¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **15.43%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 22.68% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EUROLAND EQUITY DYNAMIC MULTI FACTORS

Identifiant d'entité juridique : 549300GS11SOXBNLON64

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>75.19%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement MSCI EMU Index. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.157 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **1.072 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.109 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 1.03 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme ; et
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

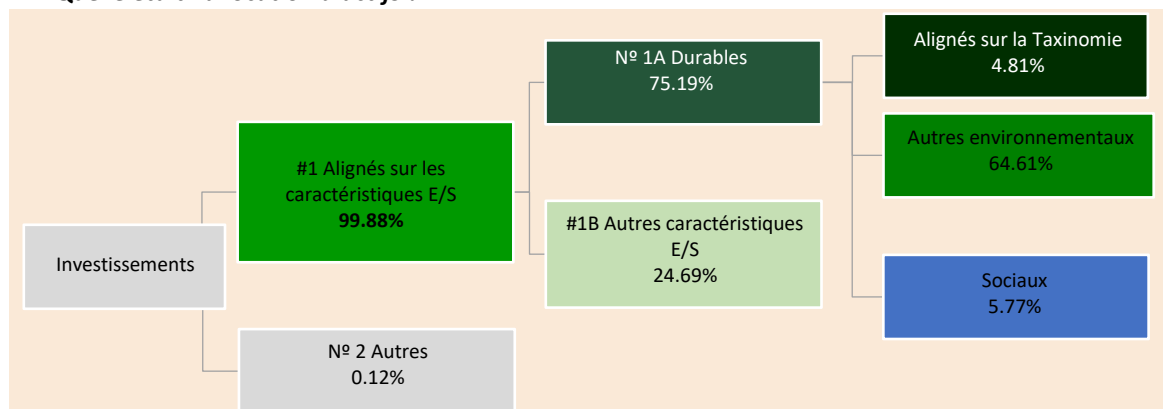

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
ASML HOLDING NV	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Pays-Bas	4.86%
SAP SE / XETRA	Technologies de l'information	Logiciels et services	Allemagne	4.75%
ALLIANZ SE-REG	Finance	Assurance	Allemagne	3.59%
BANCO SANTANDER SA MADRID	Obligations financières	Banques	Espagne	3.29%
TOTALENERGIES SE PARIS	Énergie	Pétrole, gaz et combustibles	France	3.05%
INDUSTRIA DE DISENO TEXTIL	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Espagne	2.26%
SAFRAN SA	Industrie	Biens d'équipement	France	2.20%
DEUTSCHE TELEKOM NAM (XETRA)	Services de communication	Télécommunications	Allemagne	2.09%
IBERDROLA SA	Services aux collectivités	Services aux collectivités – électricité	Espagne	2.07%
SIEMENS AG-REG	Industrie	Biens d'équipement	Allemagne	1.99%
BANCO BILBAO VIZCAYA ARGENTA	Obligations financières	Banques	Espagne	1.89%
KONINKLIJKE AHOLD DELHAIZE	Biens de consommation de base	Distribution et vente au détail de biens de consommation de base	Pays-Bas	1.77%
AIRBUS SE	Industrie	Biens d'équipement	Netherlands	1.66%
DEUTSCHE BOERSE AG	Finance	Services financiers	Allemagne	1.65%
AM EURO LIQUIDITY S-T RESP - Z (C)	Obligations financières	Fonds communs de placement	France	1.58%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 75.19% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	16.83%
Obligations financières	Banques	14.02%
Obligations financières	Assurance	7.78%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	7.21%
Technologies de l'information	Logiciels et services	6.21%
Énergie	Pétrole, gaz et combustibles	4.48%
Obligations financières	Services financiers	4.11%
Consommation discrétionnaire	Automobiles et composants	3.88%

<i>Services aux collectivités</i>	<i>Services aux collectivités – électricité</i>	3.63%
<i>Consommation discrétionnaire</i>	<i>Distribution et vente au détail de biens de consommation discrétionnaires</i>	3.54%
<i>Services aux collectivités</i>	<i>Services multiples aux collectivités</i>	3.45%
<i>Santé</i>	<i>Pharmacie, biotechnologie et sciences de la vie</i>	3.38%
<i>Services de communication</i>	<i>Télécommunications</i>	3.05%
<i>Biens de consommation de base</i>	<i>Distribution et vente au détail de biens de consommation de base</i>	2.01%
<i>Consommation discrétionnaire</i>	<i>Biens de consommation durables et habillement</i>	1.93%
<i>Biens de consommation de base</i>	<i>Alimentation, boissons et tabac</i>	1.82%
<i>Biens de consommation de base</i>	<i>Produits ménagers et personnels</i>	1.70%
<i>Obligations financières</i>	<i>Fonds communs de placement</i>	1.58%
<i>Industrie</i>	<i>Services commerciaux et professionnels</i>	1.41%
<i>Services de communication</i>	<i>Médias et loisirs</i>	1.11%

<i>Industrie</i>	<i>Transport</i>	0.98%
<i>Énergie</i>	<i>Équipement et services énergétiques</i>	0.87%
<i>Technologies de l'information</i>	<i>Matériel technologique et équipement</i>	0.87%
<i>Services aux collectivités</i>	<i>Services aux collectivités – gaz</i>	0.72%
<i>Consommation discrétionnaire</i>	<i>Services aux consommateurs</i>	0.72%
<i>Matériaux</i>	<i>Matériaux de construction</i>	0.68%

Matériaux	Chimie	0.64%
Immobilier	Sociétés d'investissement immobilier	0.21%
Autres	Autres	0.00%
Liquidités	Liquidités	0.12%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 4.81% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.22% et la part d'investissements dans les activités habilitantes était de 4.53%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 2.05%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 64.61% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.77% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Oui	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>67.67%</u> d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement MSCI EMU Index. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.085 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **1.072 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.057 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 1.03 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement

socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

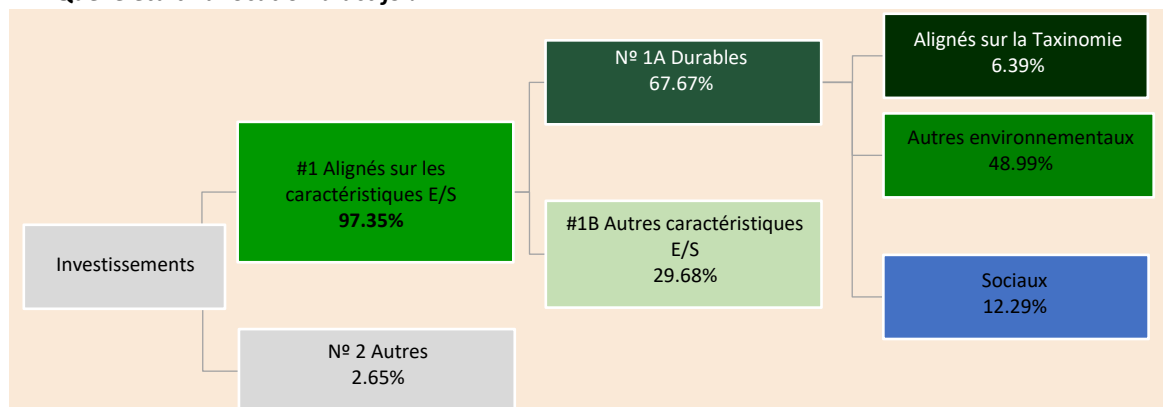

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TOTALENERGIES SE PARIS	Énergie	Pétrole, gaz et combustibles	France	1.31%
ENI SPA MILAN	Énergie	Pétrole, gaz et combustibles	Italie	1.31%
ORANGE	Services de communication	Télécommunications	France	1.29%
OMV AG	Énergie	Pétrole, gaz et combustibles	Autriche	1.29%
DANONE	Biens de consommation de base	Alimentation, boissons et tabac	France	1.28%
KONINKLIJKE KPN NV	Services de communication	Télécommunications	Pays-Bas	1.28%
TELEFONICA SA	Services de communication	Télécommunications	Espagne	1.13%
ELISA OYJ	Services de communication	Télécommunications	Finlande	1.13%
INFRASTRUTTURE WIRELESS ITALIANE SPA	Services de communication	Télécommunications	Italie	1.12%
DEUTSCHE TELEKOM NAM (XETRA)	Services de communication	Télécommunications	Allemagne	1.12%
COCA-COLA EUROPACIFIC PARTNE	Biens de consommation de base	Alimentation, boissons et tabac	Royaume-Uni	1.10%
KONINKLIJKE AHOLD DELHAIZE	Biens de consommation de base	Distribution et vente au détail de biens de consommation de base	Pays-Bas	1.09%
KERRY GROUP PLC-A	Biens de consommation de base	Alimentation, boissons et tabac	Irlande	1.08%
REPSOL SA	Énergie	Pétrole, gaz et combustibles	Espagne	1.08%
GALP ENERGIA -B	Énergie	Pétrole, gaz et combustibles	Portugal	1.08%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 67.67% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Services de communication	Télécommunications	8.57%
Services aux collectivités	Services aux collectivités – électricité	8.24%
Biens de consommation de base	Alimentation, boissons et tabac	7.52%
Énergie	Pétrole, gaz et combustibles	6.92%
Matériaux	Chimie	6.05%
Santé	Pharmacie, biotechnologie et sciences de la vie	5.92%
Industrie	Biens d'équipement	5.86%
Services de communication	Médias et loisirs	4.51%

<i>Liquidités</i>	<i>Liquidités</i>	<i>2.65%</i>

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 6.39% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

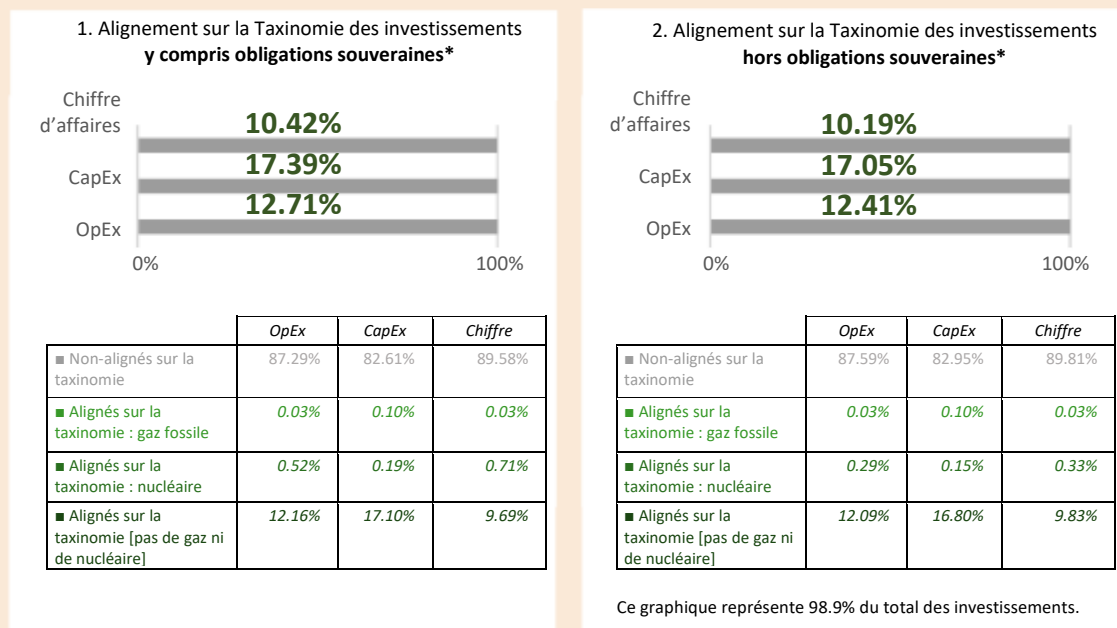

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 1.17% et la part d'investissements dans les activités habilitantes était de 5.30%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 3.87%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 48.99% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 12.29% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit n'a pas d'indice de référence ESG et est comparé à son univers de référence pour tous les thèmes environnementaux et sociaux.

Veillez vous référer à la question relative à la performance des indicateurs de durabilité.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 70.58% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement MSCI Europe Index. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.019 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.828 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.054 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.798 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

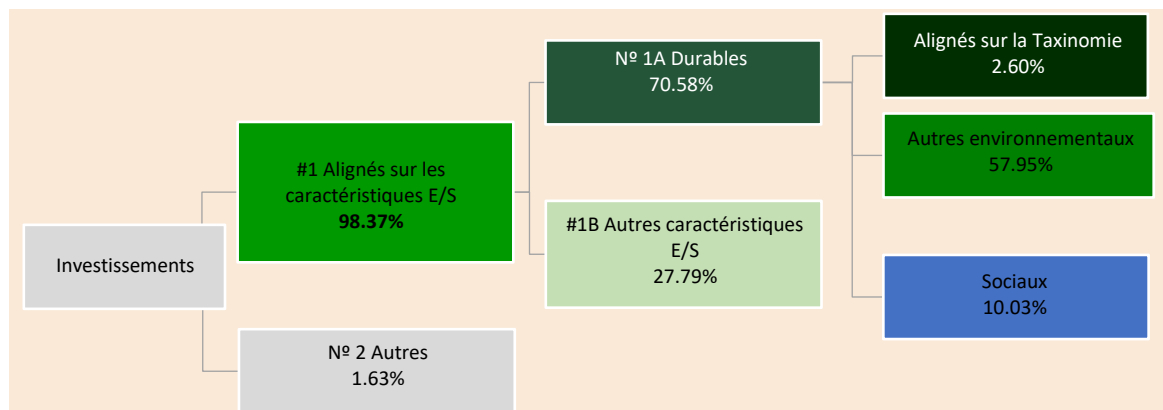

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
NOVARTIS AG-REG	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	2.42%
NATIONAL GRID PLC	Services aux collectivités	Services multiples aux collectivités	Royaume-Uni	2.20%
ROCHE HLDG AG-GENUSS	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	2.13%
DANONE	Biens de consommation de base	Alimentation, boissons et tabac	France	2.11%
SWISSCOM AG-REG	Services de communication	Télécommunications	Switzerland	2.04%
TOTALENERGIES SE PARIS	Énergie	Pétrole, gaz et combustibles	France	2.01%
GSK PLC	Santé	Pharmacie, biotechnologie et sciences de la vie	Royaume-Uni	2.01%
SAMPO OYJ-A SHS	Obligations financières	Assurance	Finlande	1.96%
SANOFI - PARIS	Santé	Pharmacie, biotechnologie et sciences de la vie	France	1.75%
SAP SE / XETRA	Technologies de l'information	Logiciels et services	Allemagne	1.68%
UNILEVER PLC (GBP)	Biens de consommation de base	Produits ménagers et personnels	Royaume-Uni	1.64%
KONINKLIJKE AHOLD DELHAIZE	Biens de consommation de base	Distribution et vente au détail de biens de consommation de base	Pays-Bas	1.62%
DEUTSCHE BOERSE AG	Finance	Services financiers	Allemagne	1.60%
NESTLE SA-REG	Biens de consommation de base	Alimentation, boissons et tabac	Suisse	1.56%
ANHEUSER-BUSCH INBEV SA/NV	Biens de consommation de base	Alimentation, boissons et tabac	Belgique	1.53%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 70.58% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Santé	Pharmacie, biotechnologie et sciences de la vie	14.74%
Biens de consommation de base	Alimentation, boissons et tabac	10.85%
Industrie	Biens d'équipement	10.14%
Obligations financières	Assurance	7.87%
Services de communication	Télécommunications	7.59%
Biens de consommation de base	Produits ménagers et personnels	5.23%
Obligations financières	Banques	3.96%
Industrie	Services commerciaux et professionnels	3.52%

<i>Énergie</i>	<i>Pétrole, gaz et combustibles</i>	<i>3.42%</i>

<i>Liquidités</i>	<i>Liquidités</i>	<i>1.52%</i>

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.60% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.04%	93.32%	95.11%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.28%	0.06%	0.38%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	4.68%	6.61%	4.51%

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.17%	93.46%	95.20%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.19%	0.05%	0.25%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	4.64%	6.49%	4.55%

Ce graphique représente 99.3% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.30% et la part d'investissements dans les activités habilitantes était de 3.27%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 3.03%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **57.95%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 10.03% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit n'a pas d'indice de référence ESG et est comparé à son univers de référence pour tous les thèmes environnementaux et sociaux.

Veillez vous référer à la question relative à la performance des indicateurs de durabilité.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EUROPEAN EQUITY DYNAMIC MULTI FACTORS

Identifiant d'entité juridique : 5493008YFOWLJMAHCR51

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>71.15%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EUROPE (15) (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.000 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.828 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.91 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.798 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

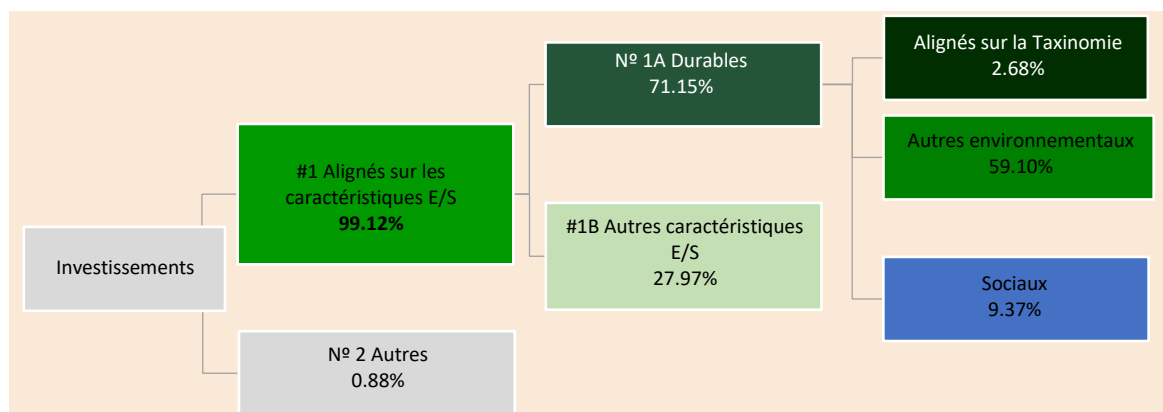

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
ASML HOLDING NV	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Pays-Bas	2.80%
ALLIANZ SE-REG	Finance	Assurance	Allemagne	2.50%
NOVARTIS AG-REG	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	2.06%
ROCHE HLDG AG-GENUSS	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	2.04%
SAP SE / XETRA	Technologies de l'information	Logiciels et services	Allemagne	2.01%
NOVO NORDISK A/S-B	Santé	Pharmacie, biotechnologie et sciences de la vie	Danemark	1.85%
NESTLE SA-REG	Biens de consommation de base	Alimentation, boissons et tabac	Suisse	1.75%
ZURICH INSURANCE GROUP AG	Obligations financières	Assurance	Switzerland	1.71%
BANCO SANTANDER SA MADRID	Obligations financières	Banques	Espagne	1.50%
ABB LTD-REG	Industrie	Biens d'équipement	Suisse	1.48%
UNILEVER PLC AMSTERDAM	Biens de consommation de base	Produits ménagers et personnels	Royaume-Uni	1.44%
DEUTSCHE TELEKOM NAM (XETRA)	Services de communication	Télécommunications	Allemagne	1.42%
SHELL PLC EUR	Énergie	Pétrole, gaz et combustibles	Royaume-Uni	1.38%
HSBC HOLDING PLC GBP	Obligations financières	Banques	Royaume-Uni	1.33%
3I GROUP PLC	Obligations financières	Services financiers	Royaume-Uni	1.26%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 71.15% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	17.55%
Obligations financières	Banques	12.29%
Santé	Pharmacie, biotechnologie et sciences de la vie	10.25%
Obligations financières	Assurance	7.67%
Biens de consommation de base	Alimentation, boissons et tabac	5.14%
Énergie	Pétrole, gaz et combustibles	3.96%
Obligations financières	Services financiers	3.94%

<i>Technologies de l'information</i>	<i>Semi-conducteurs et équipement pour semi-conducteurs</i>	3.30%
<i>Biens de consommation de base</i>	<i>Produits ménagers et personnels</i>	2.93%

<i>Liquidités</i>	<i>Liquidités</i>	<i>0.88%</i>

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.68% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.19% et la part d'investissements dans les activités habilitantes était de 2.60%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.08%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 59.10% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 9.37% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 42.07% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI World Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.082 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.185 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.021 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.179 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

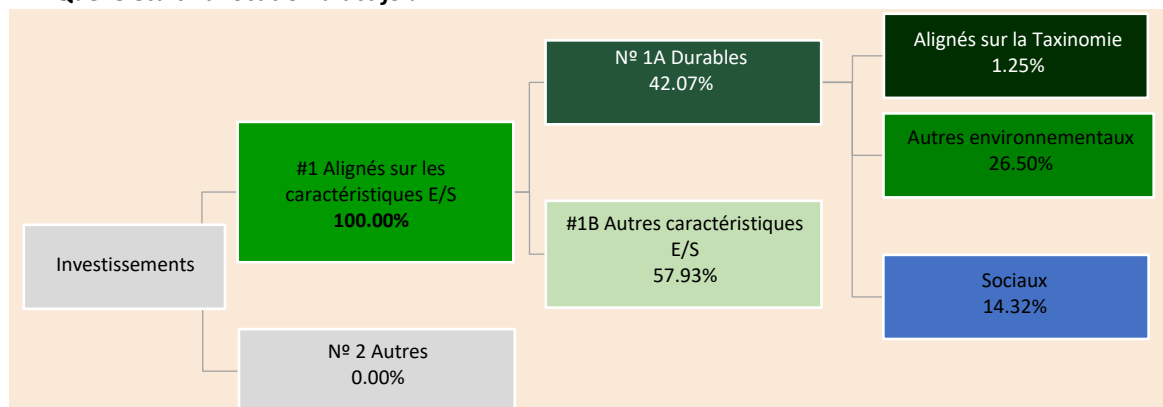

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
NOVARTIS AG-REG	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	1.98%
JOHNSON & JOHNSON	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	1.91%
PROCTER & GAMBLE CO/THE	Biens de consommation de base	Produits ménagers et personnels	États-Unis	1.55%
A-F CASH USD - Z USD	Obligations financières	Fonds communs de placement	Luxembourg	1.42%
KDDI CORP	Services de communication	Télécommunications	Japon	1.41%
AMUNDI MMST (USD)-OV	Obligations financières	Fonds communs de placement	Luxembourg	1.41%
TAKEDA PHARMACEUTIC	Santé	Pharmacie, biotechnologie et sciences de la vie	Japon	1.32%
ROPER TECHNOLOGIES INC	Technologies de l'information	Logiciels et services	États-Unis	1.29%
CHUBB LTD	Obligations financières	Assurance	Switzerland	1.29%
ABBOTT LABORATORIES	Santé	Matériel et services de santé	États-Unis	1.28%
IBERDROLA SA	Services aux collectivités	Services aux collectivités – électricité	Espagne	1.25%
VERIZON COMMUNICATIONS INC	Services de communication	Télécommunications	États-Unis	1.20%
SOFTBANK CORP	Services de communication	Télécommunications	Japon	1.18%
HALEON PLC	Santé	Pharmacie, biotechnologie et sciences de la vie	Royaume-Uni	1.14%
CENCORA INC	Santé	Matériel et services de santé	États-Unis	1.13%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 42.07% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Santé	Pharmacie, biotechnologie et sciences de la vie	11.32%
Services de communication	Télécommunications	10.25%
Biens de consommation de base	Alimentation, boissons et tabac	8.82%
Technologies de l'information	Logiciels et services	8.17%
Santé	Matériel et services de santé	6.47%
Industrie	Services commerciaux et professionnels	5.34%
Industrie	Biens d'équipement	5.03%

<i>Biens de consommation de base</i>	<i>Produits ménagers et personnels</i>	4.42%

Liquidités	Liquidités	-0.76%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.25% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.11% et la part d'investissements dans les activités habilitantes était de 1.78%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.87%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 26.50% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 14.32% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS GLOBAL EQUITY DYNAMIC MULTI FACTORS

Identifiant d'entité juridique : 549300YXILW3014Y0587

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 39.92% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI World (dividend reinvested) Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.076 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.185 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.079 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.179 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

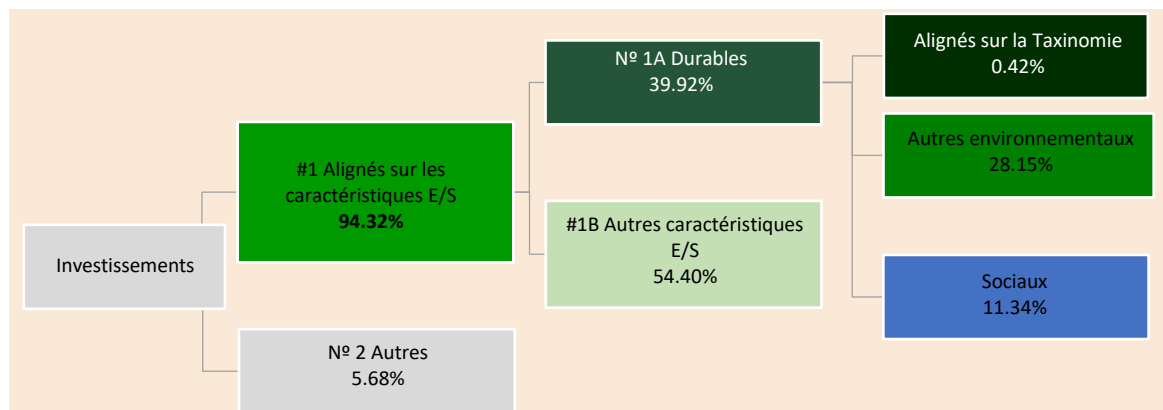

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
NVIDIA CORP	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	5.83%
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	3.68%
APPLE INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	3.53%
META PLATFORMS INC-CLASS A	Services de communication	Médias et loisirs	États-Unis	2.68%
AMAZON.COM INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	2.02%
COMCAST CORP-CLASS A	Services de communication	Médias et loisirs	États-Unis	1.46%
GILEAD SCIENCES INC	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	1.46%
CHUBB LTD	Obligations financières	Assurance	Switzerland	1.44%
TJX COMPANIES INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	1.41%
PFIZER INC	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	1.40%
CITIGROUP INC	Obligations financières	Banques	États-Unis	1.35%
AT&T INC	Services de communication	Télécommunications	États-Unis	1.17%
APPLIED MATERIALS INC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	1.09%
MASTERCARD INC-CL A	Obligations financières	Services financiers	États-Unis	1.08%
AUTOMATIC DATA PROCESSING	Industrie	Services commerciaux et professionnels	États-Unis	1.06%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 39.92% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	10.41%
Obligations financières	Banques	8.15%
Services de communication	Médias et loisirs	7.72%
Technologies de l'information	Logiciels et services	7.10%
Santé	Pharmacie, biotechnologie et sciences de la vie	6.03%
Industrie	Biens d'équipement	5.84%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	5.53%

<i>Technologies de l'information</i>	<i>Matériel technologique et équipement</i>	5.42%

<i>Liquidités</i>	<i>Liquidités</i>	4.91%

Aux fins d’observer la Taxinomie de l’UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d’ici fin 2035. Pour l’**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d’autres activités de contribuer de manière substantielle à la réalisation d’un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n’existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d’émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l’UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s’est pas engagé à réaliser des investissements alignés sur la Taxinomie de l’UE, au cours de la période sous revue, il a cependant investi 0.42% dans des investissements durables alignés sur la Taxinomie de l’UE. De tels investissements ont contribué aux objectifs d’atténuation du changement climatique de la taxinomie de l’UE. L’alignement des sociétés bénéficiaires d’investissements sur les objectifs de la Taxinomie de l’UE susmentionnés est évalué à l’aide du chiffre d’affaires (ou des revenus) et/ou des données d’utilisation des produits des obligations vertes.

Le pourcentage communiqué d’alignement des investissements du fonds sur la Taxinomie de l’UE n’a pas été audité par le réviseur d’entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l’énergie nucléaire qui sont conformes à la Taxinomie de l’UE¹ ?**

Oui :

Dans le gaz fossile

Dans l’énergie nucléaire

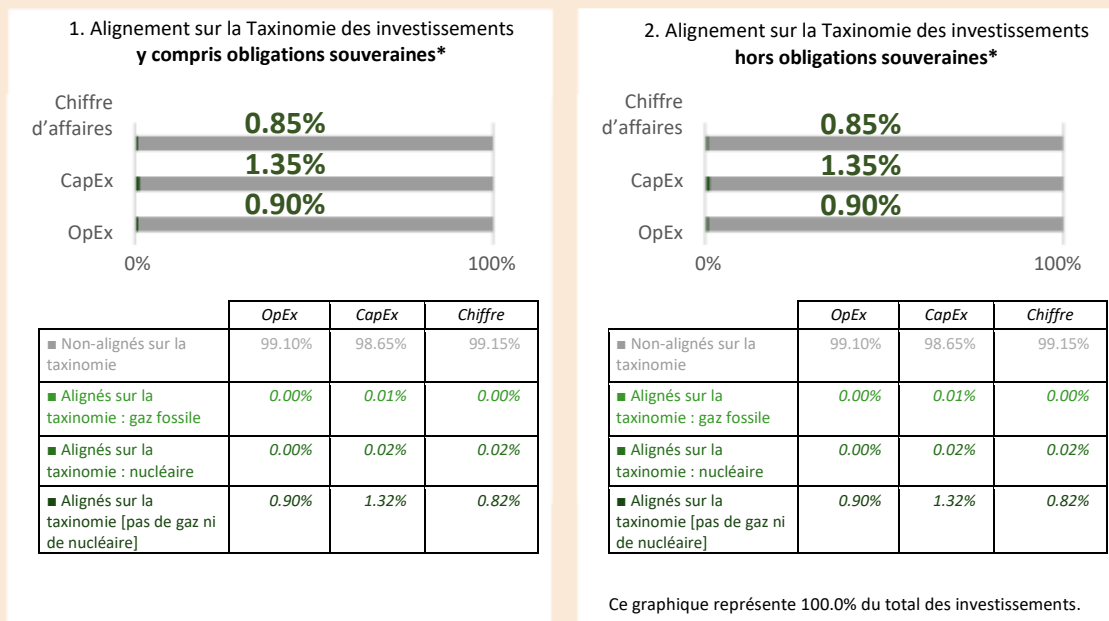

Non

¹ Les activités liées au gaz fossile et/ou à l’énergie nucléaire ne seront conformes à la Taxinomie de l’UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l’UE. L’intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l’énergie nucléaire conformes à la Taxinomie de l’UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.07% et la part d'investissements dans les activités habilitantes était de 0.43%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.17%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **28.15%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 11.34% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS EUROPEAN
CONVERTIBLE BOND

Identifiant d'entité juridique :
529900644PSS3LALW918

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 61.00% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **REFINITIV EUROPEAN CONVERTIBLE HEDGED (EUR) INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.774 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.768 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.037 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.675 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

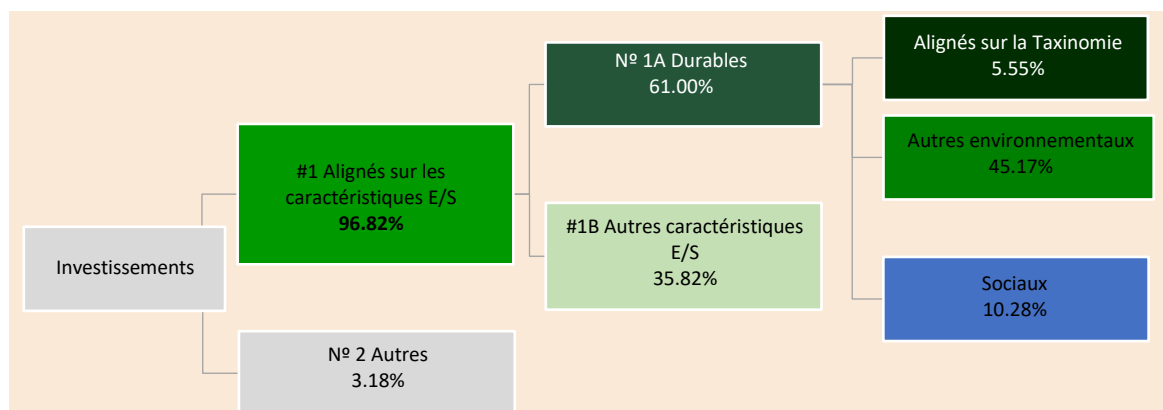

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TUIGR 1.95% 07/31 EUR CV	Consommation discrétionnaire	Services aux consommateurs	Allemagne	6.16%
SCHNEIDER ELEC 1.97% 11/30 CV	Industrie	Biens d'équipement	France	5.12%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 61.00% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	23.51%
Consommation discrétionnaire	Services aux consommateurs	12.53%
Immobilier	Gestion et promotion immobilière	9.62%
Industrie	Services commerciaux et professionnels	7.17%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 5.55% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.47% et la part d'investissements dans les activités habilitantes était de 4.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 3.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **45.17%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 10.28% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
Amundi Funds Montpensier Global Convertible Bond

Identifiant d'entité juridique :
529900LZ9GLOP969J692

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Oui	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : ___% de l'actif net du fonds <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : ___% de l'actif net du fonds	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion d'investissements durables de 35.7% <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Une société est identifiée comme durable par le gestionnaire d'actifs, par le biais de la méthodologie décrite dans la Politique ESG disponible sur le site [Web montpensier-arbevel.com](http://montpensier-arbevel.com).

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le fonds intègre des facteurs de durabilité dans son processus d'investissement, comme indiqué plus en détail ci-dessous et dans le chapitre « Stratégie d'investissement » du Prospectus.

Les critères ESG sont pris en compte par le fonds afin d'unifier la performance financière et le souhait d'influencer l'émetteur de manière positive, si possible, en matière de performance ESG, en encourageant les entreprises à améliorer l'intégration de critères ESG à leurs activités et en valorisant les bonnes pratiques.

La société de gestion a appliqué la politique décrite dans le Document précontractuel pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier alinéa du Règlement (UE) 2020/852.

36.84% du portefeuille investi à l'exclusion de la catégorie trésorerie et équivalents de trésorerie et de tout organisme de placement collectif (soit 35.66% de l'actif net du fonds) sont constitués d'investissements durables.

L'empreinte carbone et l'intensité carbone moyenne pondérée du portefeuille sont considérablement inférieures à celles de l'indice.

Les proportions restent les mêmes en ajoutant les émissions de catégorie Scope 3: l'intensité et l'empreinte carbone du portefeuille sont nettement inférieures à celles de l'indice.

Pour rappel, le Niveau 3 Catégorie 1 prenait auparavant en compte les émissions des fournisseurs directs du produit final, tandis que le Niveau 3 en Amont a un champ d'application plus large, qui prend en compte les émissions liées au transport et à la distribution des produits achetés par l'entreprise entre ses fournisseurs de Catégorie 1 et ses opérations, ainsi que d'autres services tels que la logistique entrante, la logistique sortante, le transport et la distribution entre les sites de l'entreprise.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Les indicateurs utilisés pour démontrer que le compartiment a promu des caractéristiques environnementales et/ou sociales sont les suivants :
 Part des investissements conformes à la politique d'exclusion de Montpensier Arbevel : 100 %.
 Part des investissements ayant une note B ou supérieure (sur une échelle allant de CCC à AAA) : 100 %.
 Part des investissements impliqués dans une controverse de niveau « Rouge » selon MSCI : 0 %.
 Part des investissements soumis à la méthodologie Montpensier Arbevel Industry Contributor, y compris une analyse qualitative de type « best-in-class » : 100 %.

Indépendance du conseil d'administration : pourcentage de sociétés en portefeuille identifiées dont la majorité des administrateurs sont indépendants des employés, des actionnaires majoritaires et des gouvernements.

Rémunération liée aux objectifs ESG : pourcentage de sociétés en portefeuille identifiées comme ayant intégré les critères ESG dans la rémunération de leurs cadres dirigeants. Cette mesure est basée sur les rapports publiés par les sociétés. Elle vise strictement à relever si ces éléments sont ou non inclus dans le calcul de la rémunération variable et ne permet pas de vérifier leur efficacité.

Conformité au Pacte mondial : Pourcentage de sociétés en portefeuille identifiées comme respectant les principes du Pacte mondial des Nations unies

- ... et par rapport aux périodes précédentes ?
Voir plus haut.
- **Quels étaient les objectifs des investissements durables que le produit financier avait partiellement réalisés, et comment l'investissement durable a-t-il contribué à ces objectifs ?**
L'objectif des investissements durables partiellement réalisés par le Compartiment était de contribuer et de s'aligner sur un Objectif de développement durable, tel que défini par les Nations Unies.
La méthodologie de Montpensier Arbevel pour identifier les investissements durables repose sur les composantes suivantes :
- Évaluer la contribution à l'objectif de durabilité, qui repose sur une approche d'obligation de moyens, dans le but d'identifier l'implication des entreprises, à partir de critères environnementaux (E) et/ou sociaux (S), ainsi que sur une approche basée sur les Objectifs de développement durable (ODD) et une exposition aux activités durables, déterminée via une définition interne des « activités définies comme durables » ;
- Évaluer le respect des principes de bonne gouvernance, sur la base de notre analyse de l'alignement des intérêts entre la direction, les actionnaires et les parties prenantes en général ;
- Évaluer le principe consistant à « ne pas causer de préjudice important » (Do Not Significantly Harm, « DNSH »), qui repose sur des exclusions sectorielles, les Principales incidences négatives (PAI) et la surveillance des controverses, y compris en termes de gouvernance.
Il est conseillé de vous référer également au Prospectus ainsi qu'au document pré-contractuel SFDR annexés au prospectus de l'OPC, disponibles sur le site Web de la société de gestion.
- **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**
Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?
L'évaluation du principe de ne pas causer de préjudice important (« Do no significant harm » ou « DNSH » en anglais), repose sur :
- Notre analyse ISR Étape 1 : l'exclusion des entreprises impliquées dans des activités controversées : fabrication d'armes, extraction de charbon, tabac, divertissement pour adultes, jeux d'argent, OGM et huile de palme.
- Étape 2, c'est-à-dire l'exclusion des entreprises notées « CCC » ou « Vigilance Controverse Rouge » par MSCI ESG Research ;

- Prise en compte des PAI dans une approche qualitative de l'analyse ISR des titres. Les indicateurs relatifs aux principales incidences négatives des décisions d'investissement sur les facteurs de durabilité sont énumérés en annexe. De plus, les entreprises présentant une analyse d'impact environnemental ou social MIA (Montpensier Impact Assessment) négative, ou qui sont des piliers environnementaux (E) ou sociaux (S), sont considérées comme dérogeant au principe DNSH. Vous pouvez aussi vous référer au Prospectus ainsi qu'au document pré-contractuel SFDR annexés au prospectus de l'OPC, disponibles sur le site Web de la société de gestion.

Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :

Nous excluons de notre univers d'investissement les entreprises qui ne sont pas alignées sur certaines normes et conventions internationales, notamment le Pacte mondial des Nations unies (PMNU), les Principes directeurs de l'OCDE à l'intention des entreprises multinationales, les règles de l'Organisation internationale du travail (OIT) et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme (UNGPBHR).

Les entreprises qui font l'objet d'une controverse de niveau « Rouge » sont exclues de l'univers d'investissement. Parmi ces controverses de niveau « Rouge » figurent des entreprises qui ne respectent pas le Pacte mondial des Nations unies (droits de l'homme, normes du travail, environnement et lutte contre la corruption).

La taxinomie de l'UE définit un principe consistant à « Ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxinomie ne doivent pas causer de préjudice important aux objectifs de la taxinomie de l'UE, qui s'accompagne de critères de l'UE spécifiques.

Le principe consistant à « Ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'Union pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'Union en matière d'activités économiques durables sur le plan environnemental.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Nous tenons compte des principaux indicateurs relatifs aux incidences négatives dans la politique d'exclusions sectorielles et normatives, l'analyse des pratiques de bonne gouvernance (en nous appuyant sur l'analyse exclusive « Montpensier Governance Flag » ou MGF), l'analyse qualitative exclusive de la contribution des entreprises à la transition environnementale et à la transition solidaire (analyse d'impact « Montpensier Impact Assessment » ou MIA et analyse de la contribution des entreprises par secteur « Montpensier Industry Contributor » ou MIC), et/ou dans l'analyse des éco-activités qui détermine la contribution à un ou plusieurs Objectifs de développement durable (ODD) de l'ONU.

La pertinence et la couverture de ces indicateurs varient selon le secteur et la région dans lesquels exercent les entreprises. Les indicateurs relatifs aux principales incidences négatives des décisions d'investissement sur les facteurs de durabilité sont énumérés en annexe.

Les informations concernant les objectifs environnementaux, sociaux et de gouvernance (ESG) sont consultables sur le site Web de la société de gestion : <https://www.montpensier-arbevel.com/sites/default/files/public/documents/politique-esg.pdf>

Le principe consistant à « Ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Les investissements sous-jacents à la portion restante de ce produit financier ne tiennent pas compte des critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

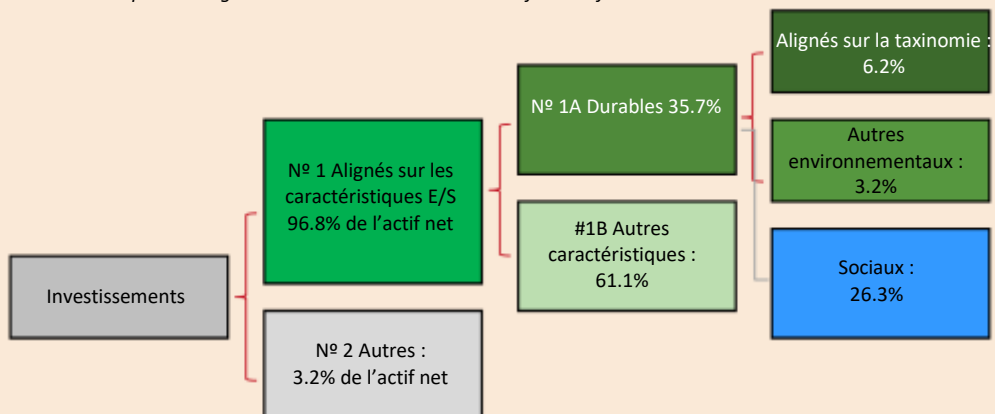

Principaux investissements	Secteur	% des actifs	Pays
Ping An Insurance - 0.875% - 07/2029	Assurance	2.37%	Chine
Uber Technologies Inc - 0.875% - 12/2028	Produits de consommation et services	2.27%	États-Unis
Schneider Electric - 1.97% - 11/2030	Biens et services industriels	1.97%	France
Anta Sports Products - 0% - 12/2029	Produits de consommation et services	1.66%	Caïmanes, Îles
Vinci - 0.7% - 02/2030	Construction et matériaux	1.66%	France
Trip.com - 0.75% - 06/2029	Voyages et loisirs	1.62%	Caïmanes, Îles
Coinbase Global Inc - 0.25% - 04/2030	Services financiers	1.56%	États-Unis
Legrand - 1.5% - 06/2033	Biens et services industriels	1.56%	France
Microstrategy Inc - 0% - 12/2029	Technologie	1.50%	États-Unis
Live Nation Entertainment - 2.875% - 01/2030	Voyages et loisirs	1.46%	États-Unis
MKS Instruments Inc. - 1.25% - 06/2030	Biens et services industriels	1.35%	États-Unis
Eni - 2.95% - 09/2030	Énergie	1.31%	Italie
Citigroup (Airbus) - 0.8% - 05/2030	Biens et services industriels	1.29%	Pays-Bas
LEG Immobilien - 1% - 09/2030	Immobilier	1.28%	Allemagne
Microstrategy Inc - 0% - 03/2030	Technologie	1.21%	États-Unis
Pourcentage total des 15 premières lignes par rapport à l'actif net du fonds au 30/06/2025		24.1%	

Quelle était la proportion d'investissements liés à la durabilité ?

- **Quelle était l'allocation d'actifs ?**

La base de calcul des pourcentages mentionnés ci-dessous est l'actif net du fonds.

La catégorie #1 Alignés sur les caractéristiques E/S inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.
 La catégorie N° 2 Autres inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.
 La catégorie N° 1 Alignés sur les caractéristiques E/S comprend :
 - la sous-catégorie N° 1A Durables couvrant les investissements durables sur le plan environnemental et social ;
 - la sous-catégorie N° 1B Autres caractéristiques E/S couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

	% des actifs sous gestion Investissements durables	% des actifs sous gestion Portefeuille investi
Technologie	6.7%	23.9%

Classification « Industry Classification Benchmark » (ICB) - 19 supersecteurs

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxinomie de l'UE ?

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les données relatives à l'implication dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la taxinomie sont déterminées compte tenu uniquement des données publiées par les entreprises.

Les données concernant l'implication des entreprises dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la taxinomie ne sont pas encore disponibles.

À titre d'information, les actions d'entreprises identifiées comme impliquées dans des activités liées à l'énergie fossile et/ou nucléaire représentent 10.62% du portefeuille, soit 7.87% du portefeuille pour les actions d'entreprises tirant une partie de leur chiffre d'affaires de l'énergie nucléaire et 3.87% pour les actions d'entreprises impliquées dans l'énergie fossile.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :
 - du chiffre d'affaires, pour refléter le caractère écologique actuel des

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.
 Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines. Le chiffre d'affaires est estimé par MSCI ESG Research conformément à la méthodologie décrite ci-dessous. Les données de CapEx et OpEx ne prennent en compte que les données publiées par les entreprises. Le pourcentage d'alignement sur la taxinomie indiqué ci-dessus représente la contribution moyenne pondérée du portefeuille à l'alignement sur la taxinomie européenne (sur la base du chiffre d'affaires, des dépenses d'investissement - CapEx - ou des dépenses d'exploitation - OpEx -) de tous les investissements durables, que leur objectif soit environnemental ou social.

Alignement sur la taxinomie européenne

L'alignement sur la taxinomie européenne est estimé par MSCI ESG Research, à partir du pourcentage maximal des ventes d'une entreprise découlant de produits et services répondant à des objectifs environnementaux, sur la base du cadre MSCI Sustainable Impact Metrics.

Le pourcentage des ventes généré par les produits et services qui répondent aux objectifs environnementaux est réduit à 0 pour les entreprises qui ne respectent pas les critères de la taxinomie européenne consistant à « ne pas causer de préjudice important » et à adopter des « garanties sociales minimales ».

Le même principe s'applique aux entreprises dont le chiffre d'affaires découle à hauteur de 5% ou plus de la fourniture, distribution ou vente au détail de produits issus du tabac, et aux entreprises impliquées dans les armes controversées.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Le fonds ne dispose pas d'une proportion minimale d'investissements dans des activités transitoires ou habilitantes.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

	30/06/25	28/06/24	30/06/23
Alignement sur la taxinomie européenne	% des actifs sous gestion	% des actifs sous gestion	% des actifs sous gestion
Amundi Funds Montpensier Global Convertible	6.1%	8.4%	9.5%

Le pourcentage indiqué ci-dessus représente la contribution du portefeuille à l'alignement sur la taxinomie européenne (sur la base du chiffre d'affaires) de tous les investissements durables, que leur objectif soit environnemental ou social.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

À la date du présent rapport, 9.4% de l'actif net étaient investis dans des investissements durables ayant un objectif environnemental, tandis que 3.2% de l'actif net n'étaient pas alignés sur la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

À la date du présent rapport, 26.3% de l'actif net étaient investis dans des investissements durables ayant un objectif social.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

La trésorerie, les équivalents de trésorerie et les fonds ou dérivés de couverture représentent 3.2% de l'actif net du fonds et n'offrent pas de garanties environnementales ou sociales minimales.

... sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

La société de gestion a appliqué la politique décrite dans les informations précontractuelles pour les produits financiers visés à l’Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l’Article 6, premier alinéa du Règlement (UE) 2020/852.

La politique en matière d’engagement des actionnaires de Montpensier Arbevel se compose d’une politique de vote et d’une politique d’engagement.

L’exercice de droits de vote est un élément important du dialogue avec les émetteurs. Il encourage les bonnes pratiques de gouvernance et promeut l’éthique professionnelle.

Montpensier Arbevel considère que l’exercice des droits de vote fait partie intégrante du processus de gestion des investissements et qu’il doit être effectué dans l’intérêt de ses clients. La politique en matière de droits de vote de Montpensier Arbevel vise la promotion de la valorisation à long terme de ses investissements dans le fonds.

Pour exercer les droits de vote attachés aux titres détenus par le fonds, les gestionnaires du fonds se réfèrent aux principes concernant les recommandations de gouvernance d’entreprise publiées par ISS Governance dans sa Politique de durabilité. ISS couvre toutes les entreprises détenues dans les portefeuilles des fonds gérés par Montpensier Arbevel.

Les réglementations en matière de gouvernance exigent aux gestionnaires de portefeuille d’exercer leurs fonctions de manière indépendante, en particulier concernant les émetteurs, et dans le strict intérêt des porteurs de parts ou actionnaires. Les gestionnaires de portefeuille sont particulièrement attentifs aux décisions susceptibles de nuire aux intérêts des porteurs de parts ou actionnaires.

La politique complète en matière de vote ainsi que le dernier rapport sur l’exercice des droits de vote sont disponibles sur notre site Web.

Montpensier Arbevel complète sa politique de vote par une politique d’engagement.

Les équipes de gestion du fonds sont encouragées à soulever toute question qui se pose auprès des entreprises au cours des réunions, en particulier lorsque les problèmes en matière d’ESG ne sont pas suffisamment pris en compte, afin d’encourager ces entreprises à améliorer leurs pratiques concernant les questions environnementales, sociales et de gouvernance, qui constituent des facteurs de croissance durable.

Les gestionnaires du fonds, assistés par les analystes ISR, établiront une entente positive et constructive à moyen et long termes avec les entreprises détenues dans le portefeuille.

Cette entente comporte de multiples facettes :

- ✓ Contacts avec l’entreprise ;
- ✓ Communication des intentions de vote des gestionnaires du fonds à la société avant l’assemblée générale.

Outre les initiatives d’engagement directes que nous menons généralement avec les petites et moyennes entreprises, Montpensier Arbevel participe également à des actions d’engagement par groupe mises en œuvre par ISS dans le cadre de son programme ISS ESG spécialement pour les grandes entreprises.

Ce dialogue est mis en place avec plusieurs objectifs :

- ✓ Encourager les entreprises à mettre en place un engagement ESG ;
- ✓ Encourager les entreprises à communiquer sur leurs pratiques ESG.

La politique complète en matière d’engagement ainsi que le dernier rapport sur l’engagement sont disponibles sur notre site Web. Le dernier rapport d’engagement est disponible à l’adresse suivante : https://www.montpensier-arbevel.com/sites/default/files/public/documents/engagement_rapport.pdf

Quelles ont été les performances de ce produit financier par rapport à l’indice de référence de durabilité ?

Un indice de référence est un indice qui sert à mesurer si le produit financier atteint l’objectif de durabilité.

Le fonds n’utilise pas d’indice de référence durable. Sa performance en matière de durabilité est comparée à celle de son indice de référence : Refinitiv Global Conv Focus EUR

- ***En quoi l’indice de référence diffère-t-il d’un indice du marché général ?***

Principales incidences négatives des décisions d'investissement sur les facteurs de durabilité

Amundi Funds Montpensier Global Convertible

Les indicateurs relatifs aux principales incidences négatives sur les facteurs de durabilité couvre une période de référence allant du 1er janvier 2024 au 31 décembre 2024. En vertu de l'article 6 du Règlement Délégué 2022/1288, l'incidence correspond à la moyenne des incidences aux 31 mars, 30 juin, 30 septembre et 31 décembre de la période. Les calculs ont été réalisés sur la base des portefeuilles à fin de trimestre et des données disponibles au 31 décembre.

Description des principales incidences négatives sur les facteurs de durabilité

[Informations prévues à l'article 6 du règlement délégué (UE) 2022/1288]

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>45.05%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **5% JP MORGAN EMBI GLOBAL+ 85% BLOOMBERG EURO AGGREGATE + 10% ICE BOFA GLOBAL HIGH YIELD Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.035 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.952 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.036 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.930 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

Quelle était la proportion d’investissements liés à la durabilité ?

Le fonds a investi 45.05% dans des investissements liés au développement durable.

• **Quelle était l’allocation d’actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L’allocation d’actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	27.91%
Obligations d’entreprise	Banques	20.45%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.72% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	97.83%	95.34%	95.27%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.10%	0.03%
■ Alignés sur la taxinomie : nucléaire	0.41%	0.65%	0.51%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	1.76%	3.91%	4.19%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	97.04%	92.87%	94.28%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.16%	0.06%
■ Alignés sur la taxinomie : nucléaire	0.03%	0.75%	0.69%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	2.92%	6.23%	4.97%

Ce graphique représente 54.3% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.33% et la part d'investissements dans les activités habilitantes était de 0.40%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.43%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **35.61%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 5.73% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Identifiant d'entité juridique : EJCJD2QBJYOUVP7HMP10

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> X Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>54.16%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> X ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> X ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> X ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG EURO AGGREGATE CORPORATE (E) (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.768 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.564 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.030 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.537 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

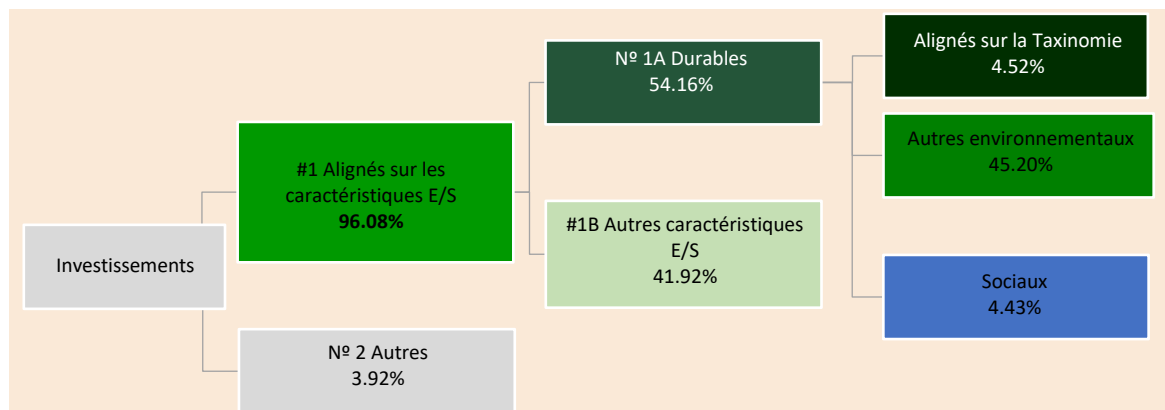

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 54.16% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	43.68%
Obligations financières	Fonds communs de placement	9.54%
Obligations d'entreprise	Consommation discrétionnaire	6.33%
Obligations d'entreprise	Communications	5.58%
Valeurs du Trésor	Valeurs du Trésor	4.85%
Obligations d'entreprise	Assurance	4.49%
Obligations d'entreprise	Électricité	3.90%
Obligations d'entreprise	Finance - autres	3.51%
Obligations d'entreprise	Transport	3.37%

<i>Obligations d'entreprise</i>	<i>Énergie</i>	3.35%

<i>Obligations d'entreprise</i>	<i>Industries -autres</i>	0.13%
<i>Forex</i>	<i>Forex</i>	0.13%
<i>Liquidités</i>	<i>Liquidités</i>	2.73%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 4.52% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.78% et la part d'investissements dans les activités habilitantes était de 0.94%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.91%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

• **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 45.20% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.43% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EURO GOVERNMENT BOND RESPONSIBLE

Identifiant d'entité juridique : 529900SX4UQ95340NW59

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>34.25%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment favorise les caractéristiques environnementales et/ou sociales en investissant au moins 30 % de son actif net dans des obligations vertes, sociales et de développement durable (GSS) répondant aux critères et lignes directrices des Green Bond Principles (GBP), Social Bond Principles (SBP) ou Sustainability Bond Guidelines (SBG), tels que publiés par l'ICMA. En outre, les émetteurs dont la notation ESG est F ou G sont exclus.

Le Compartiment a été activement géré par référence à l'indice JP Morgan EMU Government Bond Investment Grade et cherche à le surperformer (après déduction des frais applicables) sur la période de détention recommandée. Le Compartiment a été principalement exposé aux émetteurs de l'Indice de référence. Toutefois, la gestion du Compartiment étant discrétionnaire, il a été exposé à des émetteurs non inclus dans l'Indice de référence. Le Compartiment a contrôlé l'exposition au risque par rapport à l'Indice de référence, mais l'ampleur de l'écart par rapport à l'Indice de référence devait être significative.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.319 (C)**.
- La note ESG moyenne pondérée de l'indice de référence est **1.304 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

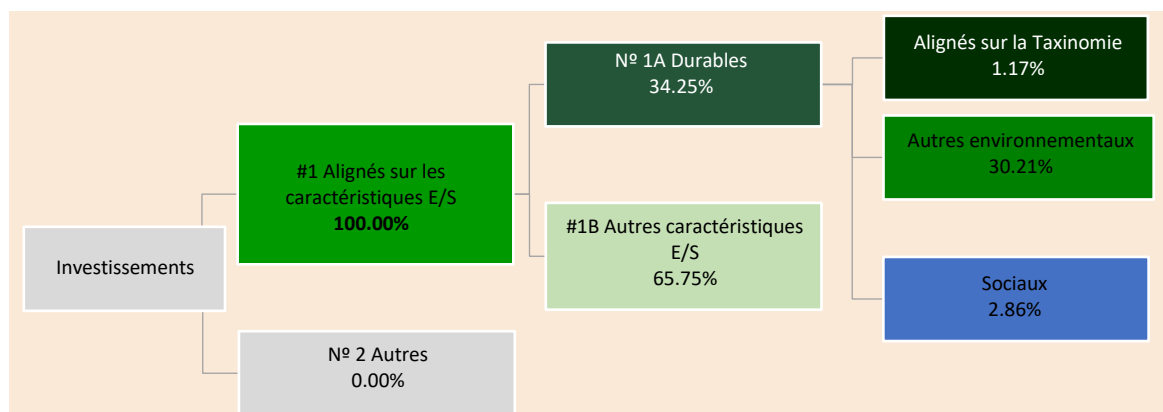

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
OAT I 0.1% 03/28 OATI	Valeurs du Trésor	Valeurs du Trésor	France	10.44%
DBR 2.3% 02/33 G	Valeurs du Trésor	Valeurs du Trésor	Allemagne	6.28%
SPAIN 1.25% 10/30	Valeurs du Trésor	Valeurs du Trésor	Espagne	3.75%
BTPS 2.7% 10/30 5Y	Valeurs du Trésor	Valeurs du Trésor	Italie	3.44%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 34.25% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	82.48%
Titres parapublics	Titres supranationaux	5.68%
Titres parapublics	Agences	4.35%
Titres parapublics	Titres souverains	2.85%
Obligations financières	Fonds communs de placement	2.04%
Titres parapublics	Autorités locales	1.63%
Obligations d'entreprise	Banques	1.55%

<i>Obligations d'entreprise</i>	<i>BROKERAGE</i>	<i>0.43%</i>
<i>Autres</i>	<i>Autres</i>	<i>0.05%</i>
<i>Forex</i>	<i>Forex</i>	<i>0.04%</i>
<i>Liquidités</i>	<i>Liquidités</i>	<i>-1.10%</i>

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.17% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Ce graphique représente 0.1% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.01%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

• **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 30.21% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La part des investissements durables sur le plan social était de 2.86% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS STRATEGIC
BOND

Identifiant d'entité juridique :
5493009E9QZ9NKKEW632

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>30.09%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment promeut les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'univers d'investissement.

Pour déterminer la note ESG du Compartiment et de l'univers d'investissement, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance.

Aucun Indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.160 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.151 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

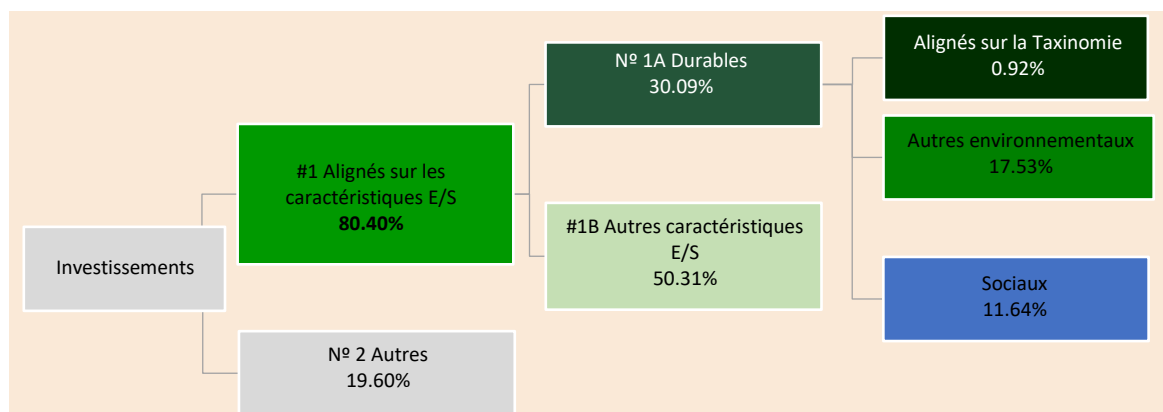

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMU PLAN-EM GR ONE-SEN USDC	Obligations financières	Fonds communs de placement	Luxembourg	3.65%
AIF - EMG MKT SOVEREIGN BD - S	Obligations financières	Fonds communs de placement	Luxembourg	3.31%
A-F EMERGING MKT CORP H-Y BD-Z EUR	Obligations financières	Fonds communs de placement	Luxembourg	2.05%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 30.09% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	11.98%
Obligations d'entreprise	Consommation discrétionnaire	10.21%
Obligations financières	Fonds communs de placement	9.30%
Obligations d'entreprise	Communications	9.15%
Obligations d'entreprise	Biens de consommation de base	8.31%
Obligations d'entreprise	Finance - autres	6.51%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.92% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	96.36%	96.58%	97.21%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.03%	0.01%
■ Alignés sur la taxinomie : nucléaire	0.22%	0.35%	0.39%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	3.42%	3.04%	2.38%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	96.35%	96.57%	97.21%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.03%	0.01%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.21%	0.22%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	3.65%	3.19%	2.56%

Ce graphique représente 92.2% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.14% et la part d'investissements dans les activités habilitantes était de 0.52%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.55%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **17.53%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 11.64% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EURO HIGH YIELD BOND

Identifiant d'entité juridique : E1BBUNTIB1P10L18SD26

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 40.87% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ML European Curr H YLD BB-B Rated Constrained Hed Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.356 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.252 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.487 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.315 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

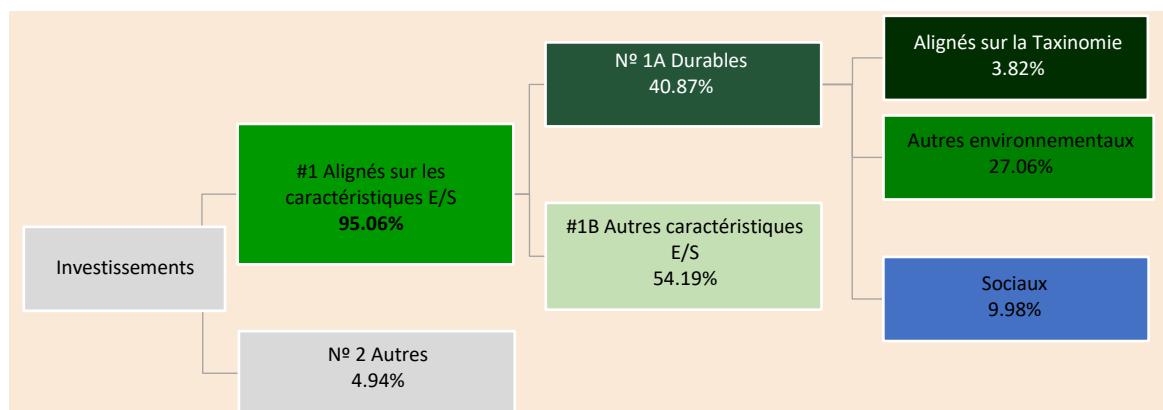

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMUNDI EURO LIQUIDITY SELECT - Z (C)	Obligations financières	Fonds communs de placement	France	4.03%
AM EURO LIQUIDITY S-T RESP - Z (C)	Obligations financières	Fonds communs de placement	France	1.49%
EDF VAR PERP EMTN	Obligations d'entreprise	Électricité	France	1.16%
DUFNSW 3.375% 04/28	Obligations d'entreprise	Consommation discrétionnaire	Pays-Bas	1.15%
BFT AUREUS ISR - Z (C)	Obligations financières	Fonds communs de placement	France	1.07%
ILDFP 5.625% 10/28 REGS	Obligations d'entreprise	Communications	France	1.04%
PEMEX 2.75% 04/27	Obligations d'entreprise	Énergie	Mexique	0.97%
TRNIM VAR PERP	Obligations d'entreprise	Électricité	Italie	0.96%
ADVZCN 7% 10/31 REGS	Obligations d'entreprise	Biens de consommation de base	Luxembourg	0.96%
TELEFO VAR PERP	Obligations d'entreprise	Communications	Pays-Bas	0.95%
AMUNDI BUY & WATCH HIGH YIELD 2029 - I C	Obligations financières	Fonds communs de placement	France	0.94%
SAPSJ 3.625% 03/28 REGS	Obligations d'entreprise	Industries de base	Autriche	0.93%
EDF VAR PERP	Obligations d'entreprise	Électricité	France	0.90%
FIB COP 5.125% 06/32	Obligations d'entreprise	Communications	Italie	0.88%
TEVA 4.375% 05/30	Obligations d'entreprise	Biens de consommation de base	Pays-Bas	0.85%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 40.87% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Consommation discrétionnaire	19.48%
Obligations d'entreprise	Communications	17.02%
Obligations d'entreprise	Biens de consommation de base	14.09%
Obligations d'entreprise	Banques	12.92%
Obligations financières	Fonds communs de placement	7.53%
Obligations d'entreprise	Électricité	7.10%
Obligations d'entreprise	Industries de base	4.85%
Obligations d'entreprise	Biens d'équipement	4.74%
Obligations d'entreprise	Finance - autres	4.12%

Obligations d'entreprise	Transport	3.40%
Obligations d'entreprise	Énergie	2.65%
Obligations d'entreprise	Technologie	2.24%
Obligations d'entreprise	Industries -autres	0.99%
Obligations d'entreprise	Immobilier (REIT)	0.68%
Obligations d'entreprise	Services aux collectivités - autres	0.62%
Obligations d'entreprise	Gaz naturel	0.32%
Obligations d'entreprise	BROKERAGE	0.20%
Obligations d'entreprise	Sociétés financières	0.00%
Forex	Forex	-0.00%
Liquidités	Liquidités	-2.96%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.82% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

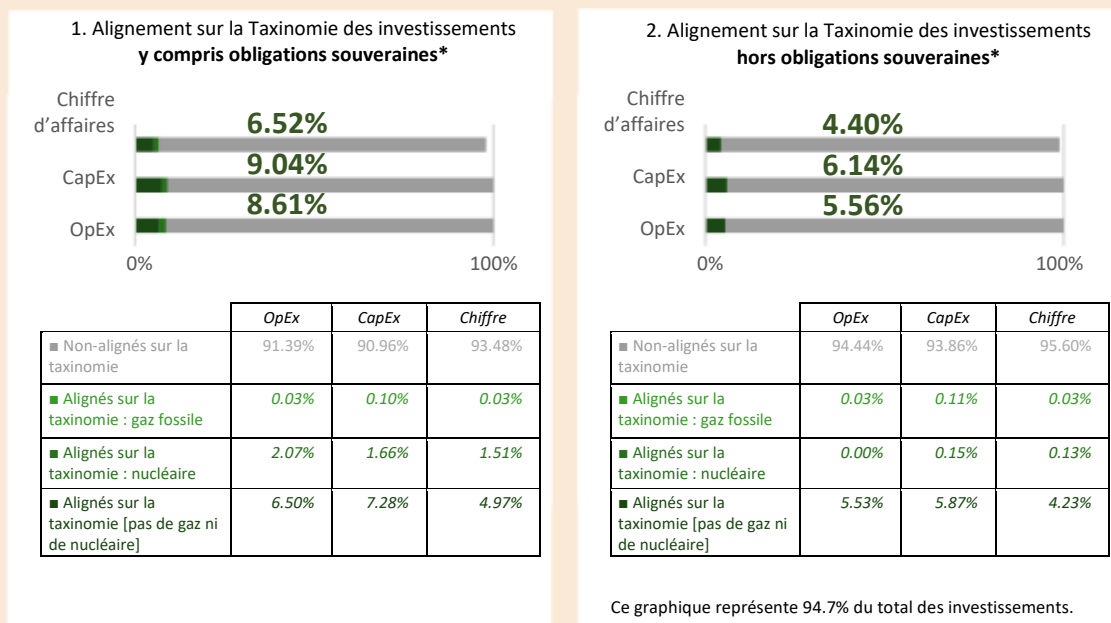

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 1.39% et la part d'investissements dans les activités habilitantes était de 1.44%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.69%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 27.6% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 9.98% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EURO HIGH YIELD SHORT TERM BOND

Identifiant d'entité juridique : 529900Q3IK91XCA88E07

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>39.82%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **Merril Lynch Euro High Yield 1-3 Non Fin, BB-B, Constrained Index**.

Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.392 (D)**
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.280 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.567 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.309 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

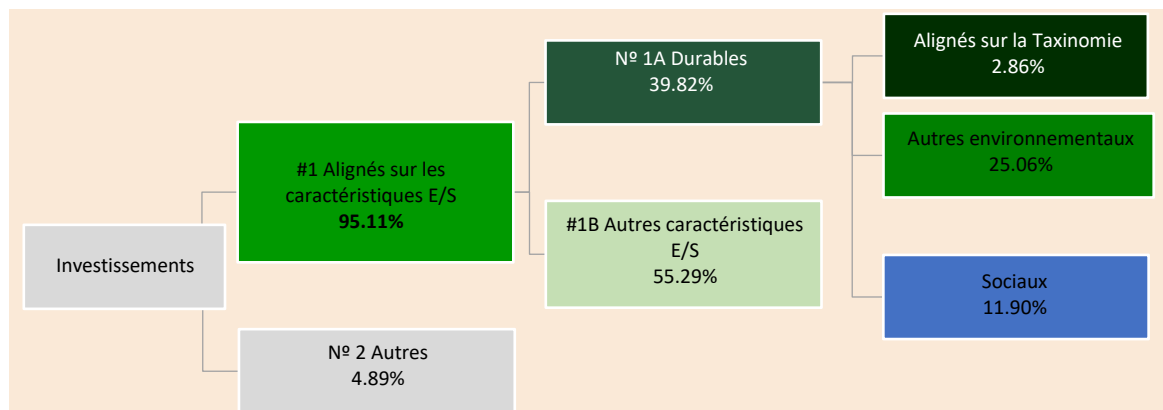

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
LORCAT 4% 09/27 REGS	Obligations d'entreprise	Communications	Espagne	2.51%
EOFP 2.75% 02/27	Obligations d'entreprise	Consommation discrétionnaire	France	2.05%
SHAEFF 4.25% 04/28	Obligations d'entreprise	Consommation discrétionnaire	Allemagne	1.71%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 39.82% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Consommation discrétionnaire	23.52%
Obligations d'entreprise	Communications	22.44%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.86% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 1.28% et la part d'investissements dans les activités habilitantes était de 1.77%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.79%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 25.06% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 11.90% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EURO SUBORDINATED BOND RESPONSIBLE

Identifiant d'entité juridique :
2221006F1314ERENWD22

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> X Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>69.13%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> X ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> X ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> X ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG EURO AGGREGATE CORPORATE INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.979 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.564 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

- **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.097 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.537 (C).

- **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

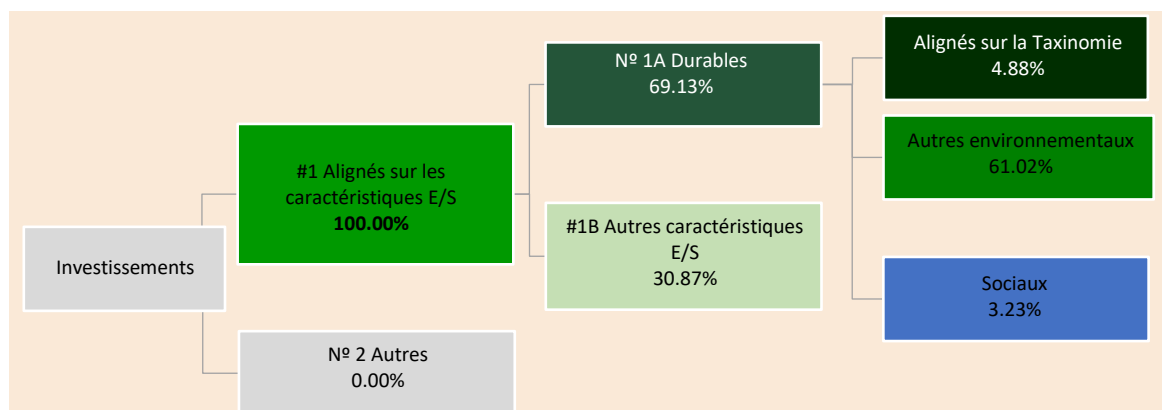

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 69.13% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 4.88% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 1.46% et la part d'investissements dans les activités habilitantes était de 1.08%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.28%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 61.02% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.23% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL HIGH
YIELD BOND RESPONSIBLE

Identifiant d'entité juridique :
21380002125EN6NGE460

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input type="checkbox"/> <input checked="" type="checkbox"/> Oui	<input checked="" type="checkbox"/> <input type="checkbox"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>37.66%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.178 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.333 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.371 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.303 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

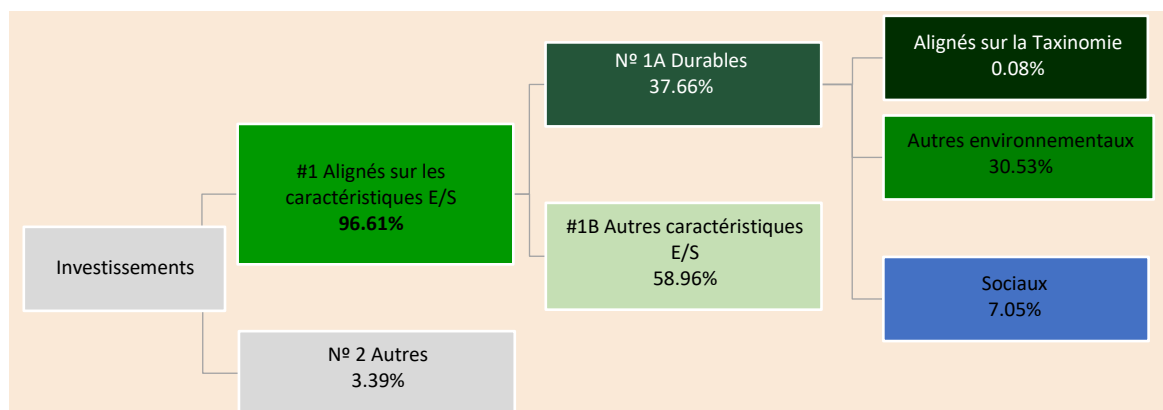

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
KW 4.75% 02/30	Obligations d'entreprise	Finance - autres	États-Unis	1.86%
UWMLLC 5.75% 06/27 144A	Obligations d'entreprise	Sociétés financières	États-Unis	1.62%
MHED 8% 08/29 144A	Obligations d'entreprise	Communications	États-Unis	1.44%
PFSI 7.875% 12/29 144A	Obligations d'entreprise	Sociétés financières	États-Unis	1.40%
RWNYNY 7.25% 10/29 144A	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.38%
UNSEAM 7.875% 02/31 144A	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.34%

NLSN 9.29% 04/29 144A	Obligations d'entreprise	Technologie	États-Unis	1.16%
BZH 7.25% 10/29	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.16%
TMHC 5.875% 06/27 144A	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.16%
TUICRU 6.25% 04/29 REGS	Obligations d'entreprise	Consommation discrétionnaire	Allemagne	1.13%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 37.66% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Consommation discrétionnaire	21.61%
Obligations d'entreprise	Industries de base	12.44%
Obligations d'entreprise	Biens de consommation de base	12.17%
Obligations d'entreprise	Communications	9.71%
Obligations d'entreprise	Sociétés financières	8.13%
Obligations d'entreprise	Biens d'équipement	7.93%
Obligations d'entreprise	Banques	7.76%
Obligations d'entreprise	Technologie	5.31%

<i>Forex</i>	<i>Forex</i>	-0.14%
<i>Liquidités</i>	<i>Liquidités</i>	1.85%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.08% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

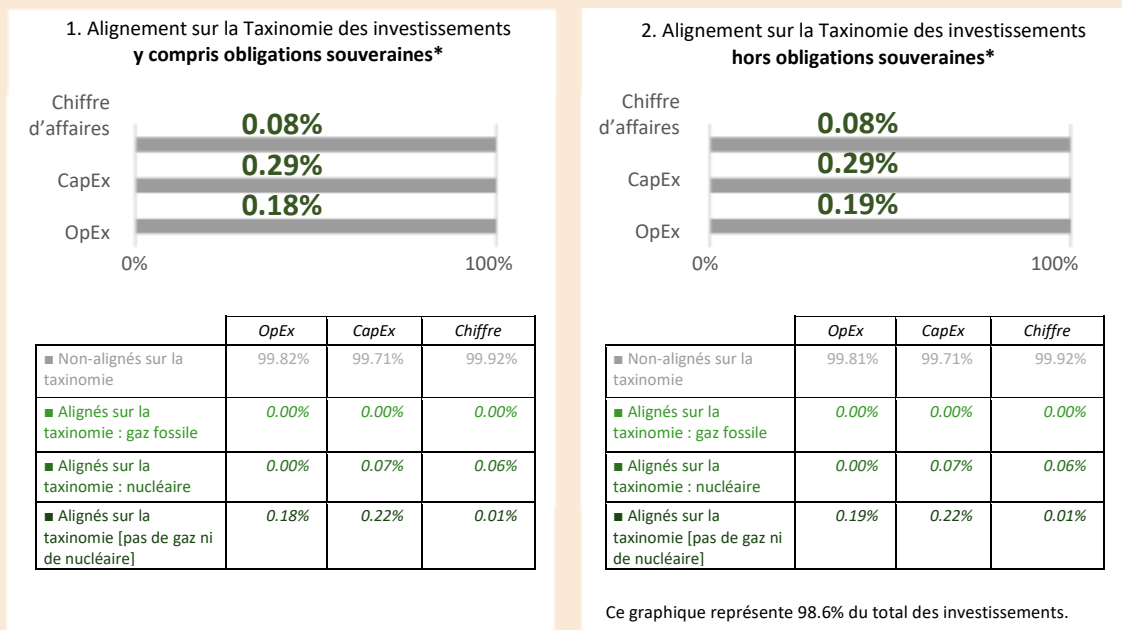

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.02% et la part d'investissements dans les activités habilitantes était de 0.01%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.01%.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **30.53%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 7.05% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL
SUBORDINATED BOND

Identifiant d'entité juridique :

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> Oui	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>45.33%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **37.5% ICE BofA ML Global Hybrid Non-Financial Corporate Index (hedged to EUR) ; 30% ICE BofA ML Contingent Capital Index (couvert en EUR) ; 15% ICE BofA ML Perpetual Preferred Securities Index (couvert en EUR); 17,5% ICE BofA ML Global Hybrid Non-Financial High Yield Index (couvert en EUR)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.591 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.425 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.560 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.42 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

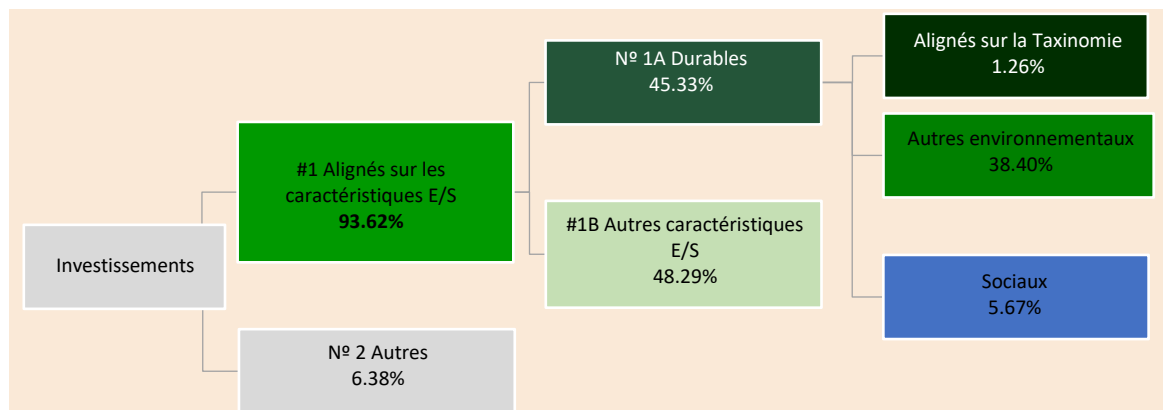

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
US TSY 4.125% 11/29	Valeurs du Trésor	Valeurs du Trésor	États-Unis	2.90%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 45.33% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	46.42%
Obligations d'entreprise	Assurance	11.23%
Obligations d'entreprise	Énergie	7.68%

<i>Liquidités</i>	<i>Liquidités</i>	3.44%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.26% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

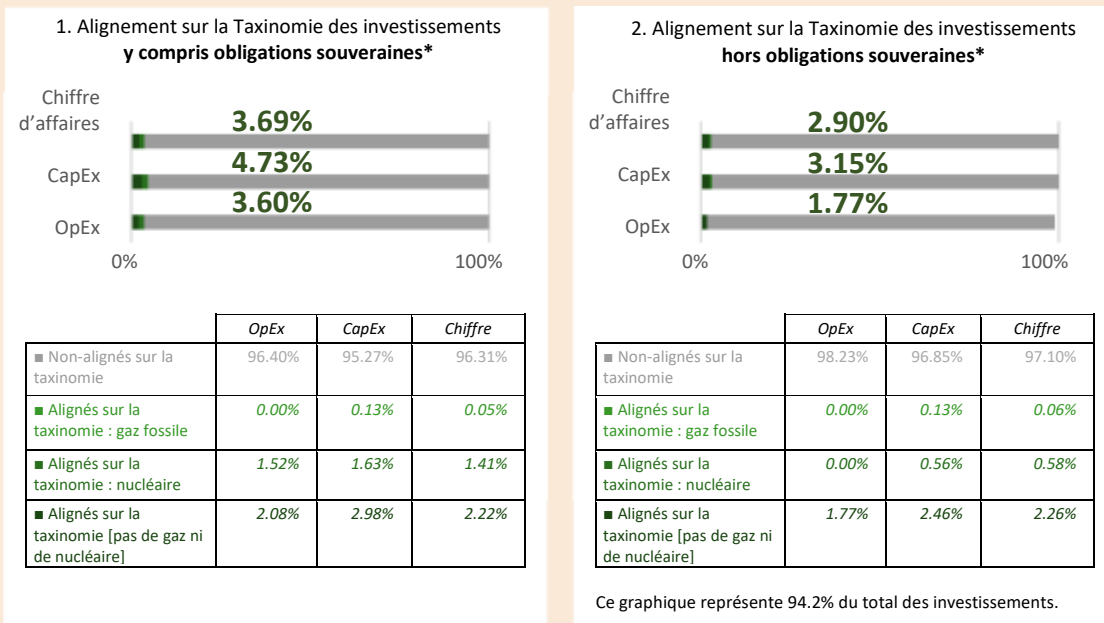

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 1.32% et la part d'investissements dans les activités habilitantes était de 0.48%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.21%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **38.40%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.67% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS PIONEER GLOBAL HIGH YIELD BOND

Identifiant d'entité juridique : 5493001ZUQBYXT51CJ95

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>15.59%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement BLOOMBERG GLOBAL HIGH YIELD. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance. L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.078 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.276 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.102 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.259 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

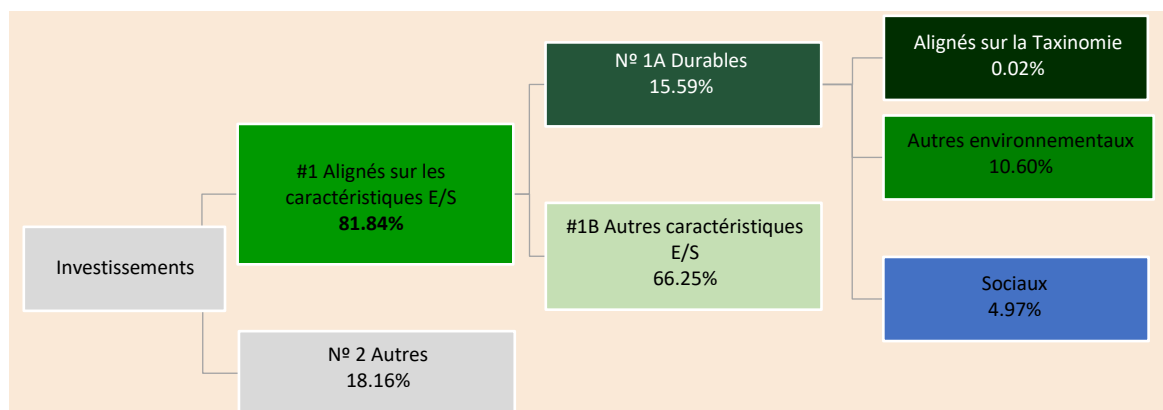

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 15.59% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Communications	13.09%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.02% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.83%	99.77%	99.98%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.02%	0.02%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.17%	0.21%	0.00%

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.82%	99.76%	99.97%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.02%	0.02%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.18%	0.22%	0.00%

Ce graphique représente 95.4% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **10.60%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 4.97% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US HIGH YIELD BOND

Identifiant d'entité juridique : 5493003QDKL8L48UQW51

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>20.32%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA US HIGH YIELD INDEX (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.251 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.462 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.238 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.457 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

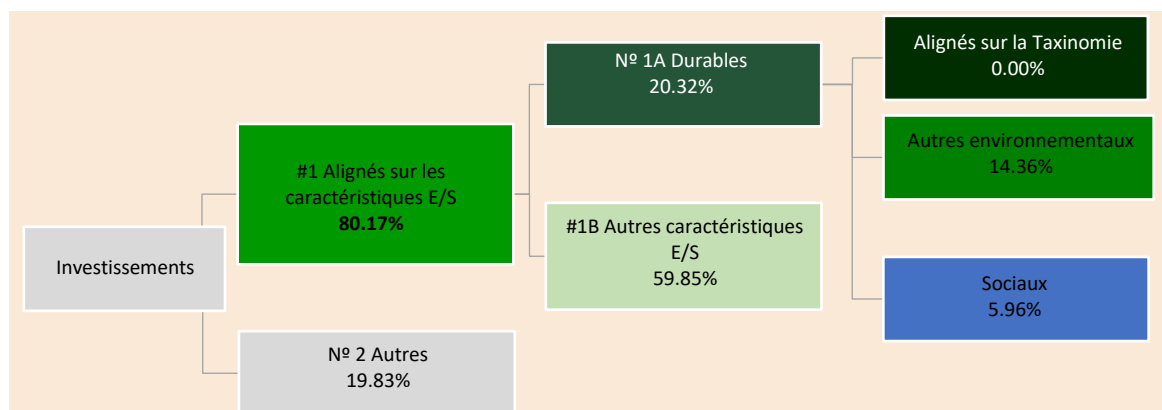

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SOLEIN 9.75% 11/28 144A	Obligations d'entreprise	Industries de base	États-Unis	1.34%
TRN 7.75% 07/28 144A	Obligations d'entreprise	Biens d'équipement	États-Unis	1.23%
MAGLLC 4.875% 05/29 144A	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.20%
TKOCN 8.25% 05/30 144A	Obligations d'entreprise	Industries de base	Canada	1.19%
TROX 4.625% 03/29 144A	Obligations d'entreprise	Industries de base	États-Unis	1.16%
CHTR 4.5% 06/33 144A	Obligations d'entreprise	Communications	États-Unis	1.12%
OMI 6.625% 04/30 144A	Obligations d'entreprise	Biens de consommation de base	États-Unis	1.10%
F 4% 11/30	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.09%
PRIHEA 9.375% 09/29 144A	Obligations d'entreprise	Biens de consommation de base	États-Unis	1.09%
ILOGIC 9% 08/29 144A	Obligations d'entreprise	Technologie	États-Unis	1.07%

USACUT 9.75% 05/29 144A	Obligations d'entreprise	Biens de consommation de base	États-Unis	1.00%
FMCN 8.625% 06/31 144A	Obligations d'entreprise	Industries de base	Canada	0.95%
KENGAR 4.875% 09/28 144A	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	0.94%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 20.32% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Consommation discrétionnaire	16.73%
Obligations d'entreprise	Industries de base	12.90%
Obligations d'entreprise	Biens d'équipement	11.63%
Obligations d'entreprise	Énergie	11.10%
Obligations d'entreprise	Biens de consommation de base	10.68%
Obligations d'entreprise	Communications	9.67%
Obligations d'entreprise	Sociétés financières	7.46%
Obligations d'entreprise	Transport	4.96%
Obligations d'entreprise	Électricité	4.28%

Obligations d'entreprise	Technologie	2.04%
Obligations d'entreprise	Banques	1.85%
Obligations d'entreprise	Industries -autres	1.26%
Obligations d'entreprise	Finance - autres	0.66%
Obligations d'entreprise	Gaz naturel	0.61%
Obligations d'entreprise	BROKERAGE	0.56%
Obligations d'entreprise	Assurance	0.30%
Forex	Forex	0.19%
Services de communication	Médias et loisirs	0.02%
Autres	Autres	-0.74%
Liquidités	Liquidités	3.83%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

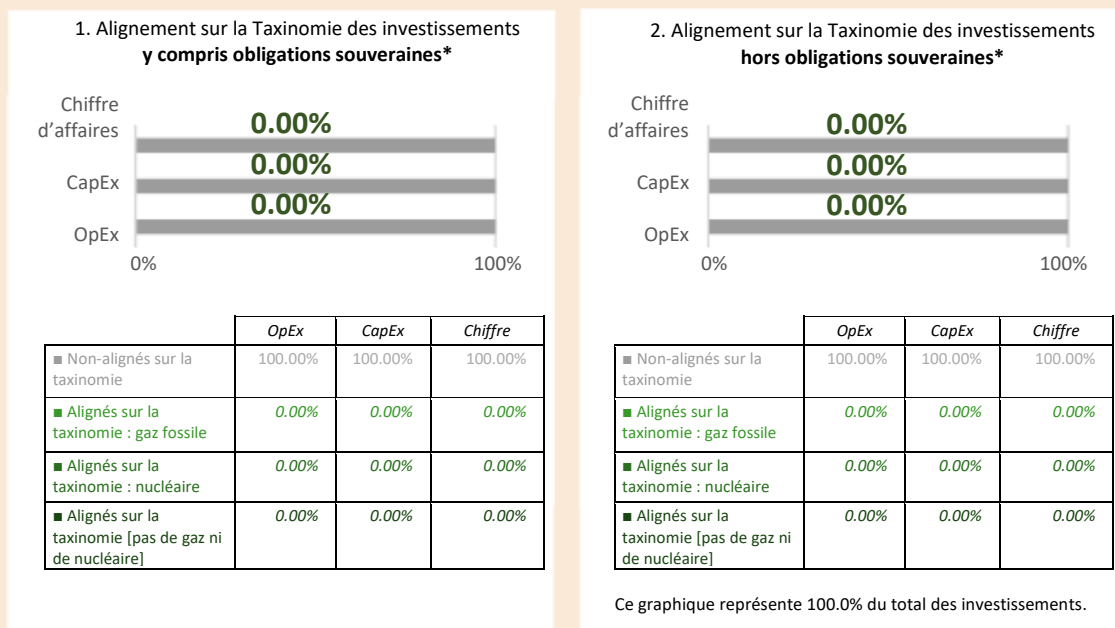

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **14.36%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.96% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL
AGGREGATE BOND

Identifiant d'entité juridique :
1BXU0IWD1I54BQDOY676

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>37.70%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL + 10% ICE BOFA GLOBAL HIGH YIELD INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.874 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.445 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.942 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.488 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

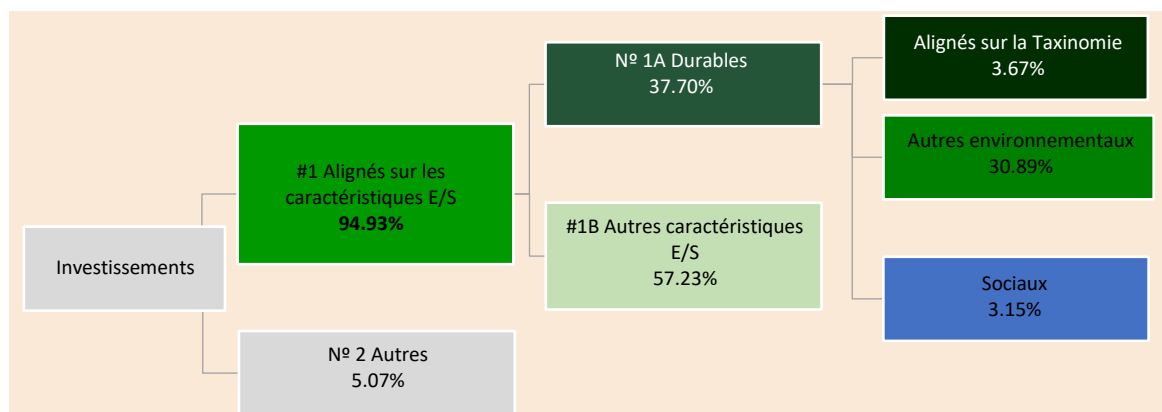

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
BRAZIL 10% 01/29 NTNF	Valeurs du Trésor	Valeurs du Trésor	Brazil	3.02%
UK TSY 4.125% 07/29	Valeurs du Trésor	Valeurs du Trésor	Royaume-Uni	2.61%
A-F GLOBAL CORPORATE BOND-O USD	Obligations financières	Fonds communs de placement	Luxembourg	2.32%
TII 1.625% 04/30	Valeurs du Trésor	Valeurs du Trésor	États-Unis	2.17%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 37.70% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	42.71%
Obligations d'entreprise	Banques	22.68%
Créances titrisées	Titres MBS émis par des agences	8.82%

Forex	Forex	-0.84%
Liquidités	Liquidités	-1.99%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.67% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Ce graphique représente 38.7% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.08% et la part d'investissements dans les activités habilitantes était de 0.18%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.06%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 30.89% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.15% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL
GOVERNMENT BOND

Identifiant d'entité juridique :
529900LNWLLVPZNRX63

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>38.22%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment favorise les caractéristiques environnementales et/ou sociales en investissant au moins 30 % de son actif net dans des obligations vertes, sociales et de développement durable (GSS) répondant aux critères et lignes directrices des Green Bond Principles (GBP), Social Bond Principles (SBP) ou Sustainability Bond Guidelines (SBG), tels que publiés par l'ICMA. En outre, les émetteurs dont la notation ESG est F ou G sont exclus.

Le Compartiment est activement géré par référence à l'indice J.P. Morgan Government Bond Global All Maturities Unhedged in USD (l'« Indice de référence ») et cherche à le surperformer (après déduction des frais applicables) sur la période de détention recommandée. Le Compartiment est principalement exposé aux émetteurs de l'Indice de référence. Toutefois, la gestion du Compartiment est discrétionnaire et il sera exposé à des émetteurs non inclus dans l'Indice de référence. Le Compartiment surveille l'exposition au risque par rapport à l'indice de référence, cependant, l'ampleur des écarts par rapport à l'indice de référence devrait être significative.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ».

Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

Pour obtenir des informations plus détaillées, se reporter à la section « Investissements durables » du Prospectus.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.080 (C)**.
- La note ESG moyenne pondérée de l'indice de référence est **1.083 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

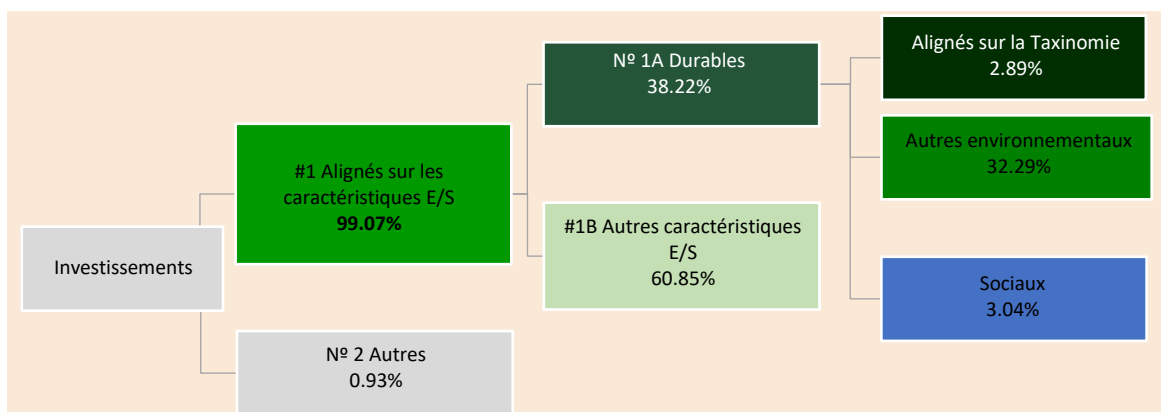

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 38.22% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.

- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	63.31%
Obligations d'entreprise	Banques	14.16%
Obligations financières	Fonds communs de placement	8.59%

Obligations d'entreprise	Énergie	0.88%
Obligations d'entreprise	Communications	0.59%
Autres	Autres	0.02%

Forex	Forex	-1.36%
Liquidités	Liquidités	2.59%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.89% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.03% et la part d'investissements dans les activités habilitantes était de 0.11%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **32.29%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.04% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL
CORPORATE BOND

Identifiant d'entité juridique :
XJOH2VT7DMIW80J7DZ04

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 49.69% d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.414 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.042 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.358 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.007 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

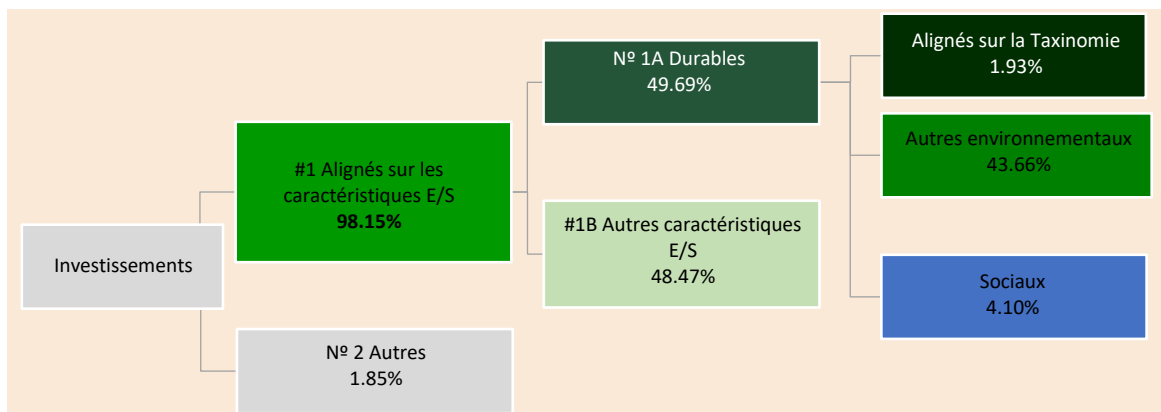

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMUNDI FUNDS MULTI SECTOR CREDIT	Obligations financières	Fonds communs de placement	Luxembourg	2.20%
A-F GLOBAL CORPORATE BD SELCT-Z USD-C	Obligations financières	Fonds communs de placement	Luxembourg	1.54%
CRHID 5.4% 05/34	Obligations d'entreprise	Biens d'équipement	États-Unis	1.31%
SPRINT 6.875% 11/28	Obligations d'entreprise	Communications	États-Unis	1.22%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 49.69% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	33.27%
Obligations d'entreprise	Communications	9.60%
Obligations d'entreprise	Biens de consommation de base	8.70%
Obligations d'entreprise	Consommation discrétionnaire	7.83%
Obligations financières	Fonds communs de placement	6.61%
Obligations d'entreprise	Électricité	5.38%
Obligations d'entreprise	Assurance	5.12%
Obligations d'entreprise	Énergie	4.19%
Obligations d'entreprise	Technologie	4.13%
Obligations d'entreprise	Biens d'équipement	3.36%
Obligations d'entreprise	Transport	2.13%

<i>Obligations d'entreprise</i>	<i>Sociétés financières</i>	2.04%
<i>Obligations d'entreprise</i>	<i>Finance - autres</i>	1.50%
<i>Obligations d'entreprise</i>	<i>Immobilier (REIT)</i>	1.22%

<i>Obligations d'entreprise</i>	<i>Gaz naturel</i>	0.35%
<i>Autres</i>	<i>Autres</i>	-0.09%
<i>Forex</i>	<i>Forex</i>	-0.31%
<i>Liquidités</i>	<i>Liquidités</i>	2.64%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.93% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.26% et la part d'investissements dans les activités habilitantes était de 0.41%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.07%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 43.66% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.10% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS GLOBAL CORPORATE BOND SELECT

Identifiant d'entité juridique : 2138002V2U9FP8L55Z17

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>63.63%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.692 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.042 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.617 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.007 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : du **01/07/2024 au 30/06/2025**

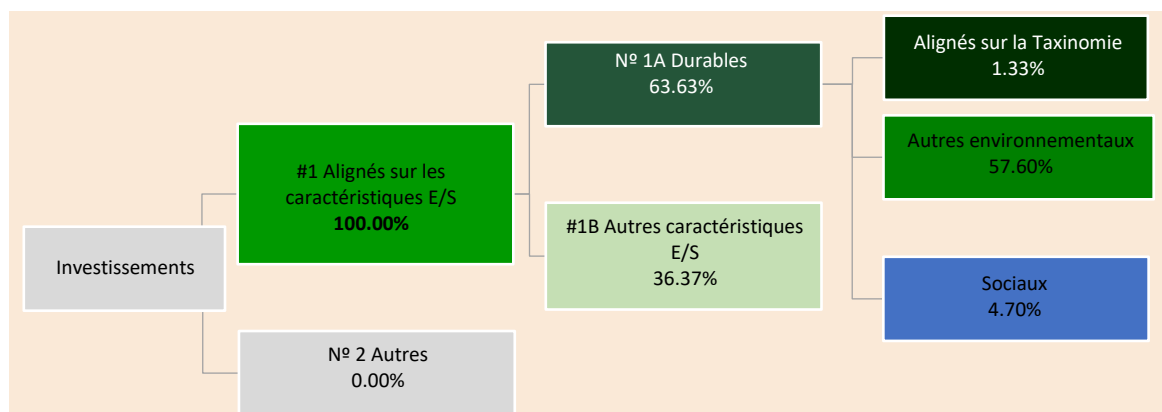

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 63.63% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	31.66%
Obligations d'entreprise	Biens de consommation de base	12.71%
Obligations d'entreprise	Communications	9.24%

Autres	Autres	-0.09%
Liquidités	Liquidités	1.04%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.33% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

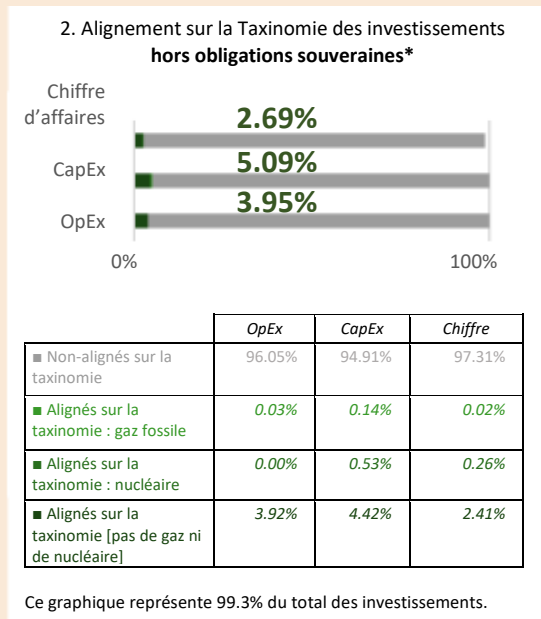

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.24% et la part d'investissements dans les activités habilitantes était de 1.23%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.75%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

• **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 57.60% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.70% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL HIGH
YIELD BOND

Identifiant d'entité juridique :
222100AIHPWCQOF6UQ48

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 16.41% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.148 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.333 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.090 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.303 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

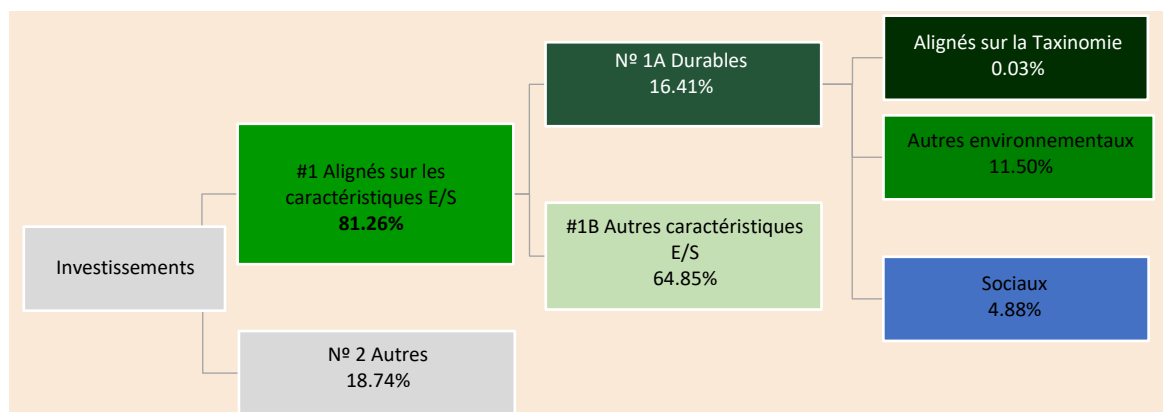

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 16.41% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.

- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Obligations financières	Services financiers	0.01%
Liquidités	Liquidités	2.78%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.03% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.01%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

• **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 11.50% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.88% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL SHORT
TERM BOND

Identifiant d'entité juridique :
213800N2508X71IK7M94

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 48.83% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL +10% ICE BOFA GLOBAL HIGH YIELD composite index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.864 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.444 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.853 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.487 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

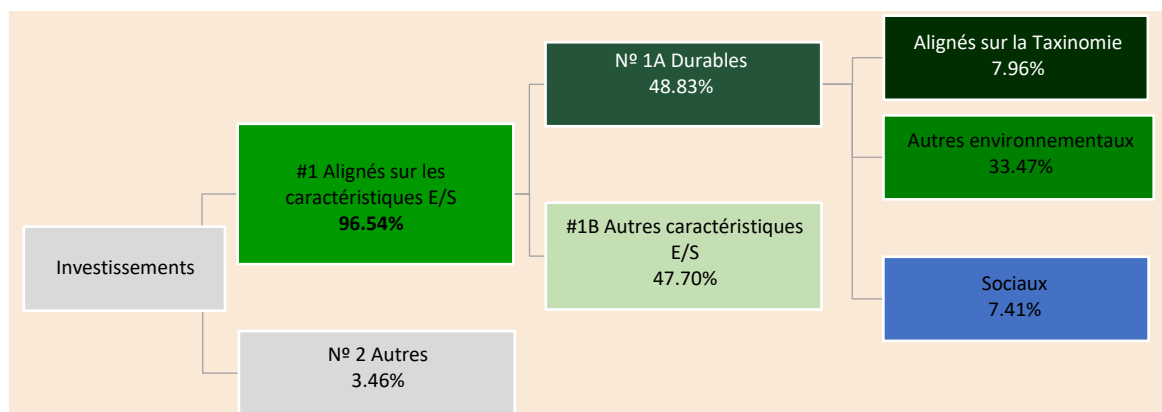

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
UK TSY 0.875% 07/33	Valeurs du Trésor	Valeurs du Trésor	Royaume-Uni	3.49%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 48.83% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	27.93%
Obligations d'entreprise	Banques	25.73%
Titres parapublics	Titres souverains	9.09%

Obligations d'entreprise	BROKERAGE	1.94%

Obligations d'entreprise	Transport	1.87%
Obligations d'entreprise	Gaz naturel	1.45%
Obligations d'entreprise	Finance - autres	0.90%
Créances titrisées	Créances hypothécaires	0.76%
Obligations d'entreprise	Immobilier (REIT)	0.41%
Obligations d'entreprise	Services aux collectivités - autres	0.32%
Autres	Autres	0.09%
Forex	Forex	-1.62%
Liquidités	Liquidités	2.14%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 7.96% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Ce graphique représente 39.2% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.42% et la part d'investissements dans les activités habilitantes était de 0.29%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.23%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 33.47% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

... sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 7.41% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL BOND

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> X Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 13.71% d'investissements durables <input checked="" type="checkbox"/> X ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> X ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> X ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **40% JP MORGAN GLOBAL GOVERNMENT BOND INDEX BROAD + 10% BLOOMBERG GLOBAL AGGREGATE GOVERNMENT RELATED + 10% BLOOMBERG GLOBAL AGGREGATE CORPORATE + 20% BLOOMBERG GLOBAL HIGH YIELD HEDGED + 20% JP MORGAN EMERGING MARKET BOND composite index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.674 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

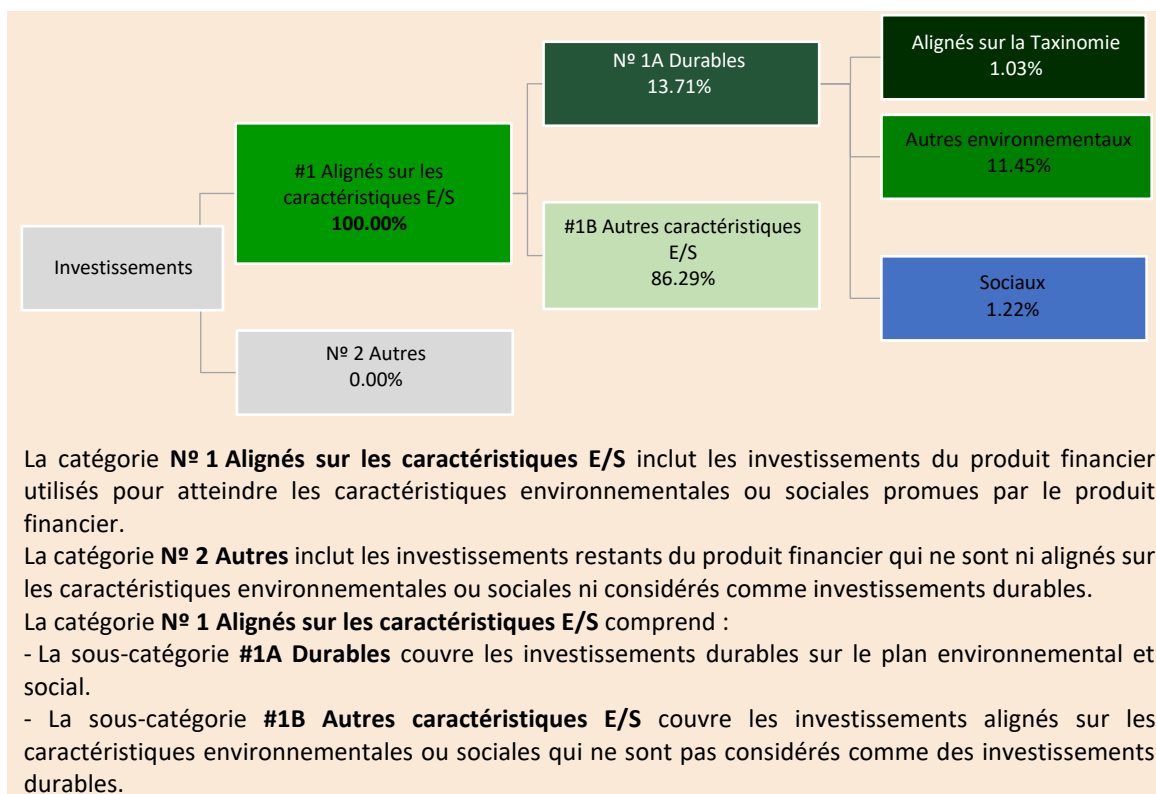

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMUNDI OBL INT FLEXIBLE-OR (D)	Obligations financières	Fonds communs de placement	France	100.62%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 13.71% dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Secteur	Sous-secteur	% des actifs
Obligations financières	Fonds communs de placement	100.62%
Liquidités	Liquidités	-0.62%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.03% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.70%	99.53%	98.87%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.02%	0.06%	0.04%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.28%	0.40%	1.09%

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	98.74%	98.16%	98.19%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.02%	0.01%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.24%	0.18%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	1.26%	1.57%	1.62%

Ce graphique représente 20.8% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au gaz fossile incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.02% et la part d'investissements dans les activités habilitantes était de 0.06%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **11.45%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 1.22% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>34.80%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.512 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.506 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

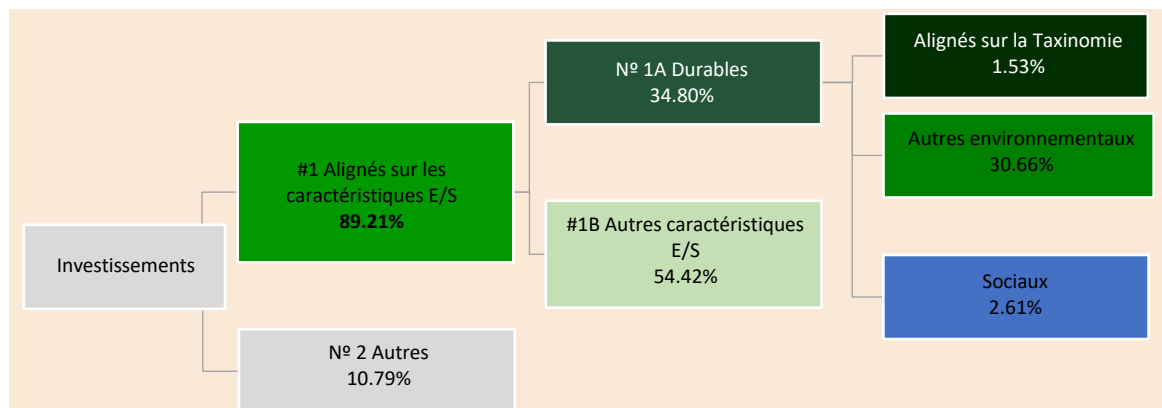

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 34.80% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	30.06%
Obligations d'entreprise	Consommation discrétionnaire	10.52%
Valeurs du Trésor	Valeurs du Trésor	9.65%

Autres	Autres	-0.16%
Liquidités	Liquidités	6.87%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.53% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.41% et la part d'investissements dans les activités habilitantes était de 0.43%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.02%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 30.66% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.61% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
GLOBAL CORPORATE BOND CLIMATE

Identifiant d'entité juridique :

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 66.74% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - Entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles
 - Exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr)
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales en cherchant à réduire son intensité carbone à travers l'alignement de l'intensité de l'empreinte carbone sur celle de son Indice de référence **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX (OFFICIAL)**.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.591 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.189 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **88.81**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **95.99**

• **... et par rapport aux périodes précédentes ?**

A la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.537 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.172 (D). À la fin de la période précédente, l'intensité carbone moyenne pondérée du portefeuille était de 82.17 et l'indice de référence de l'intensité carbone moyenne pondérée était de 99.19

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

• **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
JPM VAR 05/30	Obligations d'entreprise	Banques	États-Unis	1.37%
COTY 6.625% 07/30 REGS	Obligations d'entreprise	Biens de consommation de base	États-Unis	1.20%

réalisés dans des actifs spécifiques.

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 66.74% dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.53% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.56%	94.51%	96.21%
■ Alignés sur la taxinomie : gaz fossile	0.01%	0.07%	0.02%
■ Alignés sur la taxinomie : nucléaire	0.62%	1.04%	0.66%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	3.80%	4.38%	3.11%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	96.59%	95.46%	96.92%
■ Alignés sur la taxinomie : gaz fossile	0.01%	0.08%	0.02%
■ Alignés sur la taxinomie : nucléaire	0.13%	0.69%	0.39%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	3.27%	3.78%	2.66%

Ce graphique représente 98.1% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.22% et la part d'investissements dans les activités habilitantes était de 0.81%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.63%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **61.41%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.80% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice Solactive Paris Aligned Global Corporate USD Hedged Index¹¹. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 88.81
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 95.99

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

- La note ESG moyenne pondérée du portefeuille est 0.591 (C).
- La note ESG moyenne pondérée de l'univers d'investissement ESG est 0.189 (D).

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 88.81
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 95.99

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice Solactive Paris Aligned Global Corporate USD Hedged Index. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 88.81
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 95.99

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS OPTIMAL YIELD

Identifiant d'entité juridique :

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 37.51% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment promeut les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'univers d'investissement.

Pour déterminer la note ESG du Compartiment et de l'univers d'investissement, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance.

Aucun Indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.241 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.232 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse

ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une

évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

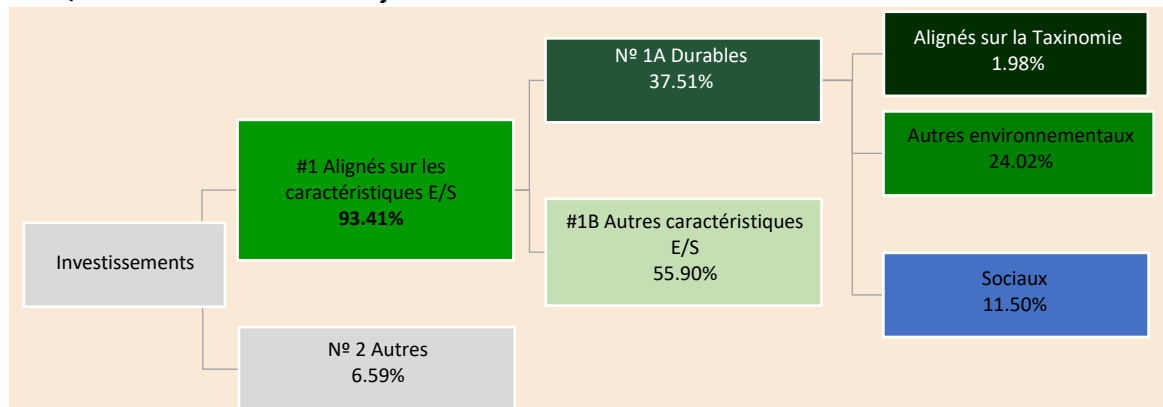

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AIF - EMG MKT SOVEREIGN BD - H	Obligations financières	Fonds communs de placement	Luxembourg	7.13%
EDF VAR PERP EMTN	Obligations d'entreprise	Électricité	France	1.75%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 37.51% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Consommation discrétionnaire	15.08%
Obligations d'entreprise	Biens de consommation de base	13.93%
Obligations d'entreprise	Communications	13.23%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.98% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	93.11%	92.35%	96.60%
■ Alignés sur la taxinomie : gaz fossile	0.01%	0.03%	0.00%
■ Alignés sur la taxinomie : nucléaire	1.27%	1.15%	0.35%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	5.62%	6.48%	3.05%

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	94.60%	93.51%	96.74%
■ Alignés sur la taxinomie : gaz fossile	0.01%	0.03%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.25%	0.09%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	5.40%	6.21%	3.16%

Ce graphique représente 90.3% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au gaz fossile incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.31% et la part d'investissements dans les activités habilitantes était de 2.23%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.23%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **24.2%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 11.50% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
OPTIMAL YIELD SHORT TERM

Identifiant d'entité juridique :

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 39.54% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment promeut les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'univers d'investissement.

Pour déterminer la note ESG du Compartiment et de l'univers d'investissement, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance.

Aucun Indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.256 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.221 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et

déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 39.54% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Consommation discrétionnaire	15.50%
Obligations d'entreprise	Biens de consommation de base	14.52%

<i>Liquidités</i>	<i>Liquidités</i>	2.90%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.29% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	92.01%	91.08%	95.02%
■ Alignés sur la taxinomie : gaz fossile	0.01%	0.04%	0.00%
■ Alignés sur la taxinomie : nucléaire	1.44%	1.41%	0.41%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	6.54%	7.48%	4.57%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	93.43%	92.14%	94.86%
■ Alignés sur la taxinomie : gaz fossile	0.01%	0.04%	0.01%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.41%	0.18%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	6.56%	7.41%	4.96%

Ce graphique représente 88.2% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.30% et la part d'investissements dans les activités habilitantes était de 2.54%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.11%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **26.45%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 9.80% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS STRATEGIC INCOME

Identifiant d'entité juridique :
5493004ZTK6D21CGCO05

Objectif d'investissement durable

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 15.19% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG US UNIVERSAL (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

- **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.270 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.232 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

- **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.461 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.356 (D).

- **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

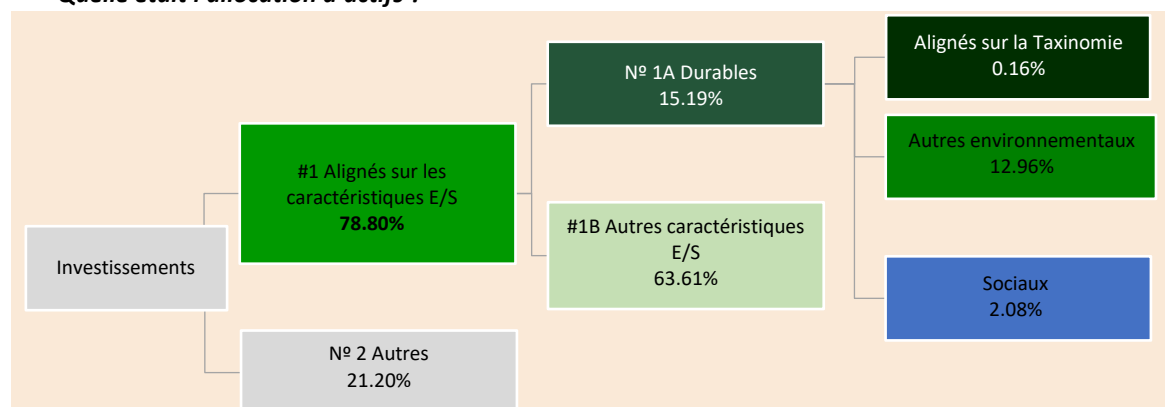

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TBIP USA 29/07/25	Valeurs du Trésor	Valeurs du Trésor	États-Unis	4.55%
US TSY 3.75% 08/26	Valeurs du Trésor	Valeurs du Trésor	États-Unis	1.88%
US TSY 2.25% 02/52	Valeurs du Trésor	Valeurs du Trésor	États-Unis	1.20%
US TSY 4% 02/30	Valeurs du Trésor	Valeurs du Trésor	États-Unis	1.19%

G2SF 6 7/25	Créances titrisées	Titres MBS émis par des agences	États-Unis	0.71%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 15.19% dans des investissements liés au développement durable.

• Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Créances titrisées	Titres MBS émis par des agences	17.64%
Valeurs du Trésor	Valeurs du Trésor	13.53%
Obligations d'entreprise	Banques	12.85%
Obligations d'entreprise	Consommation discrétionnaire	7.88%
Obligations d'entreprise	Énergie	6.12%
Créances titrisées	Titres CMBS non émis par des agences	5.63%
Autres	Autres	5.55%
Obligations d'entreprise	Biens de consommation de base	3.61%
Obligations financières	Assurance	3.40%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.16% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.72%	99.60%	99.77%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.18%	0.08%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.28%	0.22%	0.15%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.55%	99.34%	99.62%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.30%	0.13%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.45%	0.36%	0.25%

Ce graphique représente 61.4% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :
 - du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.08%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **12.96%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 2.08% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US CORPORATE BOND CLIMATE

Identifiant d'entité juridique : 213800VWP1P2KAFPEU55

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 25.71% d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales en cherchant à réduire son intensité carbone à travers l'alignement de l'intensité de l'empreinte carbone sur celle de son Indice de référence **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND Index**.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.113 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.111 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **49.58**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **140.83**

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.188 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.097 (D). À la fin de la période précédente, l'intensité carbone moyenne pondérée du portefeuille était de 42.30 et l'indice de référence de l'intensité carbone moyenne pondérée était de 77.40

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions,

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.

- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

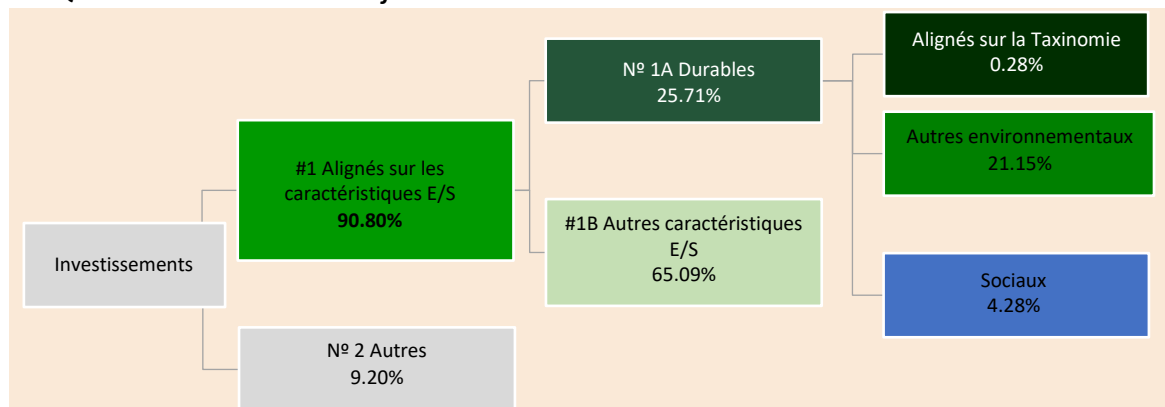

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
DAIL VAR PERP 144A	Obligations d'entreprise	Assurance	Japon	2.52%
JPM VAR 07/35	Obligations d'entreprise	Banques	États-Unis	2.42%
CCDJ 5.7% 03/28 144A	Obligations d'entreprise	Banques	Canada	1.81%
UTX 3.125% 05/27	Obligations d'entreprise	Biens d'équipement	États-Unis	1.73%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 25,71 % dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	37.77%
Obligations d'entreprise	Assurance	13.96%
Obligations d'entreprise	Consommation discrétionnaire	11.64%
Obligations d'entreprise	Biens d'équipement	7.54%
Obligations d'entreprise	Biens de consommation de base	6.73%
Obligations d'entreprise	Technologie	6.18%
Obligations d'entreprise	Sociétés financières	2.29%
Obligations d'entreprise	BROKERAGE	1.94%
Obligations d'entreprise	Transport	1.89%

<i>Obligations d'entreprise</i>	<i>Immobilier (REIT)</i>	<i>1.26%</i>
<i>Obligations d'entreprise</i>	<i>Électricité</i>	<i>1.20%</i>
<i>Titres parapublics</i>	<i>Titres souverains</i>	<i>0.93%</i>

<i>Obligations d'entreprise</i>	<i>Industries de base</i>	<i>0.72%</i>
<i>Forex</i>	<i>Forex</i>	<i>0.01%</i>
<i>Liquidités</i>	<i>Liquidités</i>	<i>4.12%</i>

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.28% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.13% et la part d'investissements dans les activités habilitantes était de 0.36%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 21.15% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.28% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI USD IG Climate Paris Aligned Corporate Bond. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 49.58
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 140.83

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

- La note ESG moyenne pondérée du portefeuille est 0.113 (D).
- La note ESG moyenne pondérée de l'univers d'investissement ESG est -0.111 (D).
- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 49.58
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 140.83

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI USD IG Climate Paris Aligned Corporate Bond. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 49.58
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 140.83

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US
BOND

Identifiant d'entité juridique :

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>9.84%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG US AGGREGATE**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.455 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.289 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.511 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.464 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

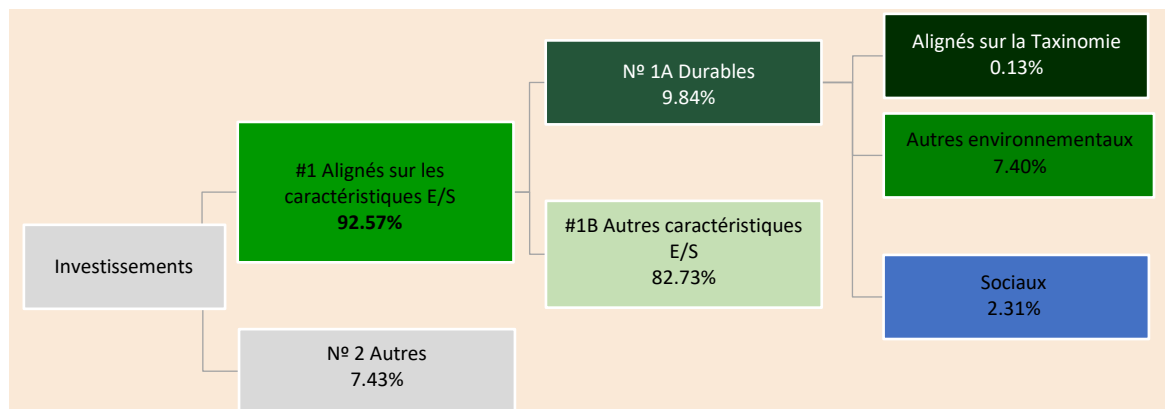

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TBIP USA 24/07/25	Valeurs du Trésor	Valeurs du Trésor	États-Unis	7.12%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 9.84% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Créances titrisées	Titres MBS émis par des agences	30.40%
Valeurs du Trésor	Valeurs du Trésor	28.13%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.13% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.52%	99.46%	99.65%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.14%	0.22%	0.16%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.33%	0.32%	0.19%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.23%	99.02%	99.43%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.30%	0.10%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.77%	0.68%	0.47%

Ce graphique représente 38.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au gaz fossile incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.08% et la part d'investissements dans les activités habilitantes était de 0.14%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **7.40%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 2.31% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US CORPORATE BOND SELECT

Identifiant d'entité juridique : 222100LE431F865A4S54

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 20.93% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG US CORPORATE INVESTMENT GRADE (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.112 (D)**
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.286 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.122 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.307 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

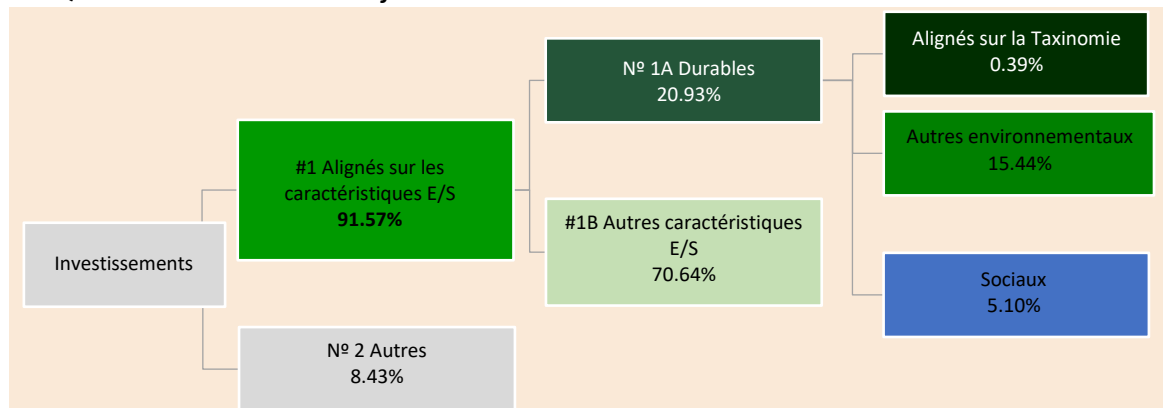

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AXP VAR 04/31	Obligations d'entreprise	Banques	États-Unis	1.78%
CNO 2.65% 01/29 144A	Obligations d'entreprise	Assurance	États-Unis	1.39%
CITSEC 5.5% 06/30	Obligations d'entreprise	BROKERAGE	États-Unis	1.31%
DAIL VAR PERP 144A	Obligations d'entreprise	Assurance	Japon	1.27%
CMI 5.3% 05/35	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.27%
FARMER FRN 11/57	Obligations d'entreprise	Assurance	États-Unis	1.27%
MASSMU 5.672% 12/52 144A	Obligations d'entreprise	Assurance	États-Unis	1.26%
MYLIFE VAR 06/55 144A	Obligations d'entreprise	Assurance	Japon	1.26%
DNBNO VAR 11/30 144A	Obligations d'entreprise	Banques	Norvège	1.18%
AER 3.3% 01/32	Obligations d'entreprise	Sociétés financières	Irlande	1.13%
DUK 5% 08/52	Obligations d'entreprise	Électricité	États-Unis	1.10%
MS VAR 01/38	Obligations d'entreprise	Banques	États-Unis	1.09%
BMW 5.4% 03/35 144A	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.09%
BAC VAR 02/36	Obligations d'entreprise	Banques	États-Unis	1.07%
DRI 6.3% 10/33	Obligations d'entreprise	Consommation discrétionnaire	États-Unis	1.05%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 20,93 % dans des investissements liés au développement durable.

• Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	28.66%
Obligations d'entreprise	Consommation discrétionnaire	11.89%
Obligations d'entreprise	Assurance	11.63%
Obligations d'entreprise	Électricité	9.76%
Obligations d'entreprise	Énergie	8.02%
Obligations d'entreprise	Biens d'équipement	5.03%
Obligations d'entreprise	Biens de consommation de base	4.37%
Obligations d'entreprise	Gaz naturel	3.20%
Obligations d'entreprise	Technologie	3.13%
Obligations d'entreprise	BROKERAGE	2.79%

<i>Obligations d'entreprise</i>	<i>Immobilier (REIT)</i>	2.54%
<i>Obligations d'entreprise</i>	<i>Transport</i>	2.32%
<i>Obligations d'entreprise</i>	<i>Sociétés financières</i>	1.13%
<i>Obligations d'entreprise</i>	<i>Communications</i>	1.06%
<i>Titres parapublics</i>	<i>Titres souverains</i>	0.92%
<i>Forex</i>	<i>Forex</i>	0.82%
<i>Valeurs du Trésor</i>	<i>Valeurs du Trésor</i>	0.52%
<i>Obligations d'entreprise</i>	<i>Services aux collectivités - autres</i>	0.48%
<i>Obligations d'entreprise</i>	<i>Industries de base</i>	0.43%
<i>Liquidités</i>	<i>Liquidités</i>	2.98%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.39% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.20% et la part d'investissements dans les activités habilitantes était de 0.45%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **15.44%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.10% à la fin de la période.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US SHORT TERM BOND

Identifiant d'entité juridique :
549300QBCEQZSOFGDW23

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 15.70% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA 0-1 YEAR US CORPORATE INDEX (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.192 (D)**
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.184 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.386 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.215 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

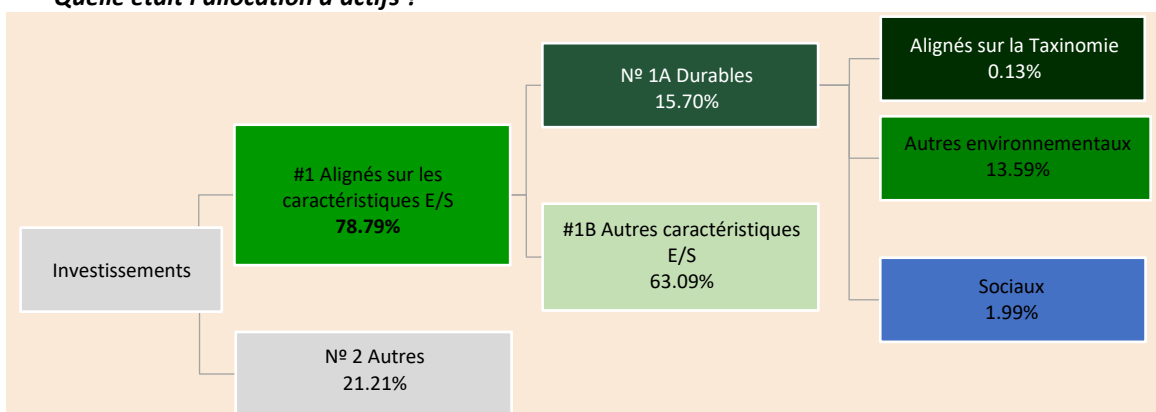

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TBIP USA 12/08/25	Valeurs du Trésor	Valeurs du Trésor	États-Unis	3.42%
TBIP USA 05/08/25	Valeurs du Trésor	Valeurs du Trésor	États-Unis	3.38%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 15.70% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.13% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.09%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 13.59% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.99% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS ASIA BOND INCOME RESPONSIBLE

Identifiant d'entité juridique : 213800UVZ2BRX4N1ZK70

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 41.08% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **90% JPM Asia Credit Index + 10% Markit iBoxx ALBI (USD Unhedged) Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.293 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.224 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.319 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.281 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

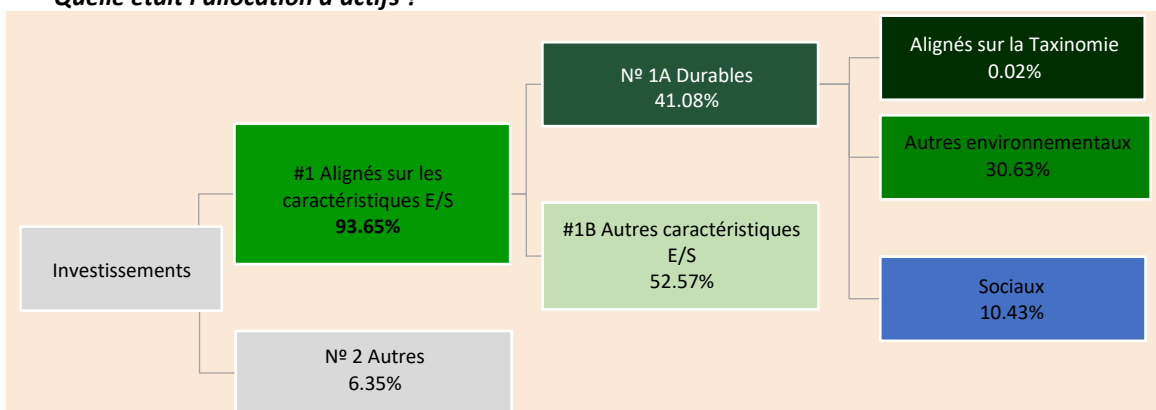

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 41.08% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.

- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.02% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.06%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.05%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **30.63%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 10.43% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CHINA RMB AGGREGATE BOND **Identifiant d'entité juridique :** 213800R541S7BYLJK77

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>5.11%</u> d'investissements durables <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG CHINA AGGREGATE (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.239 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.285 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

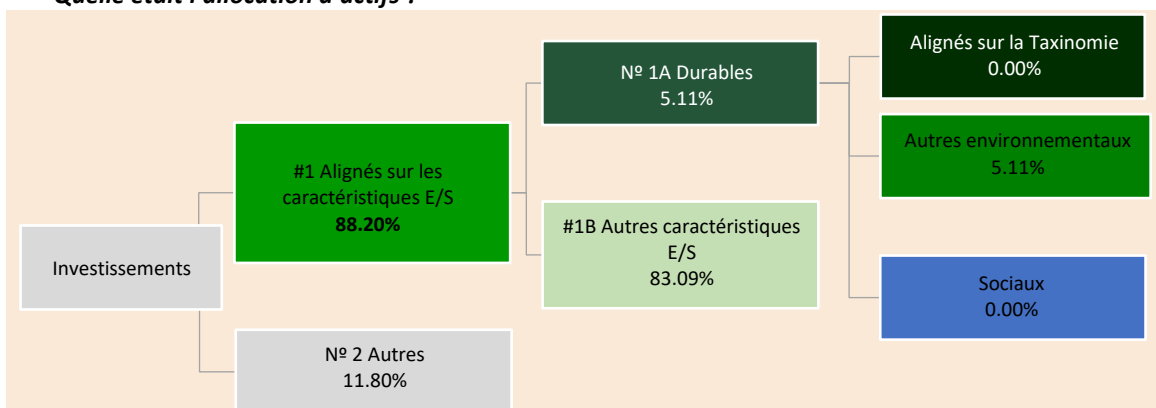

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 5.11% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	39.02%
Obligations d'entreprise	Banques	38.97%
Obligations d'entreprise	Énergie	5.67%

Liquidités	Liquidités	10.76%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

• **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la **taxinomie** sont exprimées en pourcentage :

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **5.11%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS BLENDED BOND

Identifiant d'entité juridique : 222100ABBIBM1BE8222

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>9.47%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN EMBI GLOBAL DIVERSIFIED (HEDGED TO EUR) INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.041 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.127 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.110 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.153 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

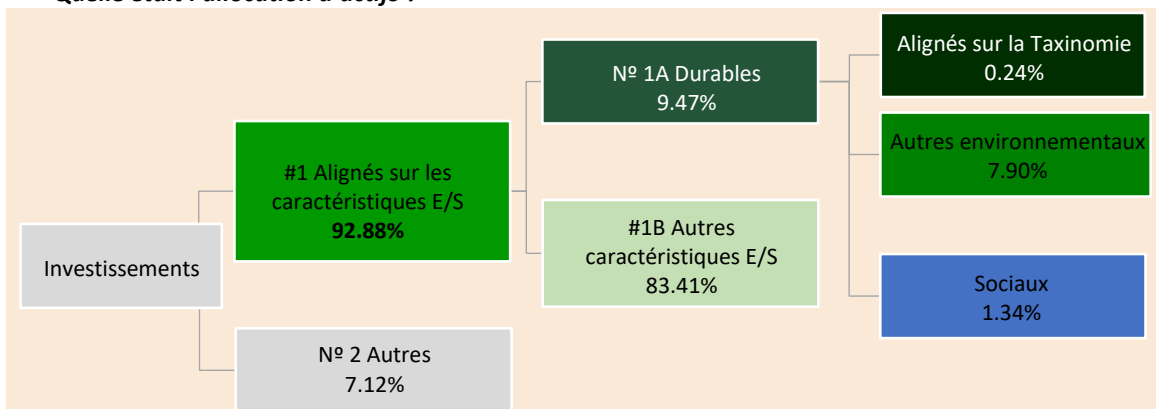

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
A-F EMERGING MKT CORP BD - Z- USD	Obligations financières	Fonds communs de placement	Luxembourg	2.48%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 9.47% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.

- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
<i>Titres parapublics</i>	<i>Titres souverains</i>	43.38%
<i>Valeurs du Trésor</i>	<i>Valeurs du Trésor</i>	20.54%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.24% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la Taxinomie (non auditées)

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la Taxinomie	99.63%	99.53%	99.63%
■ Alignés sur la Taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la Taxinomie : nucléaire	0.11%	0.05%	0.05%
■ Alignés sur la Taxinomie [pas de gaz ni de nucléaire]	0.26%	0.42%	0.32%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la Taxinomie	99.04%	98.67%	99.28%
■ Alignés sur la Taxinomie : gaz fossile	0.00%	0.00%	0.01%
■ Alignés sur la Taxinomie : nucléaire	0.00%	0.08%	0.06%
■ Alignés sur la Taxinomie [pas de gaz ni de nucléaire]	0.96%	1.25%	0.64%

Ce graphique représente 22.8% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.02% et la part d'investissements dans les activités habilitantes était de 0.05%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.02%.

Les investissements durables sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la Taxinomie était de 7.90% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la Taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la Taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.34% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS BOND

Identifiant d'entité juridique : 549300KZW6KQ7WLJO866

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>11.14%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement 50% JP Morgan EMBI Global Diversified Index + 50% JP Morgan CEMBI Global Diversified Index. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.147 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.156 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.018 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.155 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

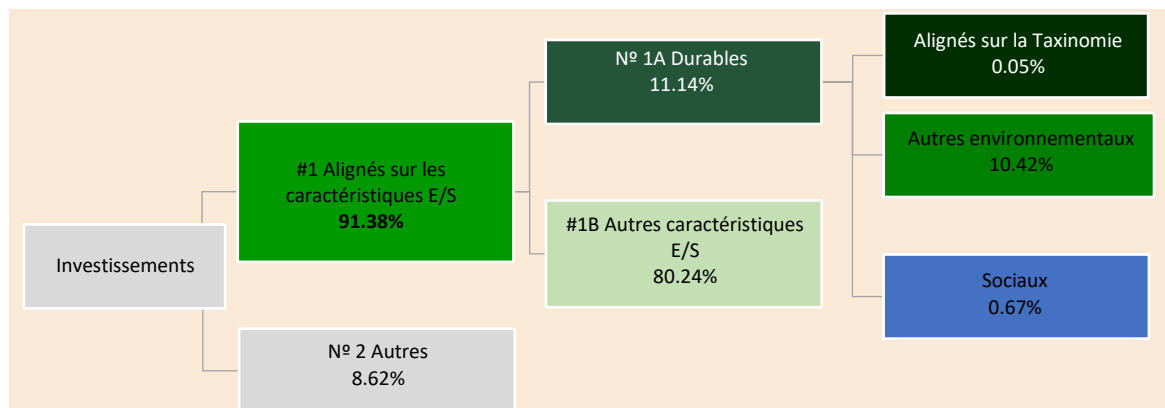

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 11.14% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Titres parapublics	Titres souverains	44.98%
Obligations d'entreprise	Énergie	10.47%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.05% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.58%	99.27%	99.74%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.01%	0.02%	0.01%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.41%	0.71%	0.24%

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.01%	98.22%	99.39%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.03%	0.02%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.99%	1.75%	0.58%

Ce graphique représente 39.6% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.06%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.01%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **10.42%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 0.67% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS CORPORATE BOND

Identifiant d'entité juridique : 529900YJOJ3E3FRQQ325

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 28.68% d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN CEMBI BROAD DIVERSIFIED (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.123 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.187 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.003 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.157 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

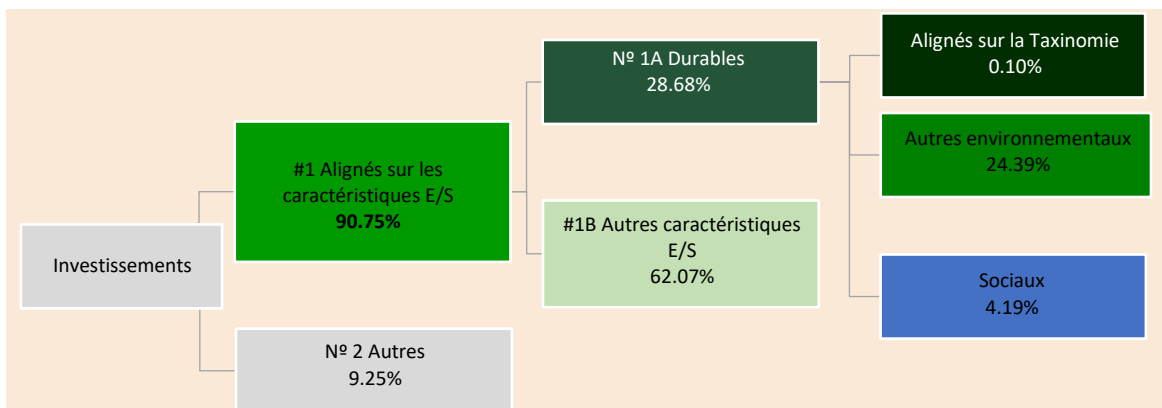

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 28.68% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	19.30%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.10% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.07% et la part d'investissements dans les activités habilitantes était de 0.02%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.04%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **24.39%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 4.19% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS CORPORATE HIGH YIELD BOND

Identifiant d'entité juridique : 5493006QGDC TMW9Y1N50

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>22.11%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance. L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.092 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.214 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.039 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.133 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

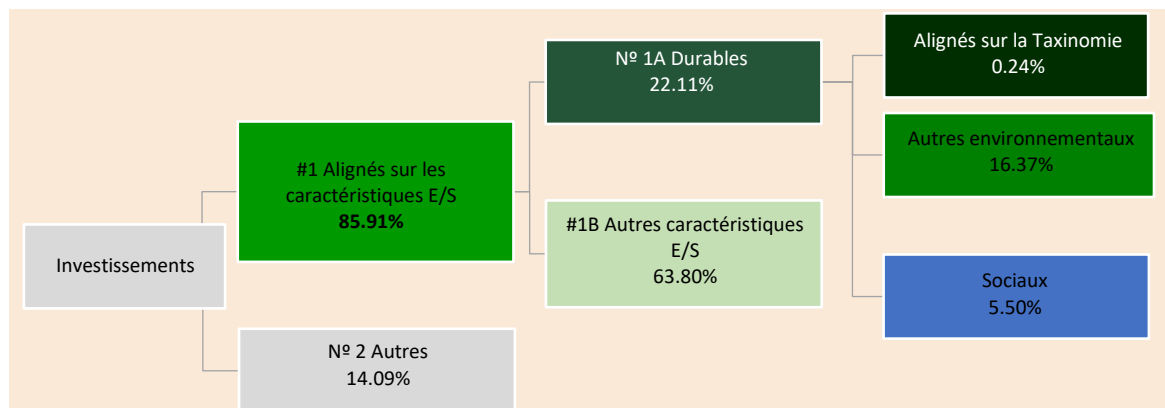

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
A-F ASIA BD INC RESPONSIBLE-Z USD-C	Obligations financières	Fonds communs de placement	Luxembourg	1.66%
VEDLN 10.875% 09/29 REGS	Obligations d'entreprise	Industries de base	Royaume-Uni	1.61%
AUNA 10% 12/29 REGS	Obligations d'entreprise	Biens de consommation de base	Luxembourg	1.59%
WYNMAC 5.625% 08/28 REGS	Obligations d'entreprise	Consommation discrétionnaire	Îles Caïmans	1.50%
YFPDAR 8.5% 06/29 REGS	Obligations d'entreprise	Énergie	Argentine	1.31%

ARAGVI 11.125% 11/29 REGS	Obligations d'entreprise	Biens de consommation de base	Irlande	0.92%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 22.11% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	17.92%
Obligations d'entreprise	Communications	12.89%
Obligations d'entreprise	Industries de base	11.40%
Obligations d'entreprise	Biens de consommation de base	10.53%
Obligations d'entreprise	Énergie	9.29%
Obligations d'entreprise	Consommation discrétionnaire	8.57%
Obligations d'entreprise	Électricité	6.11%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.24% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Ce graphique représente 92.2% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.36%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **16.37%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 5.50% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS GREEN BOND

Identifiant d'entité juridique : 2138001AOC3QUTY9SA42

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="checkbox"/> Oui	<input checked="" type="radio"/> <input type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 70.21% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN EM CREDIT GREEN BOND DIVERSIFIED INDEX (HEDGED TO USD)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Le compartiment a maintenu la part prévue de son allocation investie dans l'utilisation d'obligations vertes.

L'objectif des obligations vertes consiste à financer les projets qui génèrent un impact sur l'environnement positif et quantifiable. L'indicateur clé mesurant l'impact des obligations vertes est le nombre de « Tonnes d'émissions de CO2 évitées par million d'euros investis en un an ». Au-delà de l'analyse financière quantitative et qualitative des obligations susceptibles de composer le portefeuille, le processus de sélection inclut une évaluation de la stratégie ESG au niveau de l'émetteur et une évaluation des obligations vertes suivant plusieurs points d'analyse :

1. Amundi a mis au point un système de notation ESG exclusif reposant sur une échelle de 7 lettres allant de A à G, où A correspond à la meilleure notation et G à la moins bonne notation. Tout émetteur assorti de la note G est exclu de tous les portefeuilles d'Amundi faisant l'objet d'une gestion active. Nous vérifions la notation ESG de l'émetteur et surveillons la conformité de la notation aux critères associés du fonds. Comme indiqué ci-dessus, les émetteurs ayant reçu la note G selon l'échelle de notation ESG d'Amundi ne sont pas éligibles à l'investissement. S'il existe des points faibles, l'équipe ESG Research effectuera une recherche de controverse plus détaillée concernant le pilier associé (E, S ou G).
2. L'évaluation des obligations vertes selon les critères suivants : (i) analyse du projet, via l'analyse de l'emplacement géographique des actifs, action sur les actifs, évaluation de tout impact supplémentaire du projet vert sur l'environnement, la biodiversité, les communautés locales ou autres aspects sociaux (principe consistant à « ne pas causer de préjudice important »), alignement sur les normes du secteur (par ex. alignement sur les principes des obligations vertes de l'International Capital Markets Association, l'initiative pour les obligations climat Climate Bond Initiative, la taxinomie de l'UE) ; (ii) analyse de l'émetteur aux niveaux de la stratégie ESG globale et de la controverse ; (iii) logique du financement vert (type de projets financés, allocation d'actifs verts, type d'instruments finançant les projets verts) ; et (iv) transparence (rapport sur les obligations vertes, existence d'évaluation par seconde partie)
3. La surveillance continue (investissement ex post), qui inclut la révision régulière de l'allocation, un rapport d'impact des obligations vertes, les controverses dans lesquelles l'émetteur est impliqué et la stratégie environnementale de l'émetteur.

Enfin, toutes les obligations vertes sélectionnées doivent respecter les critères et recommandations des principes des obligations vertes telles que publiées par l'International Capital Market Association. Veuillez consulter la Politique d'investissement responsable d'Amundi pour plus de renseignements sur ce qui précède.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.239 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.097 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

À la fin de la période, le portefeuille détient **87.20%** d'obligations vertes.

- **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.131 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.006 (D). À la fin de la période précédente, le portefeuille détenait 89.04% d'obligations vertes

- **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

En ce qui concerne les titres de créance verts, sociaux et durables (« ESG »), tels que définis par l'International Capital Market Association (« ICMA »), et structurés conformément à ses principes ou lignes directrices, qui contribuent par leur conception à un objectif environnemental ou social, ils sont réputés satisfaire au Test de contribution décrit ci-dessus, à condition que :

- Le cas échéant, les émetteurs exercent une activité compatible avec les objectifs de durabilité et de développement à long terme ; ou

- Les instruments ESG ont été analysés par les analystes ESG d'Amundi et sont conformes aux exigences ESG d'Amundi (y compris la justification du financement, la performance ESG de l'émetteur, l'analyse du projet et la transparence).

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

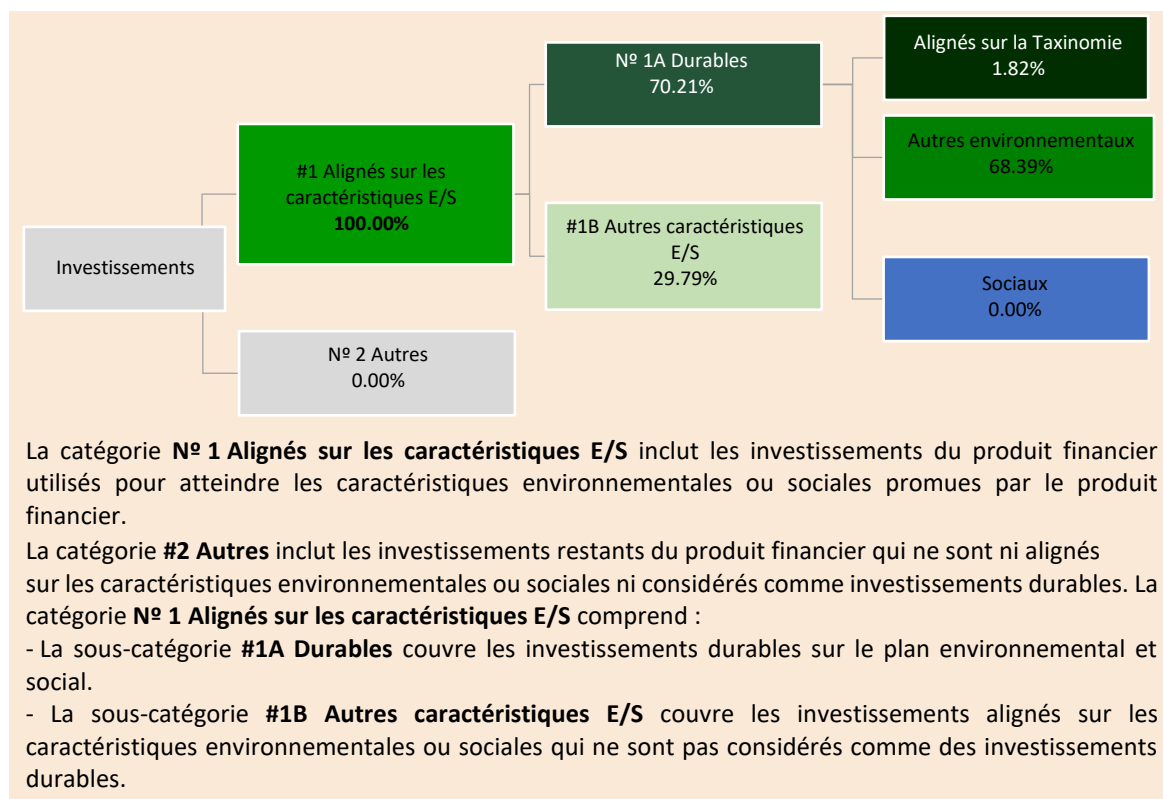

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMU PLAN-EM GR ONE-SEN USDC	Obligations financières	Fonds communs de placement	Luxembourg	5.66%
FSBIOE 8.875% 02/31 REGS	Obligations d'entreprise	Énergie	Luxembourg	2.41%

SKBTAM 2.125% 01/26	Obligations d'entreprise	Biens d'équipement	États-Unis	1.54%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 70.21% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Électricité	24.13%
Obligations d'entreprise	Banques	16.60%
Titres parapublics	Titres souverains	10.77%
Obligations d'entreprise	Industries de base	8.20%
Obligations d'entreprise	Consommation discrétionnaire	6.87%
Obligations financières	Fonds communs de placement	5.66%
Obligations d'entreprise	Technologie	4.03%

<i>Obligations d'entreprise</i>	<i>Finance - autres</i>	<i>3.97%</i>
<i>Obligations d'entreprise</i>	<i>Sociétés financières</i>	<i>3.43%</i>
<i>Obligations d'entreprise</i>	<i>Immobilier (REIT)</i>	<i>2.79%</i>

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.82% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.25%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **68.39%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS
HARD CURRENCY BOND

Identifiant d'entité juridique :
549300CF4H3SXCNRP626

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 8.98% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **JP MORGAN EMBI GLOBAL DIVERSIFIED (HEDGED TO EUR)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.027 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.127 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.119 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.153 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

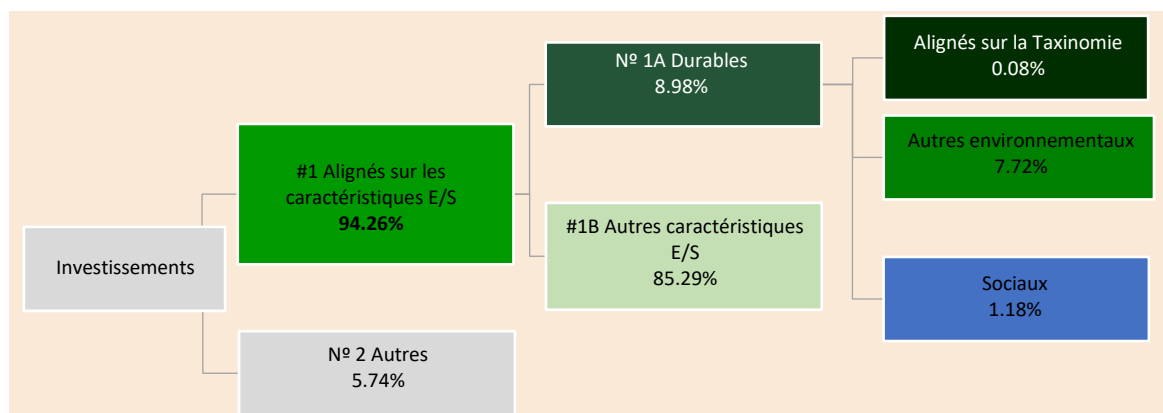

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 8.98% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Titres parapublics	Titres souverains	67.46%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.08% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

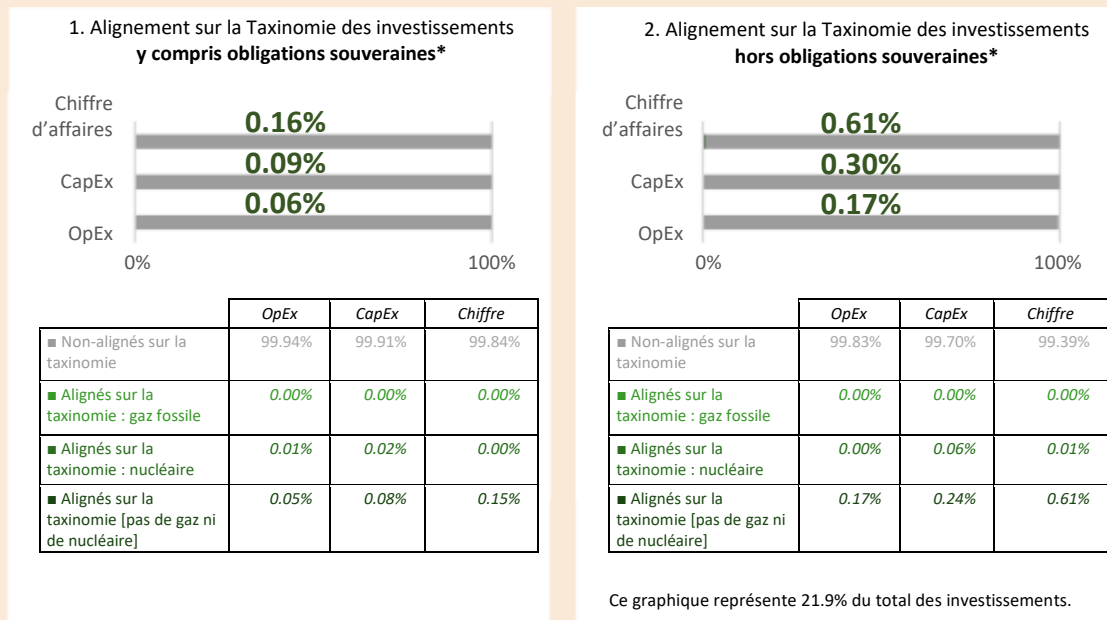

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.02%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **7.72%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.18% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS LOCAL CURRENCY BOND

Identifiant d'entité juridique : 549300JJ3276S8R63L30

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>7.74%</u> d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **80% JPM GBI EM GLOBAL DIVERSIFIED Index + 20% ICE BOFA BROAD LOCAL EMERGING MARKETS NON-SOVEREIGN Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.336 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.182 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.328 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.186 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

● ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

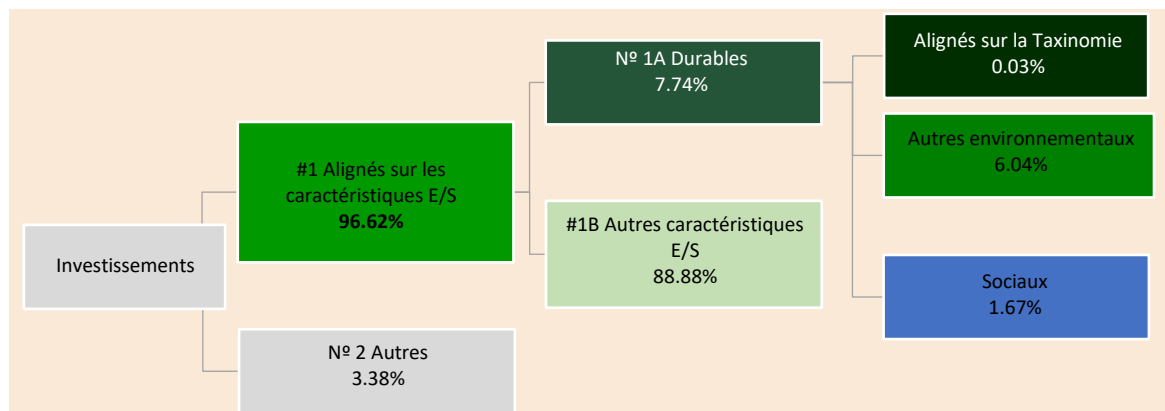

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SAGB 8.25% 3/32	Valeurs du Trésor	Valeurs du Trésor	South Africa	2.70%
MGS 3.844% 4/33	Valeurs du Trésor	Valeurs du Trésor	Malaisie	2.68%
MGS 3.757% 05/40 0519	Valeurs du Trésor	Valeurs du Trésor	Malaisie	2.46%
BRAZIL NTN-F 10% 01/27	Valeurs du Trésor	Valeurs du Trésor	Brazil	2.23%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 7.74% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	81.98%
Titres parapublics	Titres supranationaux	8.05%
Obligations financières	Fonds communs de placement	3.73%
Obligations d'entreprise	Énergie	1.13%
Obligations d'entreprise	Banques	0.83%
Obligations d'entreprise	Biens de consommation de base	0.37%
Titres parapublics	Agences	0.33%

<i>Obligations d'entreprise</i>	<i>Communications</i>	<i>0.26%</i>
<i>Forex</i>	<i>Forex</i>	<i>0.25%</i>
<i>Obligations d'entreprise</i>	<i>Électricité</i>	<i>0.22%</i>
<i>Obligations d'entreprise</i>	<i>Finance - autres</i>	<i>0.03%</i>
<i>Obligations d'entreprise</i>	<i>Immobilier (REIT)</i>	<i>0.01%</i>
<i>Autres</i>	<i>Autres</i>	<i>-0.04%</i>
<i>Liquidités</i>	<i>Liquidités</i>	<i>2.86%</i>

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.03% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

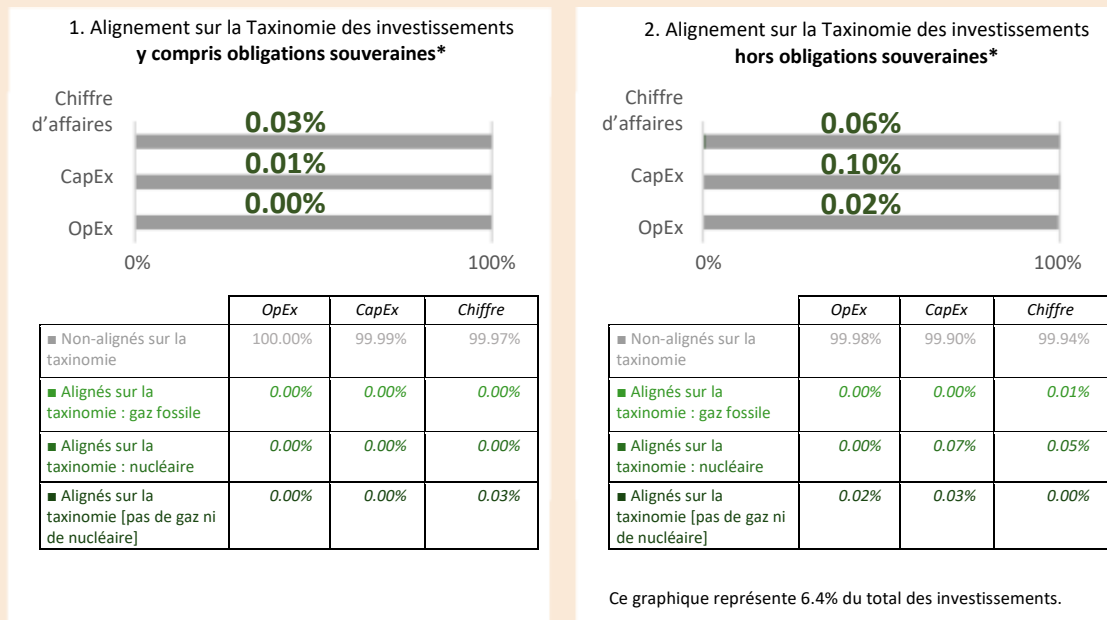

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 6.04% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.67% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS SHORT TERM BOND

Identifiant d'entité juridique : 5493000K4D8P0NQAIA67

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 17.24% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **75% JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD + 25% JP MORGAN EMBI GLOBAL DIVERSIFIED 1-3 Y INDEX (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.225 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.245 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.019 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.201 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

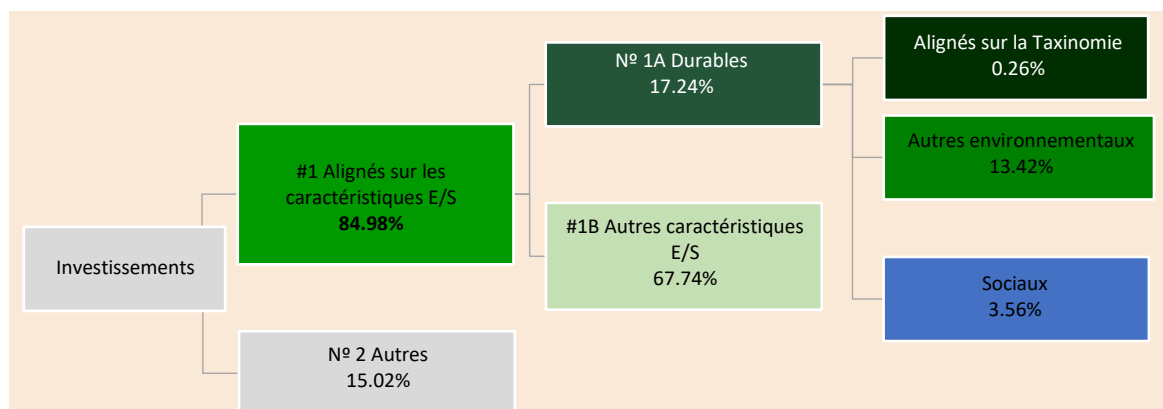

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AIF - EMG MKT SOVEREIGN BD - S	Obligations financières	Fonds communs de placement	Luxembourg	6.08%
ROMANI 3.75% 02/34 REGS	Titres parapublics	Titres souverains	Roumanie	2.45%
CPIPGR 6% 01/32 EMTN	Obligations d'entreprise	Finance - autres	Luxembourg	2.40%
BOAD VAR 02/55 REGS	Titres parapublics	Titres supranationaux		2.37%
GDZELE 9% 10/29 REGS	Obligations d'entreprise	Électricité	Turquie	2.13%

FUNOTR 7.375% 02/34 REGS	Obligations d'entreprise	Immobilier (REIT)	Mexique	1.38%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 17.24% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Industries de base	12.95%
Obligations d'entreprise	Banques	9.84%
Titres parapublics	Titres souverains	9.69%
Obligations d'entreprise	Électricité	9.14%
Obligations d'entreprise	Transport	7.11%
Obligations d'entreprise	Finance - autres	6.43%
Obligations financières	Fonds communs de placement	6.08%

<i>Obligations d'entreprise</i>	<i>Énergie</i>	5.98%

<i>Immobilier</i>	<i>Gestion et promotion immobilière</i>	0.00%
<i>Liquidités</i>	<i>Liquidités</i>	2.65%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.26% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Ce graphique représente 79.6% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au gaz fossile incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.26%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.08%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **13.42%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.56% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS ASIA MULTI ASSET TARGET INCOME

Identifiant d'entité juridique : 213800D8TH8Y8YWFV59

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>30.89%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **50% MSCI Emerging Markets Index, 30% J.P. Morgan EMBI Global Diversified Composite and 20% J.P. Morgan CEMBI Broad Diversified Composite**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.192 (D)**
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.083 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.150 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.126 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

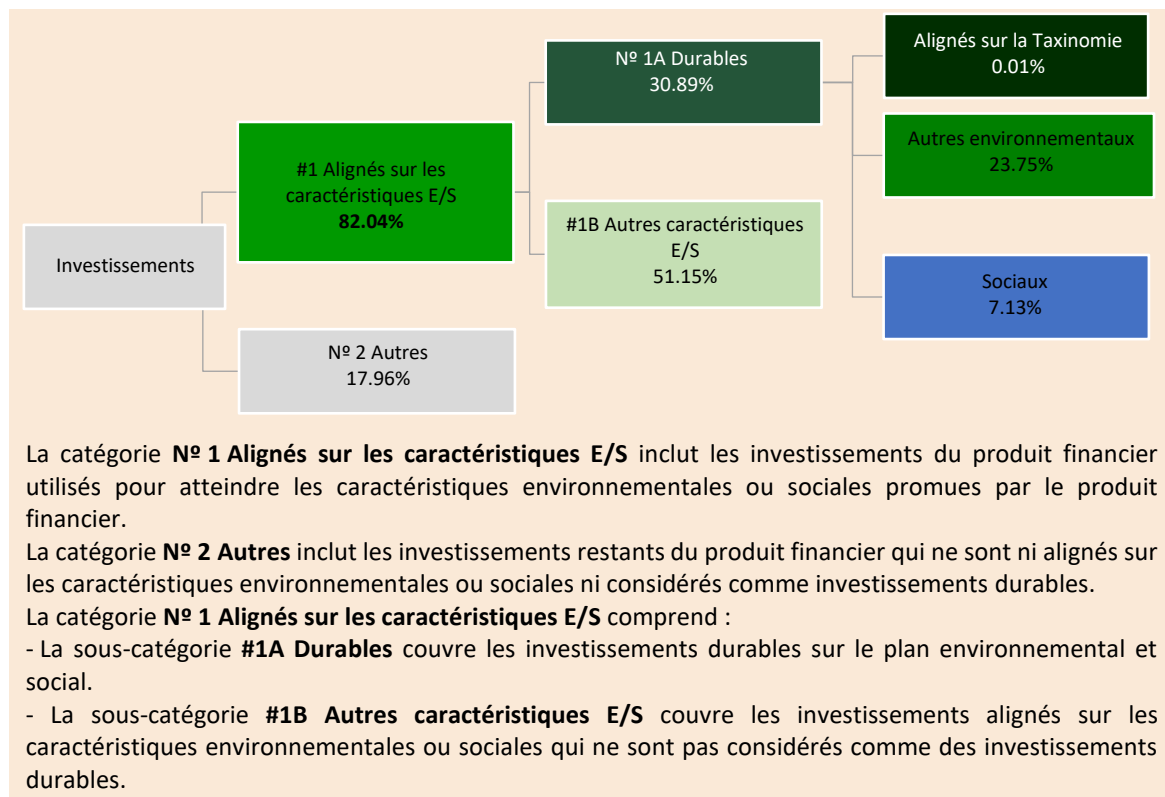

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
ISHSIV-MSCI INDIA UCITS ETF(LSE)	Obligations financières	Fonds communs de placement	Irlande	5.29%
TAIWAN SEMICONDUCTOR MANUFAC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taiwan	3.15%
Amundi MSCI China A II ETF	Obligations financières	Fonds communs de placement	Luxembourg	2.44%
AMUNDI PHYSICAL GOLD ETC	Obligations financières	Fonds communs de placement	Irlande	2.20%
TENCENT HOLDINGS LTD	Services de communication	Médias et loisirs	Îles Caïmans	1.54%
DB X-TR MSCI KOREA	Obligations financières	Fonds communs de placement	Luxembourg	1.18%
RPGB 6.25% 02/29 R518	Valeurs du Trésor	Valeurs du Trésor	Philippines	0.90%
HYUELE 2.375% 01/31 REGS	Obligations d'entreprise	Technologie	Korea	0.89%
MEITUA 3.05% 10/30 REGS	Obligations d'entreprise	Consommation discrétionnaire	Îles Caïmans	0.81%
KDB 5.625% 10/33	Obligations d'entreprise	Banques	Korea	0.80%
ALIBABA GROUP HOLDING LTD	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Îles Caïmans	0.80%
PETRONAS 7.625% 10/26-REGS	Obligations d'entreprise	Énergie	Malaisie	0.79%
CKHH 5.5% 04/34 REGS	Obligations d'entreprise	Consommation discrétionnaire	Îles Caïmans	0.78%
SAMSUNG ELECTRONICS	Technologies de l'information	Matériel technologique et équipement	Korea	0.77%
KORGAS 3.5% 7/25	Obligations d'entreprise	Gaz naturel	Korea	0.76%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 30.89% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Fonds communs de placement	11.90%
Obligations d'entreprise	Consommation discrétionnaire	8.44%
Obligations d'entreprise	Banques	6.82%
Obligations financières	Banques	5.38%
Obligations d'entreprise	Technologie	4.64%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	4.42%
Valeurs du Trésor	Valeurs du Trésor	3.87%
Obligations d'entreprise	Assurance	3.66%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.01% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.90%	99.96%	99.99%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.10%	0.04%	0.01%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.88%	99.95%	99.99%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.12%	0.05%	0.01%

Ce graphique représente 84.3% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.01%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.01%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **23.75%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 7.13% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EURO MULTI-ASSET TARGET INCOME

Identifiant d'entité juridique : 549300MRV3FILX0BHB52

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 33.34% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.674 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.674 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

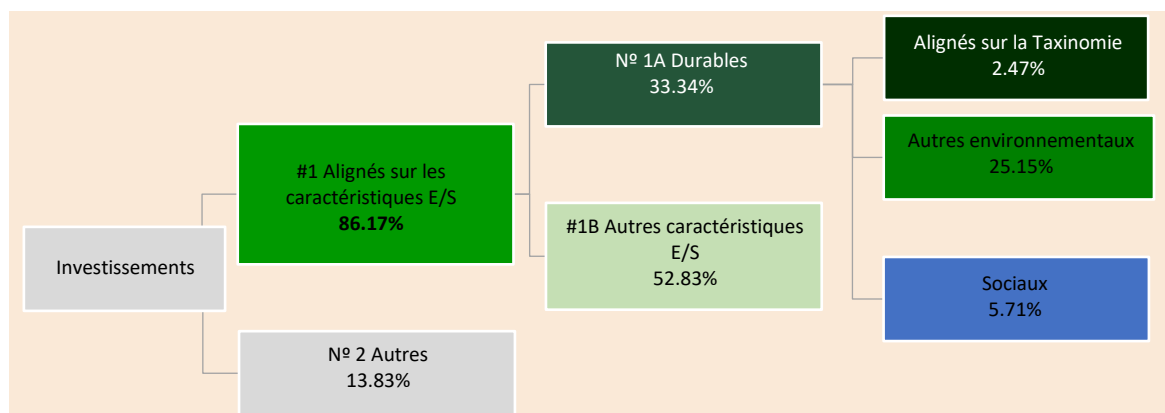

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AMND GOLD LBMA ETC(PAR)	Obligations financières	Fonds communs de placement	Irlande	4.55%
A-F REAL ASSETS TGT INCOME - Z EUR (D)	Obligations financières	Fonds communs de placement	Luxembourg	2.93%
A-F EMERGING MKT EQY SELECT-Z USD QD-D	Obligations financières	Fonds communs de placement	Luxembourg	2.59%
BTPS 6% 05/31	Valeurs du Trésor	Valeurs du Trésor	Italie	1.46%
SPAIN 5.90% 07/26	Valeurs du Trésor	Valeurs du Trésor	Espagne	1.26%

BTPS 5.75% 02/33	Valeurs du Trésor	Valeurs du Trésor	Italie	0.83%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 33.34% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	19.97%
Obligations financières	Fonds communs de placement	15.66%
Obligations d'entreprise	Banques	7.05%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.47% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.97%	95.06%	96.27%
■ Alignés sur la taxinomie : gaz fossile	0.02%	0.08%	0.02%
■ Alignés sur la taxinomie : nucléaire	0.39%	0.41%	0.45%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	3.62%	4.45%	3.26%

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.38%	94.15%	95.74%
■ Alignés sur la taxinomie : gaz fossile	0.02%	0.10%	0.03%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.18%	0.16%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	4.60%	5.57%	4.07%

Ce graphique représente 68.6% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.40% et la part d'investissements dans les activités habilitantes était de 1.38%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.62%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **25.15%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.71% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS GLOBAL MULTI-ASSET

Identifiant d'entité juridique :
549300OD7WDES3BYBD54

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>37.45%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.255 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.312 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

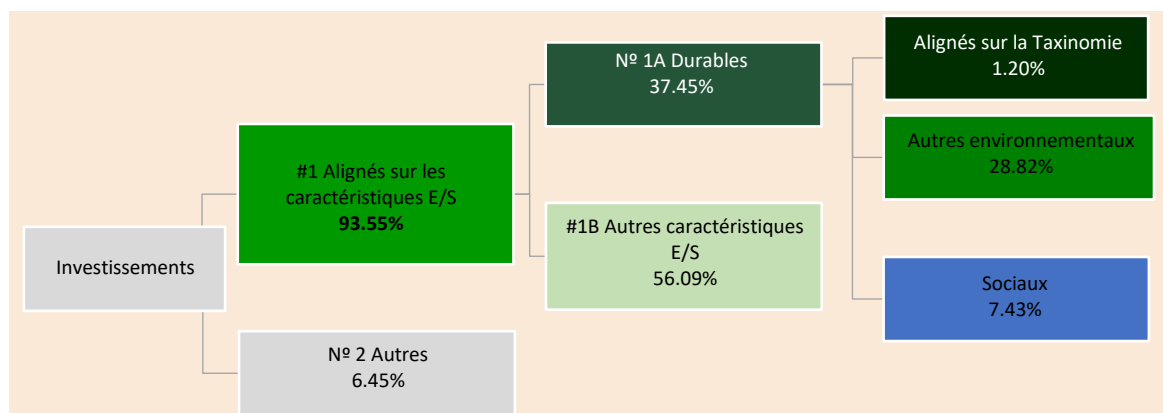

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
A-F ABS RETURN MULTI-STRAT-I EUR	Obligations financières	Fonds communs de placement	Luxembourg	2.14%
NVIDIA CORP	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	1.92%
US TSY 4% 02/34	Valeurs du Trésor	Valeurs du Trésor	États-Unis	1.91%
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	1.90%
ETF5 PHYS SILVER USD	Obligations financières	Fonds communs de placement	Jersey	1.42%
ALPHABET INC CL C	Services de communication	Médias et loisirs	États-Unis	1.41%
AMAZON.COM INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	1.30%
ADVANCED MICRO DEVICES	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	1.29%
BANK OF AMERICA CORP	Obligations financières	Banques	États-Unis	1.22%
ROCKWELL AUTOMATION INC	Industrie	Biens d'équipement	États-Unis	1.15%
APPLE INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	1.13%
A F ASIA MULTI ASSET TGT INC	Obligations financières	Fonds communs de placement	Luxembourg	1.06%
META PLATFORMS INC-CLASS A	Services de communication	Médias et loisirs	États-Unis	1.04%
CISCO SYSTEMS INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	0.98%
WELLS FARGO & CO	Obligations financières	Banques	États-Unis	0.98%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 37.45% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	10.37%
Obligations d'entreprise	Banques	7.89%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	7.55%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.20% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Ce graphique représente 84.4% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.35% et la part d'investissements dans les activités habilitantes était de 0.78%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.37%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

• **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **28.82%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 7.43% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS GLOBAL MULTI-ASSET CONSERVATIVE

Identifiant d'entité juridique : 549300B1RON20X3Z5K83

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 34.82% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.481 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.633 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

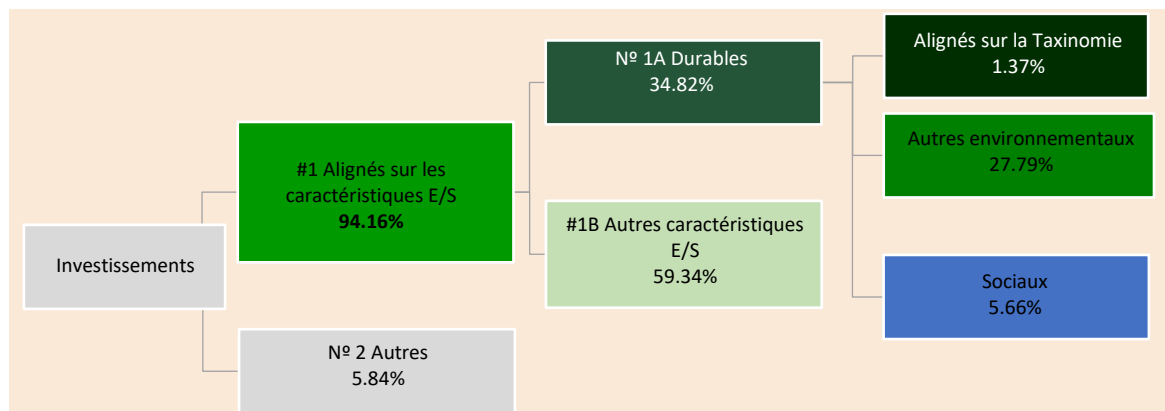

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 34.82% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.37% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	98.44%	97.22%	97.68%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.02%	0.01%
■ Alignés sur la taxinomie : nucléaire	0.09%	0.11%	0.11%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	1.46%	2.65%	2.21%

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	97.57%	95.73%	96.49%
■ Alignés sur la taxinomie : gaz fossile	0.01%	0.03%	0.01%
■ Alignés sur la taxinomie : nucléaire	0.13%	0.16%	0.17%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	2.30%	4.09%	3.33%

Ce graphique représente 63.4% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.44% et la part d'investissements dans les activités habilitantes était de 0.83%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.37%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **27.79%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 5.66% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS GLOBAL MULTI-ASSET TARGET INCOME

Identifiant d'entité juridique : 549300MJSB1OV3IZ3T98

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 23.49% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a promu des caractéristiques durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment promeut les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'univers d'investissement. Pour déterminer la note ESG du Compartiment et de l'univers d'investissement, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance. Aucun Indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.418 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.506 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail.

En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

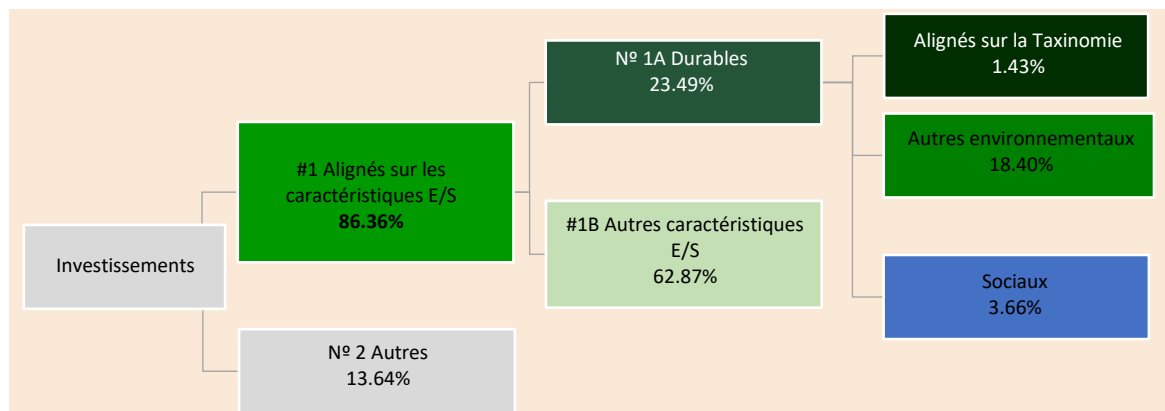

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
US TSY 6.75% 08/26	Valeurs du Trésor	Valeurs du Trésor	États-Unis	7.60%
US TSY 6.25 05/30	Valeurs du Trésor	Valeurs du Trésor	États-Unis	6.63%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 23.49% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	26.92%
Obligations financières	Fonds communs de placement	14.00%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.43% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.28% et la part d'investissements dans les activités habilitantes était de 0.52%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.46%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **18.40%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.66% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS INCOME OPPORTUNITIES **Identifiant d'entité juridique :** 5493001LVTGROHRV6666

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 28.60% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.035 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.280 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

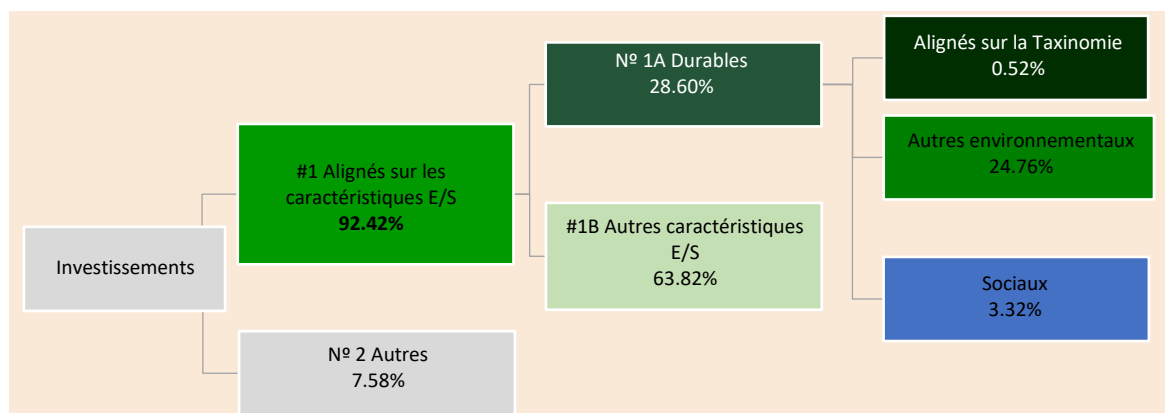

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
ABN AMRO BANK NV-CVA	Obligations financières	Banques	Netherlands	2.83%
US TSY 4% 07/30	Valeurs du Trésor	Valeurs du Trésor	États-Unis	2.40%
PFIZER INC	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	2.32%
BANK OF AMERICA CORP	Obligations financières	Banques	États-Unis	2.29%
US TSY 4% 02/30	Valeurs du Trésor	Valeurs du Trésor	États-Unis	2.00%
EVERSOURCE ENERGY	Services aux collectivités	Services aux collectivités – électricité	États-Unis	1.93%

KB FINANCIAL GROUP INC	Obligations financières	Banques	Korea	1.80%
HANA FINANCIAL HLDG	Obligations financières	Banques	Korea	1.66%
BANK OF IRELAND GROUP PLC	Obligations financières	Banques	Irlande	1.63%
INTL BUSINESS MACHINES CORP	Technologies de l'information	Logiciels et services	États-Unis	1.48%
CISCO SYSTEMS INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	1.47%
STATE STREET CORP	Obligations financières	Services financiers	États-Unis	1.43%
HENSOLDT AG	Industrie	Biens d'équipement	Allemagne	1.31%
WF - AMD 15.48% 06/24/2026	Autres	Autres	États-Unis	1.03%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 28.60% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Autres	Autres	21.60%
Créances titrisées	Titres MBS émis par des agences	16.88%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.52% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

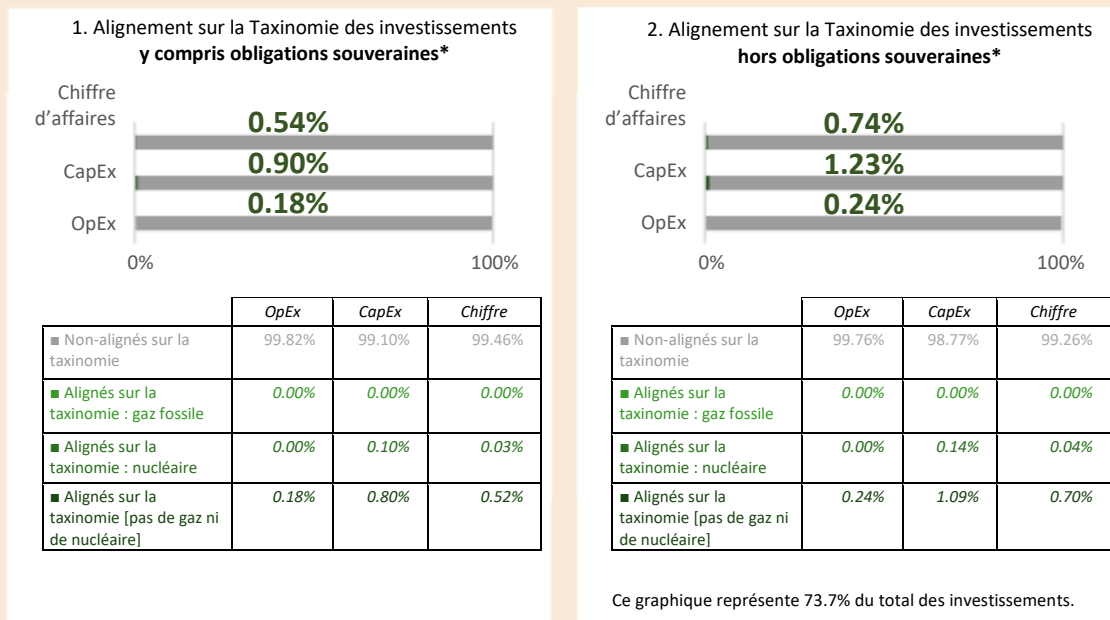

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.10% et la part d'investissements dans les activités habilitantes était de 0.09%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.01%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 24.76% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.32% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS MULTI-ASSET REAL RETURN

Identifiant d'entité juridique : 222100UNVFMGHI5DQJ57

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>45.53%</u> d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **Euro HICP ex Tobacco**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.777 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.769 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 45.53% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

<i>Forex</i>	<i>Forex</i>	-0.77%
<i>Liquidités</i>	<i>Liquidités</i>	2.74%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.50% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

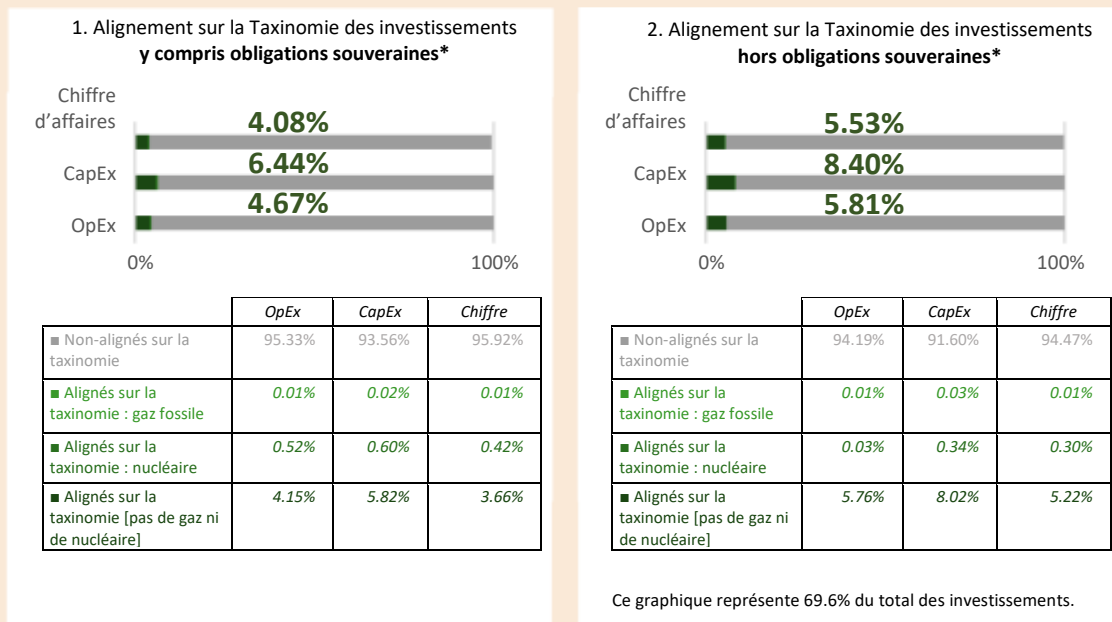

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.33% et la part d'investissements dans les activités habilitantes était de 0.82%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.06%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **37.31%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.72% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS MULTI-ASSET CONSERVATIVE RESPONSIBLE

Identifiant d'entité juridique : 549300E1QOFTUCHMCV76

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>72.93%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice, le produit a continuellement promu des caractéristiques environnementales et/ou sociales en visant à obtenir un score ESG plus élevé que celui de son indice de référence **MSCI Daily Net Total Return World Euro Index (30%) Bloomberg EuroAgg Total Return Index Value Unhedged EUR Index (70%) Index**. Pour déterminer la note ESG du Produit et de l'indice de référence, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'indice de référence est un indice de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - Entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles
 - Exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr)
 - Le Compartiment a appliqué des critères d'exclusion supplémentaires et spécifiques aux entreprises et aux émetteurs publics sur la base d'activités controversées (y compris les armes controversées, les armes nucléaires et autres armes, le tabac, le charbon, le pétrole et le gaz, la production d'électricité par le charbon, le nucléaire, le pétrole ou le gaz, les alcools forts, les jeux, le génie génétique, la fourrure et la pornographie) et de comportements controversés (y compris le travail des enfants, le travail et les droits de l'homme, les comportements nuisibles à l'environnement, la corruption, la fraude, la peine de mort, l'énergie nucléaire).
2. Aucun investissement n'a été réalisé auprès d'émetteurs notés E, F ou G. Pour tout émetteur dont la notation a été revue à la baisse et désormais noté F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. Aucun investissement n'a été réalisé dans des émetteurs notés F ou G sur un ou plusieurs des trois indicateurs : transition énergétique et écologique, chaîne d'approvisionnement socialement responsable et stratégie d'entreprise ESG.
4. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'indice de référence du fonds après suppression de 20% des émetteurs les moins bien notés. *(règle applicable jusqu'à fin décembre 2024, puis le seuil a été élevé à 25 %)*
5. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- **Quelle performance ont affichée les indicateurs de durabilité ?**
 - Engagement à améliorer les principaux indicateurs défavorables par rapport à l'univers (référence) : Intensité de carbone et absence de politique en matière de droits de l'homme :

- Engagement à améliorer la notation ESG et les indicateurs ESG supplémentaires (transition énergétique et écologique, chaîne d'approvisionnement socialement responsable, stratégie d'entreprise ESG, politique en matière de droits de l'homme en référence au Pacte mondial des Nations unies) :

** L'indice de référence se réfère à l'indice de référence suivant [30% MSCI World + 70% Bloomberg Euro Aggregate].

- Engagement à améliorer les principaux indicateurs défavorables par rapport à l'univers (référence) : Intensité de carbone et absence de politique en matière de droits de l'homme :

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'indice de référence du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.128 (C)**.
- La note ESG moyenne pondérée du portefeuille est **0.711 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.104 (C) et la note ESG moyenne pondérée de l'Indice de référence était de 0.718 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

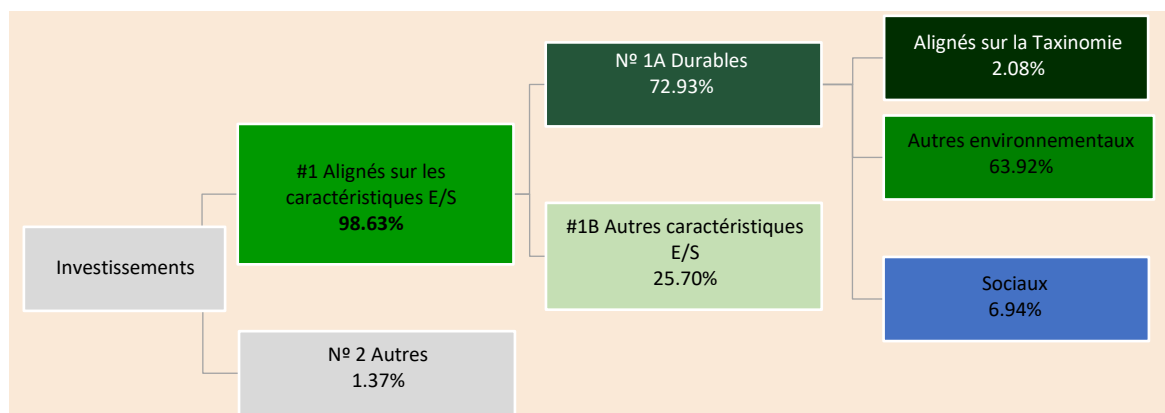

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
BTPS 4% 04/35 13Y	Valeurs du Trésor	Valeurs du Trésor	Italie	2.57%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 72.93% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.08% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

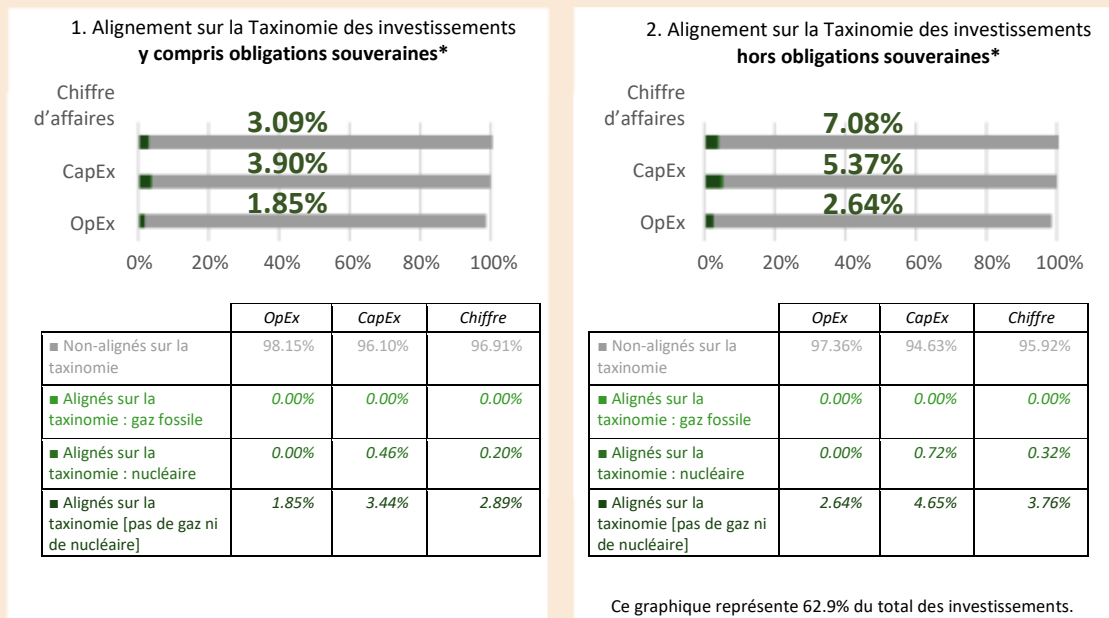

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.08% et la part d'investissements dans les activités habilitantes était de 1.11%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.04%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 63.92% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.94% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS MULTI-ASSET CLIMATE

Identifiant d'entité juridique :
549300UWEKCHQNE88693

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 62.01% d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **5% MSCI USD HY CORPORATE BOND INDEX + 50% MSCI ACWI + 5% MSCI EUR HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 25% MSCI EUR IG CORPORATE BOND INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales en cherchant à réduire son intensité carbone à travers l'alignement de l'intensité de l'empreinte carbone sur celle de son Indice de référence **50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index**.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est 0.521 (C).
- La note ESG moyenne pondérée de l'univers d'investissement ESG est -0.003 (D).

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits de l'homme en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 90.77
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 161.27

- **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.519 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.012 (C). À la fin de la période précédente, l'intensité carbone moyenne pondérée du portefeuille était de 93.73 et l'indice de référence de l'intensité carbone moyenne pondérée était de 110.21

- **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- **Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?**

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : du **01/07/2024** au **30/06/2025**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
NVIDIA CORP	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	2.13%
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	1.97%
A-F EUROPE EQUITY CLIMATE-Z EUR-C	Obligations financières	Fonds communs de placement	Luxembourg	1.97%
APPLE INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	1.56%
EU 0.4% 02/37 UFA	Titres parapublics	Titres supranationaux		1.28%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 62.01% dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.87% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

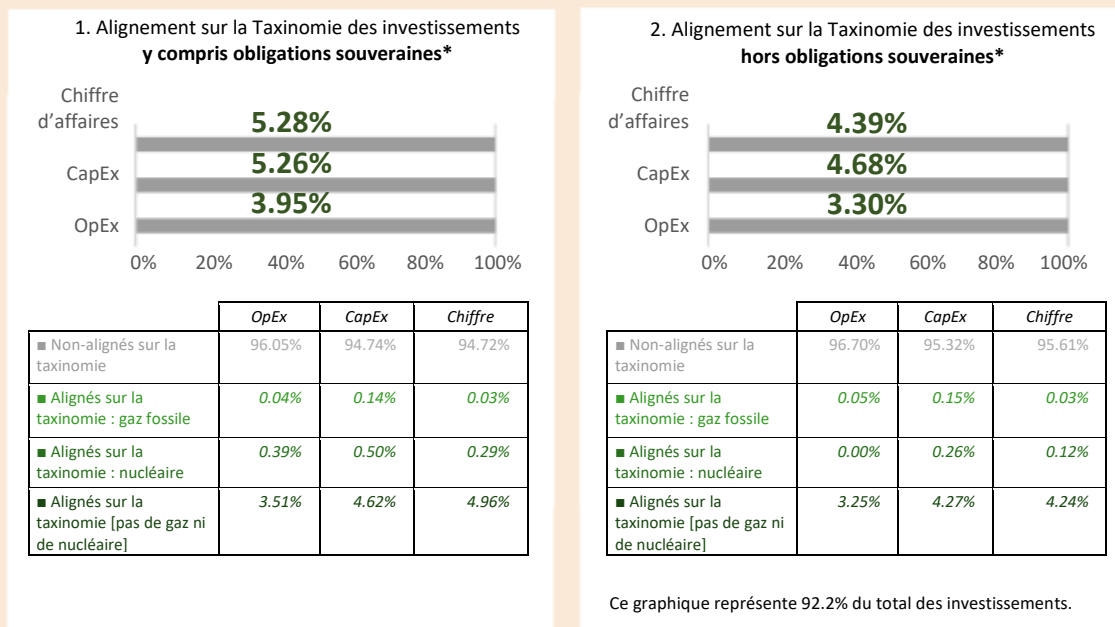

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.20% et la part d'investissements dans les activités habilitantes était de 0.95%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.68%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 47.86% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 10.28% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI ACWI 50 % + 5 % MSCI USD HY CORPORATE BOND INDEX + 15 % MSCI USD IG CORPORATE BOND + 5 % MSCI EUR HY CORPORATE BOND INDEX + 25 % MSCI EUR IG CORPORATE BOND INDEX (ESG). L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 90.77
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 161.27

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

L'indice utilisé est un indice de référence « transition climatique » qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**
 - La note ESG moyenne pondérée du portefeuille est 0.521 (C).
 - La note ESG moyenne pondérée de l'univers d'investissement ESG est -0.003 (D).

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 90.77
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 161.27

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI ACWI 50 % + 5 % MSCI USD HY CORPORATE BOND INDEX + 15 % MSCI USD IG CORPORATE BOND + 5 % MSCI EUR HY CORPORATE BOND INDEX + 25 % MSCI EUR IG CORPORATE BOND INDEX (ESG). L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 90.77
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 161.27

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

L'indice utilisé est un indice de référence « transition climatique » qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS PIONEER FLEXIBLE OPPORTUNITIES

Identifiant d'entité juridique : 5493000SYHI3US1RDZ90

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 39.33% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **U.S. CPI Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.601 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.509 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

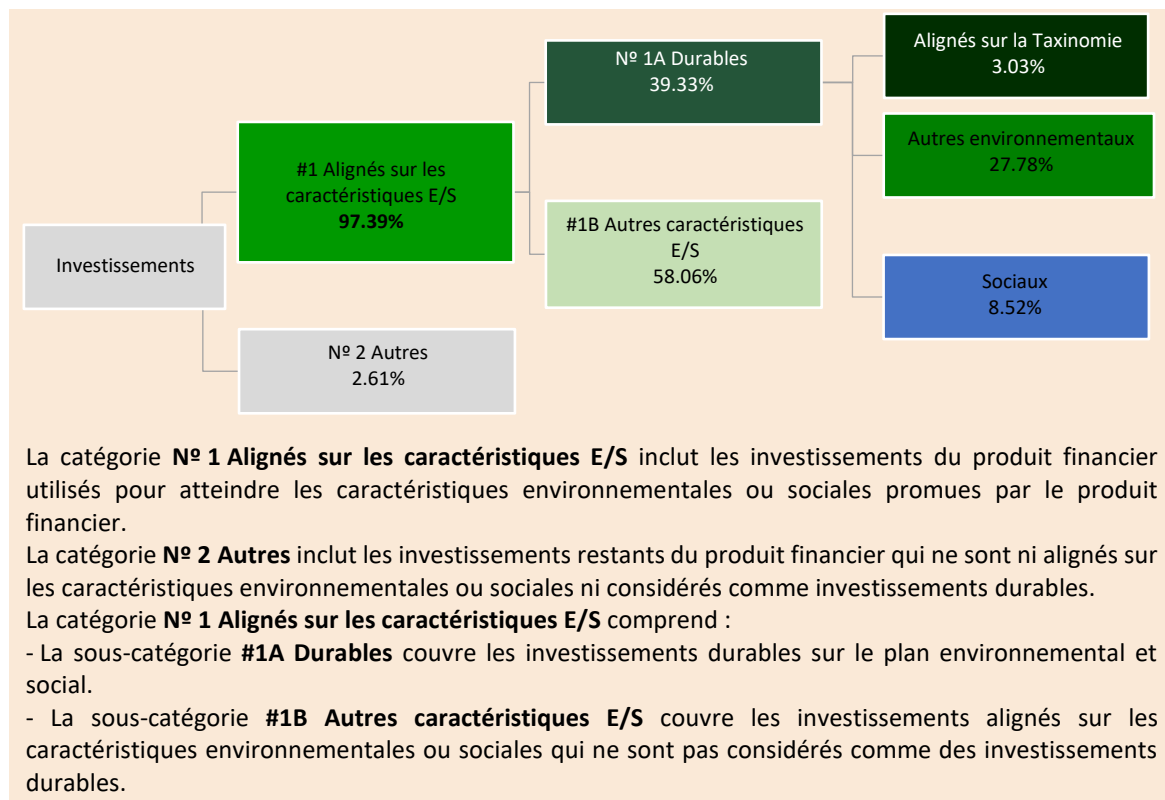

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
POSTE ITALIANE SPA	Obligations financières	Assurance	Italie	4.63%
BAWAG GROUP AG	Obligations financières	Banques	Autriche	4.14%
INTL BUSINESS MACHINES CORP	Technologies de l'information	Logiciels et services	États-Unis	3.94%
CURTISS-WRIGHT	Industrie	Biens d'équipement	États-Unis	3.72%
PALO ALTO NETWORKS INC	Technologies de l'information	Logiciels et services	États-Unis	3.58%
AXA SA	Obligations financières	Assurance	France	3.46%
NEWMONT CORP	Matériaux	Métaux et exploitation minière	États-Unis	3.45%
IBERDROLA SA	Services aux collectivités	Services aux collectivités – électricité	Espagne	3.42%
SWISS LIFE HOLD AG	Obligations financières	Assurance	Switzerland	3.33%
CRH PLC UK	Matériaux	Matériaux de construction	Irlande	3.27%
DBS GROUP HOLDINGS LTD	Obligations financières	Banques	Singapore	3.03%
SUMITOMO MITSUI FINAN	Obligations financières	Banques	Japon	2.88%
CISCO SYSTEMS INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	2.80%
EVERSOURCE ENERGY	Services aux collectivités	Services aux collectivités – électricité	États-Unis	2.50%
AVIVA PLC	Obligations financières	Assurance	Royaume-Uni	2.46%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 39.33% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	19.67%
Obligations financières	Assurance	19.17%
Technologies de l'information	Logiciels et services	7.52%
Services aux collectivités	Services aux collectivités – électricité	7.19%
Industrie	Biens d'équipement	6.58%
Obligations financières	Services financiers	3.84%
Matériaux	Métaux et exploitation minière	3.45%
Matériaux	Matériaux de construction	3.27%
Industrie	Services commerciaux et	3.23%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.03% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	94.53%	92.83%	96.42%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.21%	0.07%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.21%	0.11%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	5.47%	6.75%	3.39%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	94.02%	92.67%	96.26%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.23%	0.08%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.23%	0.12%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	5.98%	6.86%	3.54%

Ce graphique représente 91.5% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.42% et la part d'investissements dans les activités habilitantes était de 1.63%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.35%.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **27.78%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 8.52% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS REAL ASSETS TARGET INCOME

Identifiant d'entité juridique : 549300B49TP3UV3FOI07

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 23.64% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **7.5% ICE BOFA US HIGH YIELD INDEX + 5% IBOXX EURO CORPORATE NON FINANCIALS + 5% BLOOMBERG COMMODITY INDEX USD TR + 5% ALERIAN MLP + 5% BLOOMBERG GOLD SUBINDEX TOTAL RETURN + 15% MSCI ACWI REAL ESTATE INVESTMENT TRUSTS (REIT) + 10% MSCI World Index / Food Beverage & Tobacco -IG + 7.5% MSCI WORLD TRANSPORTATION INFRASTRUCTURE + 10% MSCI World Index / Materials -SEC + 5% ICE BOFA EURO HIGH YIELD INDEX + 5% ICE BOFA GLOBAL INFLATION- LINKED GOVERNMENT INDEX + 5% MSCI World Index / Utilities -SEC + 5% ICE BOFA US NON-FINANCIAL CORPORATE INDEX + 10% MSCI World Index / Energy -SEC (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.419 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.025 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.533 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.045 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

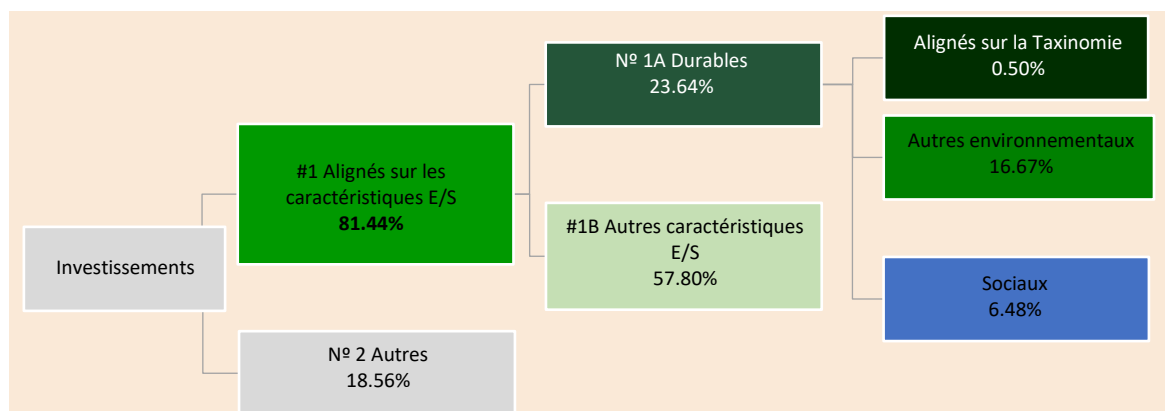

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
US TSY 6.75% 08/26	Valeurs du Trésor	Valeurs du Trésor	États-Unis	6.88%
BTPS 5% 09/40	Valeurs du Trésor	Valeurs du Trésor	Italie	4.06%
AMUNDI PHYSICAL GOLD ETC	Obligations financières	Fonds communs de placement	Irlande	3.77%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 23.64% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Valeurs du Trésor	Valeurs du Trésor	19.42%
Obligations financières	Fonds communs de placement	13.11%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.50% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Ce graphique représente 76.2% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.17% et la part d'investissements dans les activités habilitantes était de 0.44%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.01%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 16.67% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.48% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EURO BOND INCOME

Identifiant d'entité juridique :
2221009DOWCSI3Q32Q11

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 47.40% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **60% Bloomberg Euro Aggregate Corporate +40% ICE BofA European Currency High Yield Constrained Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.730 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.435 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.561 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.000 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

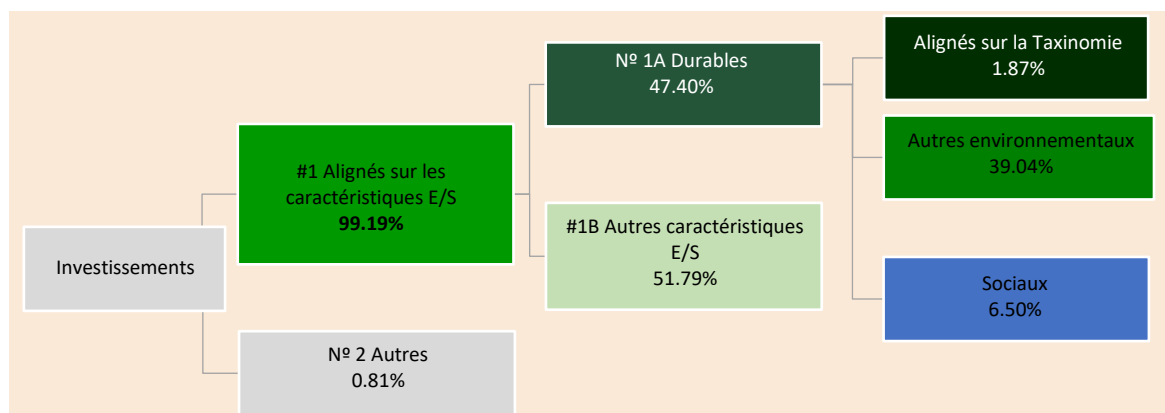

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d’investissements liés à la durabilité ?

Le fonds a investi 47.40% dans des investissements liés au développement durable.

• **Quelle était l’allocation d’actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L’allocation d’actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d’entreprise	Banques	29.14%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.87% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.55% et la part d'investissements dans les activités habilitantes était de 0.57%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.96%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 39.4% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.50% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

• En quoi l'indice de référence diffère-t-il de l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

• Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

• Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

• Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS ABSOLUTE RETURN MULTI-STRATEGY

Identifiant d'entité juridique : 549300G94XO1UF8XMQ66

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 35.95% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **INDEX AMUNDI RATING D (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.525 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.466 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

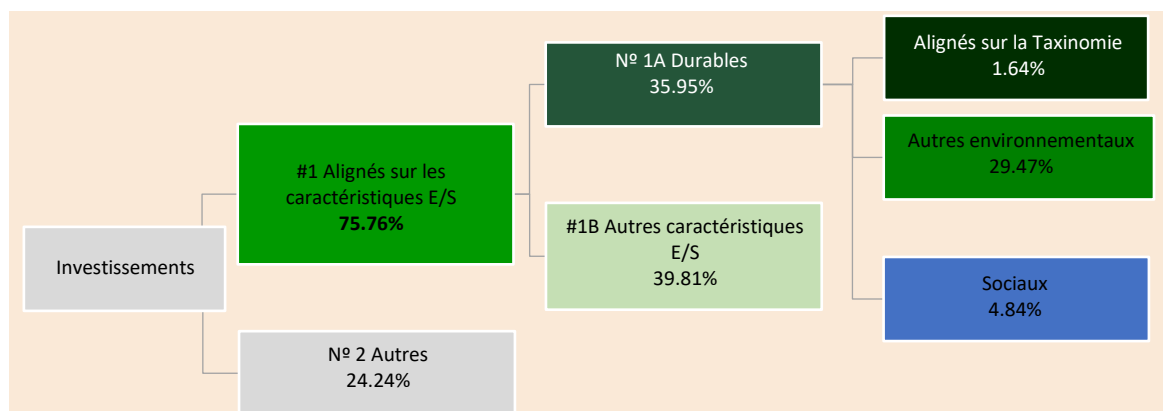

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
OBL % 10/25 G	Valeurs du Trésor	Valeurs du Trésor	Allemagne	7.83%
AMUNDI PHYSICAL GOLD ETC	Obligations financières	Fonds communs de placement	Irlande	3.48%
AMUNDI BBG EQUAL WEIGHT COMMEXAGR (LSE	Obligations financières	Fonds communs de placement	Luxembourg	3.38%
BRAZIL 10% 01/33 NTN	Valeurs du Trésor	Valeurs du Trésor	Brazil	1.12%
Amundi MSCI Semiconductors ETF Acc	Obligations financières	Fonds communs de placement	Luxembourg	0.85%
SCD ITRAXX S43 5Y XOVER V1	Autres	Autres		0.81%
BRAZIL 10% 01/29 NTN	Valeurs du Trésor	Valeurs du Trésor	Brazil	0.78%
ISHARES AUTOMATION / ROBOTICS -A	Obligations financières	Fonds communs de placement	Irlande	0.76%
INDOGB 6.625% 02/34 100	Valeurs du Trésor	Valeurs du Trésor	Indonesia	0.69%

ENAPHO 1.698% 07/26	Obligations d'entreprise	Gaz naturel	République tchèque	0.57%
AMND STXAA5 ENR ETF(MIL)	Obligations financières	Fonds communs de placement	Luxembourg	0.50%
ALPHA VAR PERP	Obligations d'entreprise	Banques	Grèce	0.47%
SIEMENS ENERGY AG	Industrie	Biens d'équipement	Allemagne	0.47%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 35.95% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	16.19%
Valeurs du Trésor	Valeurs du Trésor	11.94%
Obligations financières	Fonds communs de placement	10.37%
Titres parapublics	Titres souverains	7.45%
Obligations d'entreprise	Consommation discrétionnaire	5.85%
Obligations d'entreprise	Communications	4.25%
Obligations d'entreprise	Énergie	3.81%
Obligations d'entreprise	Biens de consommation de base	3.57%
Obligations d'entreprise	Électricité	2.88%

<i>Obligations d'entreprise</i>	<i>Transport</i>	<i>2.26%</i>

<i>Liquidités</i>	<i>Liquidités</i>	<i>10.72%</i>

Aux fins d’observer la Taxinomie de l’UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d’ici fin 2035. Pour l’**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l’UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s’est pas engagé à réaliser des investissements alignés sur la Taxinomie de l’UE, au cours de la période sous revue, il a cependant investi 1.64% dans des investissements durables alignés sur la Taxinomie de l’UE. De tels investissements ont contribué aux objectifs d’atténuation du changement climatique de la taxinomie de l’UE.

L’alignement des sociétés bénéficiaires d’investissements sur les objectifs de la Taxinomie de l’UE susmentionnés est évalué à l’aide du chiffre d’affaires (ou des revenus) et/ou des données d’utilisation des produits des obligations vertes.

Le pourcentage communiqué d’alignement des investissements du fonds sur la Taxinomie de l’UE n’a pas été audité par le réviseur d’entreprises agréé du fonds ni par aucun tiers.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.30% et la part d'investissements dans les activités habilitantes était de 0.79%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.22%.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **29.47%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 4.84% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS ABSOLUTE RETURN
GLOBAL OPPORTUNITIES BOND

Identifiant d'entité juridique :
549300BBK38MPT8QZI59

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 46.79% d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG GLOBAL AGGREGATE (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.795 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.619 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.876 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.699 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

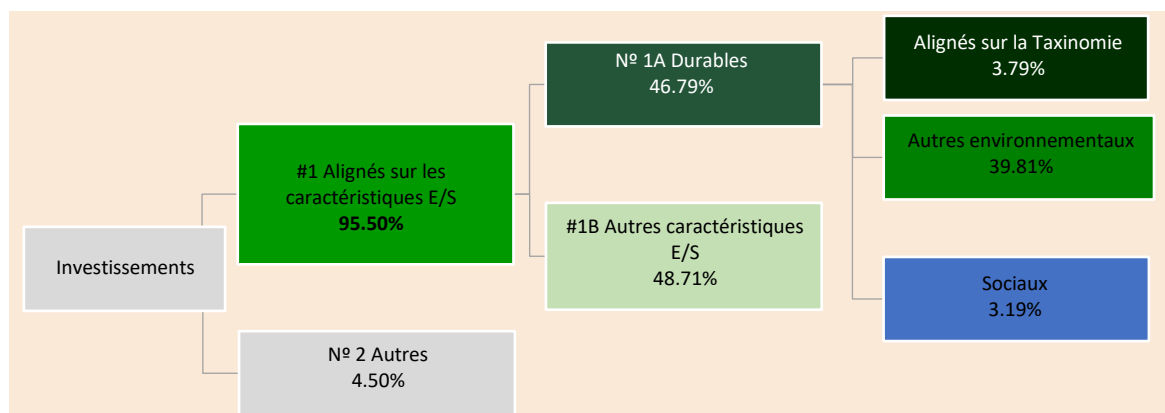

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 46.79% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	38.83%
Valeurs du Trésor	Valeurs du Trésor	22.70%
Obligations d'entreprise	Consommation discrétionnaire	9.63%

Obligations d'entreprise	BROKERAGE	1.07%
Obligations d'entreprise	Biens de consommation de base	0.53%
Forex	Forex	0.01%
Autres	Autres	-0.23%
Liquidités	Liquidités	3.87%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.79% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.38% et la part d'investissements dans les activités habilitantes était de 0.29%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.22%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 39.81% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.19% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS MULTI STRATEGY GROWTH

Identifiant d'entité juridique : 549300U03843Z1MQX452

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input type="checkbox"/> Oui	<input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 30.54% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment promeut les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'univers d'investissement. Pour déterminer la note ESG du Compartiment et de l'univers d'investissement, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance. Aucun Indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.437 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.386 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

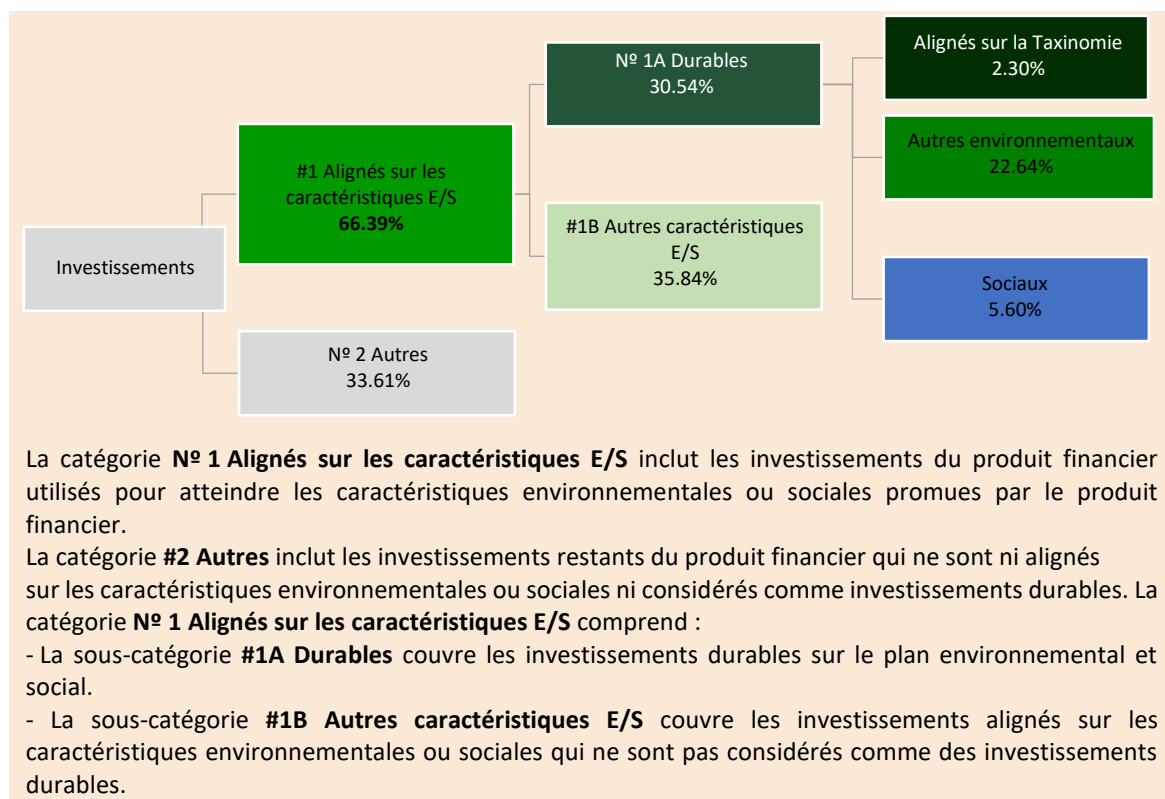

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.30% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.96%	94.45%	96.64%
■ Alignés sur la taxinomie : gaz fossile	0.01%	0.06%	0.02%
■ Alignés sur la taxinomie : nucléaire	0.60%	0.37%	0.15%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	3.43%	5.12%	3.19%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	96.60%	94.76%	96.70%
■ Alignés sur la taxinomie : gaz fossile	0.0%	0.0%	0.0%
■ Alignés sur la taxinomie : nucléaire	0.0%	0.0%	0.0%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	3.38%	5.24%	3.32%

Ce graphique représente 86.6% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.45% et la part d'investissements dans les activités habilitantes était de 0.94%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.15%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **22.64%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 5.60% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement,

disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS QUANTITATIVE GLOBAL ABSOLUTE RETURN BOND

Identifiant d'entité juridique : 213800ADK5DD5CTZQ486

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 43.88% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **90% Bloomberg Global Aggregate + 10% JPM EMBI Global Diversified Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.107 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.545 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.067 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

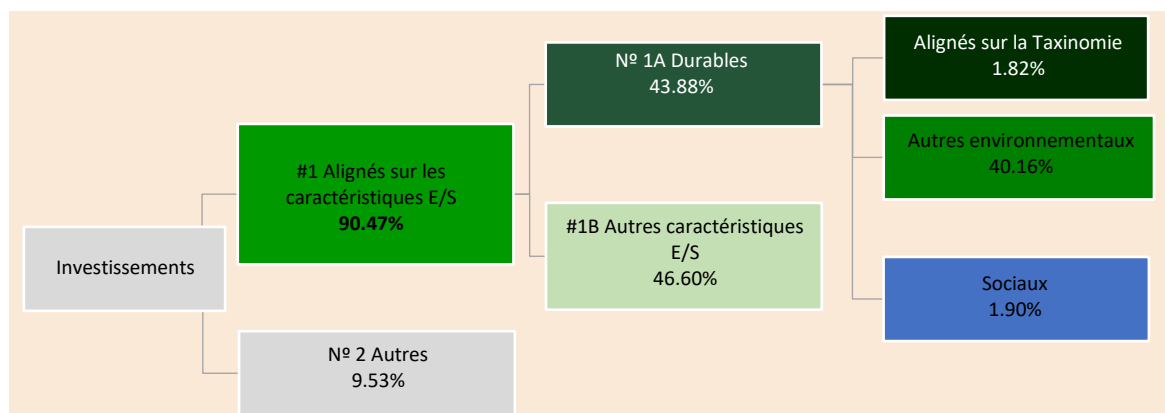

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 43.88% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	40.72%
Valeurs du Trésor	Valeurs du Trésor	9.68%

<i>Forex</i>	<i>Forex</i>	-0.99%
<i>Liquidités</i>	<i>Liquidités</i>	11.42%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.82% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.22% et la part d'investissements dans les activités habilitantes était de 0.32%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.05%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 40.16% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 1.90% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS PROTECT 90

Identifiant d'entité juridique :
22210055YWH87PNEL252

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 39.32% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment promeut les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'univers d'investissement.

Pour déterminer la note ESG du Compartiment et de l'univers d'investissement, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance.

Aucun Indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.589 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.000 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.648 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

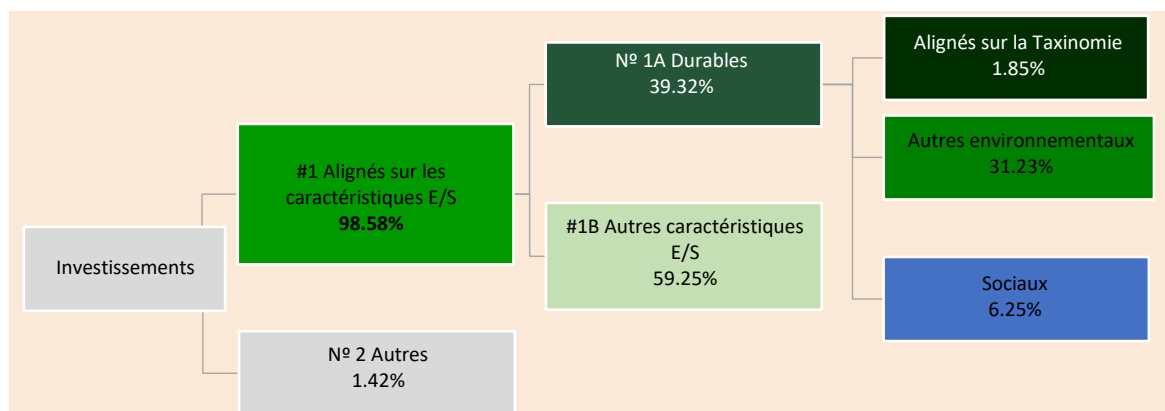

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 39.32% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Fonds communs de placement	98.58%
Autres	Autres	0.15%
Forex	Forex	0.04%
Valeurs du Trésor	Valeurs du Trésor	0.00%
Liquidités	Liquidités	1.23%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.85% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.13% et la part d'investissements dans les activités habilitantes était de 0.69%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.36%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **31.23%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 6.25% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CASH EUR

Identifiant d'entité juridique :
5299002SSK89DA5VPJ96

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 64.50% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.993 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.098 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.849 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.051 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

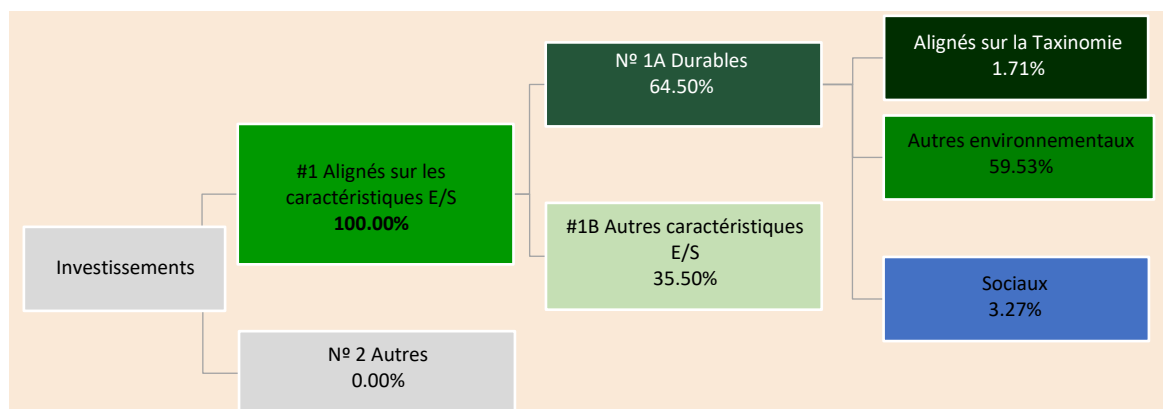

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
CCTS FRN 04/32 EU	Valeurs du Trésor	Valeurs du Trésor	Italie	5.17%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 64.50% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.

- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	57.57%
Valeurs du Trésor	Valeurs du Trésor	17.87%
Autres	Autres	8.72%
Créances titrisées	Créances hypothécaires	3.86%
Obligations d'entreprise	Technologie	3.17%
Titres parapublics	Titres supranationaux	2.98%
Obligations d'entreprise	Communications	2.81%
Obligations d'entreprise	Consommation discrétionnaire	2.69%
Obligations d'entreprise	Biens de consommation de base	2.26%

<i>Obligations d'entreprise</i>	<i>Biens d'équipement</i>	1.93%

<i>Obligations d'entreprise</i>	<i>Finance - autres</i>	0.08%
<i>Obligations d'entreprise</i>	<i>Transport</i>	0.04%
<i>Liquidités</i>	<i>Liquidités</i>	-8.63%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.71% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.14% et la part d'investissements dans les activités habilitantes était de 0.53%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.63%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **59.53%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.27% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CASH USD

Identifiant d'entité juridique :
529900YRTK94MJYXUO62

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 48.76% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a promu des caractéristiques durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.585 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.098 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.736 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.051 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

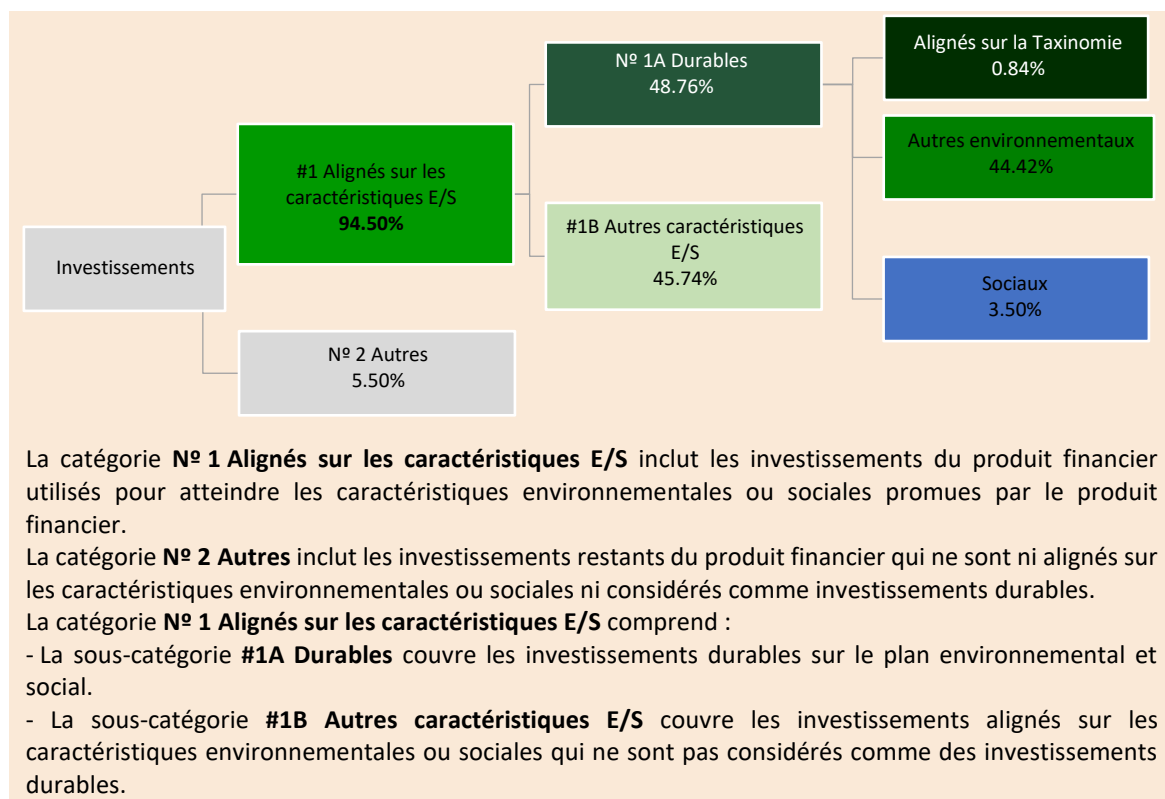

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
DAT 01/07/25 BRED USD F 4.33	Autres	Autres	France	5.01%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 48.76% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations d'entreprise	Banques	46.75%
Obligations d'entreprise	Consommation discrétionnaire	6.33%
Autres	Autres	6.27%
Obligations d'entreprise	Communications	5.92%
Créances titrisées	Créances hypothécaires	4.96%
Titres parapublics	Agences	4.93%
Obligations d'entreprise	Biens de consommation de base	4.72%
Obligations d'entreprise	Électricité	4.49%
Obligations financières	Fonds communs de placement	3.02%

Obligations d'entreprise	Technologie	2.51%
Obligations d'entreprise	Biens d'équipement	1.64%
Obligations d'entreprise	Industries de base	1.49%
Obligations d'entreprise	Services aux collectivités - autres	1.23%
Obligations d'entreprise	Énergie	0.26%
Forex	Forex	-0.11%
Liquidités	Liquidités	6.86%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.84% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

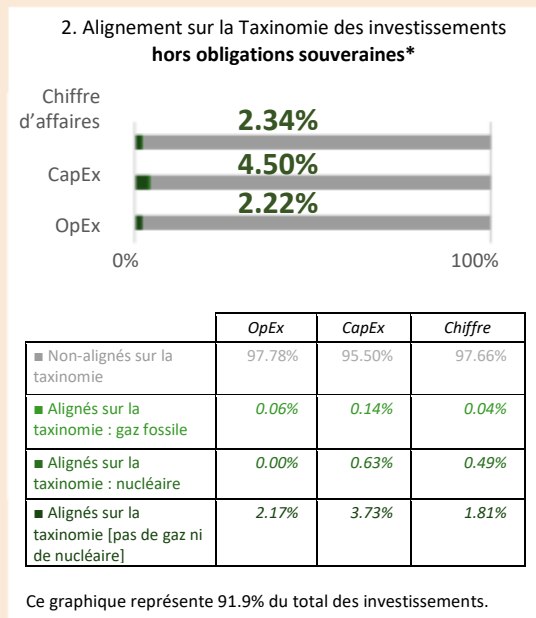

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.04% et la part d'investissements dans les activités habilitantes était de 0.45%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.39%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

• **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **44.42%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.50% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.
