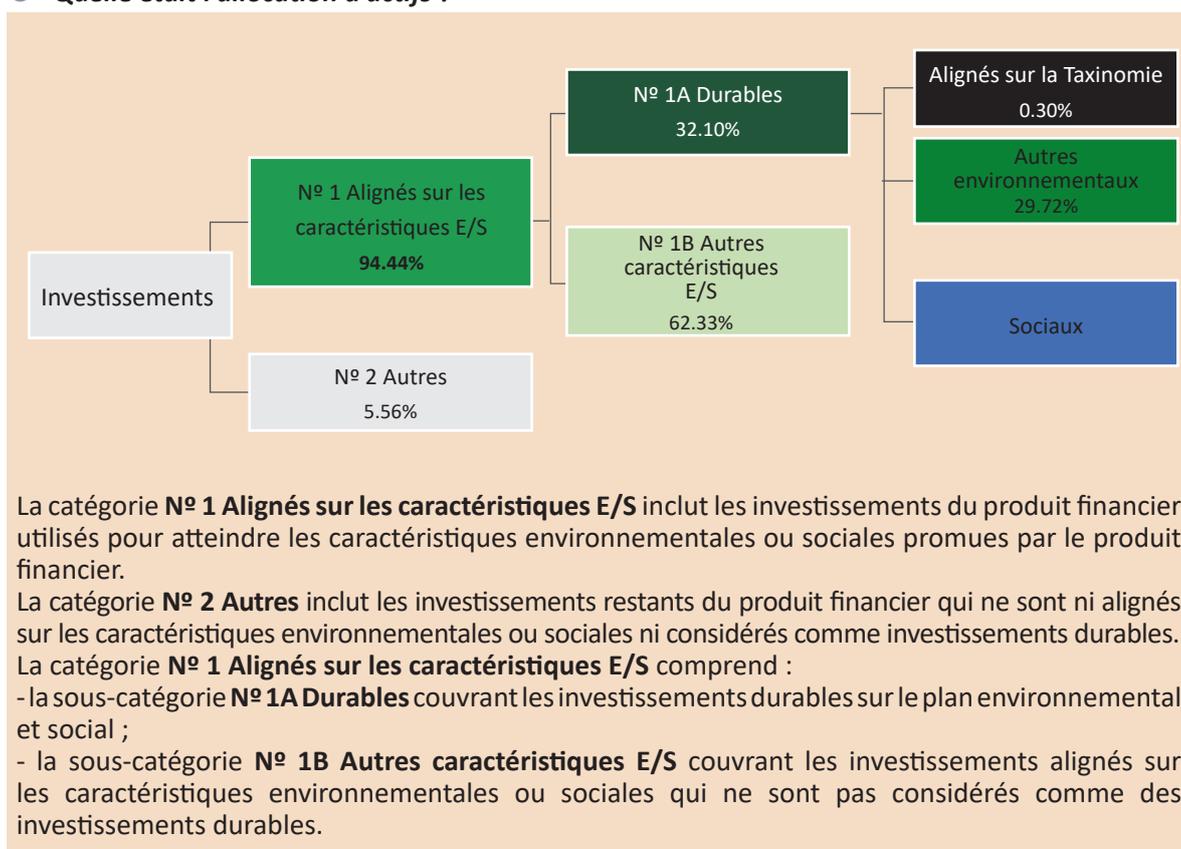

Principaux investissements	Secteur	% des actifs	Pays
US TSY 3.625% 05/28	VALEURS DU TRÉSOR	1.77%	USA

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	45.79%
Industrie	10.13%

<i>Énergie</i>	7.28%
<i>Services aux collectivités</i>	6.86%
<i>Consommation discrétionnaire</i>	5.84%
<i>VALEURS DU TRÉSOR</i>	5.59%
<i>Biens de consommation de base</i>	5.20%
<i>Immobilier</i>	4.60%
<i>Services de communication</i>	4.07%
<i>Technologies de l'information</i>	2.76%
<i>Forex</i>	0.65%
<i>Autres</i>	-0.11%
<i>Liquidités</i>	1.20%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :
- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.30% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

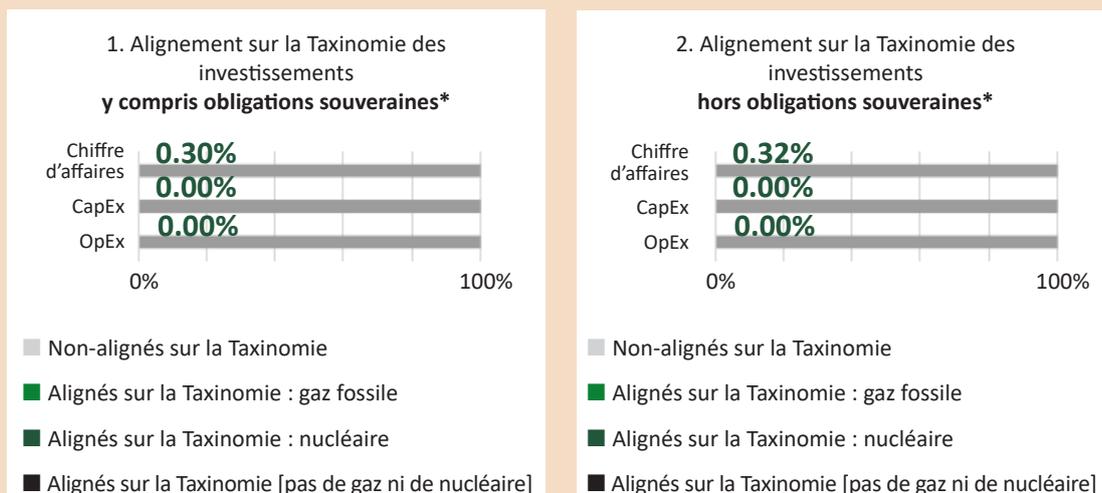

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

 sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **29.72%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS PIONEER US SHORT TERM BOND

Identifiant d'entité juridique : 549300QBCEQZSOFGDW23

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **16.16%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.29 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le

cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

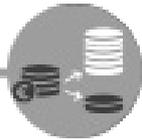

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

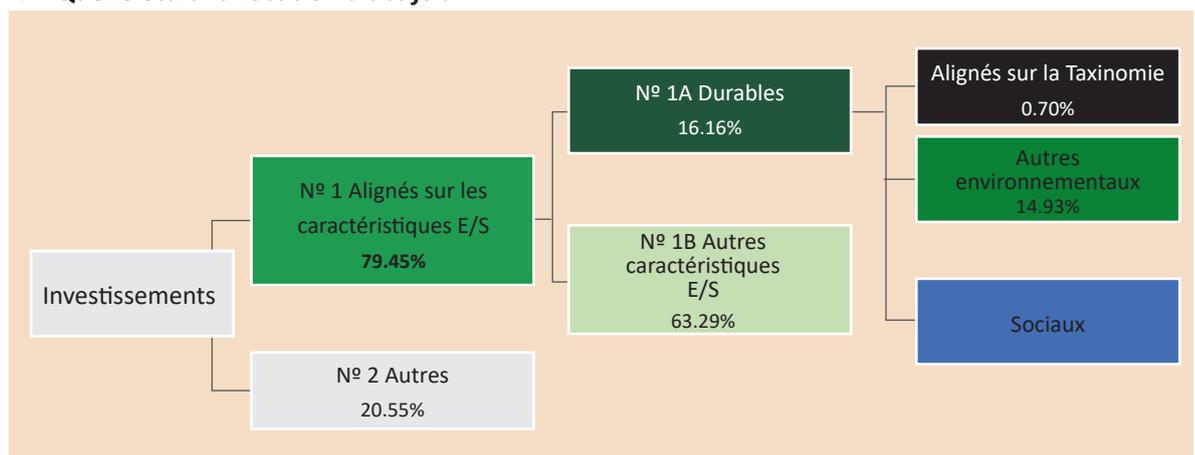

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
FHLB FRN 08/23	ORGANISMES GOUVERNEMENTAUX	3.42%	USA

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

<i>Secteur</i>	<i>% des actifs</i>
<i>Finance</i>	<i>31.30%</i>
<i>ABS</i>	<i>15.86%</i>
<i>ORGANISMES GOUVERNEMENTAUX</i>	<i>15.79%</i>

<i>Pandémie</i>	0.11%
<i>Forex</i>	-0.00%
<i>Liquidités</i>	5.69%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.70% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

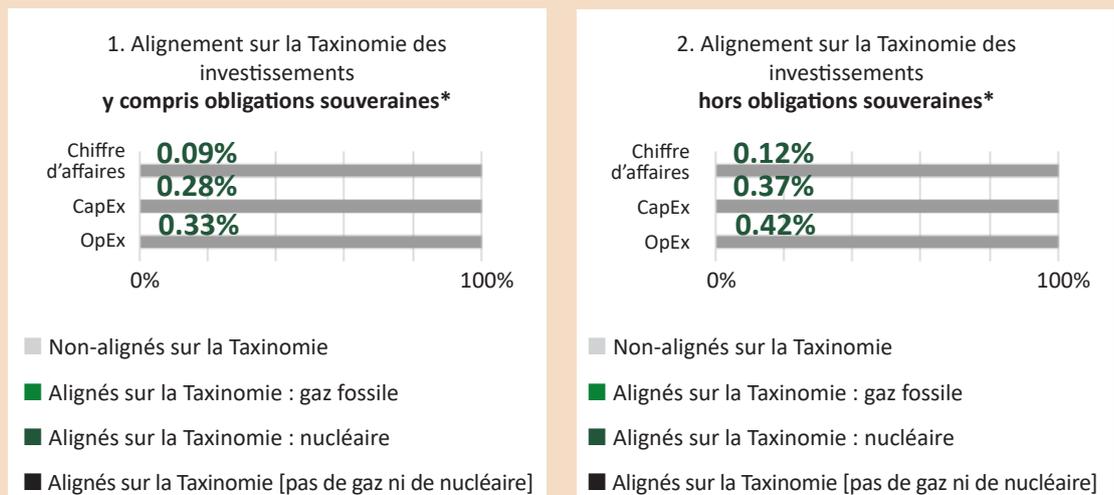

- Oui :
 - Dans le gaz fossile Dans l'énergie nucléaire
- Non

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

² Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **14.93%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le

Indications complémentaires (non auditées)

produit financier
réalise les
caractéristiques
environnementales
et/ou sociales qu'il
promeut.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS BLENDED BOND

Identifiant d'entité juridique :
222100ABBJBM1BE8222

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **10.62%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.03 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.16 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux

et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

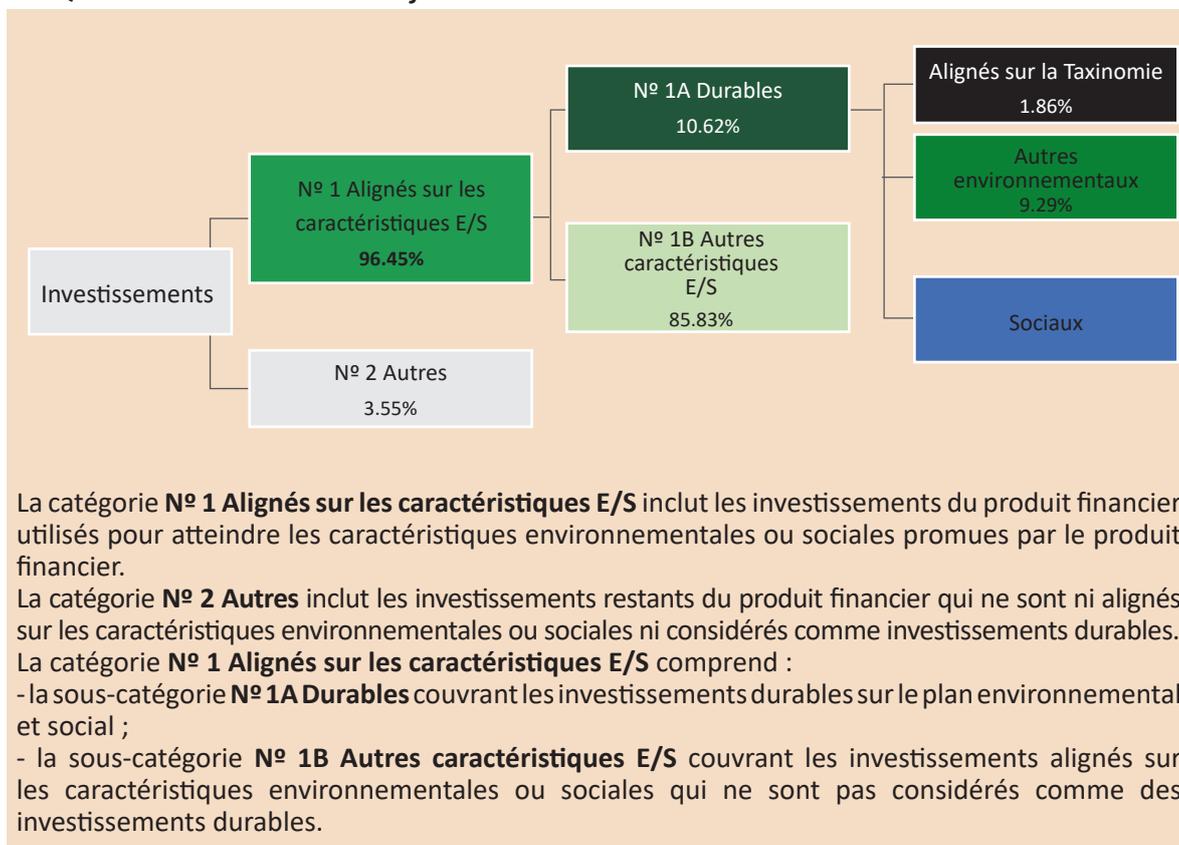

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

<i>Immobilier</i>	0.04%
<i>Autres</i>	-2.15%
<i>Liquidités</i>	1.77%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire

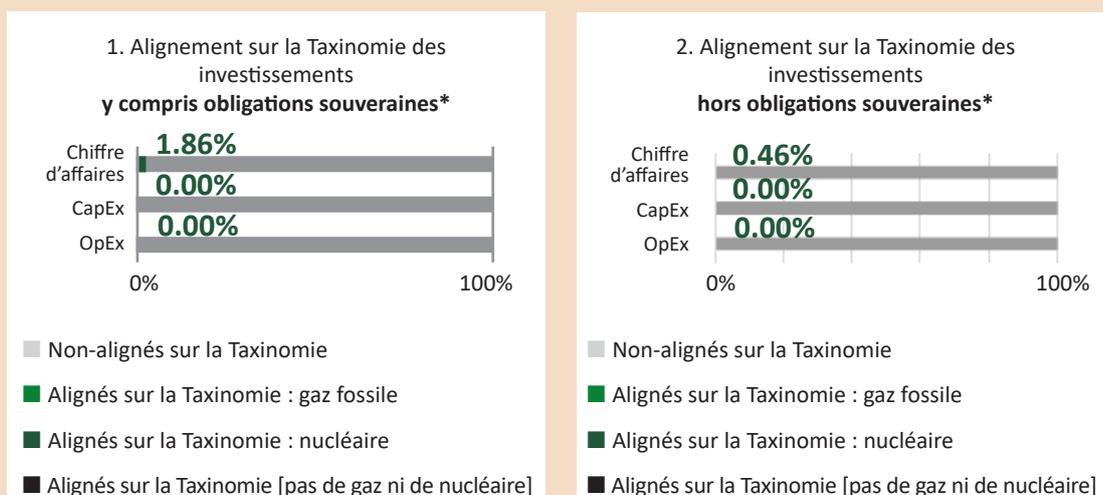

Non

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **9.29%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS BOND

Identifiant d'entité juridique : 549300KZW6KQ7WLJO866

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **9.70%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **50% JPM EMBI GLOBAL DIVERSIFIED COMPOSITE + 50% JP MORGAN CEMBI BROAD DIVERSIFIED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.11 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.17 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux

et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

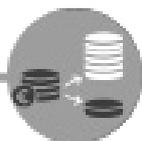

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de

référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

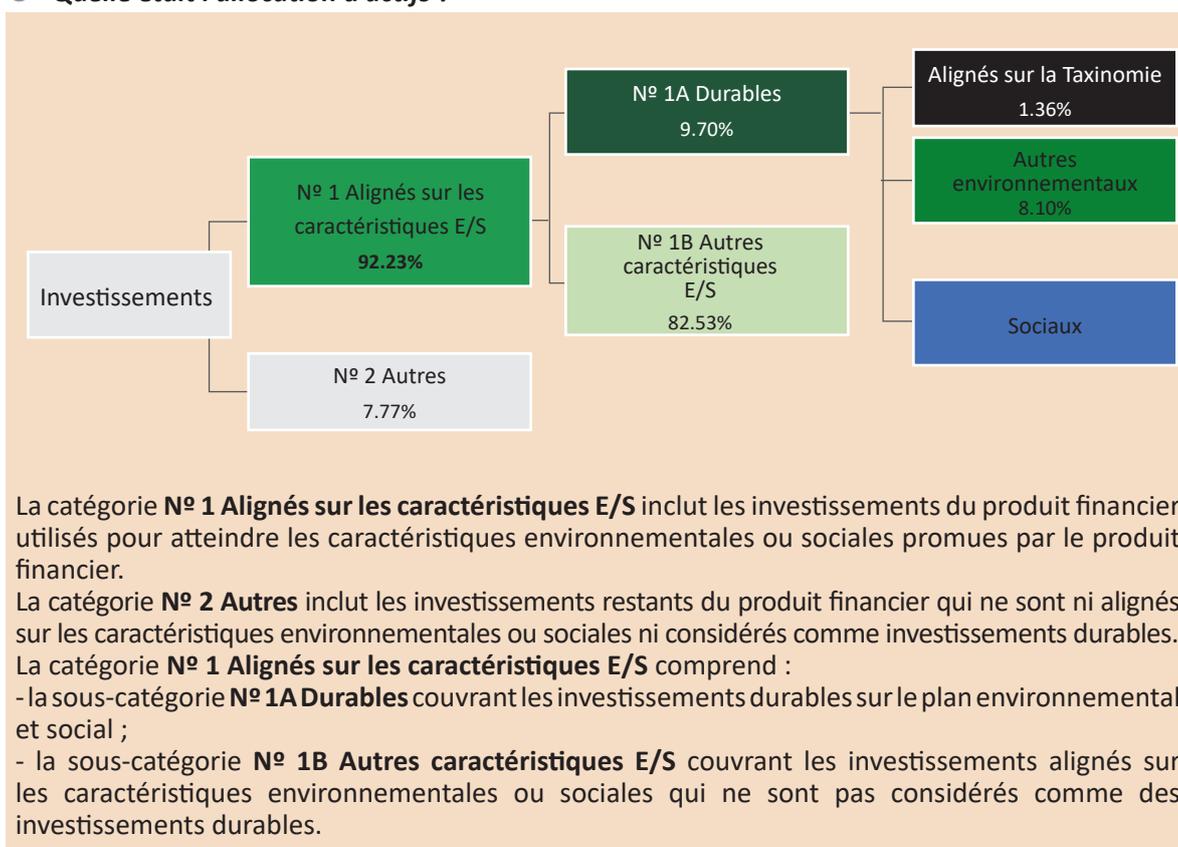

la liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2022 au 30/06/2023**

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.36% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

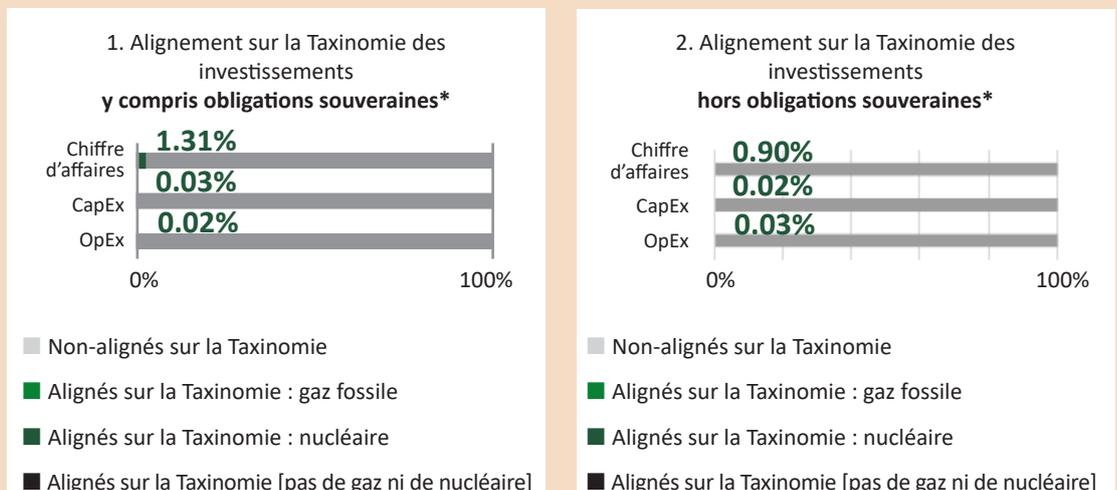

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

 **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **8.10%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

 **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS CORPORATE BOND

Identifiant d'entité juridique :
529900YJOJ3E3FRQQ325

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a **promu des caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **20.92%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN CEMBI BROAD DIVERSIFIED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.11 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.17 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être

considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

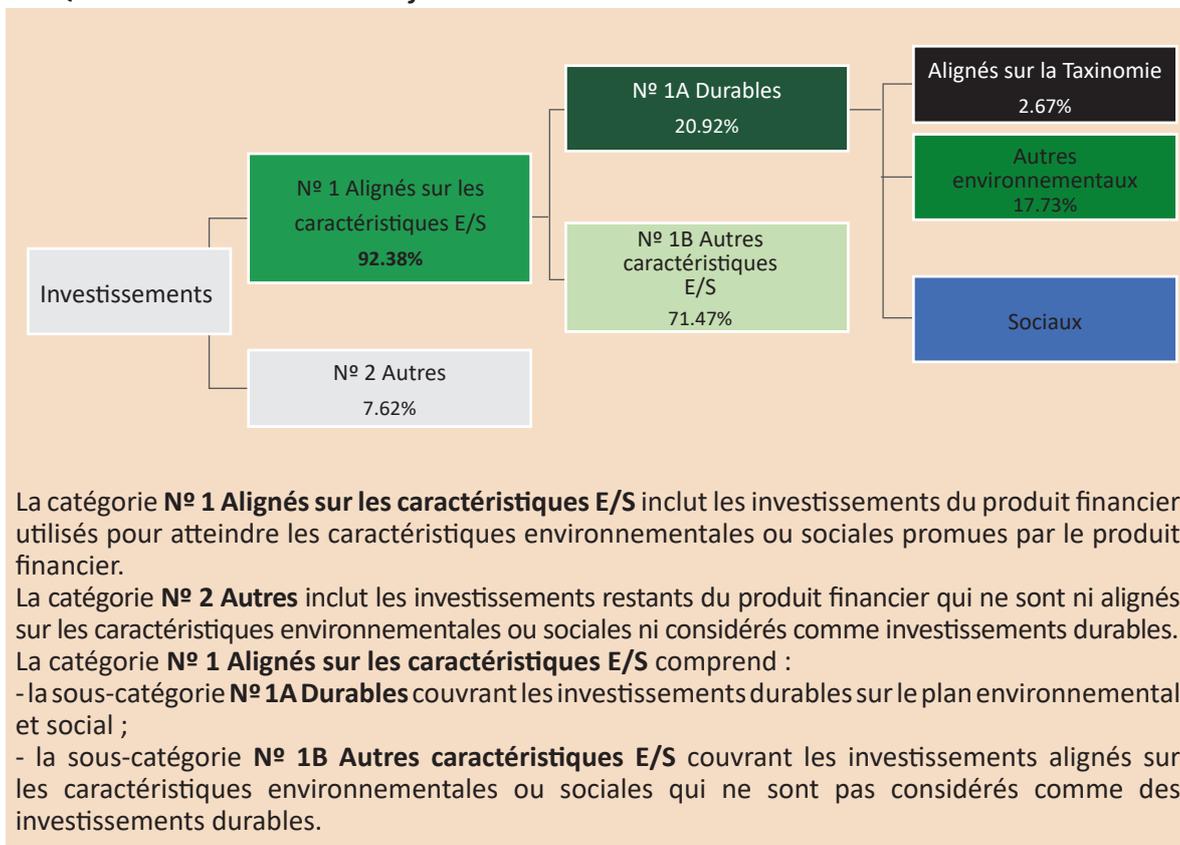

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du 01/07/2022 au 30/06/2023

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	27.46%
Industrie	15.29%
Énergie	12.06%
Services de communication	10.26%
Consommation discrétionnaire	8.38%
Technologies de l'information	5.85%

<i>Fonds communs de placement</i>	5.63%
<i>TITRES SOUVERAINS</i>	5.18%
<i>Services aux collectivités</i>	4.21%
<i>TITRES SUPRANATIONAUX</i>	1.90%
<i>VALEURS DU TRÉSOR</i>	1.18%
<i>Forex</i>	0.37%
<i>ORGANISMES GOUVERNEMENTAUX</i>	0.29%
<i>Immobilier</i>	0.26%
<i>Technologies de l'information</i>	0.24%
<i>Autres</i>	0.00%
<i>Liquidités</i>	1.41%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.67% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

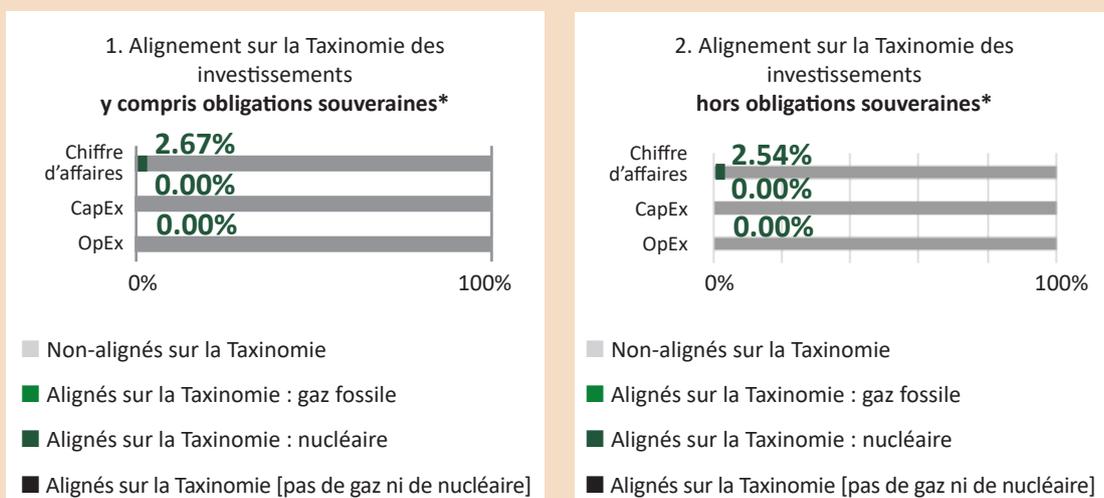

Non

vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **17.73%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Indications complémentaires (non auditées)

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS GREEN BOND

Identifiant d'entité juridique :
2138001AOC3QUTY9SA42

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **59.87%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN CEMBI BROAD DIVERSIFIED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Le compartiment a maintenu la part prévue de son allocation investie dans l'utilisation d'obligations vertes.

L'objectif des obligations vertes consiste à financer les projets qui génèrent un impact sur l'environnement positif et quantifiable. L'indicateur clé mesurant l'impact des obligations vertes est le nombre de « Tonnes d'émissions de CO2 évitées par million d'euros investis en un an ». Au-delà de l'analyse financière quantitative et qualitative des obligations susceptibles de composer le portefeuille, le processus de sélection inclut une évaluation de la stratégie ESG au niveau de l'émetteur et une évaluation des obligations vertes suivant plusieurs points d'analyse :

1. Amundi a mis au point un système de notation ESG exclusif reposant sur une échelle de 7 lettres allant de A à G, où A correspond à la meilleure notation et G à la moins bonne notation. Tout émetteur assorti de la note G est exclu de tous les portefeuilles d'Amundi faisant l'objet d'une gestion active. Nous vérifions la notation ESG de l'émetteur et surveillons la conformité de la notation aux critères associés du fonds. Comme indiqué ci-dessus, les émetteurs ayant reçu la note G selon l'échelle de notation ESG d'Amundi ne sont pas éligibles à l'investissement. S'il existe des points faibles, l'équipe ESG Research effectuera une recherche de controverse plus détaillée concernant le pilier associé (E, S ou G).
2. L'évaluation des obligations vertes selon les critères suivants : (i) analyse du projet, via l'analyse de l'emplacement géographique des actifs, action sur les actifs, évaluation de tout impact supplémentaire du projet vert sur l'environnement, la biodiversité, les communautés locales ou autres aspects sociaux (principe consistant à « ne pas causer de préjudice important »), alignement sur les normes du secteur (par ex. alignement sur les principes des obligations vertes de l'International Capital Markets Association, l'initiative pour les obligations climat Climate Bond Initiative, la taxinomie de l'UE) ; (ii) analyse de l'émetteur aux niveaux de la stratégie ESG globale et de la controverse ; (iii) logique du financement vert (type de projets financés, allocation d'actifs verts, type d'instruments finançant les projets verts) ; et (iv) transparence (rapport sur les obligations vertes, existence d'évaluation par seconde partie)
3. La surveillance continue (investissement ex post), qui inclut la révision régulière de l'allocation, un rapport d'impact des obligations vertes, les controverses dans lesquelles l'émetteur est impliqué et la stratégie environnementale de l'émetteur.

Enfin, toutes les obligations vertes sélectionnées doivent respecter les critères et recommandations des principes des obligations vertes telles que publiées par l'International Capital Market Association. Veuillez consulter la Politique d'investissement responsable d'Amundi pour plus de renseignements sur ce qui précède.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● *Quelle performance ont affichée les indicateurs de durabilité ?*

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.12 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.17 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.

- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

À la fin de la période, le portefeuille détient **85.42%** d'obligations vertes.

● ***et par rapport aux périodes précédentes ?***

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● ***Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?***

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales,

sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

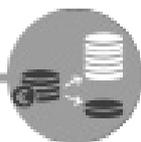

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>Finance</i>	37.31%
<i>Services aux collectivités</i>	26.41%
<i>Industrie</i>	14.05%
<i>Biens de consommation de base</i>	3.16%
<i>Fonds communs de placement</i>	2.64%

Forex	0.91%
VALEURS DU TRÉSOR	0.16%
ORGANISMES GOUVERNEMENTAUX	0.08%
Liquidités	3.90%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 37.21% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

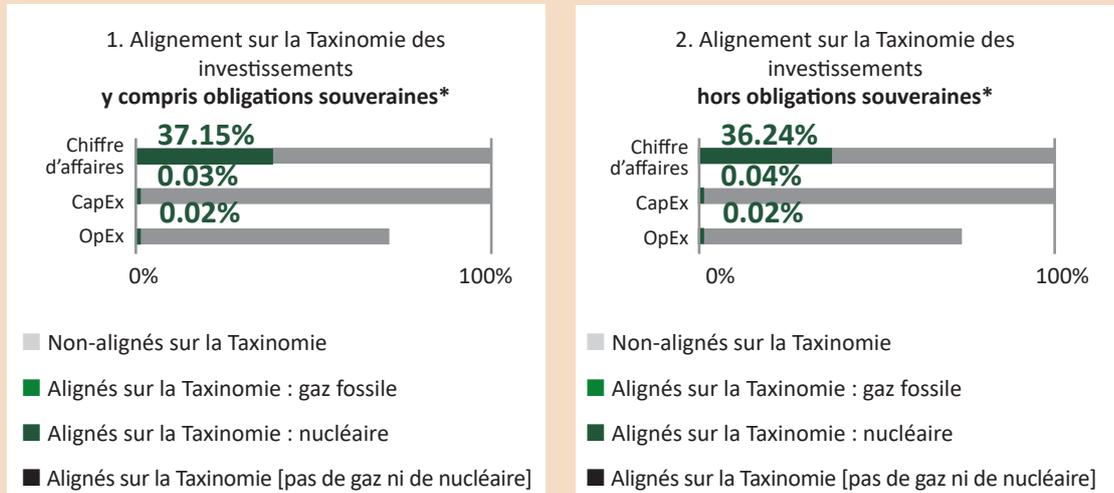

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

 **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **59.87%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS CORPORATE
HIGH YIELD BOND

Identifiant d'entité juridique :
5493006QGDCMTW9Y1N50

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <ul style="list-style-type: none"> <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de 16.67% d'investissements durables</p> <ul style="list-style-type: none"> <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> ayant un objectif social <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
--	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.04 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.18 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements

doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

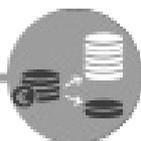

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

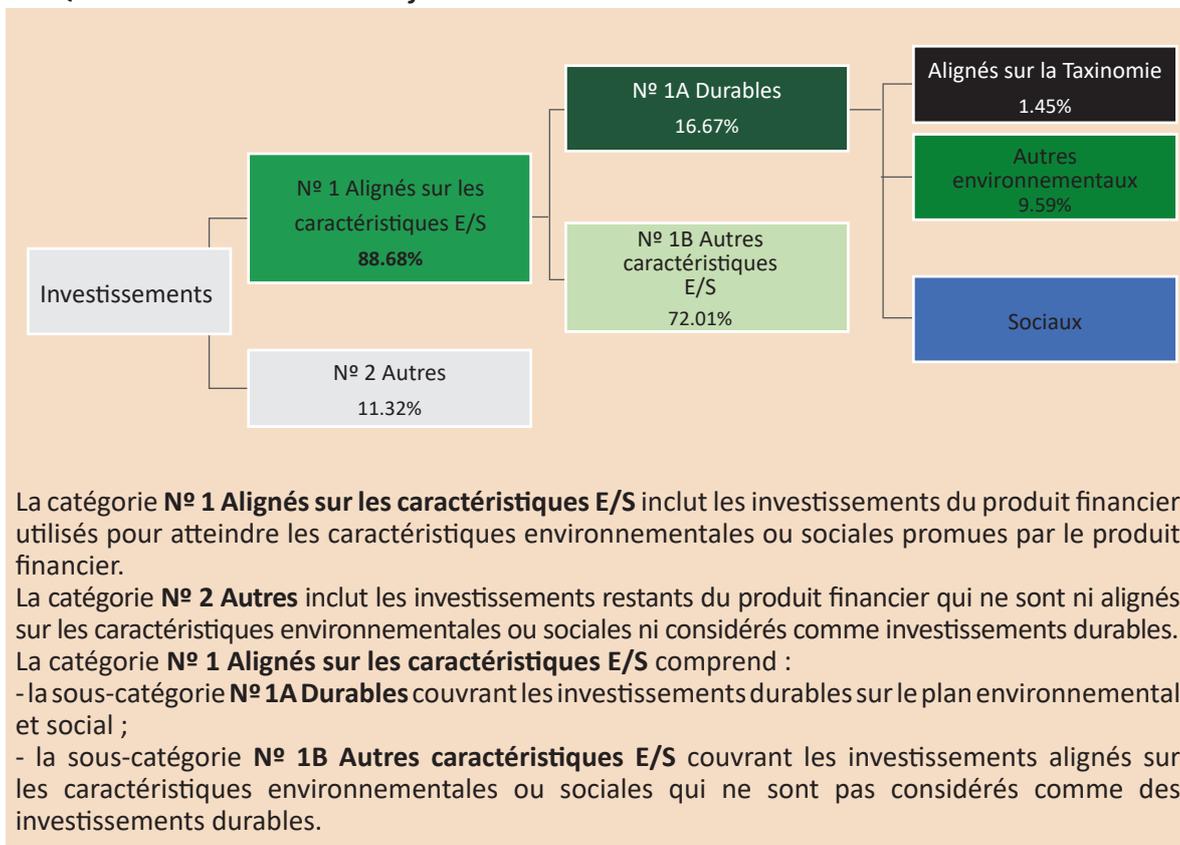

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
SANLTD 4.3% 01/26	Consommation discrétionnaire	3.75%	MAC
WYNMAC 5.625% 08/28 REGS	Consommation discrétionnaire	2.06%	MAC

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	22.47%
Consommation discrétionnaire	17.39%
Énergie	15.84%
Industrie	13.49%
Biens de consommation de base	8.65%
Services aux collectivités	7.98%

<i>Services de communication</i>	6.22%
<i>Immobilier</i>	3.62%
<i>TITRES SOUVERAINS</i>	2.28%
<i>Technologies de l'information</i>	0.38%
<i>Forex</i>	0.09%
<i>Autres</i>	0.06%
<i>Liquidités</i>	1.54%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.45% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

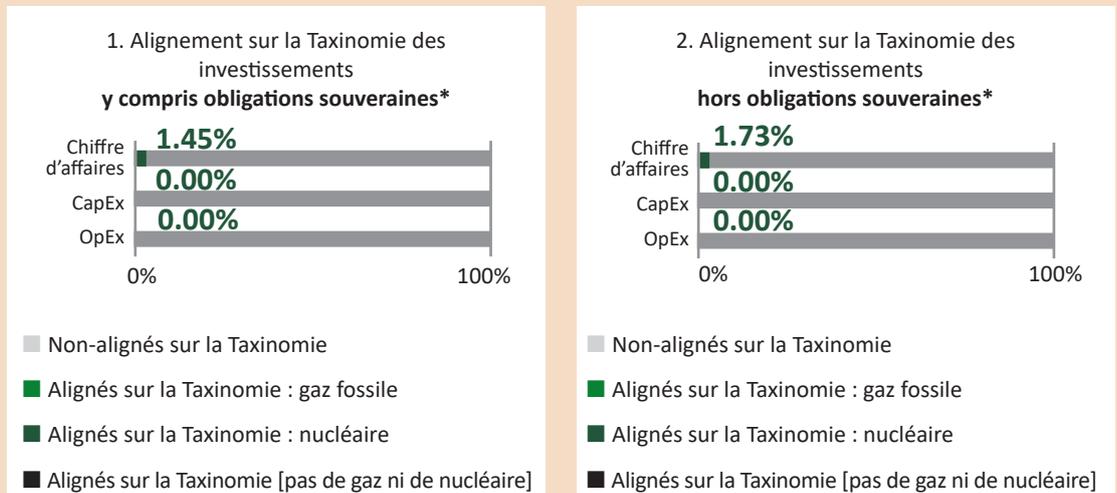

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 9.59% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS HARD CURRENCY BOND

Identifiant d'entité juridique :
549300CF4H3SXCNRP626

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)**

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **8.97%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE HEDGED**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.07 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.16 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux

et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

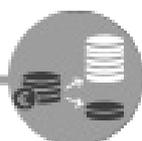

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des

activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

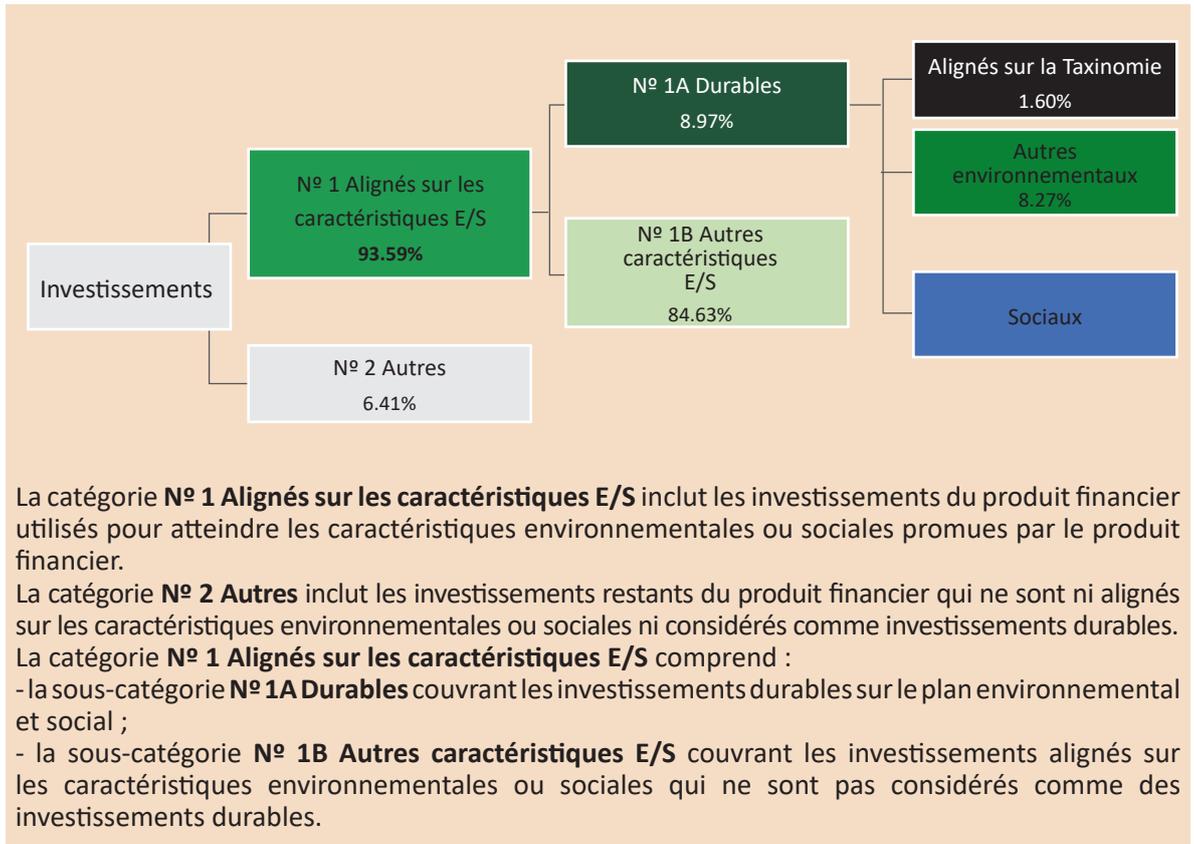

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
TITRES SOUVERAINS	58.02%
Énergie	14.04%
Fonds communs de placement	8.66%
VALEURS DU TRÉSOR	7.34%
Finance	5.55%

Immobilier	0.87%
Forex	0.42%
Services de communication	0.26%
Autres	-0.03%
Liquidités	-1.18%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.60% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

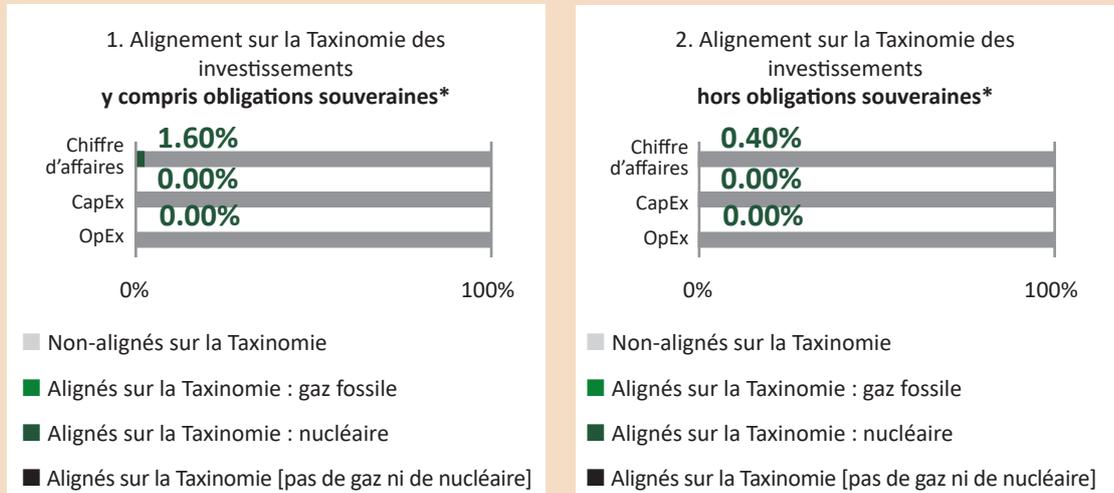

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 8.27% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS LOCAL CURRENCY
BOND

Identifiant d'entité juridique :

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des caractéristiques **environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part d' **4.30%** investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **80% JP MORGAN GBI EM GLOBAL DIVERSIFIED COMPOSITE + 20% ICE BOFA BROAD LOCAL EMERGING MARKETS NON-SOVEREIGN INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.30 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.17 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

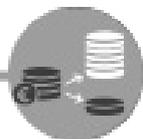

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).

- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

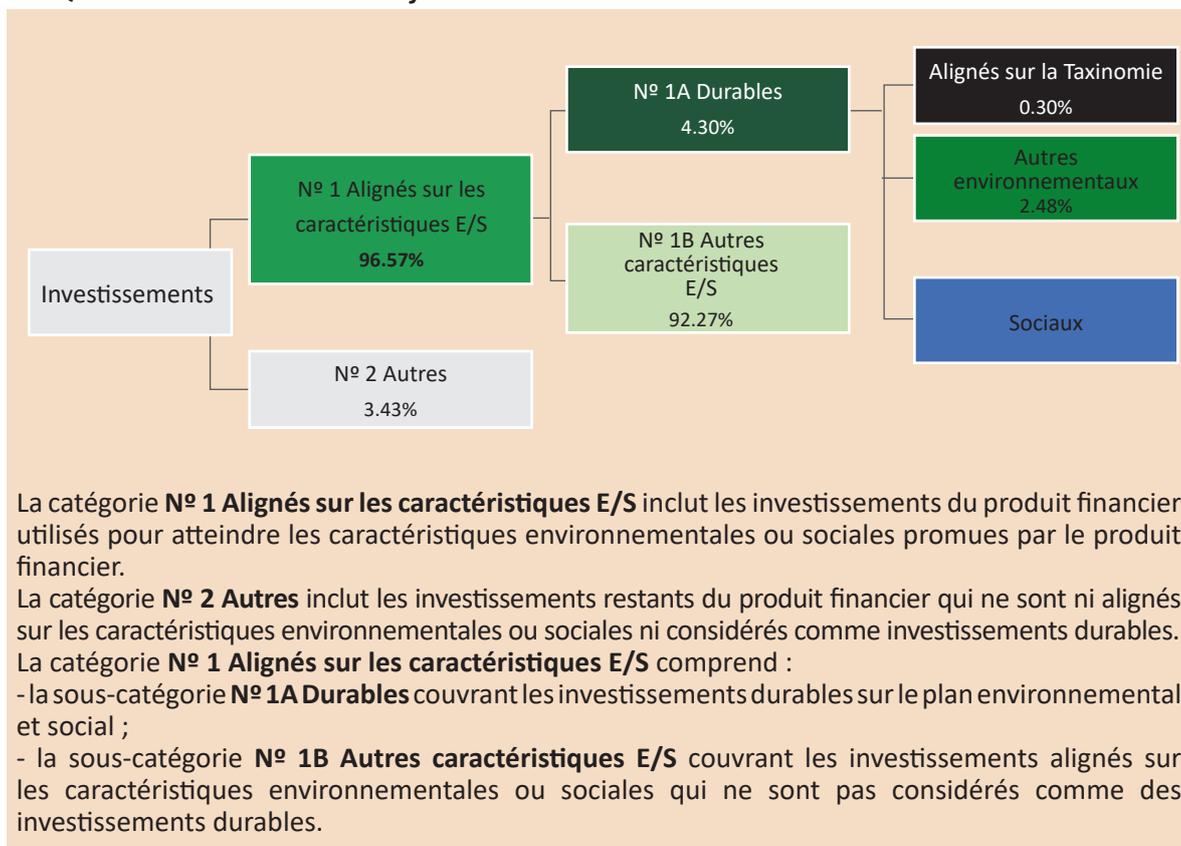

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
US TSY 4.125% 01/25	VALEURS DU TRÉSOR	2.94%	USA
SAGB 8.875% 2/35	VALEURS DU TRÉSOR	2.86%	ZAF
BRAZIL 01/07/24 LTN	VALEURS DU TRÉSOR	2.73%	BRA
CZGB 2.5% 8/28	VALEURS DU TRÉSOR	2.51%	CZE
BRAZIL NTN-F 10% 1/25	VALEURS DU TRÉSOR	2.46%	BRA

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
VALEURS DU TRÉSOR	84.89%
Fonds communs de placement	3.14%
SOVEREIGN	2.82%
TITRES SUPRANATIONAUX	2.58%
Énergie	1.30%

<i>ORGANISMES GOUVERNEMENTAUX</i>	1.04%
<i>Services de communication</i>	0.36%
<i>Services aux collectivités</i>	0.21%
<i>Finance</i>	0.08%
<i>Immobilier</i>	0.07%
<i>Forex</i>	-0.13%
<i>Liquidités</i>	3.83%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.30% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

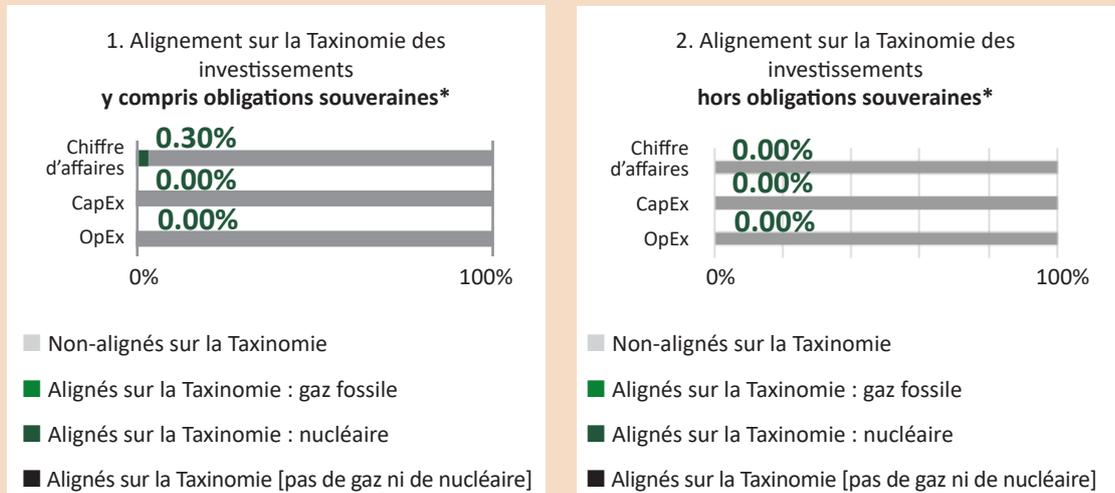

Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 2.48% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING MARKETS SHORT TERM BOND

Identifiant d'entité juridique :
5493000K4D8P0NQAIA67

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des caractéristiques **environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **21.12%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **75% JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD + 25% JP MORGAN EMBI GLOBAL DIVERSIFIED 1-3 Y INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.06 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.21 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son

secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

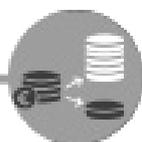

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des

activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

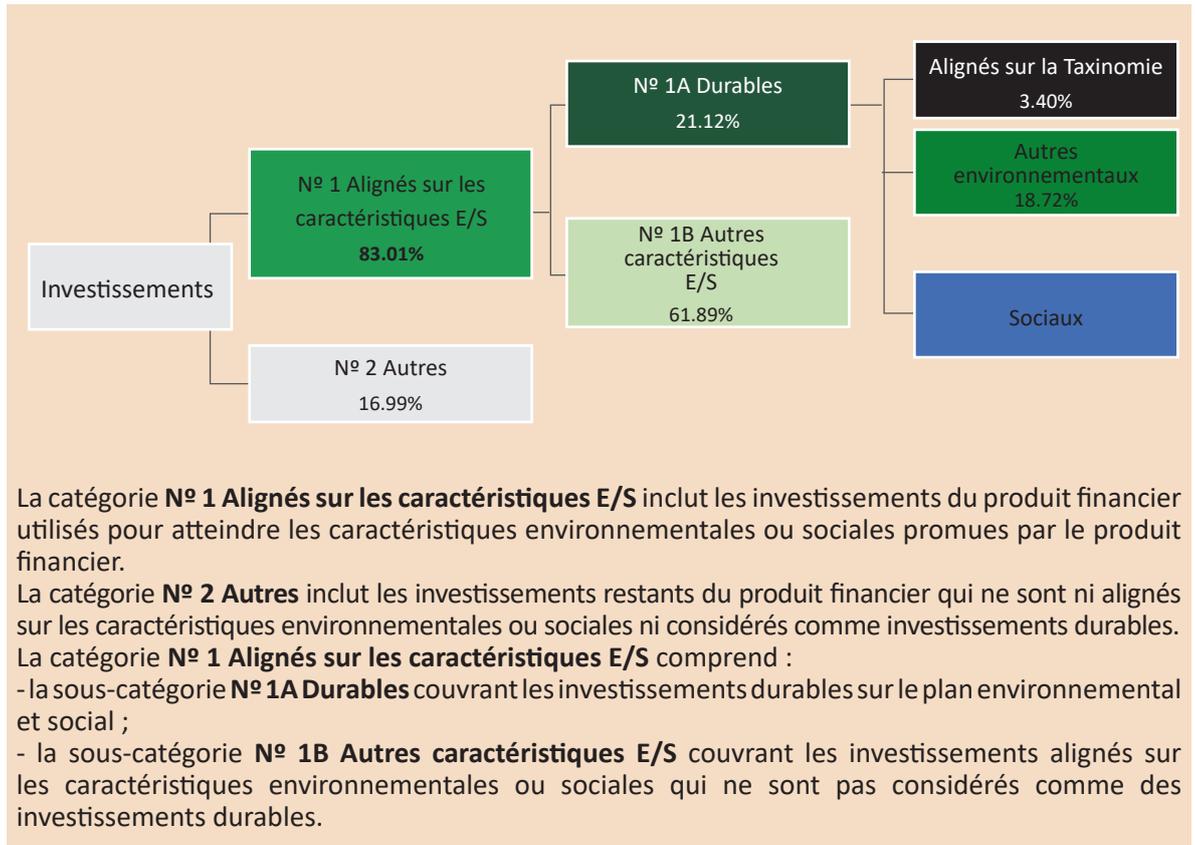

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

<i>TITRES SUPRANATIONAUX</i>	0.23%
<i>ORGANISMES GOUVERNEMENTAUX</i>	0.08%
<i>Liquidités</i>	4.44%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :
- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.4% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
 - des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

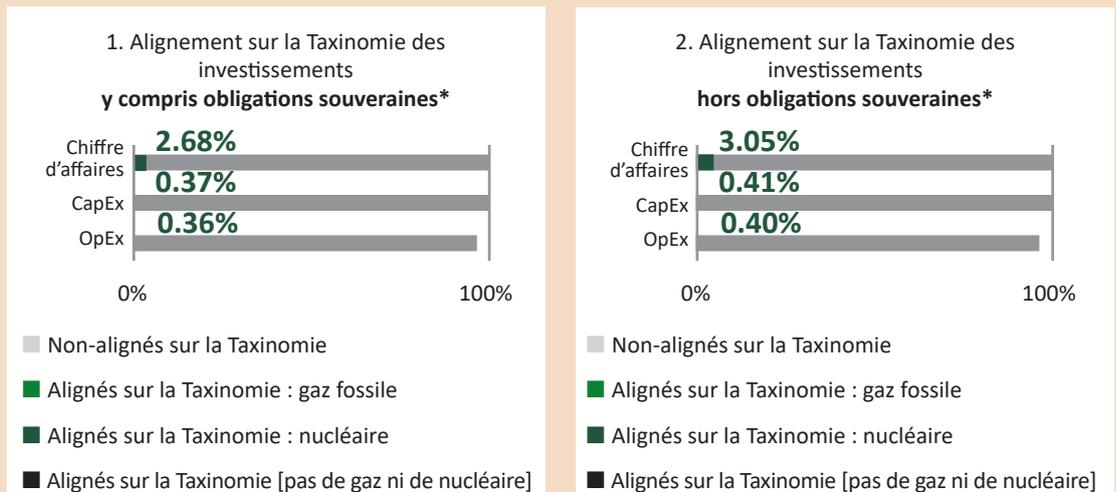

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

 sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **18.72%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EURO
MULTI-ASSET TARGET INCOME

Identifiant d'entité juridique :
549300MRV3FILX0BHB52

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **29.30%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.73 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux

et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

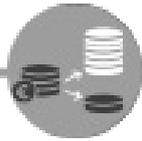

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

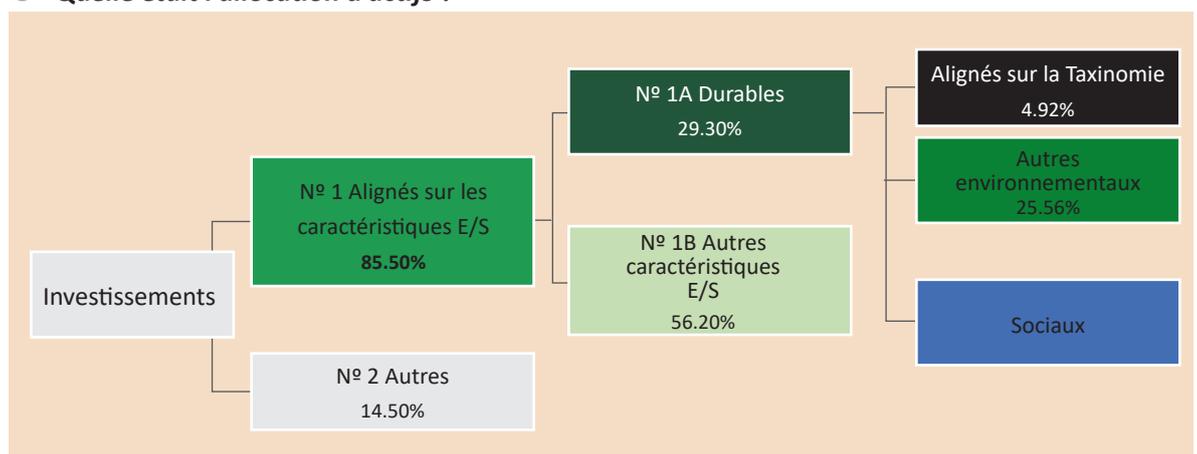

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>VALEURS DU TRÉSOR</i>	21.76%
<i>Fonds communs de placement</i>	12.89%
<i>Finance</i>	11.87%
<i>TITRES SOUVERAINS</i>	6.73%
<i>Industrie</i>	6.05%
<i>Consommation discrétionnaire</i>	5.77%
<i>Biens de consommation de base</i>	5.14%
<i>Services de communication</i>	4.96%
<i>Services aux collectivités</i>	4.36%
<i>Santé</i>	3.98%

<i>Technologies de l'information</i>	3.29%

<i>Immobilier</i>	0.44%
<i>Autres</i>	0.30%
<i>Forex</i>	-0.07%
<i>Liquidités</i>	8.52%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour

montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour

refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 4.92% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

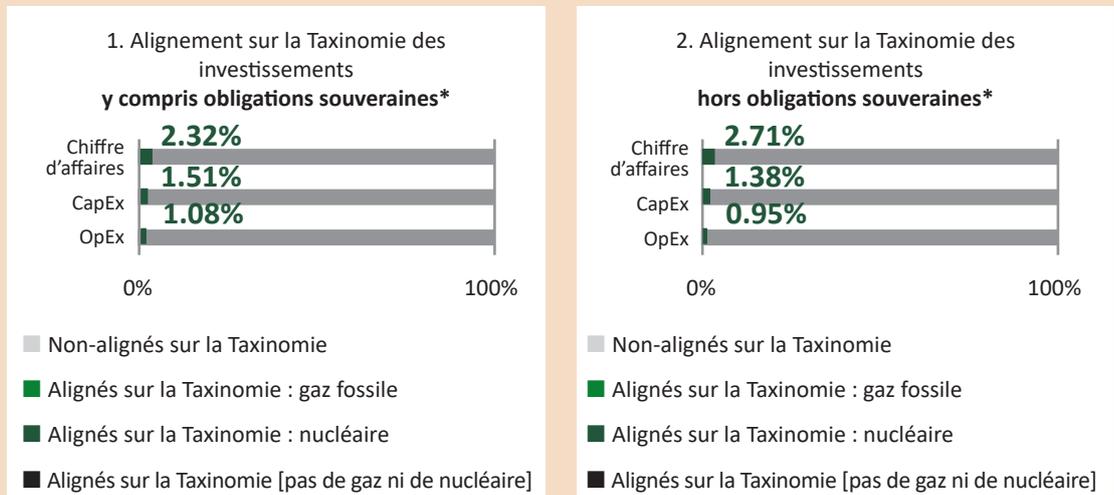

Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.15%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 25.56% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS GLOBAL MULTI-ASSET

Identifiant d'entité juridique : 549300OD7WDES3BYBD54

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **32.24%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.49 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le

cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

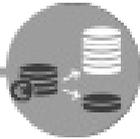

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

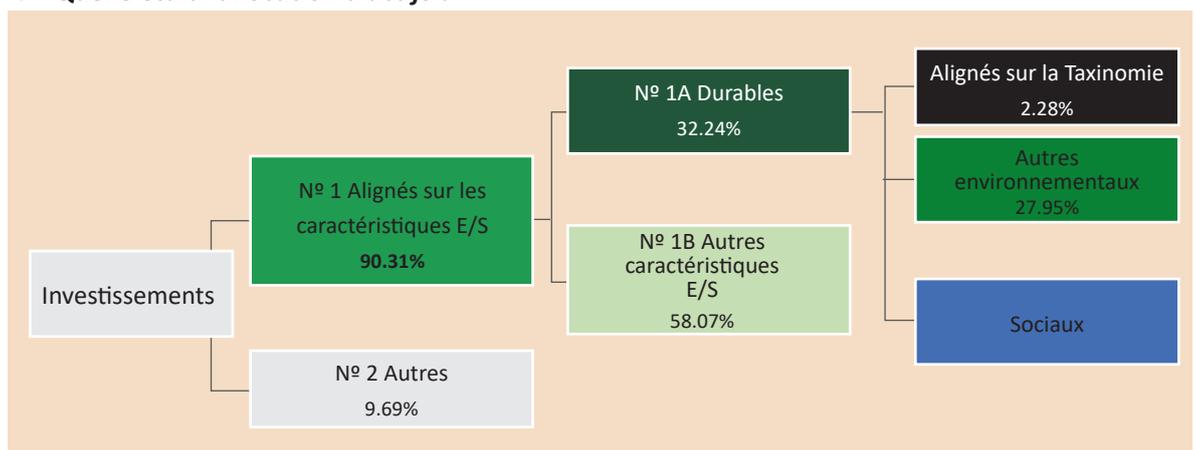

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.28% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

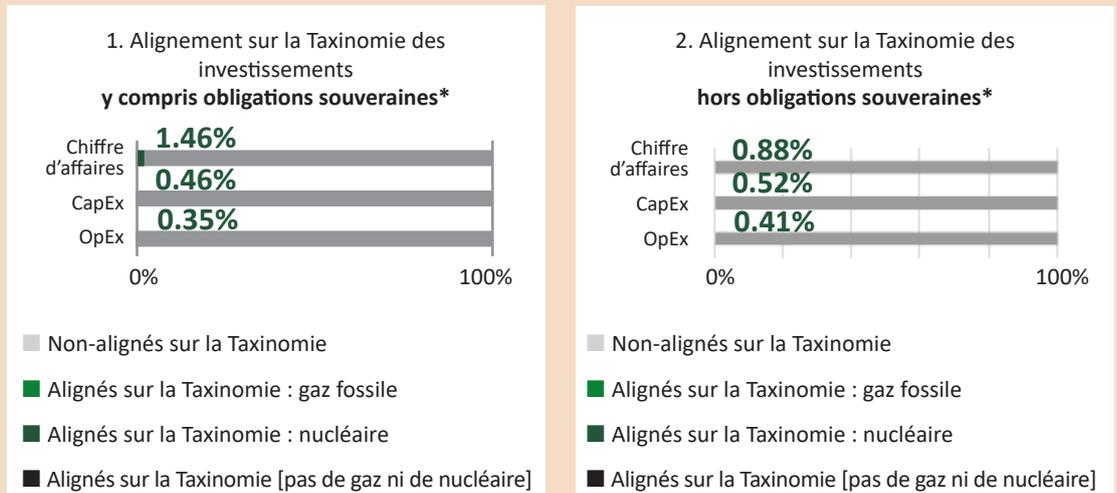

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.05%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **27.95%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL MULTI-ASSET CONSERVATIVE

Identifiant d'entité juridique :
549300B1R0N20X3Z5K83

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des caractéristiques **environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **27.01%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.62 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux

et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

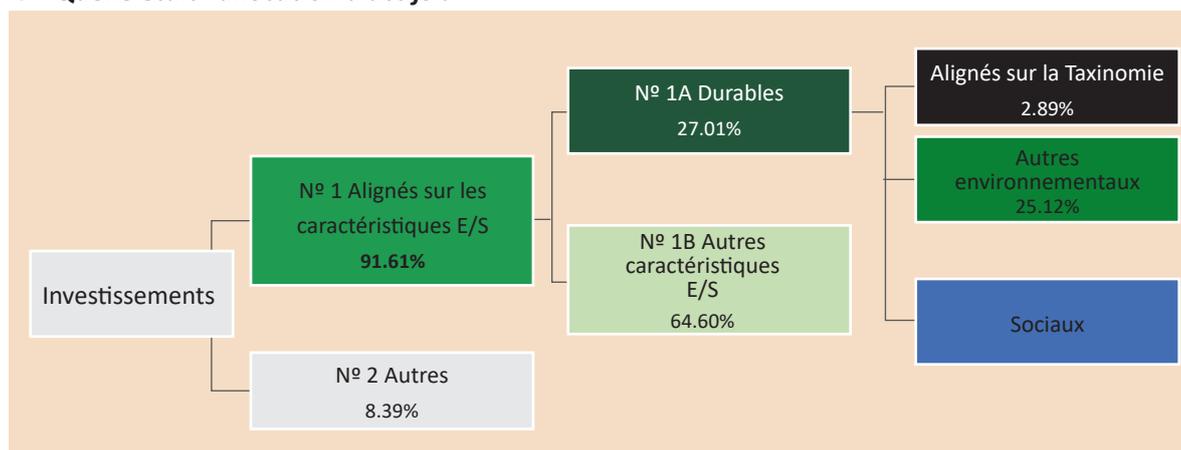

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.89% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

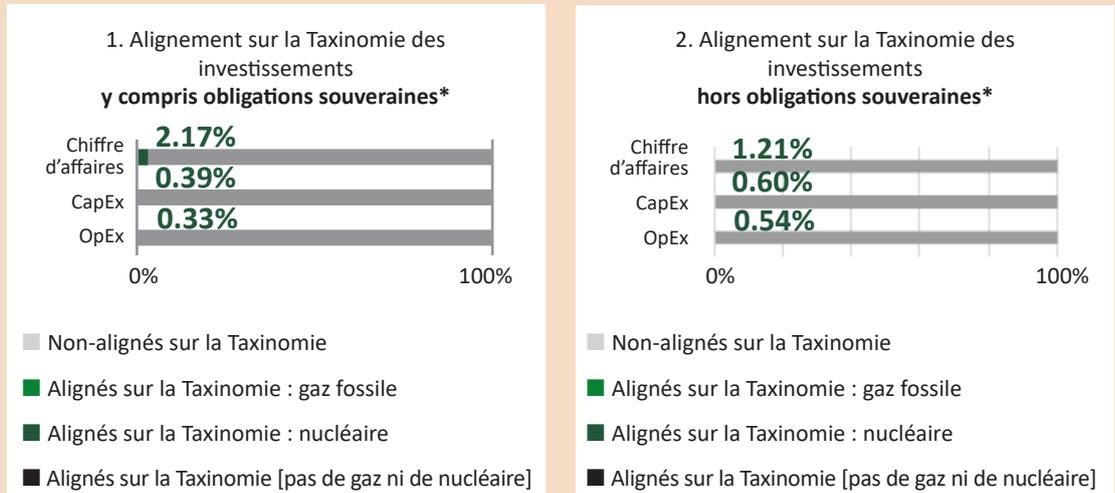

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.02%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

 **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 25.12% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL MULTI-ASSET TARGET INCOME

Identifiant d'entité juridique :

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **28.08%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.52 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux

et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

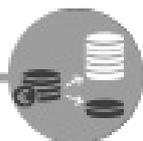

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

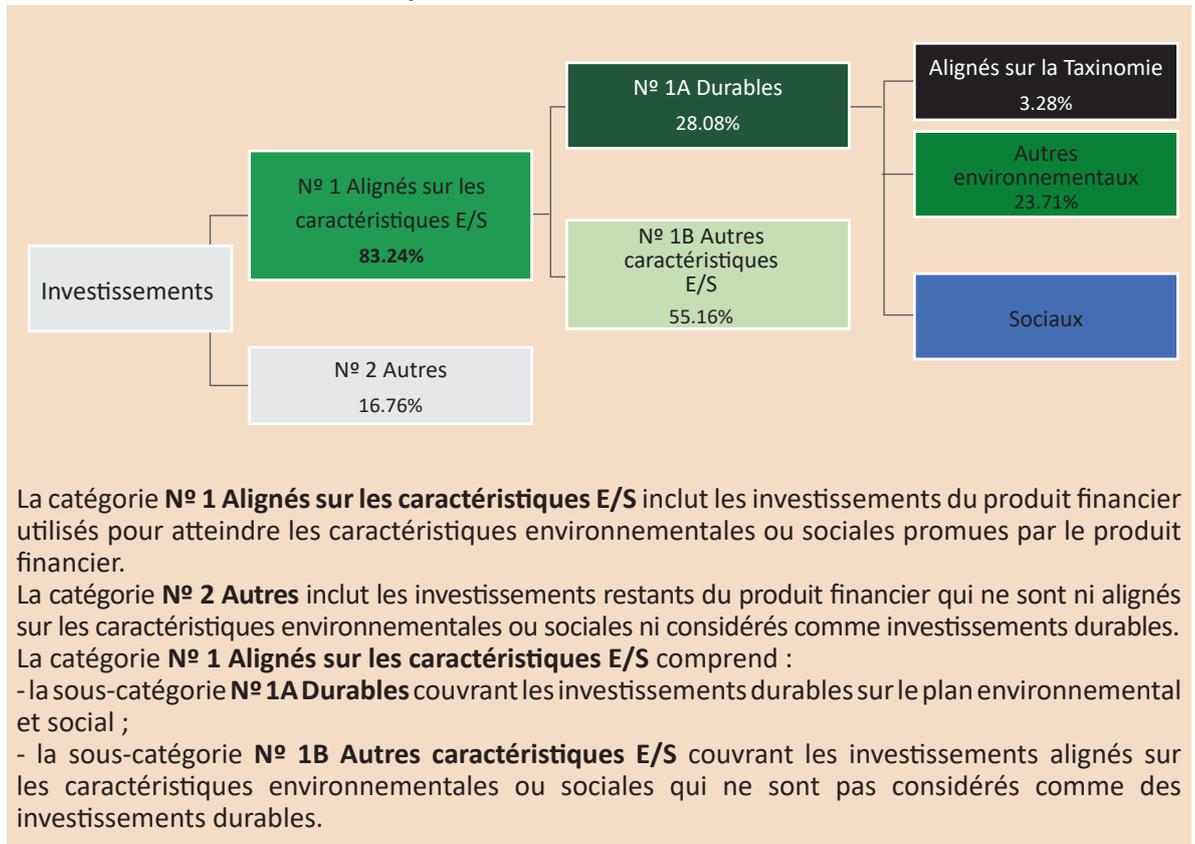

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2022 au 30/06/2023**

Principaux investissements	Secteur	% des actifs	Pays

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.28% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

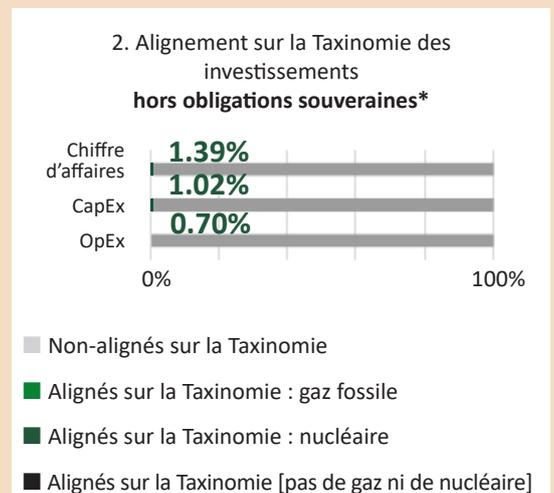

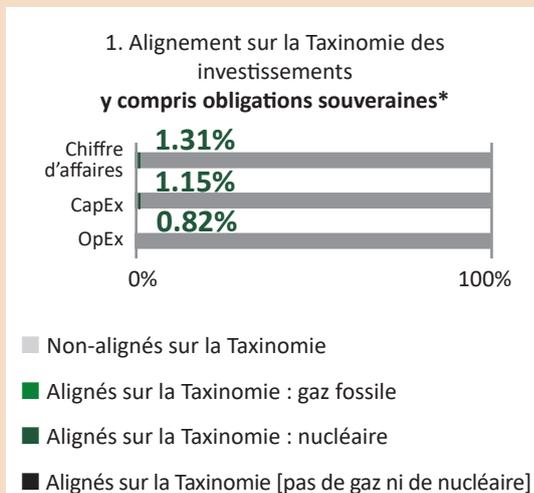

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.12%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **23.71%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second

niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS NET
ZERO AMBITION MULTI-ASSET

Identifiant d'entité juridique :
549300UWEKCHQNE88693

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)**

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **57.60%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **5% MSCI USD HY CORPORATE BOND INDEX + 60% MSCI ACWI + 5% MSCI EUR HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 15% MSCI EUR IG CORPORATE BOND INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - Entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles
 - Exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr)
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales en cherchant à réduire son intensité carbone à travers l'alignement de l'intensité de l'empreinte carbone sur celle de son Indice de référence **5% MSCI USD HY CORPORATE BOND INDEX + 60% MSCI ACWI + 5% MSCI EUR HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 15% MSCI EUR IG CORPORATE BOND INDEX.**

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.46 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.04 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.

- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **122.08**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **221.64**

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux

droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

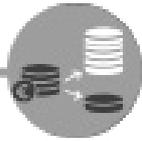

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

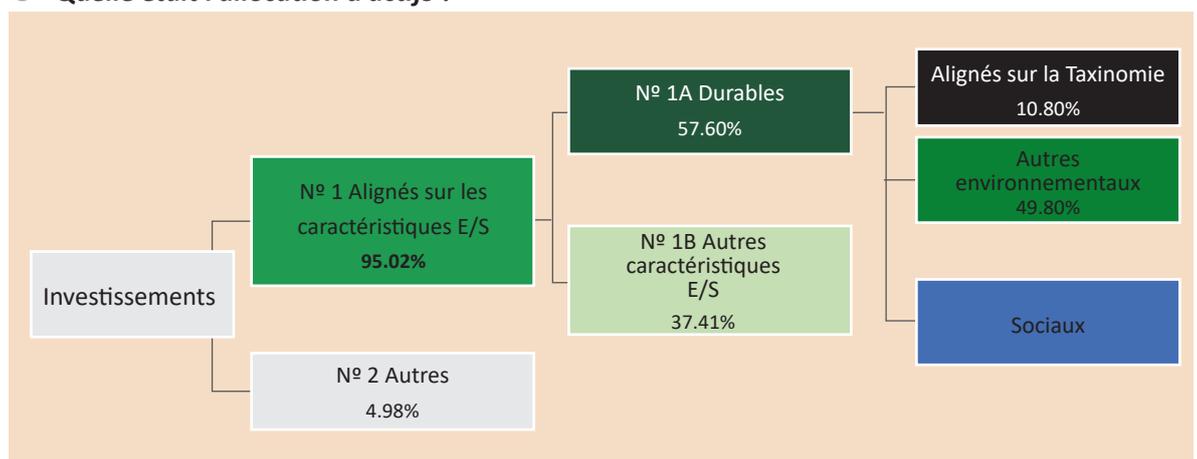

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
MICROSOFT CORP	Informations Technologie	1.76%	USA
APPLE INC	Informations Technologie	1.66%	USA

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>Finance</i>	26.60%
<i>Technologies de l'information</i>	14.96%
<i>Industrie</i>	9.63%
<i>Services de communication</i>	9.05%
<i>Consommation discrétionnaire</i>	7.85%
<i>Services aux collectivités</i>	6.31%
<i>Biens de consommation de base</i>	6.14%
<i>Santé</i>	6.03%
<i>Matériaux</i>	3.07%
<i>Immobilier</i>	2.46%
<i>TITRES SUPRANATIONAUX</i>	2.07%
<i>VALEURS DU TRÉSOR</i>	1.84%

Forex	0.46%
TITRES SOUVERAINS	0.45%
ORGANISMES GOUVERNEMENTAUX	0.31%
Énergie	0.29%
Autres	0.13%
Fonds communs de placement	0.11%
Liquidités	2.25%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
- et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 10.80% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

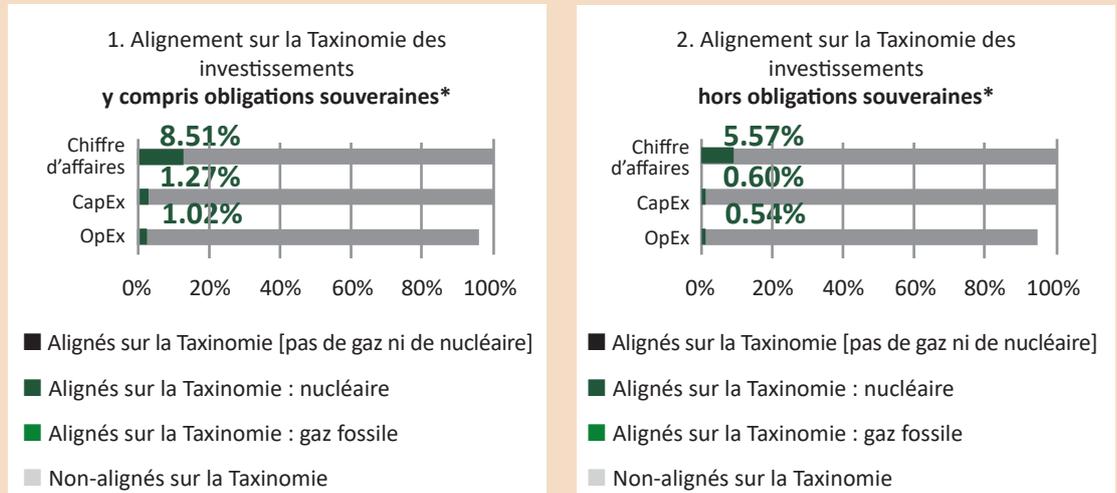

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.07%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 49.80% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **122.08**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **221.64**

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI World Climate Paris Aligned Net USD. L'intensité de l'empreinte

Indications complémentaires (non auditées)

carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **122.08**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **221.64**

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
MULTI-ASSET REAL RETURN

Identifiant d'entité juridique :
222100UNVFMGHI5DQJ57

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **X Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <p><input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> X Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de 31.92% d'investissements durables</p> <p><input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> X ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> ayant un objectif social</p> <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.80 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son

secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

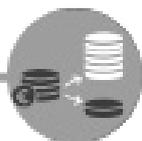

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de

référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

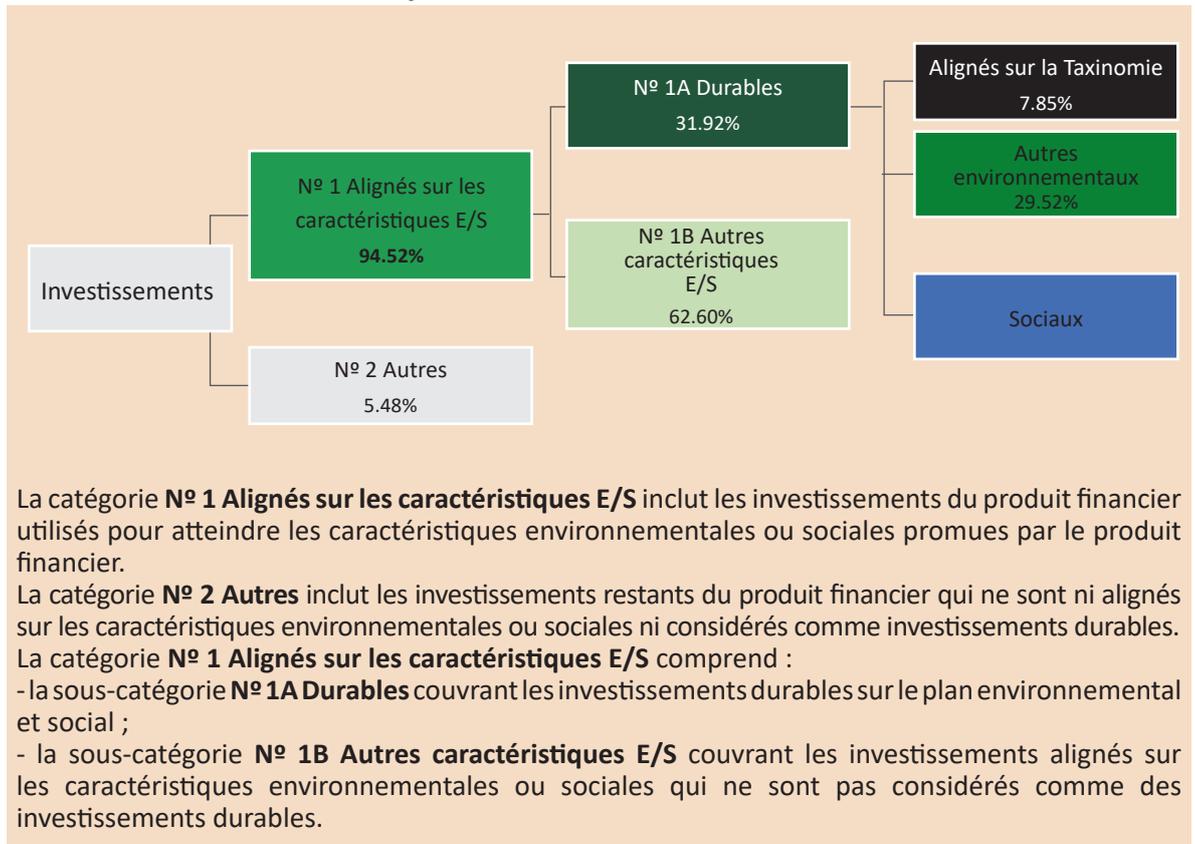

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 7.85% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

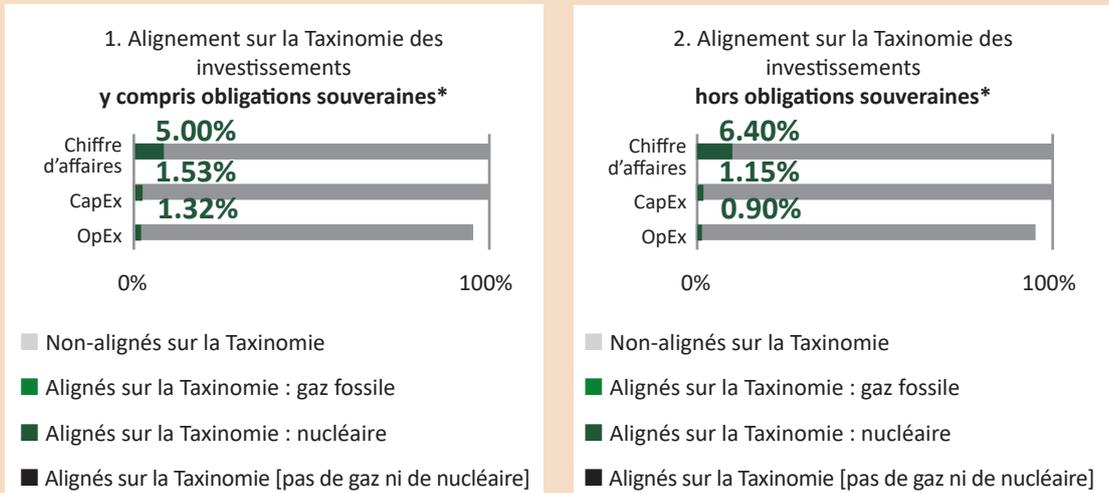

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.03%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **29.52%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

● **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

● **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS MULTI-ASSET SUSTAINABLE FUTURE

Identifiant d'entité juridique : 549300E1QOFTUCHMCV76

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des caractéristiques **environnementales/sociales (E/S)**

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **65.26%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **30% MSCI WORLD + 70% BLOOMBERG EURO AGGREGATE (E)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.14 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.75 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs

environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

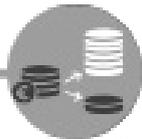

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>VALEURS DU TRÉSOR</i>	24.18%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 12.17% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

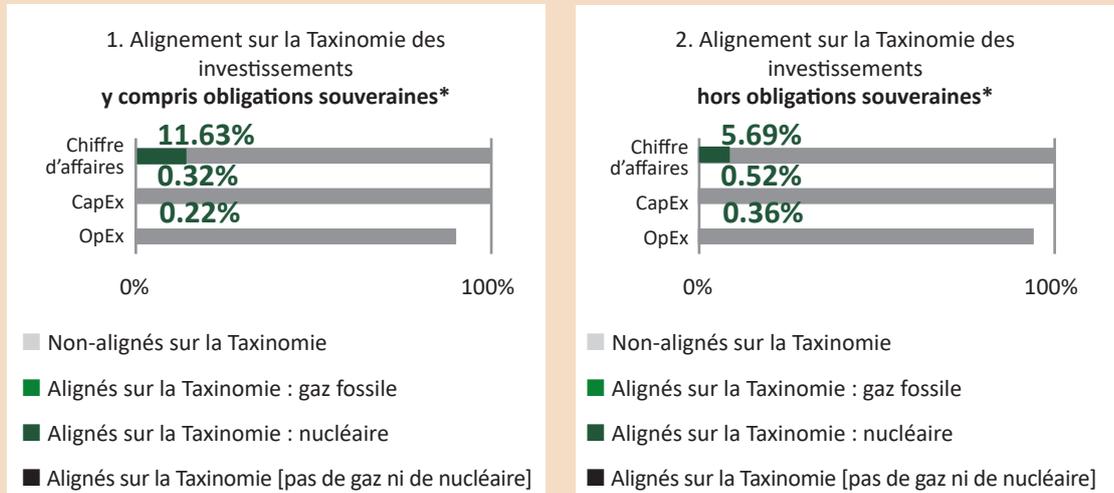

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 56.98% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
PIONEER FLEXIBLE OPPORTUNITIES

Identifiant d'entité juridique :
5493000SYHI3US1RDZ90

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **26.47%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.43 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à

G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

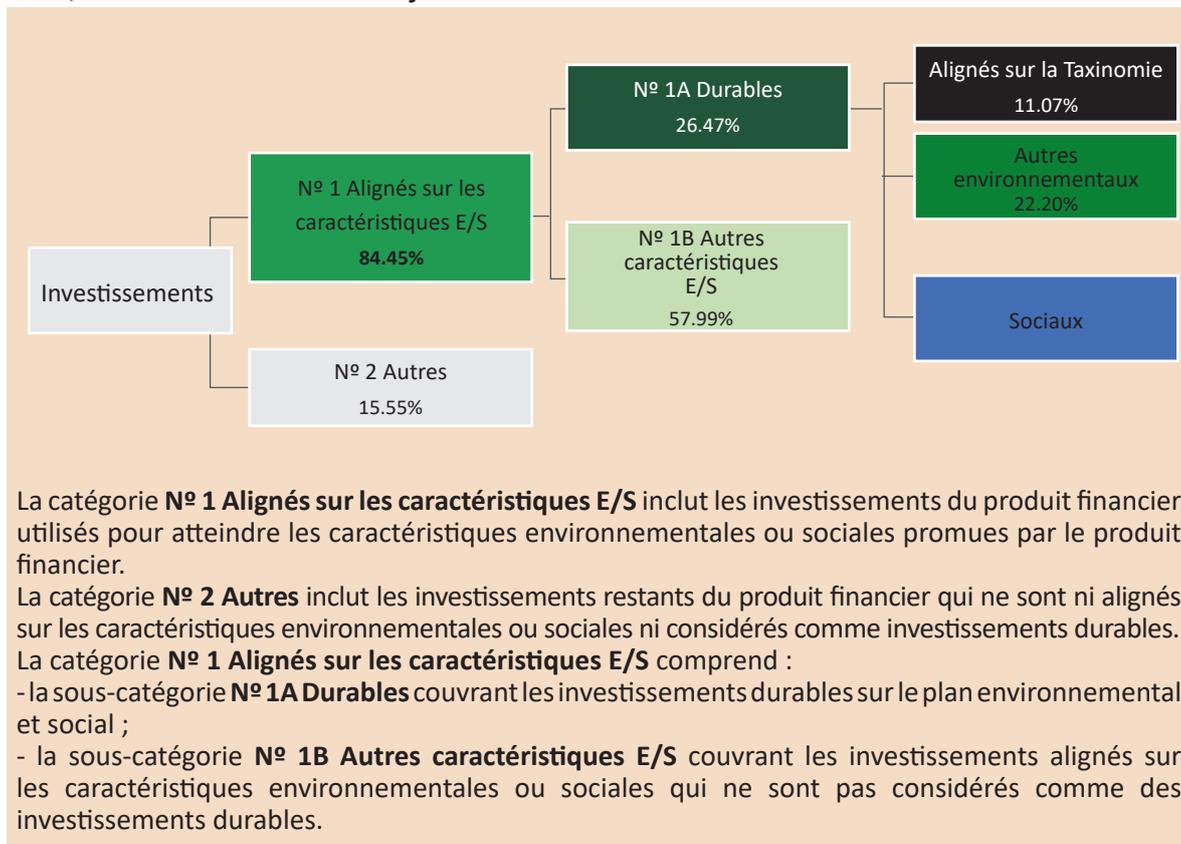

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	30.60%
VALEURS DU TRÉSOR	11.42%
Immobilier	9.08%
Fonds communs de placement	8.56%

Forex	1.11%
TITRES SOUVERAINS	0.93%
Liquidités	5.04%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
 et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 11.07% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

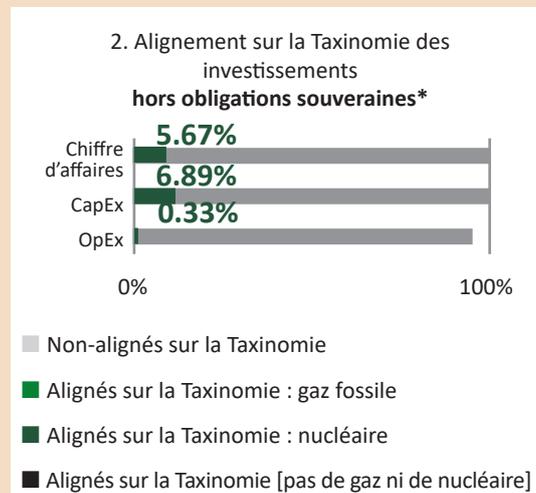

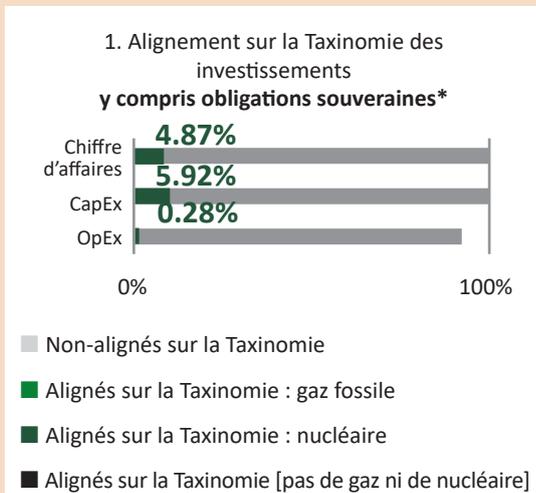

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 3.66%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **22.20%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
PIONEER INCOME OPPORTUNITIES

Identifiant d'entité juridique :
549300ILVTGROHRV6666

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **19.61%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.46 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux

et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

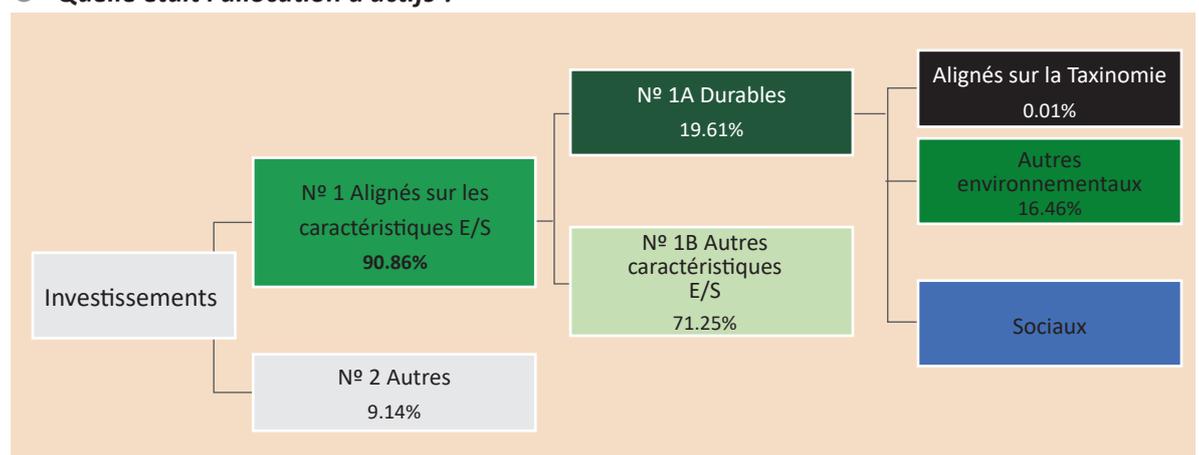

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
SHELL PLC	Énergie	4.13%	NLD
PFIZER INC-USD	Santé	3.10%	USA

Quelle était la proportion d'investissements liés à la durabilité ?

- Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
<i>Finance</i>	38.74%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.01% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

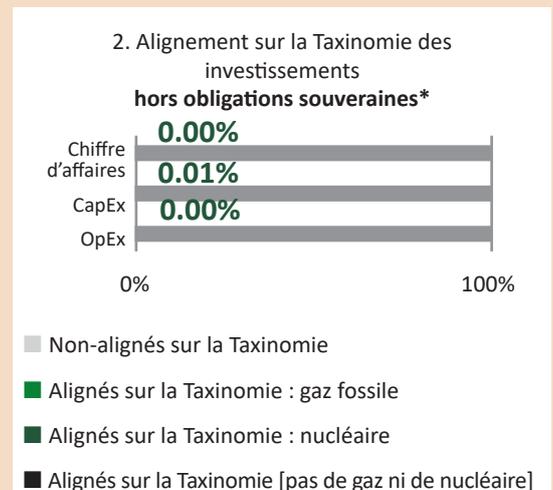

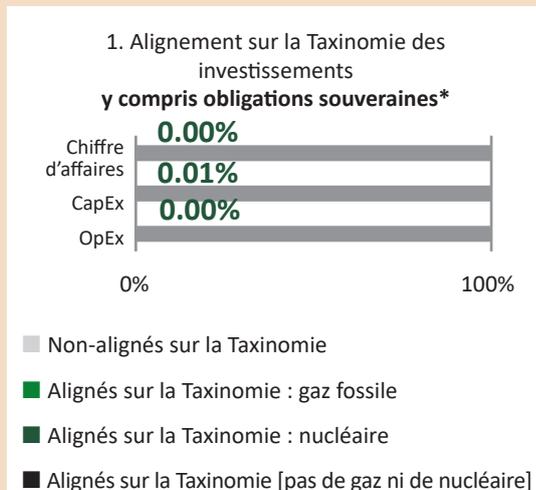

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
 - Dans le gaz fossile
 - Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

 **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **16.46%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

 **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

 **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second

niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS REAL ASSETS TARGET INCOME

Identifiant d'entité juridique : 549300B49TP3UV3FOI07

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <p><input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de 35.07% d'investissements durables</p> <p><input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> ayant un objectif social</p> <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
---	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **7.5% ICE BOFA US HIGH YIELD INDEX + 5% IBOMX EURO CORPORATE NON FINANCIALS + 5% ALERIAN MLP + 5% BLOOMBERG GOLD SUBINDEX TOTAL RETURN + 5% BLOOMBERG COMMODITY INDEX (VALO) + 15% MSCI ACWI REAL ESTATE INVESTMENT TRUSTS (REIT) + 7.5% MSCI WORLD TRANSPORTATION INFRASTRUCTURE + 10% MSCI World Index / Food Beverage & Tobacco -IG + 10% MSCI World Index / Materials -SEC + 5% ICE BOFA GLOBAL INFLATION-LINKED GOVERNMENT INDEX + 5% ICE BOFA EURO HIGH YIELD INDEX + 5% MSCI World Index / Utilities -SEC + 5% ICE BOFA US NON-FINANCIAL CORPORATE INDEX + 10% MSCI World Index / Energy -SEC**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la

performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.64 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.10 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution. Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.
- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de

référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

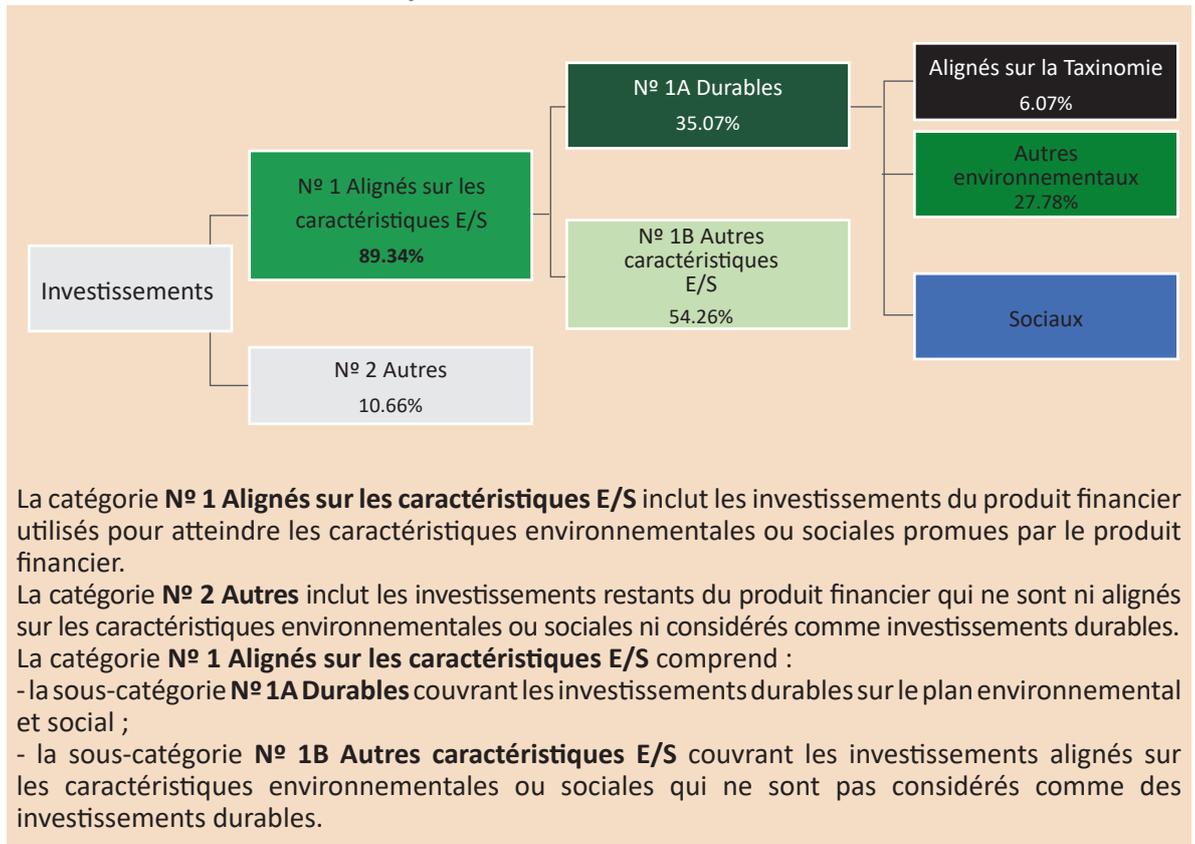

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays
AMUNDI EURO LIQUIDITY-RATED SRI - Z (C)	Fonds communs de placement	2.09%	FRA

<i>Autres</i>	0.08%
<i>Liquidités</i>	6.82%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 6.07% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

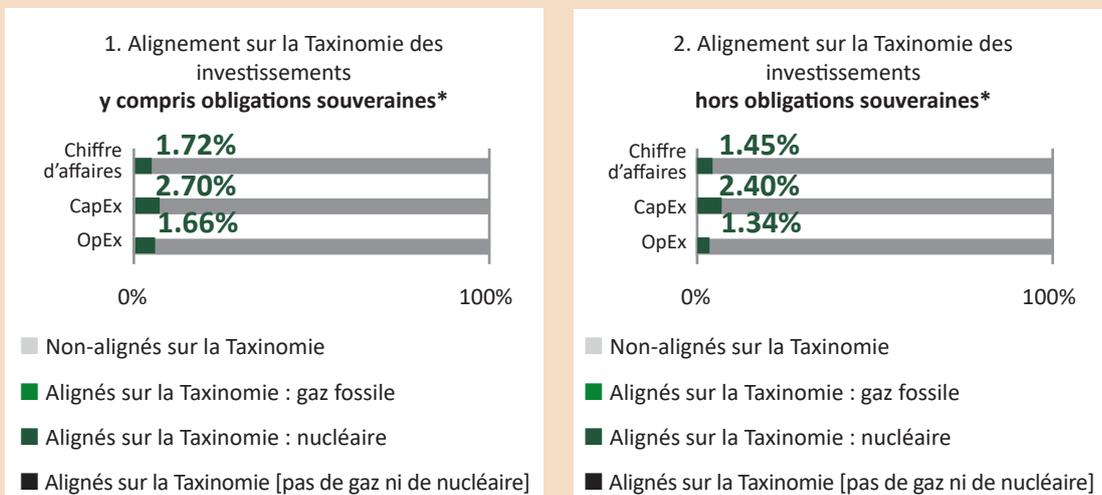

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.22%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

 **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **27.78%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

 **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

 **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second

niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
TARGET COUPON

Identifiant d'entité juridique :
2221009D0WCSI3Q32Q11

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des caractéristiques **environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **60.67%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques **E/S**, mais **n'a pas réalisé d'investissements durables**

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.99 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs

importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

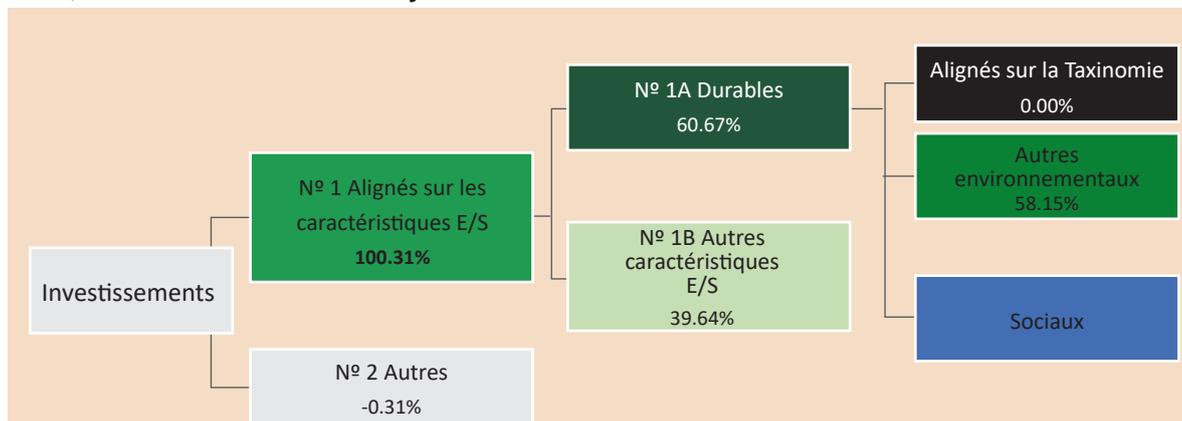

Principaux investissements	Secteur	% des actifs	Pays
AMUNDI REVENUS - OR	Fonds communs de placement	100.30%	FRA

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du
01/07/2022 au
30/06/2023

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.
La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.
La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :
- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	% des actifs
Fonds communs de placement	100.30%
Liquidités	-0.30%

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.00% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

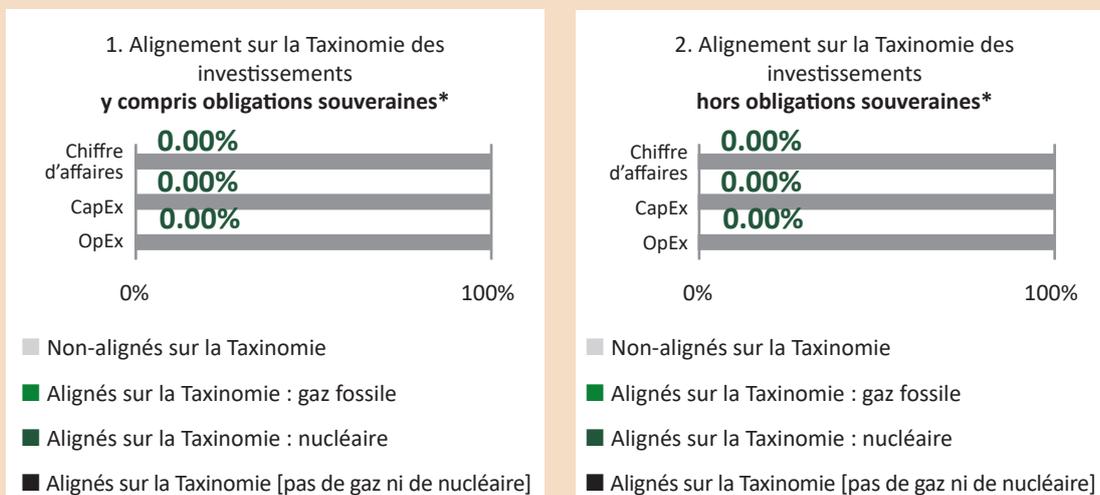

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **58.15%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
ABSOLUTE RETURN CREDIT

Identifiant d'entité juridique :
222100C0Q8DZ00NZYS48

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **32.12%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.29 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du

secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

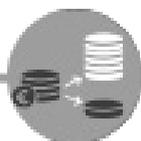

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour

améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

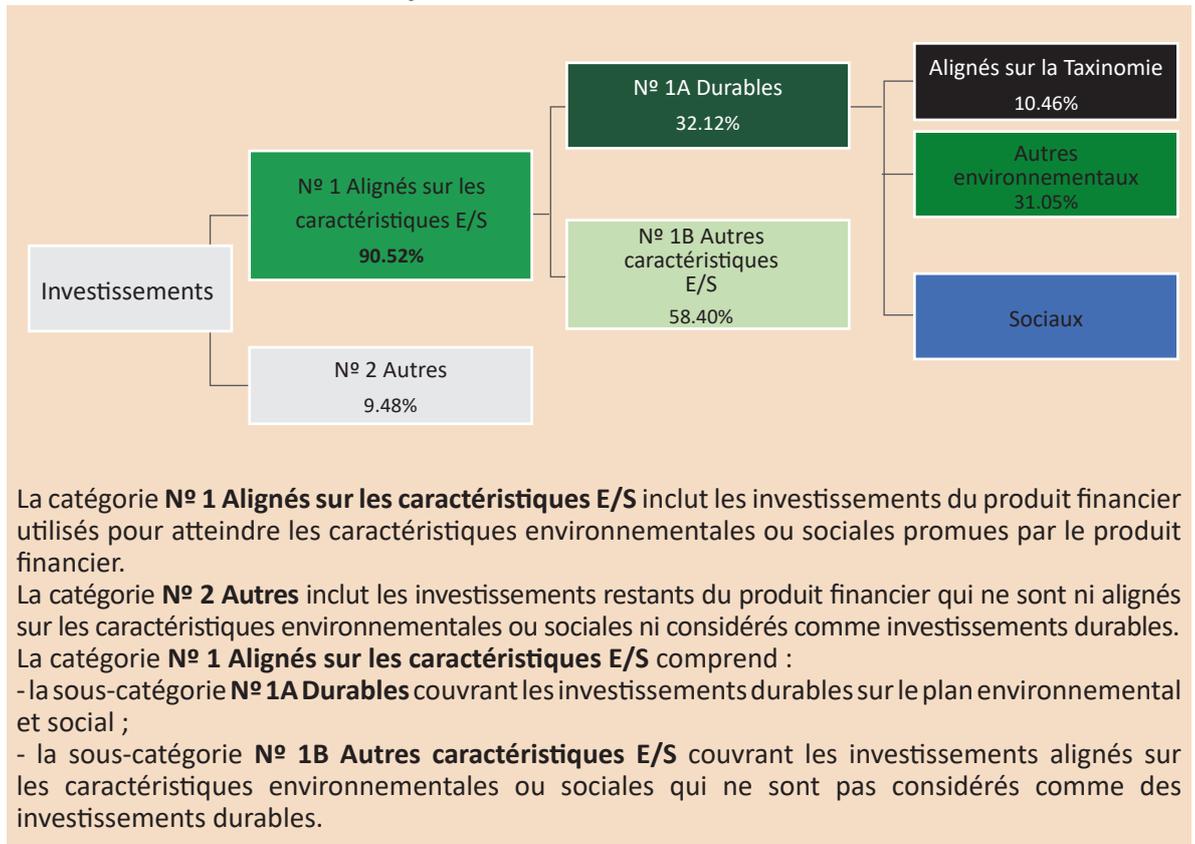

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- la sous-catégorie **N° 1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	44.38%
Consommation discrétionnaire	11.87%
Services de communication	8.59%
Biens de consommation de base	6.36%
Industrie	6.27%
VALEURS DU TRÉSOR	5.70%

<i>Services aux collectivités</i>	5.53%
<i>Énergie</i>	5.51%
<i>TITRES SOUVERAINS</i>	0.66%
<i>Immobilier</i>	0.50%
<i>Forex</i>	0.30%
<i>Autres</i>	-0.55%
<i>Liquidités</i>	4.52%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 10.46% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

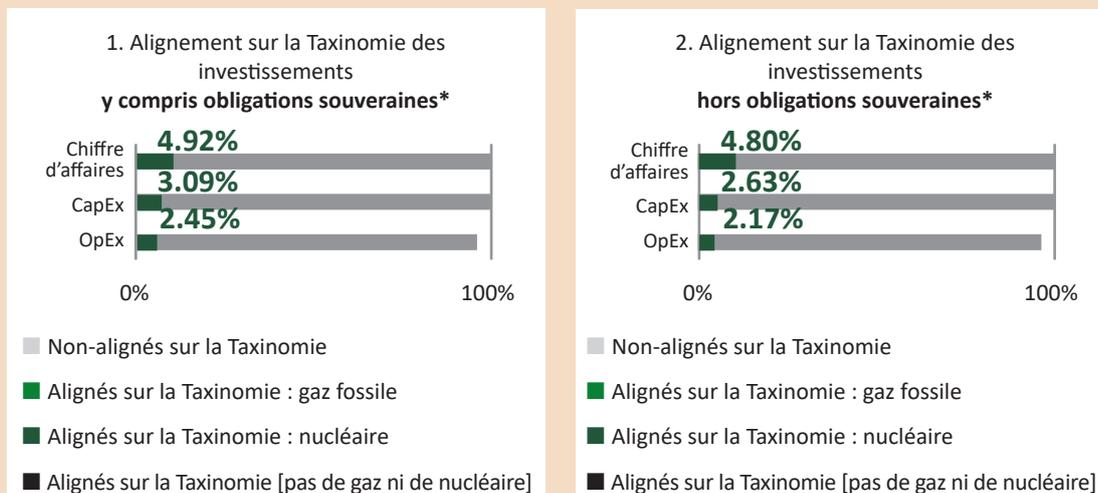

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.46%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 31.05% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
ABSOLUTE RETURN MULTI-STRATEGY

Identifiant d'entité juridique :
549300G94XO1UF8XMQ66

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <ul style="list-style-type: none"> <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de 28.20% d'investissements durables</p> <ul style="list-style-type: none"> <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> ayant un objectif social <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
--	--

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.58 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le

cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

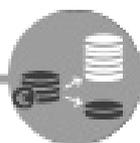

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des

activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

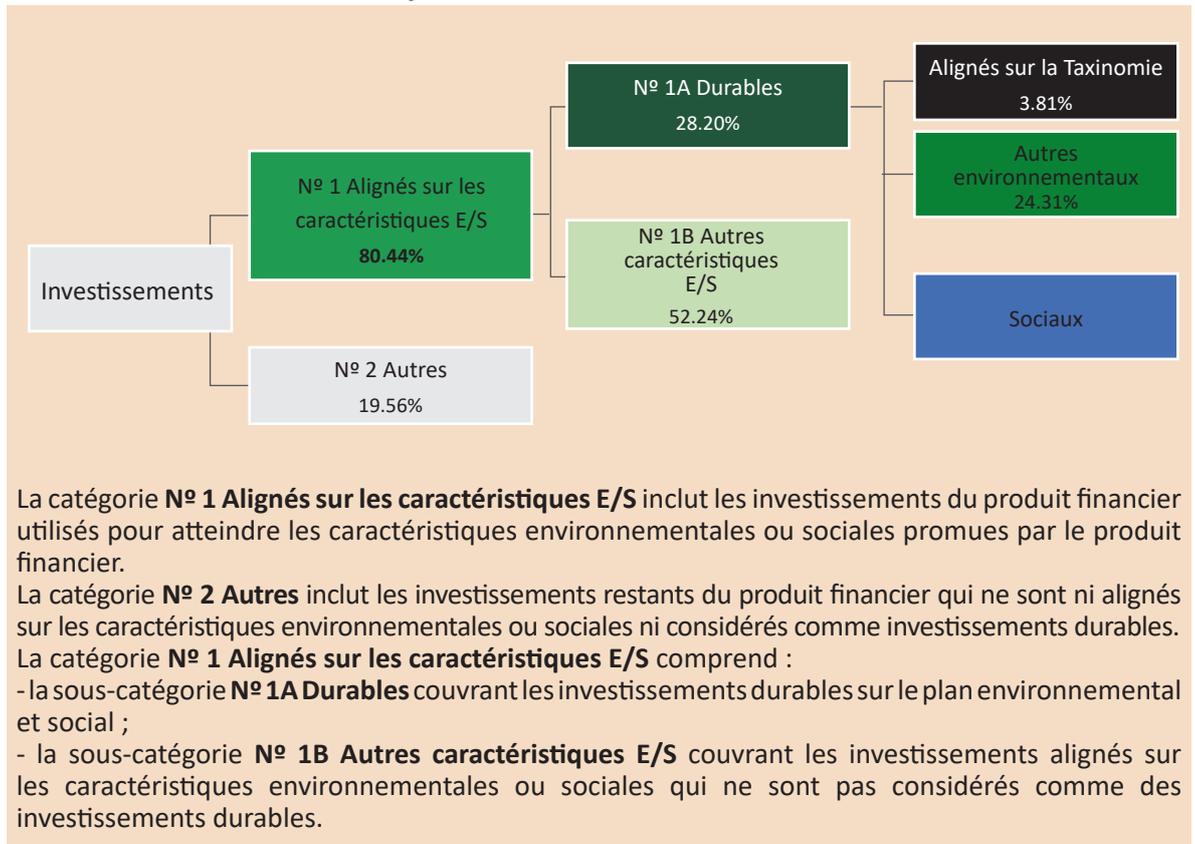

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.81% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

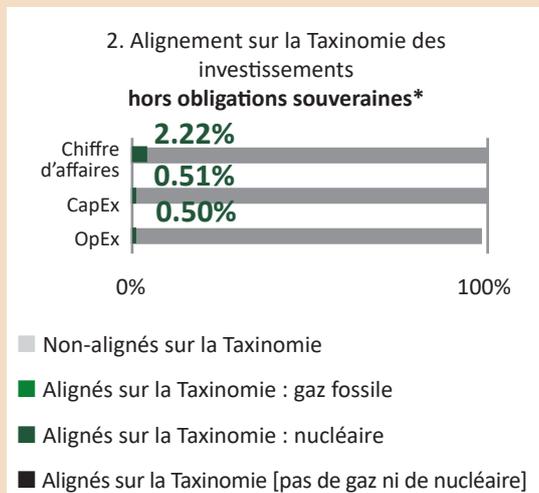

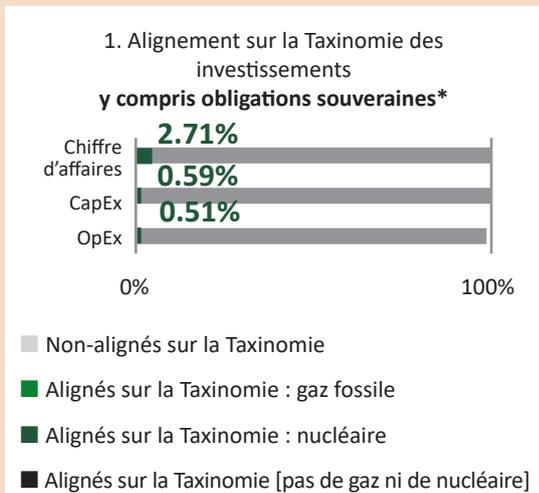

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

 **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **24.31%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

 **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

 **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
ABSOLUTE RETURN GLOBAL
OPPORTUNITIES BOND

Identifiant d'entité juridique :
549300BBK38MPT8QZI59

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)**

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **36.38%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.94 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le

cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives

correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

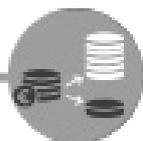

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de

référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

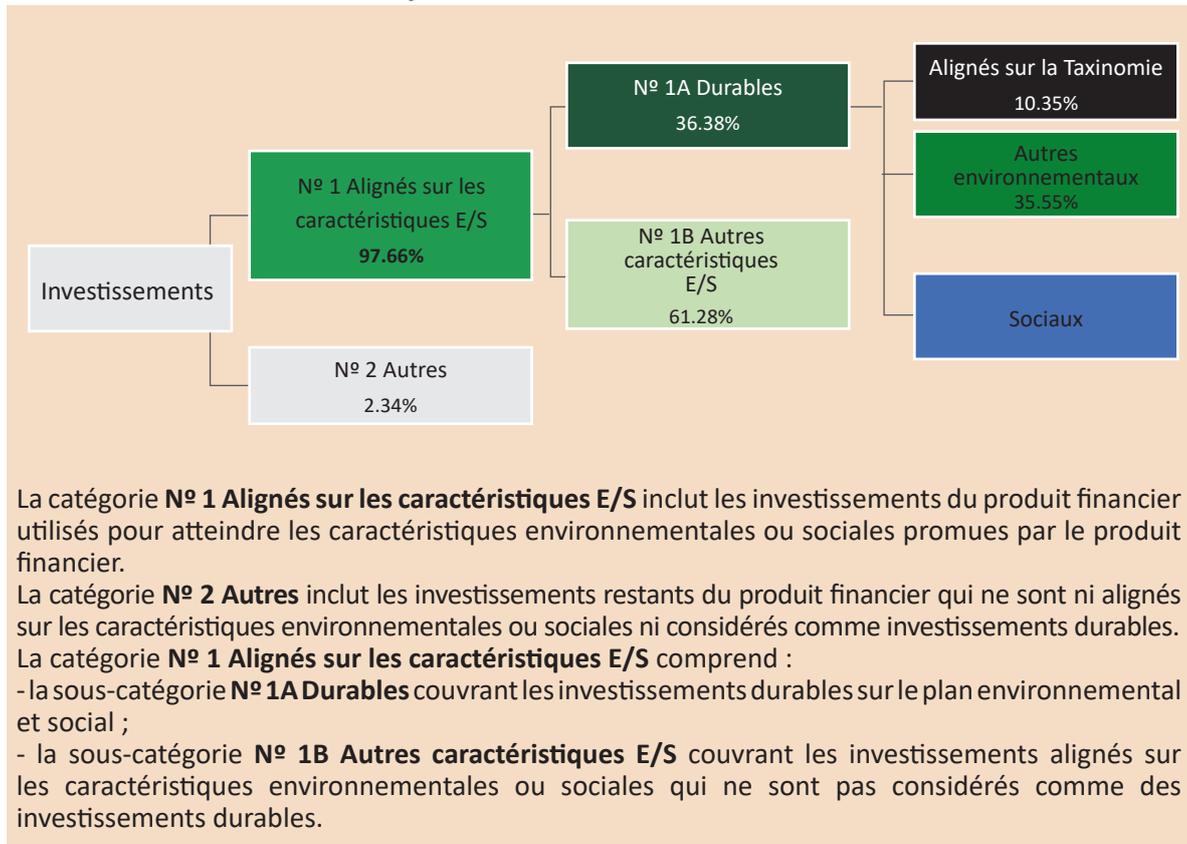

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ;
 et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 10.35% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

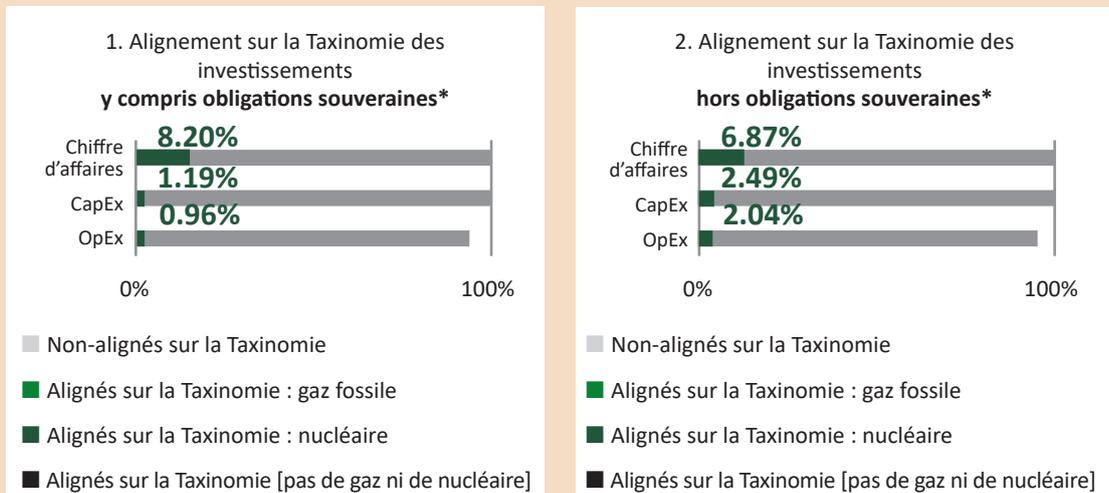

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.09%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 35.55% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
ABSOLUTE RETURN GLOBAL
OPPORTUNITIES BOND DYNAMIC

Identifiant d'entité juridique :
213800ADK5DD5CTZQ486

Par investissement durable,

on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **18.27%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.21 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le

cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

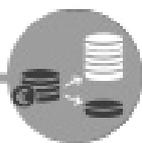

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs

ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

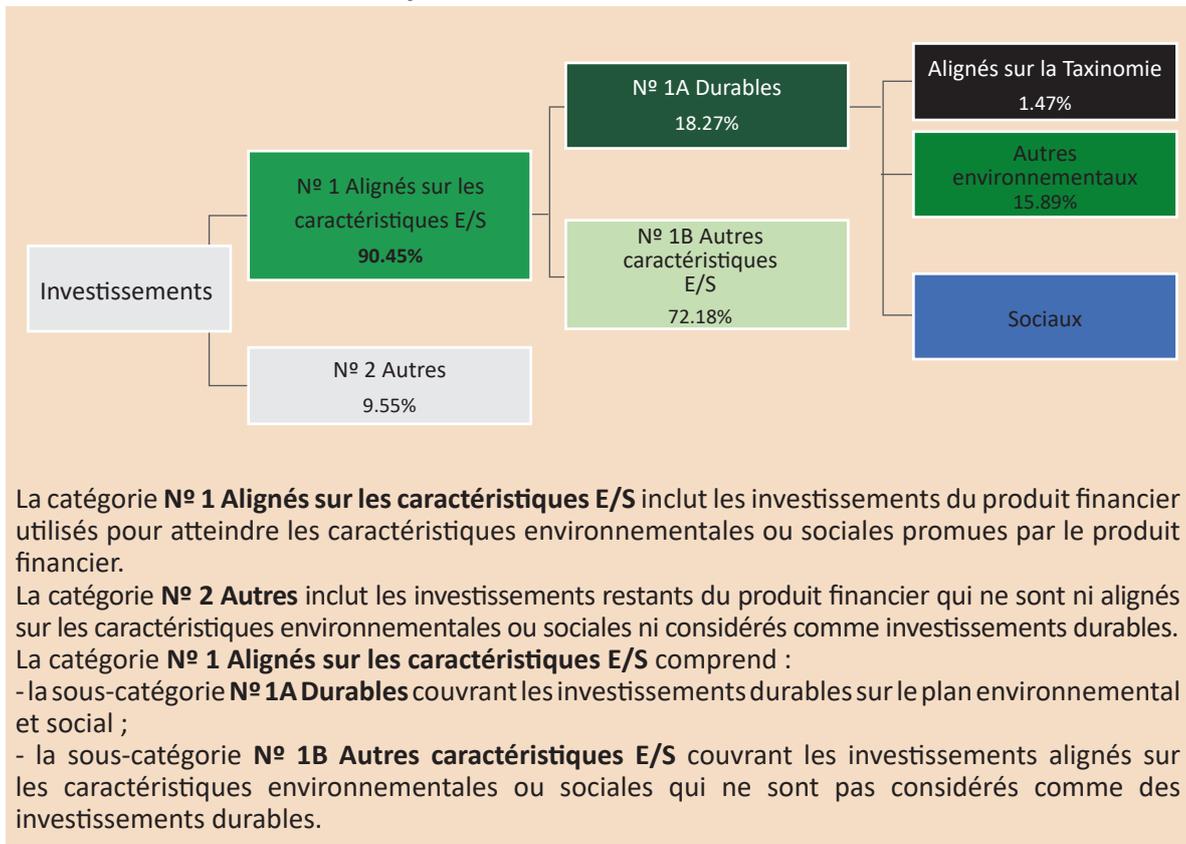

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du
01/07/2022 au
30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

Industrie	0.57%
Énergie	0.30%
Immobilier	0.11%
Liquidités	2.42%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.47% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

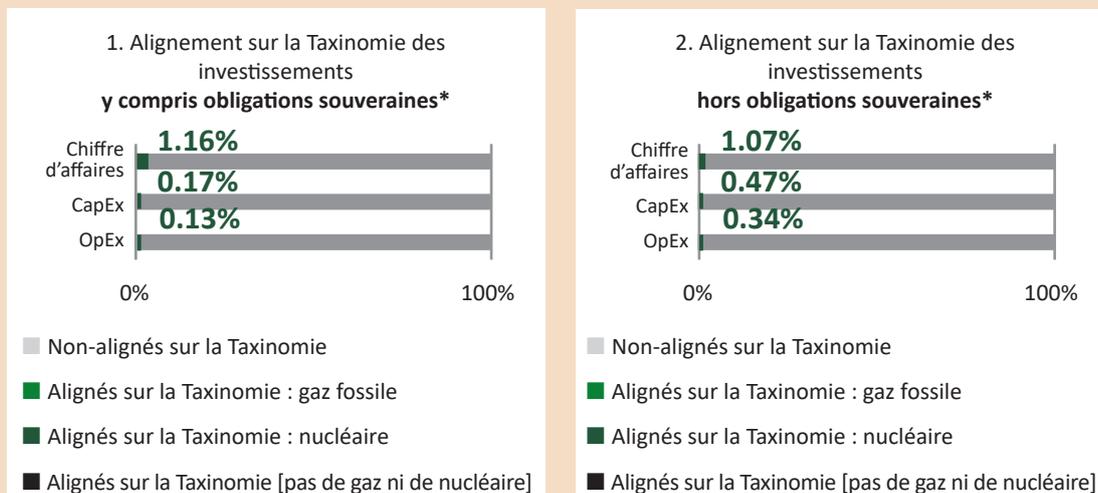

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 15.89% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
MULTI-STRATEGY GROWTH

Identifiant d'entité juridique :
549300U03843Z1MQX452

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **28.50%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.54 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs

importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour

améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

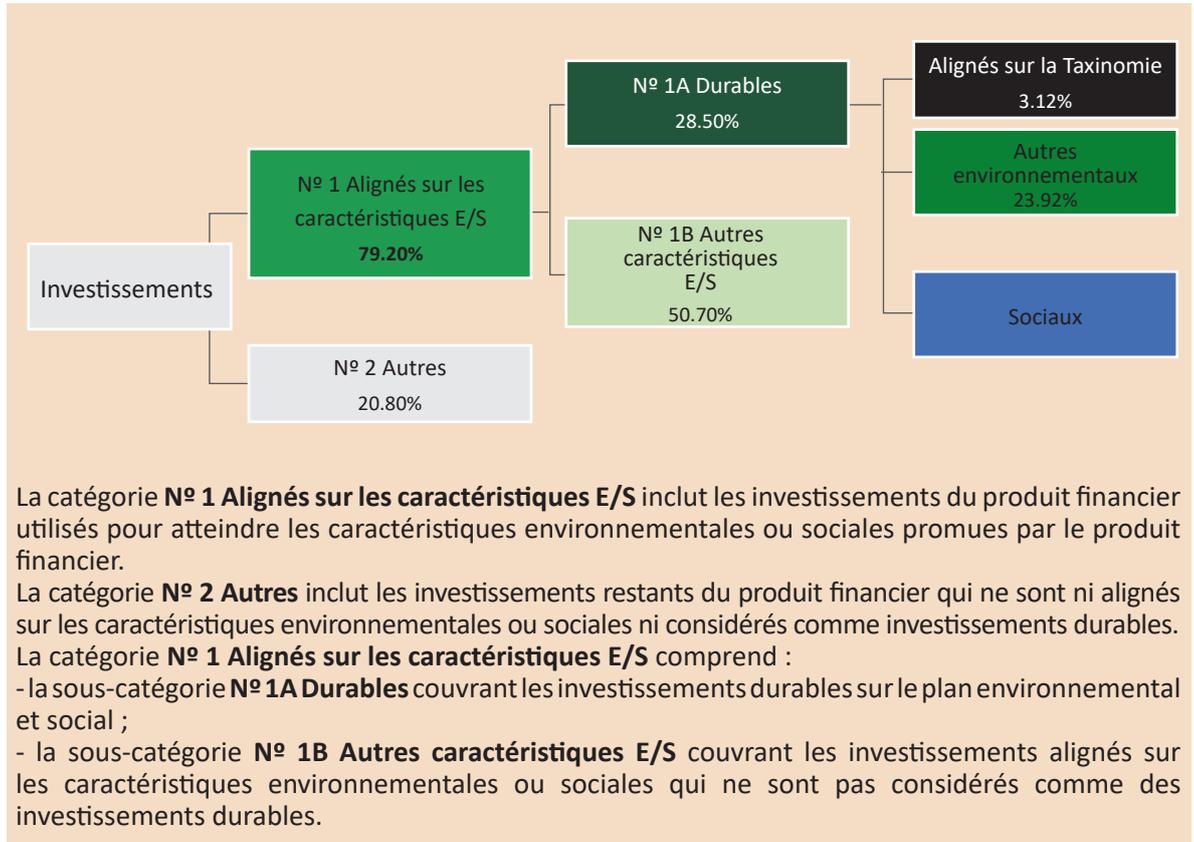

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.12% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

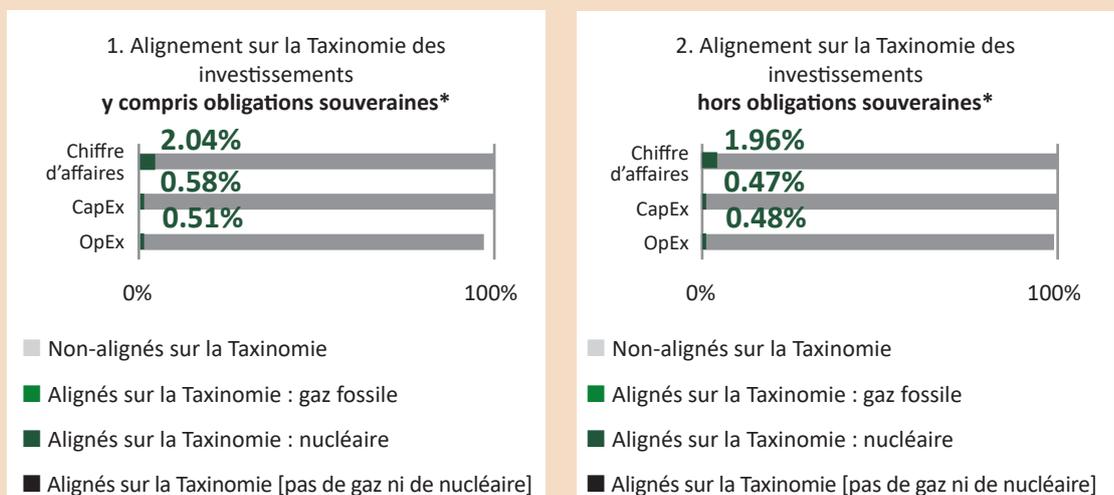

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

- Oui :
- Dans le gaz fossile Dans l'énergie nucléaire
- Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

 sont des investissements durables ayant un objectif environnemental **qui ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

 **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **23.92%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

 **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

 **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS PROTECT 90

Identifiant d'entité juridique :
22210055YWH87PNEL252

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La Taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S)

et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **47.09%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI NOTATION D**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.71 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.00 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières

et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

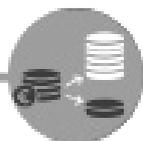

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et

liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

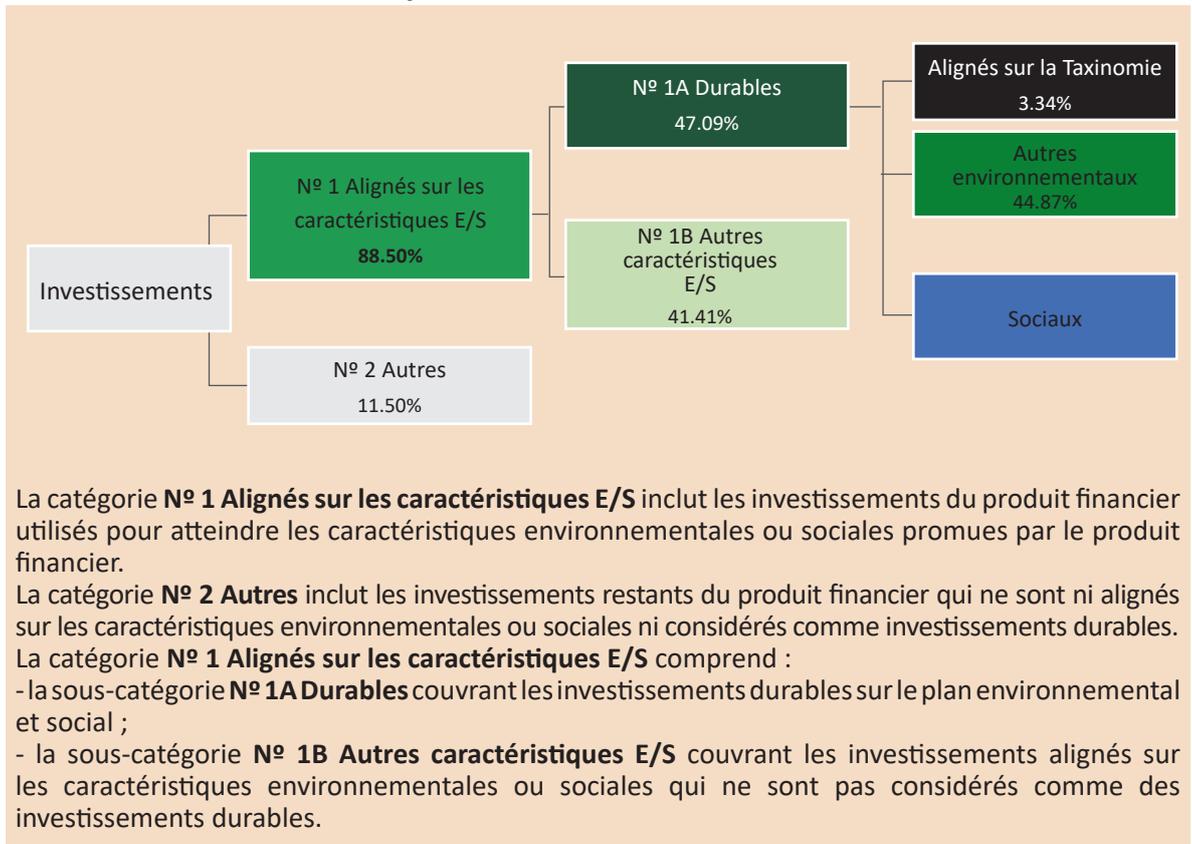

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du 01/07/2022 au 30/06/2023

Principaux investissements	Secteur	% des actifs	Pays

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Fonds communs de placement	67.38%
Finance	19.46%
Services de communication	2.91%
Énergie	2.83%
Services aux collectivités	2.75%

<i>Consommation discrétionnaire</i>	2.70%
<i>Immobilier</i>	0.99%
<i>Industrie</i>	0.98%
<i>Autres</i>	0.08%
<i>Forex</i>	-0.02%
<i>Liquidités</i>	-0.06%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.34% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

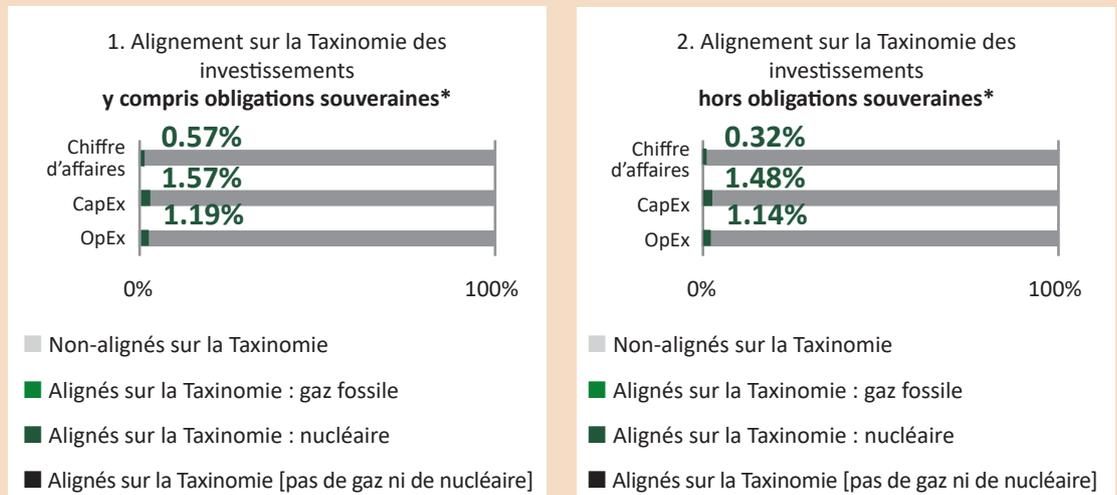

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **44.87%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

● sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CASH
EUR

Identifiant d'entité juridique :
5299002SSK89DA5VPJ96

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **50.85%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.66 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.04 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs

importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

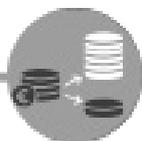

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour

améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

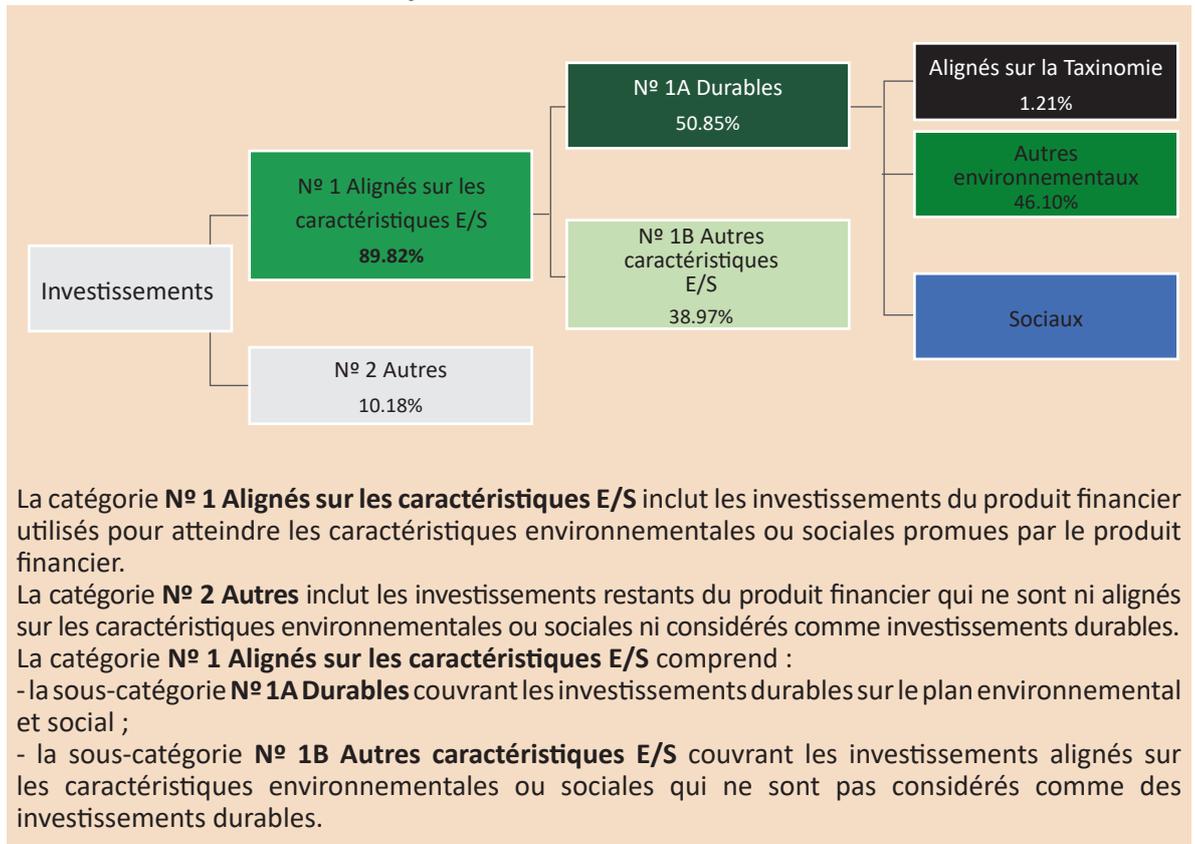

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2022 au 30/06/2023

Quelle était la proportion d'investissements liés à la durabilité ?

● Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements dans des actifs spécifiques.

● Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	% des actifs
Finance	53.11%
VALEURS DU TRÉSOR	20.21%
Autres	14.77%
Technologies de l'information	5.75%

<i>Consommation discrétionnaire</i>	4.05%
<i>Industrie</i>	3.77%
<i>Services de communication</i>	1.72%
<i>Biens de consommation de base</i>	1.71%
<i>Immobilier</i>	0.09%
<i>Liquidités</i>	-4.33%

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement

(CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation

(OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.21% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la taxinomie de l'UE¹ ?

Oui :

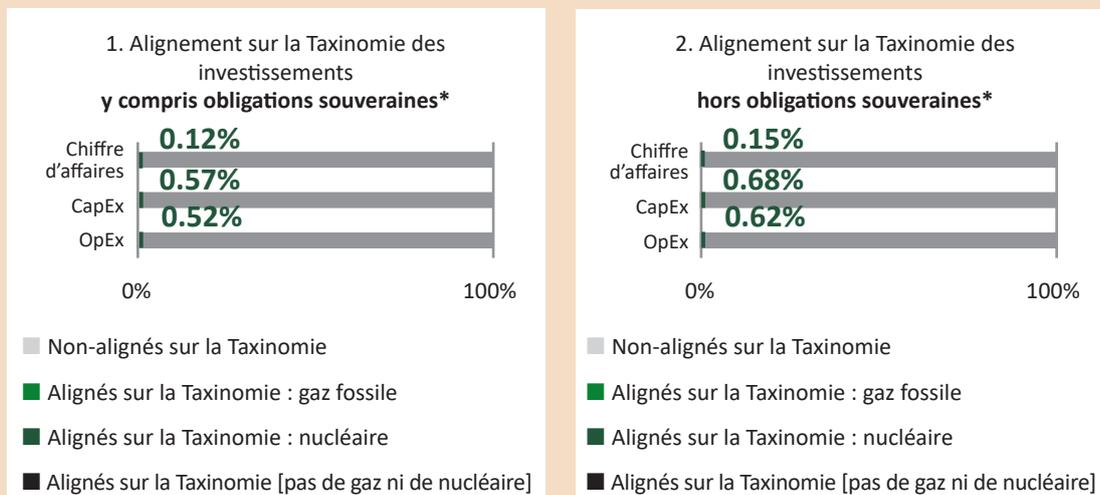

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **46.10%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Modèle d'informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CASH
USD

Identifiant d'entité juridique :
529900YRTK94MJYXUO62

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés détenues respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X

Non

Il a réalisé **des investissements durables ayant un objectif environnemental** : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé **des investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de **45.71%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité

évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.62 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.04 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes antérieures ?**

Les indicateurs de durabilité ci-dessus n'ont pas été comparés à des périodes antérieures dans la mesure où la réglementation n'était pas encore entrée en vigueur.

● **Quels étaient les objectifs des investissements durables que le produit financier tentait de partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs

importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre de DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité) ; et
- un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits humains ;
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits humains et à la lutte contre la corruption et les actes de corruption.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

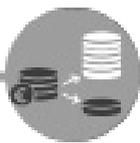

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

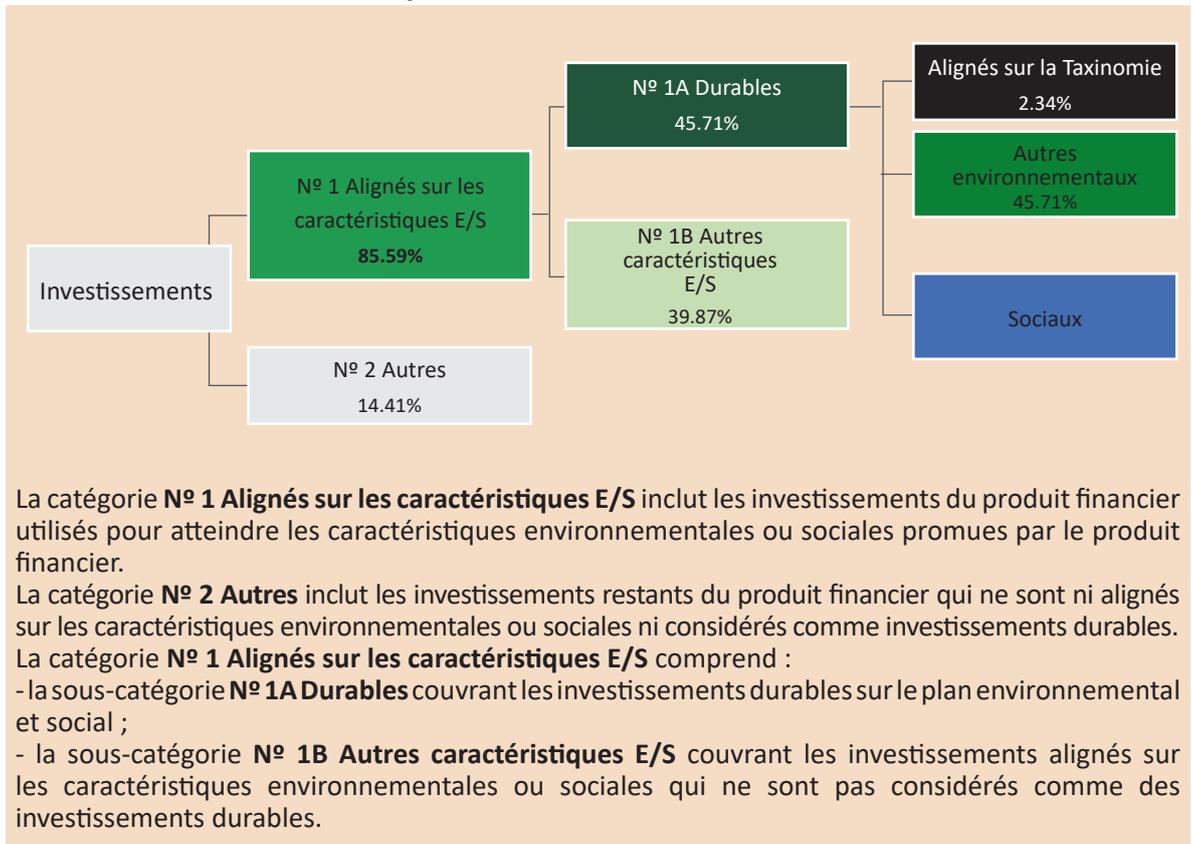

la liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :
du 01/07/2022 au 30/06/2023

Les activités alignées sur la Taxinomie

sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;

- des dépenses d'investissement (CapEx)

pour montrer les investissements verts réalisés par les sociétés bénéficiaires d'investissements, pour une transition vers une économie verte, par exemple ; et

- des dépenses d'exploitation (OpEx)

pour refléter les activités opérationnelles vertes des sociétés bénéficiaires d'investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.34% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué à l'obligation relative au changement climatique ou aux objectifs de réduction du changement climatique de la Taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

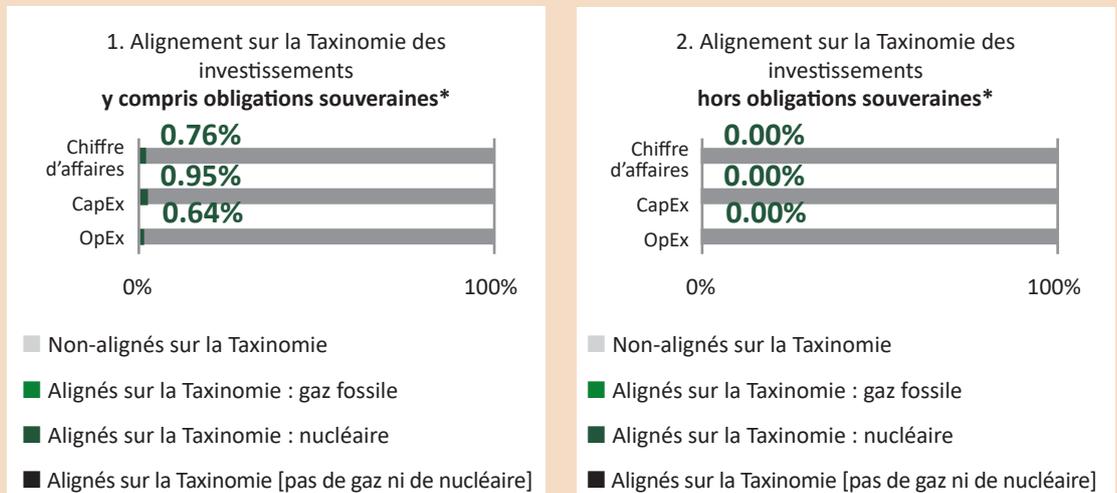

Dans le gaz fossile Dans l'énergie nucléaire

Non

Aucune donnée fiable concernant l'alignement sur les activités de gaz fossile et d'énergie nucléaire conformes à la Taxinomie de l'UE n'était disponible sur la période.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2023, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

● **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence antérieures ?**

Sur les périodes précédentes, la réglementation n'était pas encore en vigueur.

● **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 45.71% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte

des critères en matière d'activités économiques durables sur le plan environnemental visés par la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et les instruments aux fins de gestion de la liquidité et des risques du portefeuille. Cette catégorie peut également inclure les titres sans notation ESG pour lesquels les données nécessaires à l'évaluation de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires d'investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

● *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?*

Ce produit ne dispose pas d'un Indice de référence ESG.

● *Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?*

Ce produit ne dispose pas d'un Indice de référence ESG.
