14 SWAPS

SWAPS DE TAUX D'INTÉRÊT

Le Fonds a conclu des contrats de « swaps de taux d'intérêt » par lesquels les contreparties échangent des engagements respectifs concernant le paiement ou la réception d'intérêts sur un montant nominal de référence spécifique. Ledit montant est calculé et enregistré lors de chaque calcul de VNI. Les intérêts à recevoir sont inclus à la rubrique « Intérêts à recevoir » de l'État des actifs nets, et les intérêts à payer sont inclus à la rubrique « Autres dettes » de l'État des actifs nets.

CREDIT DEFAULT SWAPS

Le Fonds a conclu des contrats de « Credit Default Swaps », conçus pour transférer entre des parties une exposition de crédit sur des instruments à revenus fixes. Le montant des revenus fixes échangés contre un revenu lié à l'évolution d'événements de crédit d'un indice ou d'une obligation, est calculé et comptabilisé lors de chaque calcul de la VNI.

SWAPS DE PERFORMANCE

Le Fonds a conclu des contrats de « swaps de performance » en vertu desquels deux parties passent un contrat pour échanger des flux de trésorerie en fonction de la performance d'un indice ou d'une action de référence pour la durée spécifique du contrat. Le montant des intérêts payés ou reçus est calculé et comptabilisé lors de chaque calcul de VNI.

SWAPS D'INFLATION

Le Fonds a souscrit des « swaps sur l'inflation ». Il s'agit de contrats qui offrent à la partie gagnante la différence entre un niveau d'inflation, appliqué à un montant nominal donné convenu à la conclusion du contrat, et un taux d'intérêt fixe appliqué à ce même montant nominal. Ledit montant est calculé et enregistré lors de chaque calcul de VNI.

■ Euro Inflation Bond

Valeur	Devise	Date de maturité	Flux payés	Flux reçus	Plus/(moins)-value non réalisée en EUR
2,500,000.00	EUR	15/12/28	2.0850%	CPTFEMU EURO EX TOBACCO 151228	36,107.47

18 ÉTAT DES VARIATIONS DU PORTEFEUILLE

Le détail de la variation des titres composant le portefeuille pour l'exercice se terminant le 30 juin 2025 peut être obtenu gratuitement sur simple demande auprès du siège social du Fonds ou auprès du bureau du représentant de Hong-Kong.

La liste des variations du portefeuille peut également être obtenue gratuitement auprès du bureau de l'agent payeur et d'information en Allemagne, et auprès du bureau du représentant en Suisse.

19 STRUCTURE MAÎTRE-NOURRICIER

Amundi Funds Global Bond Flexible

Le Compartiment Amundi Funds Global Bond Flexible a pour objectif la croissance combinée du capital et des revenus (rendement total).

En particulier, le Compartiment investit en tant que fonds nourricier dans Amundi Oblig Internationales (fonds maître) afin de surperformer (après commissions applicables) l'ensemble de l'indice JP Morgan Global Government Bond sur une période donnée de 3 ans.

Le fonds maître investit principalement dans des titres obligataires ou des obligations convertibles de l'OCDE. Les investissements peuvent inclure des titres adossés à des créances hypothécaires (MBS) et des titres adossés à des actifs (ABS).

En particulier, le Compartiment investit au moins 85% de ses actifs nets dans des parts du fonds maître (classe OR-D).

Amundi Oblig Internationales est une SICAV de droit français éligible en qualité de fonds maître au titre de la Directive 2009/65/CE.

Le fonds maître investit jusqu'à 100% dans :

- des titres obligataires émis ou garantis par des États membres de l'OCDE,
- des titres obligataires et des obligations convertibles notés « investment grade » émis par des sociétés domiciliées ou exerçant une partie considérable de leurs activités au sein de l'OCDE,
- des titres MBS et ABS notés AAA (S&P) ou Aaa (Moody's) au moment de l'achat et dont la notation a été abaissée à AA ou Aa2 une fois détenus.

Les créances hypothécaires sous-jacentes des MBS peuvent être commerciales ou résidentielles, et les MBS peuvent être adossés, ou non, à tout type de garantie gouvernementale.

L'exposition du fonds maître à des obligations convertibles contingentes est limitée à 10% des actifs nets.

Le fonds maître offre gère activement son exposition sur les marchés des taux d'intérêt et des changes.

Conformément aux politiques précitées, le fonds maître pourra aussi investir dans des instruments du marché monétaire, des dépôts, et jusqu'à 10% de ses actifs nets dans des OPC/OPCVM.

Le fonds maître a largement recours à des produits dérivés pour réduire différents risques, à des fins de gestion efficace du portefeuille et pour obtenir une exposition (longue ou courte) à divers actifs, marchés ou autres opportunités d'investissement (notamment les produits dérivés ciblant le crédit et le change).

Le fonds maître pourra souscrire des opérations d'achat et de vente de titres de nature temporaire (contrats de pension livrée et de pension inversée sur titres).

Les revenus nets du fonds maître sont automatiquement distribués et ses plus-values nettes réalisées sont automatiquement réinvesties ou distribuées chaque année, dans la mesure établie par la société de gestion du fonds maître.

L'équipe d'investissement du fonds maître utilise un large éventail de positions stratégiques et tactiques, y compris l'arbitrage sur les marchés des changes, des taux d'intérêt et du crédit, en réunissant un portefeuille très diversifié.

Le gestionnaire des investissements des deux Compartiments est Amundi (UK) Limited.

Les frais directement imputés à Amundi Funds Global Bond Flexible s'élèvent à EUR 382,220.757, ce qui est résumé dans le tableau ci-dessous et exprimé en pourcentage de la VNI moyenne des classes d'actions d'Amundi Funds Global Bond Flexible :

			Charges courantes	Commissions de performance

Les frais imputés indirectement par l'intermédiaire des frais cumulés dans le fonds maître (classe OR-D) s'élèvent à EUR 25,626.81, soit 0.11% de la VNI moyenne du fonds maître (classe OR-D) Amundi Oblig Internationales.

Le rapport annuel et le rapport semestriel du fonds maître sont disponibles sur demande auprès du siège social du Fonds.

Par ailleurs, Amundi Funds Global Bond Flexible supporte indirectement les frais des fonds sous-jacents détenus dans le fonds maître.

L'avis d'audit relatif au rapport annuel du Fonds maître arrêté au 30 juin 2025, sans modification, inclut une observation portant sur la valorisation des titres russes à la suite de l'invasion de l'Ukraine par la Russie le 24 février 2022.

Amundi Funds Euro Bond Income

Amundi Funds Target Coupon a été renommé Amundi Funds Euro Bond Income et a été dissocié en tant que fonds nourricier de son Fonds maître Amundi Revenus le 16 mai 2025.

Le Compartiment Amundi Funds Euro Bond Income a pour objectif la croissance combinée du capital et des revenus (rendement total). En particulier, le Compartiment investit à titre de fonds nourricier dans Amundi Revenus (fonds maître). Le fonds maître, et par conséquent le Compartiment, sont des produits financiers qui promeuvent les caractéristiques ESG conformément à l'Article 8 du Règlement sur la publication d'informations.

Le fonds maître investit principalement dans tout type de titres de créance (instruments du marché monétaire et obligataire) émis par des gouvernements et des sociétés du monde entier et libellés dans l'une des devises de l'OCDE, en diversifiant les devises et marchés des actions.

En particulier, le Compartiment investit au moins 85% de ses actifs nets dans des parts du fonds maître (classe OR). Le Compartiment peut investir jusqu'à 15% dans des dépôts et produits dérivés utilisés uniquement à des fins de couverture.

Amundi Revenus est un FCP de droit français éligible en qualité de fonds maître au titre de la Directive 2009/65/CE.

Le fonds maître investit au moins 70% de ses actifs nets dans des titres de créance. Le fonds maître peut investir dans

- des titres obligataires dont la note est inférieure à l'« investment-grade » (obligations à haut rendement),
- des titres obligataires de sociétés subordonnés (y compris des obligations convertibles contingentes à hauteur de 50% des actifs nets) et
- jusqu'à 20% de ses actifs nets dans des titres adossés à des créances hypothécaires (MBS) et des titres adossés à des actifs (ABS).

Le fonds maître pourra également investir dans des actions de sociétés du monde entier, quels que soient leurs secteurs et capitalisations boursières. L'exposition du fonds maître au marché des actions pourra varier dans une fourchette comprise entre 0% et 20% des actifs nets, et son exposition au marché des changes entre 0% et 100% des actifs nets.

Le fonds maître pourra investir jusqu'à 10 % de ses actifs nets dans des OPC/OPCVM.

Le fonds maître a largement recours à des produits dérivés pour réduire différents risques, à des fins de gestion efficace du portefeuille et pour obtenir une exposition (longue ou courte) à divers actifs, marchés ou autres opportunités d'investissement (notamment les produits dérivés ciblant le crédit).

Le fonds maître pourra souscrire des opérations d'achat et de vente de titres de nature temporaire (contrats de pension livrée et de pension inversée sur titres).

Le montant des revenus distribués sera fixé chaque année par la société de gestion du fonds maître, en fonction des rendements prévus des actifs du portefeuille. La performance du fonds maître n'est comparée à aucun indice particulier.

L'équipe d'investissement du fonds maître vise à exploiter des primes de rendement d'un large univers de placement (principalement des obligations), en utilisant une approche de gestion flexible et basée sur des choix de forte conviction. Elle étudie le taux d'intérêt et les tendances économiques (méthode descendante) pour identifier les stratégies et catégories d'actifs les plus à même d'offrir le meilleur rapport entre le risque et le rendement. L'équipe d'investissement s'appuie ensuite sur son analyse technique et en profondeur, y compris du crédit et de la prime de risque, pour sélectionner des titres en fonction de leur potentiel de génération de revenus (méthode ascendante) et pour constituer un portefeuille très diversifié au rendement régulier.

Par ailleurs, le fonds maître cherche à obtenir pour son portefeuille une note ESG qui soit supérieure à celle de son univers d'investissement.

Le gestionnaire des investissements des deux Compartiments est Amundi Asset Management.

Les frais directement imputés à Amundi Funds Euro Bond Income s'élèvent à EUR 506,132.42, ce qui est résumé dans le tableau ci-dessous et exprimé en pourcentage de la VNI moyenne des classes d'actions d'Amundi Funds Euro Bond Income :

			Charges courantes	Commissions de performance
Euro Bond Income	EUR	Classe A2 EUR AD (D)	1.05%	-
	EUR	Classe F2 EUR AD (D)	1.63%	-
	EUR	Classe G2 EUR AD (D)	1.23%	-
	EUR	Classe I2 EUR AD (D)	0.54%	-
	EUR	Classe M2 EUR AD (D)	0.65%	-
	EUR	Classe Q-A4 EUR AD (D)	1.00%	-

Les frais imputés indirectement par l'intermédiaire des frais cumulés dans le fonds maître (classe OR) s'élèvent à 83,570.70 soit 0.22% de la VNI moyenne du fonds maître (classe OR) Amundi Revenus.

Par ailleurs, Amundi Funds Euro Bond Income supporte indirectement les frais des fonds sous-jacents détenus dans le fonds maître.

Le rapport annuel et le rapport semestriel du fonds maître sont disponibles sur demande auprès du siège social du Fonds.

Amundi Funds Montpensier Great European Models SRI

Le Compartiment Amundi Funds Montpensier Great European Models SRI a pour objectif la croissance du capital sur la période de détention recommandée, à travers des Investissements durables, conformément à l'Article 9 du Règlement sur la publication d'informations. En particulier, le Compartiment investit en tant que fonds nourricier dans le fonds Montpensier GREAT EUROPEAN MODELS SRI (fonds maître), qui vise la surperformance de son indice de référence, l'indice Stoxx Europe 600 (SXXR).

Le fonds maître investit principalement dans des actions européennes et des instruments liés à des actions.

En particulier, le Compartiment investit au moins 85% de ses actifs nets dans des parts du fonds maître (classe Y).

Le fonds maître est une SICAV de droit français éligible en qualité de fonds maître au titre de la Directive 2009/65/CE.

Le fonds maître intègre des facteurs de durabilité à son processus d'investissement, comme exposé plus en détail dans le Code de transparence disponible sur la page dédiée au fonds sur le site Internet de la société de gestion, www.montpensier-arbevel.com/.

Le portefeuille du fonds maître comporte une exposition minimale de 60% aux actions des pays de l'Union européenne. Les placements en titres éligibles au Plan d'Épargne Action représenteront un minimum de 75% des actifs.

Dans l'exécution des politiques susmentionnées, le Compartiment pourra également avoir

- une exposition maximale de 30% de ses actifs aux actions de pays européens non membres de l'Espace économique européen ;
- une exposition maximale de 10% de ses actifs aux actions de marchés émergents, telle que définie par le fonds maître ;
- une exposition maximale de 10% de ses actifs aux actions de marchés extérieurs à l'Europe ;
- une exposition maximale au risque de taux d'intérêt de 40% des actifs nets, avec un maximum de 20% des actifs en obligations et 10% en instruments du marché monétaire ;
- une exposition maximale de 10% des actifs nets à des dépôts ;
- une exposition maximale de 10% des actifs nets à des OPCVM/OPC.

Les investissements en actions de petites capitalisations seront limités à 20% des actifs.

Il n'existe pas de contraintes en termes d'allocation sectorielle, d'allocation géographique en Europe, de devise ou de notation pour ces investissements.

Le fonds maître pourra comporter un risque de change limité à 30% de ses actifs nets, en excluant l'euro ou d'autres devises de l'Espace économique européen.

Le fonds maître pourra avoir recours à des produits dérivés pour réduire différents risques et pour obtenir une exposition (longue ou courte) à divers actifs, marchés ou autres opportunités d'investissement (notamment les produits dérivés ciblant les actions).

L'indice Stoxx Europe 600 (SXXR) sert d'indicateur a posteriori pour évaluer la performance du Compartiment.

Le fonds maître est géré de façon active et il n'existe aucune contrainte liée à l'indice Stoxx Europe 600 (SXXR) en matière de construction du portefeuille.

L'approche extra-financière mise en œuvre est décrite dans le Code de transparence de la SICAV disponible sur le site Internet du gestionnaire des investissements du fonds maître. Elle repose sur l'intégration de critères extra-financiers dès la définition de l'univers d'investissement, via un processus d'exclusion visant à réduire cet univers d'investissement initial d'au moins 20 %, conformément aux dispositions du label ISR. De plus, toutes les actions du portefeuille sont analysées conformément à une double approche ESG et fondamentale, le label ISR exigeant au minimum que 90% de ces titres soient analysés selon l'approche ESG.

L'approche extra-financière s'applique en accord avec un objectif de réduction des risques en termes de durabilité.

Les Gestionnaires des investissements des Compartiments sont Amundi Asset Management (fonds nourricier) et Montpensier Finance (fonds maître).

Les frais directement imputés à Amundi Funds Montpensier Great European Models SRI s'élèvent à EUR 8,194.06, ce qui est résumé dans le tableau ci-dessous et exprimé en pourcentage de la VNI moyenne des classes de parts du Compartiment Amundi Funds Montpensier Great European Models SRI :

			Charges courantes	Commissions de performance
Montpensier	EUR	Classe A2 EUR (C)	3.01%	-
Great	EUR	Classe E2 EUR (C)	2.83%	-
European	EUR	Classe G EUR (C)	3.07%	-
Models SRI	EUR	Classe I2 EUR (C)	2.08%	-
	EUR	Classe R2 EUR (C)	2.12%	-

Les frais imputés indirectement par l'intermédiaire des frais cumulés dans le fonds maître s'élèvent à EUR 1,576.07 soit 0.60% de la VNI moyenne du fonds maître Montpensier GREAT EUROPEAN MODELS SRI.

Par ailleurs, Amundi Funds Montpensier Great European Models SRI supporte indirectement les frais des fonds sous-jacents détenus dans le fonds maître.

Le rapport annuel et le rapport semestriel du fonds maître sont disponibles sur demande auprès du siège social du Fonds.

Amundi Funds Montpensier M Climate Solutions

Le Compartiment Amundi Funds Montpensier M Climate Solutions a pour objectif la croissance du capital sur la période de détention recommandée, à travers des Investissements durables, conformément à l'Article 9 du Règlement sur la publication d'informations.

En particulier, le Compartiment investit en tant que fonds nourricier dans le fonds Montpensier M Climate Solutions, dont l'objectif est de profiter du développement des marchés d'actions mondiaux en investissant principalement dans les actions de sociétés dont les initiatives ou les solutions contribuent directement ou indirectement à réduire les conséquences du changement climatique, ou dans les actions de sociétés dont une partie de l'activité concerne des tendances et des évolutions liées au thème de la transition énergétique et climatique.

Le fonds maître investit principalement dans des actions du monde entier.

En particulier, le Compartiment investit au moins 85% de ses actifs nets dans des parts du fonds maître (classe Y).

Le fonds maître est un FCP de droit français éligible en qualité de fonds maître au titre de la Directive 2009/65/CE.

Le fonds maître investit au minimum 75% de ses actifs nets dans des actions et instruments similaires (tels que les certificats d'investissement et les obligations convertibles) de sociétés du monde entier, dans tous les secteurs et toutes les zones géographiques, notamment un maximum de 40% des actifs sur les marchés émergents.

Les instruments équivalant à des actions pourront représenter jusqu'à 25% des actifs nets. Il n'existe pas de contraintes en termes de capitalisation boursière pour ces investissements.

Dans l'exécution des politiques susmentionnées, le Compartiment pourra également :

- inclure une exposition maximale au risque de taux d'intérêt de 40% des actifs nets, avec un maximum de 25% des actifs en obligations et 10% en instruments du marché monétaire ;
- investir un maximum de 10% des actifs nets dans des OPCVM/OPC ; et
- disposer de dépôts allant jusqu'à 10% de ses actifs nets.

Il n'existe pas de contraintes en termes de notation ou de devise pour ces investissements.

Le fonds maître a recours à des produits dérivés pour réduire différents risques et pour obtenir une exposition (longue ou courte) à divers actifs, marchés ou autres opportunités d'investissement (notamment les produits dérivés ciblant le crédit et les actions).

Le fonds maître est géré de manière active.

La référence à un indice sert uniquement à des fins de comparaison ultérieure.

L'indice Stoxx Global 1800 (SXW1R) sert d'indicateur a posteriori pour évaluer la performance du Compartiment.

La stratégie de gestion du fonds maître suit une approche double afin d'identifier les titres de la manière suivante :

- sélection de titres selon des critères non financiers dans le but d'identifier l'implication des sociétés dans la transition énergétique et écologique pour le climat. Certaines activités, telles que l'énergie nucléaire et les combustibles fossiles, seront exclues ;
- complétée par une analyse fondamentale, elle-même soutenue par une étude quantitative basée sur des ratios financiers.

Les Gestionnaires des investissements des Compartiments sont Amundi Asset Management (fonds nourricier) et Montpensier Finance (fonds maître).

Les frais directement imputés à Amundi Funds Montpensier M Climate Solutions s'élèvent à EUR 253,511.48, ce qui est résumé dans le tableau ci-dessous et exprimé en pourcentage de la VNI moyenne du Compartiment Amundi Funds Montpensier M Climate Solutions :

			Charges courantes	Commissions de performance
Montpensier M	EUR	Classe A2 EUR (C)	1.64%	-
Climate	EUR	Classe A5 EUR (C)	0.87%	-
Solutions	EUR	Classe E2 EUR (C)	1.49%	-
	EUR	Classe F EUR (C)	2.44%	-
	EUR	Classe G EUR (C)	1.79%	-
	EUR	Classe I2 EUR (C)	0.81%	-
	EUR	Classe R2 EUR (C)	0.85%	-

Les frais imputés indirectement par l'intermédiaire des frais cumulés dans le fonds maître s'élèvent à EUR 204,883.06, soit 0.45% de la VNI moyenne du fonds maître Montpensier M Climate Solutions.

Par ailleurs, Amundi Funds Montpensier M Climate Solutions supporte indirectement les frais des fonds sous-jacents détenus dans le fonds maître.

Le rapport annuel et le rapport semestriel du fonds maître sont disponibles sur demande auprès du siège social du Fonds.

Amundi Funds Impact Green Bond

Le Compartiment Amundi Funds Impact Green Bond a pour objectif la croissance combinée du capital et des revenus (rendement total) sur la période de détention recommandée, à travers des Investissements durables, conformément à l'Article 9 du Règlement sur la publication d'informations.

En particulier, le Compartiment investit en tant que fonds nourricier dans le fonds Amundi Responsible Investing - Impact Green Bonds (fonds maître), dont l'objectif est d'atteindre une performance liée à des Investissements durables, conformément à l'Article 9 du Règlement sur la publication d'informations, en investissant dans des obligations vertes dont l'impact sur l'environnement est positif, évalué à partir de l'estimation des émissions de gaz à effet de serre évitées, en utilisant comme indicateur les tonnes équivalent CO2 (tCO2e) évitées.

Le fonds maître investit principalement dans des obligations vertes de l'OCDE notées « Investment grade », émises par tout émetteur dans le monde entier et libellées dans toute devise.

L'exposition aux devises autres que l'euro est limitée à 10% des actifs nets.

En particulier, le Compartiment investit au moins 85% de ses actifs nets dans des parts du fonds maître (classe OR-D).

Le fonds maître Impact Green Bonds est un Compartiment de la SICAV Amundi Responsible Investing de droit français et est éligible en qualité de fonds maître au titre de la Directive 2009/65/CE.

Le fonds maître pourra investir un maximum de 100% de ses actifs nets dans tous les types d'obligations vertes suivantes, négociées sur un marché réglementé et émises par des gouvernements, des organisations supranationales ainsi que des sociétés privées ou publiques du monde entier, y compris un maximum de 15% des actifs sur les marchés émergents :

- obligations à taux fixe ou variable ;
- obligations indexées : inflation, TEC (Taux à l'échéance constante) ;
- titres subordonnés émis par tout type de banque, société ou compagnie d'assurance ;
- titres adossés à des actifs (ABS) et titres adossés à des créances hypothécaires (MBS) jusqu'à un maximum de 10% des actifs nets.

Le fonds maître investira un minimum de 50% des actifs nets dans des obligations vertes provenant d'émetteurs qui présentent une notation ESG comprise entre A et D. Au minimum 90% des titres détenus dans le portefeuille sont soumis à une analyse non financière.

Le fonds maître pourra investir un maximum de 15% de ses actifs nets dans des titres non notés ou ayant une notation inférieure à « Investment grade ».

Le risque de change sera couvert à hauteur d'une exposition totale aux devises autres que l'euro de 10% des actifs nets.

Dans l'exécution des politiques susmentionnées, le fonds maître pourra également investir :

- au maximum 30% de ses actifs nets dans des instruments du marché monétaire ;
- au maximum 10% des actifs nets dans des OPCVM/OPC ;
- dans des dépôts.

Le fonds maître a recours à des produits dérivés pour réduire différents risques, à des fins de gestion efficace du portefeuille et pour obtenir une exposition (longue ou courte) à divers actifs, marchés ou autres opportunités d'investissement (notamment les produits dérivés ciblant les taux d'intérêt, le crédit et le taux de change).

Le fonds maître est géré de manière active. L'indice Barclays MSCI Global Green Bond (coupons réinvestis), couvert en euros (l'« Indice ») sert d'indicateur a posteriori pour évaluer la performance du fonds maître.

Il n'existe aucune contrainte liée à l'Indice en matière de construction du portefeuille.

L'investissement durable du fonds maître est principalement axé sur des objectifs environnementaux, en investissant dans les « obligations vertes » qui financent les projets éligibles (i) répondant aux critères et aux lignes directrices des Principes pour les obligations vertes (tels que publiés par l'ICMA) et (ii) pour lesquels l'impact positif sur la transition énergétique et l'environnement des projets financés peut être évalué.

Le Gestionnaire des investissements des deux Compartiments est Amundi Asset Management.

Les frais directement imputés à Amundi Funds Impact Green Bond s'élèvent à EUR 115,391.48, ce qui est résumé dans le tableau ci-dessous et exprimé en pourcentage de la VNI moyenne du Compartiment Amundi Funds Impact Green Bond :

			Charges courantes	Commissions de performance
Impact Green Bond	EUR	Classe A2 EUR (C)	1.09%	-
	EUR	Classe E2 EUR (C)	0.89%	-
	EUR	Classe G2 EUR (C)	1.26%	-

22 FRAIS DE RÉCEPTION ET TRANSMISSION DES ORDRES

Les frais de réception et transmission des ordres sont :

- versés à Amundi Intermediation ou à Amundi (UK) Ltd, pour leurs services rendus aux Compartiments gérés par Amundi, services comprenant la centralisation et la meilleure exécution possible des ordres ;
- comptabilisés chaque jour et versés trimestriellement sur la base des opérations traitées par les parties liées à Amundi.

Par rapport à un gestionnaire des investissements négociant des opérations seul, la centralisation des ordres permet notamment de négocier de meilleurs prix auprès des courtiers grâce à l'effet de volume, d'avoir accès à un plus grand nombre de courtiers et à une meilleure information sur les marchés, de bénéficier de l'expertise d'experts en trading et de contrôleurs du trading dédiés.

Ces frais sont comptabilisés à la rubrique « Frais de réception et transmission des ordres » dans l'État des opérations et des variations des actifs nets.

23 OPÉRATIONS AVEC DES PARTIES LIÉES

Les parties liées, en leur qualité de courtiers, peuvent aussi effectuer des opérations ou investir dans des devises ou autres produits financiers pour le compte de chaque Compartiment pour lequel les parties liées agissent en tant que courtier, pour leur propre compte ou en tant que contrepartie pour leurs clients, y compris dans le cas où les parties liées ou leurs clients ont la possibilité d'effectuer des opérations pour leur compte propre en même temps que pour le compte de chaque Compartiment. Les opérations telles que figurent dans le tableau ont été souscrites dans le cadre ordinaire des affaires et dans des conditions normales de concurrence. Le Fonds considère que les commissions, majorations et réductions appliquées par les parties liées seront compétitives, bien que les parties liées aient un intérêt à obtenir des taux de commission favorables, ainsi que des majorations et réductions pour chaque Compartiment.

Au cours de l'exercice, des transactions pour un montant total de EUR 22,472,959,393.32, soit 8.77% de l'ensemble des transactions réalisées sur l'année, ont été effectuées par ces parties liées. Pendant l'exercice se terminant le 30 juin 2025, Amundi Funds a effectué des opérations avec des parties liées pour un montant de :

24 SOFT DOLLARS COMMISSIONS

Les Gestionnaires des investissements des Compartiments concernés ont conclu des « soft commissions arrangements » avec des courtiers, par lesquels certains biens et services utilisés pour prendre des décisions en matière d'investissement, offrant des avantages substantiels auxdits Compartiments, sont distribués aux Gestionnaires des investissements. Les biens et services sont payés par les courtiers en déduction de la commission qu'ils reçoivent et les gestionnaires des investissements ne réalisent aucun paiement pour lesdits services. Les biens et services que le Fonds utilise incluent l'analyse de marché ; des services d'information et de cotation, l'évaluation des performances, l'analyse du matériel et des logiciels connexes aux biens et services ; des services de compensation et de dépôt et des publications liées aux investissements. Les compartiments suivants ont conclu des « soft commission arrangements » :

- Amundi Funds Climate Transition Global Equity
- Amundi Funds Equity Japan Target
- Amundi Funds Global Equity
- Amundi Funds Japan Equity Value
- Amundi Funds US Equity Dividend Growth
- Amundi Funds US Equity Select
- Amundi Funds US Equity Fundamental Growth
- Amundi Funds US Equity Research
- Amundi Funds US Equity Research Value
- Amundi Funds US Pioneer Fund
- Amundi Funds Income Opportunities
- Amundi Funds Pioneer Flexible Opportunities

25 DIVIDENDES

Pendant l'exercice sous revue, le Fonds a distribué les dividendes par action suivants :

Compartiments	Classes d'actions	Devise	ISIN	Date de détachement des dividendes	Date de maturité	Dividende par action
Equity Japan Target	A EUR AD (D)	EUR	LU0568583776	10/09/2024	13/09/2024	0.4800

26 SWING PRICING

Si, lors d'un Jour d'évaluation, la négociation des actions d'un Compartiment semble devoir nécessiter des achats ou ventes importants d'investissements en portefeuille, le Conseil d'administration peut ajuster la VNI du Compartiment de manière à mieux refléter les prix réels des transactions sous-jacentes, sur la base d'estimations des écarts et des frais des opérations ainsi que d'autres considérations relatives aux marchés et à la négociation. D'une manière générale, il révisé la VNI à la hausse quand la demande d'actions du Compartiment est élevée, et à la baisse quand les demandes de rachat sont nombreuses. Cet ajustement s'applique à toutes les transactions d'un Compartiment un jour donné, lorsque les demandes nettes dépassent un certain seuil défini par le Conseil d'administration. Ces ajustements ont pour objectif de protéger les Actionnaires à long terme de la SICAV des coûts liés aux opérations de souscription et de rachat et non de répondre à la situation particulière de chaque investisseur individuel. D'une manière générale, pour un Jour d'évaluation quelconque, l'ajustement ne dépasse pas les 2% de la VNI, mais le Conseil d'administration peut aller au-delà si la protection des intérêts des actionnaires l'exige.

Les montants d'ajustement enregistrés pour l'exercice se terminant au 30 juin 2025 sont comptabilisés dans la rubrique « État des opérations et des variations de l'actif net » au poste « souscriptions/rachats nets ».

Entre juillet 2024 et juin 2025, les Compartiments suivants étaient concernés par le mécanisme de Swing Pricing :

Dans la mesure où l'activité nette des actionnaires dépassait les seuils prédéfinis, la Valeur nette d'inventaire par action au 30 juin 2025 pour Amundi Funds European Equity Value, Amundi Funds Equity MENA et Amundi Funds Latin America Equity oscillait, aussi la Valeur nette d'inventaire par action officielle au 30 juin 2025 indiquée à la section « Indications financières concernant les 3 derniers exercices » de ce rapport, inclut un ajustement du Swing Pricing, qui n'est pas pris en compte dans l'« État de l'actif net » et dans l'« État des opérations et des variations de l'actif net ».

Le montant de ces ajustements comptabilisé pour les Valeurs nettes d'inventaire au 30 juin 2025 était le suivant :

Compartiments	VNI avant ajustement	Ajustement en EUR	VNI après ajustement
Amundi Funds European Equity Value	2,416,054,454.59	-2,506,777.62	2,413,547,676.97
Amundi Funds Equity MENA	40,333,802.72	-102,619.71	40,231,183.01
Amundi Funds Latin America Equity	127,039,179.14	194,549.56	127,233,728.70

27 TITRES ÉVALUÉS À LA JUSTE VALEUR

Conformément aux conventions comptables applicables, les titres peuvent être évalués à leur valeur de réalisation probable raisonnable, déterminée avec soin et en toute bonne foi par le conseil d'administration. La présente note fournit un aperçu de ces titres évalués à la juste valeur lorsque ces informations sont raisonnablement susceptibles d'influencer les décisions économiques des utilisateurs des états financiers.

Titres russes

Suite à l'invasion de l'Ukraine par la Russie du 24 février 2022 et de son impact sur les marchés et titres russes, le Conseil d'administration et la Société de gestion ont décidé dès la fin du mois de février de réviser continuellement la situation des actions (y compris les certificats ADR/GDR) et obligations russes et de les évaluer à leur juste valeur.

L'évaluation à la juste valeur prend en compte les régimes de sanctions en vigueur et leur impact sur la négociabilité et le processus de règlement des titres concernés. À l'heure de la rédaction du présent rapport, le processus d'évaluation des titres à leur juste valeur est toujours en place.

Une liste des titres évalués à leur juste valeur au 30 juin 2025 est donnée ci-dessous :

Un nombre limité de transactions ont été effectuées sur de tels titres juste avant l'invasion et n'ont pas encore été réglées.

La valeur cumulée de ces titres au 30 juin 2025 est indiquée ci-dessous :

Nom du compartiment	Montant des opérations non réglées exprimé en USD
Emerging Europe Middle East and Africa	478,590.89
Emerging Markets Equity Focus	252,148.38
Emerging World Equity	1,806,635.62
Russian Equity	856,001.35
Emerging Markets Blended Bond	708,887.24
Multi-Asset Climate	283,360.36
Pioneer Flexible Opportunities	636,367.38

Les montants correspondants de ces transactions sont reportés dans l'État de l'actif net sous les rubriques « Autres passifs » et « Avoirs en banque et liquidités ».

Le Conseil d'administration et la Société de gestion appliquent actuellement des mesures visant à résoudre ces difficultés dans l'intérêt du fonds et de ses actionnaires, compte tenu du caractère sans précédent de la situation.

Le Conseil d'administration et la Société de gestion continuent de suivre l'évolution de la situation et tiennent rigoureusement compte des options qui leur sont offertes eu égard au Compartiment suspendu, et également à la lumière de la FAQ de la CSSF publiée le 31 mars 2022.

Atento S.A.

Atento S.A. est un fournisseur multinational de services de gestion de la relation client et d'externalisation des processus métier, fondé en 1999, ayant son siège à Madrid et constitué au Brésil, avec une présence historique significative en Amérique latine. L'entreprise propose des services d'assistance clientèle, de vente, de support technique, d'analytique et de back office dans plusieurs secteurs, notamment les télécommunications, les services financiers, la distribution, la santé et le secteur public. Le 21 juillet 2023, les actions ordinaires d'Atento ont été suspendues de la cotation à la Bourse de New York et ont ensuite été radiées ; l'entreprise fait actuellement l'objet d'un plan de restructuration. Lorsque des prix de marché observables pour certains titres Atento n'étaient pas disponibles, ces instruments ont été évalués à la juste valeur selon une approche de valeur intrinsèque. Les valorisations reflètent la structure du capital de l'entreprise et incluent des ajustements liés à la liquidité et au risque de crédit associé aux instruments.

Vous trouverez ci-dessous la liste des titres évalués à la juste valeur au 30 juin 2025 :

28 TITRES DÉCOTÉS

En fin d'exercice, aucun des Compartiments n'avait investi plus de 10% de sa VNI dans des titres décotés.

29 ÉVÉNEMENTS ULTÉRIEURS

Le Compartiment Amundi Funds Global Bond Income sera lancé le 7 juillet 2025.

30 RÈGLEMENT SUR LA PUBLICATION D'INFORMATIONS EN MATIÈRE DE DURABILITÉ DANS LE SECTEUR DES SERVICES FINANCIERS (« SFDR »)

Des informations relatives aux caractéristiques environnementales et/ou sociales et/ou aux investissements durables sont disponibles à la section (non auditée) « Règlement sur la publication d'informations en matière de durabilité dans le secteur des services financiers » et dans les annexes correspondantes, le cas échéant.

Rapport du réviseur d'entreprises agréé

À l'intention des actionnaires de
Amundi Funds

Opinion

À notre avis, les présents états financiers donnent une image juste et fidèle de la situation financière d'Amundi Funds (le « Fonds ») et de chacun de ses Compartiments (le « Fonds ») compartiments au 30 juin 2025, et des résultats des opérations et des variations de l'actif net pour l'exercice clôturé à cette même date, conformément aux prescriptions légales et réglementaires relatives à l'établissement et à la présentation des états financiers au Luxembourg.

Éléments couverts par l'audit

Les états financiers du Fonds comprennent les éléments suivants :

- l'état de l'actif net au dimanche 30 juin 2025 ;
- l'état des opérations et des variations de l'actif net pour l'exercice clôturé à la même date ;
- le portefeuille de titres au 30 juin 2025 ; et
- les notes aux états financiers, qui incluent un résumé des principales conventions comptables.

Base de l'opinion

Nous avons réalisé notre audit conformément à la Loi du 23 juillet 2016 relative à la profession de l'audit (Loi du 23 juillet 2016) et aux normes internationales d'audit (ISA) telles qu'adoptées pour le Luxembourg par la Commission de Surveillance du Secteur Financier (CSSF). Nos responsabilités en vertu de cette Loi du 23 juillet 2016 et de ces normes ISA telles qu'adoptées pour le Luxembourg par la CSSF sont décrites plus en détail dans la section « Responsabilités du réviseur d'entreprises agréé pour l'audit des états financiers » de notre rapport.

Nous estimons que les éléments probants recueillis sont suffisants et appropriés pour fonder notre opinion.

Nous sommes indépendants du Fonds, conformément au code de déontologie international de l'International Ethics Standards Board for Accountants pour les comptables professionnels incluant les normes internationales en matière d'indépendance (Code de l'IESBA), tel qu'adopté par la CSSF pour le Luxembourg avec les exigences opportunes en matière de déontologie dans le cadre de notre audit des états financiers. Nous avons assumé nos responsabilités en termes de déontologie en vertu de telles exigences.

Paragraphe d'observation

Nous attirons l'attention sur la note 1 des présents états financiers, qui indique que le Conseil d'administration du Fonds a décidé de suspendre le calcul de la valeur nette d'inventaire, ainsi que l'émission, le rachat et la conversion des actions du compartiment Russian Equity à compter du 28 février 2022, en conséquence des tensions géopolitiques actuelles et des sanctions imposées à la Russie, qui ont rendu impossible la négociation ou l'évaluation de la majorité des actifs de ce compartiment. Notre opinion n'a pas varié à ce sujet.

Autres informations

Le Conseil d'administration du Fonds a la responsabilité des autres informations. Les autres informations comprennent celles qui sont précisées dans le rapport annuel, mais ne couvrent pas les états financiers ni notre rapport des commissaires aux comptes du réviseur d'entreprises agréé concernant ceux-ci.

Notre opinion sur les états financiers ne couvre pas les autres informations et nous n'exprimons aucun type de conclusion assortie d'une assurance à leur sujet.

Dans le cadre de notre contrôle des états financiers, notre responsabilité consiste à lire les autres informations identifiées ci-dessus et, ce faisant, à évaluer si de telles informations sont substantiellement incohérentes avec les états financiers ou les connaissances que nous avons acquises au cours de l'audit, ou si elles semblent de toute autre manière substantiellement erronées. Si, d'après nos travaux, nous arrivons à la conclusion que ces informations ont fait l'objet d'une déclaration inexacte/inexactitude significative, nous avons l'obligation de le signaler. Nous n'avons rien à signaler à ce sujet.

Responsabilités du Conseil d'administration du Fonds en ce qui concerne les états financiers

Le Conseil d'administration du Fonds est responsable de l'établissement et de la présentation fidèle des états financiers, conformément aux prescriptions légales et réglementaires relatives à l'établissement et à la présentation des états financiers au Luxembourg. Cette responsabilité couvre également tout contrôle interne que le Conseil d'administration du Fonds jugerait nécessaire pour permettre la préparation d'états financiers exempts d'inexactitude significative, qu'elle résulte d'une fraude ou d'une erreur.

Lors de l'établissement des états financiers, le Conseil d'administration du Fonds est responsable de l'évaluation de la capacité du Fonds et de chacun de ses compartiments à poursuivre son exploitation, en communiquant, le cas échéant, les points relatifs à la continuité de l'exploitation et en partant du postulat comptable de la continuité de l'exploitation, excepté si le Conseil d'administration du Fonds a l'intention ou n'a pas d'autre solution réaliste que de liquider le Fonds ou tout compartiment de celui-ci ou de cesser ses activités.

Responsabilités du réviseur d'entreprises agréé pour l'audit des états financiers

Notre audit a pour objectif d'obtenir l'assurance raisonnable que les états financiers dans leur ensemble sont exempts de toute inexactitude significative, qu'elle soit conséquence d'une fraude ou d'une erreur, et d'émettre un rapport d'audit qui présente notre opinion. L'assurance raisonnable correspond à un niveau d'assurance élevé, mais ne saurait garantir qu'un audit mené conformément à la Loi du 23 juillet 2016 et aux ISA telles qu'adoptées pour le Luxembourg par la CSSF permettra toujours de détecter une inexactitude significative, si elle existe. Les inexactitudes peuvent découler de fraudes ou d'erreurs et sont considérées comme significatives si, à titre individuel ou collectif, elles peuvent raisonnablement être jugées susceptibles d'influencer les décisions économiques des utilisateurs prises sur la base de ces états financiers.

Dans le cadre d'un audit réalisé conformément à la Loi du 23 juillet 2016 et aux ISA telles qu'adoptées pour le Luxembourg par la CSSF, nous exerçons notre appréciation professionnelle et faisons preuve de scepticisme professionnel tout au long de l'audit. Notre mission couvre également les tâches suivantes :

- identifier et évaluer les risques d'inexactitude significative des états financiers, qu'elle soit conséquence d'une fraude ou d'une erreur, concevoir et suivre des procédures d'audit répondant à ces risques, et recueillir des éléments probants constituant une base suffisante et adéquate pour former notre opinion d'audit. Le risque de ne pas détecter une inexactitude significative découlant d'une fraude est plus élevé que dans le cas d'une inexactitude résultant d'une erreur, dans la mesure où la fraude implique la collusion, la falsification, des omissions intentionnelles, des assertions inexacts ou le contournement des contrôles internes ;
- obtenir une bonne compréhension des contrôles internes pertinents pour l'audit afin de définir des procédures d'audit adaptées à la situation, mais non dans le but d'exprimer une opinion sur l'efficacité des contrôles internes mis en place par le Fonds ;
- évaluer le caractère approprié des règles comptables utilisées et le caractère raisonnable des estimations comptables et autres communications effectuées par le Conseil d'administration du Fonds ;
- conclure sur la pertinence de l'utilisation par le Conseil d'administration du Fonds du postulat comptable de continuité de l'exploitation et, à partir des éléments probants recueillis, établir s'il existe des incertitudes importantes concernant des événements ou situations pouvant éveiller des doutes sur la capacité du Fonds ou de tout compartiment de celui-ci à poursuivre son exploitation. Si nous arrivons à la conclusion qu'il existe des incertitudes importantes, nous avons l'obligation d'attirer l'attention dans notre rapport d'audit sur les informations connexes dans les états financiers ou, si de telles informations ne sont pas adéquates, de modifier notre opinion. Nos conclusions reposent sur les éléments probants recueillis jusqu'à la date de notre rapport d'audit. Toutefois, des circonstances ou événements ou situations futurs pourraient amener le Fonds à mettre un terme à l'exploitation du Fonds ou de tout compartiment de celui-ci ;
- évaluer la présentation générale, la structure et le contenu des états financiers, y compris les informations, et établir si les états financiers représentent les opérations et événements sous-jacents de manière à donner une image fidèle.

Nous communiquons avec les personnes chargées de la gouvernance concernant, entre autres, la portée et le calendrier prévus pour l'audit ainsi que les conclusions significatives de l'audit, notamment toute anomalie importante dans les contrôles internes que nous pourrions identifier au cours de l'audit.

Nous fournissons également aux personnes chargées de la gouvernance une déclaration selon laquelle nous avons respecté les exigences déontologiques applicables relatives à l'indépendance, et nous leur communiquons les relations et autres questions raisonnablement jugées comme susceptibles de peser sur notre indépendance, et le cas échéant, les mesures prises pour éliminer les menaces ou les sauvegardes appliquées.

PricewaterhouseCoopers Assurance, Société coopérative
Représentée par

Luxembourg, le 29 octobre 2025

Thomas Druant

À l'intention des actionnaires d'Amundi Funds

Par les présentes, nous confirmons qu'à notre avis, la Société de gestion du Fonds a, dans tous les aspects significatifs, géré Amundi Funds conformément aux dispositions de la documentation légale du Fonds, dans sa version modifiée, pour l'exercice clôturé au 30 juin 2025.

Pour le compte et au nom de
CACEIS Bank Luxembourg S.A.

Si la législation l'exige, les avis aux actionnaires seront publiés au Mémorial luxembourgeois, dans le Luxemburger Wort et dans tout autre journal que les administrateurs détermineront.

RÈGLEMENT SUR LES OPÉRATIONS DE FINANCEMENT SUR TITRES

Suite au Règlement 2015/2365 du Parlement européen et du Conseil du 25 novembre 2015 relatif à la transparence des opérations de financement sur titres, seules les transactions concernant les contrats de prise en pension, mise en pension, prêt de titres et swaps de performance étaient soumises à ce Règlement au 30 juin 2025.

Toutes les transactions sont bilatérales.

Les compartiments respectent à tout moment la contrainte selon laquelle « le montant des espèces reçues à titre de garantie de contrats de gré à gré et de contrats de mise en pension doit être supérieur à la somme des dépôts auprès d'établissements de crédit, des investissements dans des obligations d'Etat de qualité, des opérations de prise en pension auprès d'établissements de crédit et des investissements dans des fonds monétaires à court terme ». Les espèces sont gérées dans leur ensemble. Le processus de gestion des investissements ne distingue pas spécifiquement les espèces reçues à titre de garantie des autres espèces. Les garanties fournies par les Compartiments dans le cadre des contrats de mise en pension sont détenues sur des comptes séparés.

Les intérêts reçus et payés en vertu de contrats de prise en pension et de mise en pension sont indiqués dans l'État des opérations et des variations de l'actif net pour chaque compartiment, aux rubriques « Intérêts reçus sur contrats de mise en pension/prise en pension » et « Intérêts payés sur contrats de mise en pension/prise en pension ».

* Le total n'inclut pas les espèces servant de garantie.

Toutes les transactions sont bilatérales.

Pour chaque contrepartie et chaque compartiment, les positions en garantie sont suivies globalement pour tous les types d'instruments de gré à gré.

Les espèces sont gérées dans leur ensemble. Le processus de gestion des investissements ne distingue pas spécifiquement les espèces reçues à titre de garantie des autres espèces.

Les rendements et coûts découlant des opérations de swaps de performance au cours de l'exercice clôturé au 30 juin 2025 sont inclus dans l'évaluation des swaps.

POLITIQUE ET PRATIQUES EN MATIÈRE DE RÉMUNÉRATION

La politique en matière de rémunération d'Amundi Luxembourg S.A. est conforme aux exigences détaillées dans la Directive européenne 2014/91/UE entrée en vigueur le 18 mars 2016 et transposée dans la Loi luxembourgeoise du 10 mai 2016. La politique en matière de rémunération repose sur le cadre régissant la rémunération du Groupe Amundi, et est revue chaque année et approuvée par le Conseil d'Amundi Luxembourg. La politique fait l'objet d'une révision indépendante par la fonction interne chargée de la Conformité.

Aucun changement important n'a été apporté à la politique en matière de rémunération adoptée par rapport aux années précédentes, mis à part des modifications/précisions de la formulation, principalement afin de clarifier le seuil à utiliser pour les calculs de reports et afin de souligner qu'un équilibre approprié est recherché entre la composante fixe et la composante variable de la rémunération.

La politique applicable pour 2024 a été approuvée par le Conseil d'administration d'Amundi Luxembourg le 26 septembre 2024. Le Comité de rémunération du Groupe Amundi revoit chaque année la politique en matière de rémunération du groupe. La revue de 2024 a eu lieu le 6 février de cette même année.

Les objectifs de la politique et des pratiques en matière de rémunération sont conformes et favorables à une gestion des risques efficace et saine, en alignant la rémunération sur la performance et les risques à long terme afin d'éviter les conflits d'intérêts. Les composantes de rémunération fixe sont liées aux postes couverts, aux services professionnels réalisés et à l'étendue des responsabilités, reflétant le niveau de qualification, les niveaux de salaire du marché, l'expérience et les compétences requises pour chaque poste ainsi que le niveau d'excellence démontré. La rémunération variable est définie pour promouvoir un développement durable à long terme de la Société de gestion ainsi qu'un système de gestion des risques solide et efficace.

Les indemnités de la rémunération variable tiennent compte de la performance de l'employé, de sa division opérationnelle et du Groupe Amundi dans son ensemble, et reposent sur des critères tant financiers que non financiers.

Amundi Luxembourg S.A. et le Groupe Amundi ont défini tout le personnel identifié disposant d'une autorité ou d'une influence sur les fonds gérés par Amundi, et qui sont par conséquent susceptibles d'avoir un impact sur la performance ou sur le profil de risque des fonds.

■ MONTANTS ACCORDÉS À TITRE DE RÉMUNÉRATION

Amundi Luxembourg S.A., la Société de gestion, intervient au 31 décembre 2024 en tant que Société de gestion ou gestionnaire de FIA pour plusieurs OPCVM à compartiments multiples et distincts et divers FIA.

La rémunération totale exprimée en euros versée par Amundi Luxembourg S.A. à son personnel pour l'année civile 2024 est la suivante :

	Nbre de bénéficiaires	Rémunération fixe	Rémunération variable	Total
Employés	106	9,237,821.73	1,719,726.79	10,957,548.52
Dont				
- Personnel identifié	10	1,370,331.15	699,980.79	2,070,311.94
- Autres employés	96	7,867,490.58	1,019,746.00	8,887,236.58

Au 31 décembre 2024 et au 30 juin 2025, la SICAV Amundi Funds représentait respectivement environ 25.55% et 24.57% du total des actifs nets sous gestion d'Amundi Luxembourg S.A. Les chiffres de la rémunération totale susmentionnés font référence à des activités concernant tous les fonds gérés. Les employés d'Amundi Luxembourg S.A. et du Groupe Amundi qui sont nommés au Conseil d'administration de la Société de gestion et/ou du Fonds renoncent au droit de percevoir une quelconque rémunération liée à l'ensemble des fonds gérés. Aucun employé de la Société de gestion ne peut recevoir de montants lui étant versés directement par les OPCVM ou les FIA gérés, y compris s'il s'agit d'intéressement aux plus-values et de commissions de performance.

RÉMUNÉRATION DES DÉLÉGUÉS

Lorsqu'elles sont mises à disposition de la Société de gestion, les données en matière de rémunération de 2024 relatives aux Gestionnaires des investissements sont détaillées ci-dessous (données relatives aux actifs sous gestion des Compartiments au 30/06/2025).

- Amundi Asset Management gérait 1,215.95 milliards d'euros d'actifs sous gestion, dont 21.26 milliards étaient représentés par des compartiments du fonds (respectivement 1.75% du total des actifs gérés par le Gestionnaire des investissements et 25.98% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 718,162, dont EUR 314,975 à titre de rémunération fixe et EUR 403,187 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 3,757,396, dont EUR 2,634,671 à titre de rémunération fixe et EUR 1,122,725 à titre de rémunération variable. Le personnel identifié d'Amundi Asset Management incluait 109 personnes, sur un total de 1 988 membres du personnel en 2024.

- Amundi Asset Management US Inc. gérait EUR 108.48 milliards d'actifs sous gestion, dont EUR 20.60 milliards représentés par des compartiments du fonds (respectivement 18.99% du total des actifs gérés par le Gestionnaire des investissements et 25.17% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 6,399,119, dont EUR 2,273,237 à titre de rémunération fixe et EUR 4,125,882 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 11,612,628, dont EUR 5,812,303 à titre de rémunération fixe et EUR 5,800,325 à titre de rémunération variable. Le personnel identifié d'Amundi Asset Management US Inc. incluait 46 personnes, sur un total de 176 membres du personnel en 2024.

- Amundi UK Ltd gérait EUR 49.22 milliards d'actifs sous gestion, dont EUR 16.67 milliards représentés par des compartiments du fonds (respectivement 33.87% du total des actifs gérés par le Gestionnaire des investissements et 20.36% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 5,841,645, dont EUR 3,269,157 à titre de rémunération fixe et EUR 2,572,488 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 16,472,917, dont EUR 10,772,948 à titre de rémunération fixe et EUR 5,699,969 à titre de rémunération variable. Le personnel identifié d'Amundi UK Ltd incluait 36 personnes, sur un total de 225 membres du personnel en 2024.

- Amundi Ireland Ltd gérait EUR 35.96 milliards d'actifs sous gestion, dont EUR 16.38 milliards représentés par des compartiments du fonds (respectivement 45.56% du total des actifs gérés par le Gestionnaire des investissements et 20.01% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 2,281,257, dont EUR 936,227 à titre de rémunération fixe et EUR 1,345,030 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 19,680,123, dont EUR 14,497,045 à titre de rémunération fixe et EUR 5,183,078 à titre de rémunération variable. Le personnel identifié d'Amundi Ireland Ltd. incluait 12 personnes, sur un total de 383 membres du personnel en 2024.

- Amundi SGR S.p.A. gérait EUR 92.38 milliards d'actifs sous gestion, dont EUR 3.77 milliards étaient représentés par des compartiments du fonds (respectivement 4.09% du total des actifs gérés par le Gestionnaire des investissements et 4,61% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 560,706, dont EUR 276,364 à titre de rémunération fixe et EUR 284,342 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 2,000,938, dont EUR 1,276,407 à titre de rémunération fixe et EUR 724,531 à titre de rémunération variable. Le personnel identifié d'Amundi SGR S.p.A. incluait 45 personnes, sur un total de 376 membres du personnel en 2024.

- Amundi Austria GmbH gérait EUR 19.41 milliards d'actifs sous gestion, dont EUR 810 millions représentés par le compartiment du fonds (respectivement 4.17% du total des actifs gérés par le Gestionnaire des investissements et 0.99% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 337,484, dont EUR 240,056 à titre de rémunération fixe et EUR 97,428 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 752,787, dont EUR 614,831 à titre de rémunération fixe et EUR 137,956 à titre de rémunération variable. Le personnel identifié d'Amundi Austria GmbH incluait 41 personnes, sur un total de 145 membres du personnel en 2024.

- Amundi Hong Kong Ltd. gérait EUR 7.56 milliards d'actifs sous gestion, dont EUR 893 millions représentés par des compartiments du fonds (respectivement 11.81% du total des actifs gérés par le Gestionnaire des investissements et 1.09% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 91,611, dont EUR 65,924 à titre de rémunération fixe et EUR 25,687 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 1,675,325, dont EUR 1,253,963 à titre de rémunération fixe et EUR 421,362 à titre de rémunération variable. Le personnel identifié d'Amundi Hong Kong Ltd incluait 3 personnes, sur un total de 72 membres du personnel en 2024.

- Amundi Deutschland GmbH gérait EUR 19 milliards d'actifs sous gestion, dont EUR 634 millions représenté par des compartiments du fonds (respectivement 3.34% du total des actifs gérés par le Gestionnaire des investissements et 0.77% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 108,879, dont EUR 64,929 à titre de rémunération fixe et EUR 43,950 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 798,740, dont EUR 545,325 à titre de rémunération fixe et EUR 253,415 à titre de rémunération variable. Le personnel identifié d'Amundi Deutschland GmbH incluait 16 personnes, sur un total de 173 membres du personnel en 2024.

- Polen Capital Management LLC gérait EUR 56.4 milliards d'actifs sous gestion, dont EUR 426 millions représentés par le compartiment du fonds (respectivement 0.76% du total des actifs gérés par le Gestionnaire des investissements et 0.52% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 107,109, dont EUR 17,646 à titre de rémunération fixe et EUR 89,463 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 815,335, dont EUR 453,872 à titre de rémunération fixe et EUR 361,463 à titre de rémunération variable. Le personnel identifié de Polen Capital Management LLC incluait 10 personnes, sur un total de 256 membres du personnel en 2024.

- Amundi Japan gérait EUR 35.78 milliards d'actifs sous gestion, dont EUR 244 millions représentés par des compartiments du fonds (respectivement 0.68% du total des actifs gérés par le Gestionnaire des investissements et 0.3% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 17,761, dont EUR 12,561 à titre de rémunération fixe et EUR 5,200 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 118,183, dont EUR 92,047 à titre de rémunération fixe et EUR 26,136 à titre de rémunération variable. Le personnel identifié d'Amundi Japan incluait 15 personnes, sur un total de 189 membres du personnel en 2024.

- Resona Asset Management Co. Ltd. gérait EUR 0.72 milliard d'actifs sous gestion, dont EUR 80 millions représentés par le compartiment du fonds (respectivement 11.25% du total des actifs gérés par le Gestionnaire des investissements et 0.1% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel identifié imputable à la gestion des compartiments s'élevait à EUR 38,917, dont EUR 27,012 à titre de rémunération fixe et EUR 11,905 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 62,533, dont EUR 41,688 à titre de rémunération fixe et EUR 20,845 à titre de rémunération variable. Le personnel identifié de Resona Asset Management Co. Ltd incluait 4 personnes, sur un total de 7 membres du personnel en 2024.

- Amundi Singapore Ltd gérait EUR 1.32 milliard d'actifs sous gestion, dont EUR 50 millions représentés par les compartiments du fonds (respectivement 3.79% du total des actifs gérés par le Gestionnaire des investissements et 0.06% des actifs sous gestion de l'ensemble des compartiments multiples du fonds). La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 363,200, dont EUR 267,435 à titre de rémunération fixe et EUR 95,765 à titre de rémunération variable. Le personnel identifié d'Amundi Singapore Ltd. incluait 0 personne, sur un total de 58 membres du personnel en 2024.

- Montpensier Finance gérait un compartiment avec EUR 32 millions d'actifs sous gestion, représentant environ 0.04% du total des actifs sous gestion du Fonds. La proportion de la rémunération totale du personnel identifié imputable à la gestion de ce compartiment s'élevait à EUR 69,000, dont EUR 34,000 à titre de rémunération fixe et EUR 35,000 à titre de rémunération variable. La proportion de la rémunération totale du personnel imputable à la gestion des compartiments s'élevait à EUR 109,000 dont EUR 51,000 à titre de rémunération fixe et EUR 58,000 à titre de rémunération variable. Le personnel identifié de Montpensier Finance incluait 8 personnes, sur un total de 40 membres du personnel en 2024.

- Victory Capital Management Inc. est devenue Gestionnaire des investissements à compter du 1er avril 2025. Comme la période entre la nomination et la fin de l'exercice n'est pas considérée comme suffisamment représentative, les chiffres de rémunération pour l'exercice en cours ne sont pas divulgués. Les statistiques de la rémunération seront communiquées à compter de l'année prochaine.

¹ Ce compartiment a été liquidé au cours de la période sous revue, voir note 1 pour plus de détails.

² Ce compartiment a changé de nom au cours de la période sous revue, voir note 1 pour plus de détails.

³ Ce compartiment a été lancé au cours de la période sous revue, voir note 1 pour plus de détails.

* Dans certains cas (lorsqu'un compartiment a été repris, liquidé ou lancé dans les 12 derniers mois, lorsqu'une classe d'actions a été lancée ou liquidée dans les 12 derniers mois, lorsque les actifs sous gestion pour une classe d'actions ont augmenté ou baissé dans une large mesure au cours des 12 derniers mois, ou lorsqu'il n'existe que peu d'actifs sous gestion pour une classe particulière), le ratio du coût total calculé annuellement (période de référence de 12 mois) peut ne pas être représentatif de la valeur réelle.

RÉGLEMENTATION SUR LES COMMISSIONS DE PERFORMANCE

Suite aux Orientations de l'Autorité européenne des marchés financiers sur les commissions de performance (ESMA34-39-992), l'impact des données de commissions de performance au 30 juin 2025 était comme suit :

Classe d'actions	ISIN	Montant des commissions de performance réalisées à la fin de la période d'observation dans la devise du compartiment	% reposant sur la VNI à la fin de la période d'observation ⁽¹⁾	Montant des commissions de performance cristallisées au quotidien au cours de l'exercice comptable en raison de rachats (dans la devise du compartiment)	% reposant sur la VNI moyenne sur la période comptable ⁽²⁾	Montant des commissions de performance cumulées à la fin de l'exercice (fin de la période comptable dans la devise du compartiment)	% reposant sur la VNI à la fin de la période comptable ⁽³⁾

(1) Montant des commissions de performance réalisées à la fin de la période d'observation dans la devise du compartiment divisé par la VNI à la fin de la période d'observation

(2) Montant des commissions de performance cristallisées au quotidien au cours de l'exercice comptable en raison de rachats dans la devise du compartiment divisé par la VNI moyenne sur la période comptable

(3) Montant des commissions de performance cumulées à la fin de la période d'observation (fin de la période comptable) dans la devise du compartiment divisé par la VNI à la fin de la période comptable

Les classes d'actions actives sans commissions de performance cristallisées au cours de l'exercice ou sans commissions de performance en fin d'exercice ne sont pas reportées dans le tableau.

RÈGLEMENT DISCLOSURE

Le 18 décembre 2019, le Conseil européen et le Parlement européen ont annoncé être parvenus à un accord politique concernant le Règlement Disclosure, cherchant ainsi à établir un cadre paneuropéen pour encourager l'investissement durable. Le Règlement Disclosure prévoit une approche harmonisée dans le respect de la publication d'informations en matière de durabilité à destination des investisseurs dans le secteur des services financiers de l'Espace économique européen. Aux fins du Règlement Disclosure, la Société de gestion remplit les critères de « participant au marché financier », et chaque Compartiment est éligible en tant que « produit financier ». Pour plus de détails sur la façon dont un Compartiment répond aux exigences du Règlement Disclosure, reportez-vous au supplément du Compartiment concerné. Reportez-vous également à la section sur l'« Investissement durable » dans le Prospectus du Fonds et à la Politique d'Investissement responsable disponible à la page www.amundi.com.

Comme exigé par l'Art.11 du Règlement Disclosure, le Fonds fait les déclarations suivantes : En vertu de sa politique d'Investissement responsable, Amundi a développé sa propre approche en matière de critères ESG. La notation ESG d'Amundi vise à mesurer les performances ESG d'un émetteur, c'est-à-dire sa capacité à anticiper et à gérer les Risques en matière de durabilité et les opportunités inhérentes à son secteur et à sa situation individuelle. En utilisant les notes ESG, les gestionnaires de portefeuille tiennent compte des Risques en matière de durabilité dans leurs décisions d'investissement. Amundi applique des politiques d'exclusion ciblées à toutes ses stratégies d'investissement actives en excluant les entreprises en contradiction avec la Politique d'investissement responsable, notamment celles qui ne respectent pas les conventions internationales, les cadres communs reconnus sur le plan international ou encore les réglementations nationales.

■ Compartiments relevant de l'Article 9

Ces Compartiments ont un objectif durable et sont pas conséquent classés comme relevant de l'Article 9 en vertu du Règlement SFDR (Règlement (UE) 2019/2088 du Parlement européen et du Conseil du 27 novembre 2019 sur la publication d'informations en matière de durabilité dans le secteur des services financiers). Par conséquent, comme requis par l'Article 58 du RÈGLEMENT DÉLÉGUÉ (UE) 2022/1288 DE LA COMMISSION, des informations détaillées sur les caractéristiques environnementales ou sociales promues par le produit financier sont disponibles en annexe au présent rapport.

Cette annexe contient des informations sur les aspects suivants :

- réalisation de l'objectif d'investissement durable du produit financier ;
- investissements les plus importants, allocation des actifs et proportion d'investissements dans les différents secteurs et sous-secteurs économiques ;
- détails sur les investissements durables.

Liste des Compartiments relevant de l'Article 9 au 30 juin 2025 :

Montpensier Great European Models SRI
 Montpensier M Climate Solutions
 Impact Euro Corporate Short Term Green Bond
 Impact Green Bond

■ Compartiments relevant de l'Article 8 (Art.11.1 requis)

Les Compartiments mentionnés ci-dessous sont classés comme relevant de l'Article 8 du Règlement Disclosure et visent à promouvoir des caractéristiques environnementales et/ou sociales. Outre le fait d'appliquer la Politique d'investissement responsable d'Amundi, ces Compartiments relevant de l'Article 8 ont pour objectif de promouvoir de telles caractéristiques à travers des investissements découlant sur une note ESG des portefeuilles supérieure à celle de l'indice de référence ou de l'univers d'investissement correspondant. La note du portefeuille ESG est la moyenne pondérée des actifs sous gestion de la note ESG des émetteurs sur le modèle de notation ESG d'Amundi.

Au cours de l'exercice financier sous revue, le Gestionnaire des investissements a continuellement fait la promotion des caractéristiques environnementales et/ou sociales à travers l'application des méthodologies susmentionnées.

■ **Compartiments relevant de l'Article 6**

Étant donné l'orientation en matière d'investissement et les classes d'actifs/secteurs dans lesquels ils investissent, les gestionnaires des investissements de tous les autres Compartiments, non classés comme relevant de l'article 8 ou 9 du Règlement Disclosure, n'ont pas intégré de facteur d'activités économiques durables sur le plan environnemental dans le processus d'investissement pour le Compartiment. Par conséquent, il convient de noter que les investissements à la base du Compartiment n'ont pas pris en compte les critères de l'UE concernant les activités économiques durables sur le plan environnemental.

Au cours de l'exercice financier, la Compartiment a, dans le cadre de la Politique d'exclusion et d'application de normes minimales d'Amundi, pris le PAI 14 en considération. Ce PAI concerne les armes controversées et l'exclusion des émetteurs impliqués dans la production, la vente, le stockage ou la prestation de services en lien avec les mines antipersonnel et armes à sous-munitions, interdites par les traités d'Ottawa et d'Oslo. Il couvre également l'exclusion des émetteurs impliqués dans la production, la vente et le stockage d'armes à base d'uranium appauvri, chimiques ou biologiques, tel que précisa dans la Politique mondiale d'investissement responsable d'Amundi.

Liste des Compartiments relevant de l'Article 6 au 30 juin 2025 :

Dénomination du produit :
AMUNDI FUNDS MONTPENSIER GREAT EUROPEAN MODELS SRI

Identifiant d'entité juridique :
213800HTVMOYLUK1WB84

Objectif d'investissement durable

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="checkbox"/> Oui	<input type="checkbox"/> Non
<p><input checked="" type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : 18.7% de l'actif net du fonds</p> <p><input checked="" type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : 78.7% de l'actif net du fonds</p>	<p><input type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de ___% d'investissements durables</p> <p><input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> ayant un objectif social</p> <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>

Une société est identifiée comme durable par le gestionnaire d'actifs, par le biais de la méthodologie décrite dans la Politique ESG disponible sur le site Web montpensier.com. Une entreprise peut être impliquée dans plusieurs ODD. Elle est classée par la société de gestion comme durable sur le plan environnemental ou social en fonction de son implication dans l'ODD principal auquel la société de gestion l'a rattachée.

Dans quelles mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint ?

Le fonds intègre des facteurs de durabilité dans son processus d'investissement, comme indiqué plus en détail ci-dessous et dans le chapitre « Stratégie d'investissement » du Prospectus.

Les critères ESG sont pris en compte par le fonds afin d'unifier la performance financière et le souhait d'influencer l'émetteur de manière positive, si possible, en matière de performance ESG, en encourageant les entreprises à améliorer l'intégration de critères ESG à leurs activités et en valorisant les bonnes pratiques.

La société de gestion a appliqué la politique décrite dans le Document précontractuel pour les produits financiers visés à l'Article 9, paragraphes 1 à 4a, du Règlement (UE) 2019/2088 et à l'Article 5, premier alinéa du Règlement (UE) 2020/852.

100% du portefeuille investi à l'exclusion de la catégorie trésorerie et équivalents de trésorerie (soit 97.36% de l'actif net du fonds) sont constitués d'investissements durables.

L'empreinte carbone et l'intensité carbone moyenne pondérée du portefeuille sont en ligne avec celles de l'indice.

L'intensité carbone moyenne pondérée du portefeuille est significativement plus élevée que celle de l'indice lorsque les émissions en amont du champ d'application 3 sont incluses, alors que l'empreinte carbone reste significativement inférieure à celle de l'indice.

Pour rappel, le Niveau 3 Catégorie 1 prenait auparavant en compte les émissions des fournisseurs directs du produit final, tandis que le Niveau 3 en Amont a un champ d'application plus large, qui prend en compte les émissions liées au transport et à la distribution des produits achetés par l'entreprise entre ses fournisseurs de Catégorie 1 et ses opérations, ainsi que d'autres services tels que la logistique entrante, la logistique sortante, le transport et la distribution entre les sites de l'entreprise.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Les indicateurs utilisés pour démontrer que le compartiment a promu des caractéristiques environnementales et/ou sociales sont les suivants :

- Part des investissements conformes à la politique d'exclusion de Montpensier Arbevel : 100 %.
- Part des investissements ayant une note B ou supérieure (sur une échelle allant de CCC à AAA) : 100 %.
- Part des investissements impliqués dans une controverse de niveau « Rouge » selon MSCI : 0 %.
- Part des investissements soumis à la méthodologie ESG de Montpensier Arbevel : 100 %.

Conformité au Pacte mondial : Pourcentage de sociétés en portefeuille identifiées comme respectant les principes du Pacte mondial des Nations unies

- ... et par rapport aux périodes précédentes ?

Voir plus haut.

- Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable ?

Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?

L'évaluation du principe de ne pas causer de préjudice important (« Do no significant harm » ou « DNSH » en anglais), repose sur :

- Notre analyse ISR Étape 1 : l'exclusion des entreprises impliquées dans des activités controversées : fabrication d'armes, extraction de charbon, tabac, divertissement pour adultes, jeux d'argent, OGM et huile de palme.
- Étape 2, c'est-à-dire l'exclusion des entreprises notées « CCC » ou « Vigilance Controverse Rouge » par MSCI ESG Research ;
- Prise en compte des PAI dans une approche qualitative de l'analyse ISR des titres. Les indicateurs relatifs aux principales incidences négatives des décisions d'investissement sur les facteurs de durabilité sont énumérés en annexe.

De plus, les entreprises présentant une analyse d'impact environnemental ou social MIA (Montpensier Impact Assessment) négative, ou qui sont des piliers environnementaux (E) ou sociaux (S), sont considérées comme dérogeant au principe DNSH.

Vous pouvez aussi vous référer au Prospectus ainsi qu'au document pré-contractuel SFDR annexés au prospectus de l'OPC, disponibles sur le site Web de la société de gestion.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :

Nous excluons de notre univers d'investissement les entreprises qui ne sont pas alignées sur certaines normes et conventions internationales, notamment le Pacte mondial des Nations unies (PMNU), les Principes directeurs de l'OCDE à l'intention des entreprises multinationales, les règles de l'Organisation internationale du travail (OIT) et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme (UNGPBHR).

Les entreprises qui font l'objet d'une controverse de niveau « Rouge » sont exclues de l'univers d'investissement. Parmi ces controverses de niveau « Rouge » figurent des entreprises qui ne respectent pas le Pacte mondial des Nations unies (droits de l'homme, normes du travail, environnement et lutte contre la corruption).

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Nous tenons compte des principaux indicateurs relatifs aux incidences négatives dans la politique d'exclusions sectorielles et normatives, l'analyse des pratiques de bonne gouvernance (en nous appuyant sur l'analyse exclusive « Montpensier Governance Flag » ou MGF), l'analyse qualitative exclusive de la contribution des entreprises à la transition environnementale et à la transition solidaire (analyse d'impact « Montpensier Impact Assessment » ou MIA et analyse de la contribution des entreprises par secteur « Montpensier Industry Contributor » ou MIC), et/ou dans l'analyse des éco-activités qui détermine la contribution à un ou plusieurs Objectifs de développement durable (ODD) de l'ONU. La pertinence et la couverture de ces indicateurs varient selon le secteur et la région dans lesquels exercent les entreprises.

Les indicateurs relatifs aux principales incidences négatives des décisions d'investissement sur les facteurs de durabilité sont énumérés en annexe.

Les informations concernant les objectifs environnementaux, sociaux et de gouvernance (ESG) sont consultables sur le site Web de la société de gestion :

<https://www.montpensier.com/sites/default/files/public/documents/politique-esg.pdf>

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir :

Classification « Industry Classification Benchmark » (ICB) - 19 supersecteurs

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxinomie de l'UE ?

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les données relatives à l'implication dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la taxinomie sont déterminées compte tenu uniquement des données publiées par les entreprises.

Les données concernant l'implication des entreprises dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la taxinomie ne sont pas encore disponibles.

À titre d'information, les actions d'entreprises identifiées comme impliquées dans des activités liées à l'énergie fossile et/ou nucléaire représentent 5.09% du portefeuille, soit 5.09% du portefeuille pour les actions d'entreprises tirant une partie de leur chiffre d'affaires de l'énergie nucléaire et 0.00% pour les actions d'entreprises impliquées dans l'énergie fossile.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines. Le chiffre d'affaires est estimé par MSCI ESG Research conformément à la méthodologie décrite ci-dessous. Les données de CapEx et OpEx ne prennent en compte que les données publiées par les entreprises.

Le pourcentage d'alignement sur la taxinomie indiqué ci-dessus représente la contribution moyenne pondérée du portefeuille à l'alignement sur la taxinomie européenne (sur la base du chiffre d'affaires, des dépenses d'investissement - CapEx - ou des dépenses d'exploitation - OpEx -) de tous les investissements durables, que leur objectif soit environnemental ou social.

Alignement sur la taxinomie européenne

L'alignement sur la taxinomie européenne est estimé par MSCI ESG Research, sur la base du pourcentage maximal des revenus d'une entreprise découlant de produits et services répondant à des objectifs environnementaux, sur la base du cadre MSCI Sustainable Impact Metrics.

Le pourcentage des ventes généré par les produits et services qui répondent aux objectifs environnementaux est réduit à 0 pour les entreprises qui ne respectent pas les critères de la taxinomie européenne consistant à « ne pas causer de préjudice important » et à adopter des « garanties sociales minimales ». Le même principe s'applique aux producteurs de tabac, dont le chiffre d'affaires découle à hauteur de 5% ou plus de la fourniture, distribution ou vente au détail de produits issus du tabac, et aux entreprises impliquées dans les armes controversées.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Le fonds ne dispose pas d'une proportion minimale d'investissements dans des activités transitoires ou habilitantes.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

	30/06/25	28/06/24	30/06/23
Alignement sur la taxinomie européenne	% des actifs sous gestion	% des actifs sous gestion	% des actifs sous gestion
Great European Models SRI	4.1%	4.8%	7.5%

Le pourcentage indiqué ci-dessus représente la contribution du portefeuille à l'alignement sur la taxinomie européenne (sur la base du chiffre d'affaires) de tous les investissements durables, que leur objectif soit environnemental ou social.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

À la date du présent rapport, 18.7% de l'actif net étaient investis dans des investissements durables ayant un objectif environnemental, tandis que 6.6% de l'actif net n'étaient pas alignés sur la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

À la date du présent rapport, 78.7% de l'actif net étaient investis dans des investissements durables ayant un objectif social.

Quels investissements étaient inclus dans la catégorie « Non durables », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

La trésorerie, les équivalents de trésorerie et les dérivés de couverture représentent 2.6% de l'actif net du fonds et n'offrent pas de garanties environnementales ou sociales minimales.

Quelles mesures ont-elles été prises pour atteindre l'objectif durable au cours de la période de référence ?

La société de gestion a appliqué la politique décrite dans les informations précontractuelles pour les produits financiers visés à l'Article 9, paragraphes 1 à 4a, du Règlement (UE) 2019/2088 et à l'Article 5, premier alinéa du Règlement (UE) 2020/852.

La politique en matière d'engagement des actionnaires de Montpensier Finance se compose d'une politique de vote et d'une politique d'engagement.

L'exercice de droits de vote est un élément important du dialogue avec les émetteurs. Il encourage les bonnes pratiques de gouvernance et promeut l'éthique professionnelle.

Montpensier Finance considère que l'exercice des droits de vote fait partie intégrante du processus de gestion des investissements et qu'il doit être effectué dans l'intérêt de ses clients. La politique en matière de droits de vote de Montpensier Finance vise la promotion de la valorisation à long terme de ses investissements dans le fonds.

Pour exercer les droits de vote attachés aux titres détenus par le fonds, les gestionnaires du fonds se réfèrent aux principes concernant les recommandations de gouvernance d'entreprise publiées par ISS Governance dans sa Politique de durabilité. ISS couvre toutes les entreprises détenues dans les portefeuilles des fonds gérés par Montpensier Finance.

Les réglementations en matière de gouvernance exigent aux gestionnaires de portefeuille d'exercer leurs fonctions de manière indépendante, en particulier concernant les émetteurs, et dans le strict intérêt des porteurs de parts ou actionnaires. Les gestionnaires de portefeuille sont particulièrement attentifs aux décisions susceptibles de nuire aux intérêts des porteurs de parts ou actionnaires. La politique complète en matière de vote ainsi que le dernier rapport sur l'exercice des droits de vote sont disponibles sur notre site Web.

Montpensier Finance complète sa politique de vote par une politique d'engagement.

Les équipes de gestion du fonds sont encouragées à soulever toute question qui se pose auprès des entreprises au cours des réunions, en particulier lorsque les problèmes en matière d'ESG ne sont pas suffisamment pris en compte, afin d'encourager ces entreprises à améliorer leurs pratiques concernant les questions environnementales, sociales et de gouvernance, qui constituent des facteurs de croissance durable.

Les gestionnaires du fonds, assistés par les analystes ISR, établiront une entente positive et constructive à moyen et long termes avec les entreprises détenues dans le portefeuille.

Cette entente comporte de multiples facettes :

- ✓ Contacts avec l'entreprise ;
- ✓ Communication des intentions de vote des gestionnaires du fonds à la société avant l'assemblée générale.

Outre les initiatives d'engagement directes que nous menons généralement avec les petites et moyennes entreprises, Montpensier Finance participe également à des actions d'engagement par groupe mises en œuvre par ISS dans le cadre de son programme ISS ESG spécialement pour les grandes entreprises.

Ce dialogue est mis en place avec plusieurs objectifs :

- ✓ Encourager les entreprises à mettre en place un engagement ESG ;
- ✓ Encourager les entreprises à communiquer sur leurs pratiques ESG.

La politique complète en matière d'engagement ainsi que le dernier rapport sur l'engagement sont disponibles sur notre site Web. Le dernier rapport d'engagement est disponible à l'adresse suivante :

https://www.montpensier.com/sites/default/files/public/documents/engagement_rapport.pdf

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence de durabilité ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier atteint l'objectif de durabilité.

Le fonds n'utilise pas d'indice de référence durable. Sa performance en matière de durabilité est comparée à celle de son indice de référence : Stoxx 600

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

N/A

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

N/A

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

N/A

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Voir plus haut la comparaison entre les indicateurs de performance du fonds et de son indice de référence et les indicateurs de durabilité.

Informations périodiques pour les produits financiers visés à l'Article 9, paragraphes 1 à 4a, du Règlement (UE) 2019/2088 et à l'Article 5, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :

Objectif d'investissement durable

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance. La taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> X Oui	<input type="checkbox"/> <input type="checkbox"/> Non
<input checked="" type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : 97.5% de l'actif net du fonds	<input type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une proportion de ___% d'investissements durables
<input checked="" type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input checked="" type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : 0.0% de l'actif net du fonds	<input type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Fonds thématique en actions mondiales, de toutes capitalisations, ciblant des entreprises effectivement impliquées dans la transition énergétique et écologique pour le climat et pouvant avoir un impact réel en la matière.

Dans quelles mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint ?

Le fonds intègre des facteurs de durabilité dans son processus d'investissement, comme indiqué plus en détail ci-dessous et dans le chapitre « Stratégie d'investissement » du Prospectus.

Les critères ESG sont pris en compte par le fonds afin d'unifier la performance financière et le souhait d'influencer l'émetteur de manière positive, si possible, en matière de performance ESG, en encourageant les entreprises à améliorer l'intégration de critères ESG à leurs activités et en valorisant les bonnes pratiques.

La société de gestion a appliqué la politique décrite dans le Document précontractuel pour les produits financiers visés à l'Article 9, paragraphes 1 à 4a, du Règlement (UE) 2019/2088 et à l'Article 5, premier alinéa du Règlement (UE) 2020/852.

100% du portefeuille investi à l'exclusion de la catégorie trésorerie et équivalents de trésorerie (soit 97.47% de l'actif net du fonds) sont constitués d'investissements durables.

L'empreinte carbone et l'intensité carbone moyenne pondérée du portefeuille sont considérablement inférieures à celles de l'indice. Cette performance est attribuable à notre forte sous-exposition aux combustibles fossiles.

L'intensité carbone moyenne pondérée du portefeuille est supérieure à celle de son indice lorsque l'on inclut les émissions en amont de niveau 3. Par exemple, les activités principales de certaines entreprises du portefeuille nécessitent des niveaux relativement élevés de logistique et de transport de matériaux et de composants, ce qui explique l'augmentation de l'intensité carbone moyenne pondérée. Ces solutions contribuent également à la transition énergétique, en permettant d'économiser de l'énergie et de réduire les émissions de carbone par d'autres moyens.

Pour rappel, le Niveau 3 Catégorie 1 prenait auparavant en compte les émissions des fournisseurs directs du produit final, tandis que le Niveau 3 en Amont a un champ d'application plus large, qui prend en compte les émissions liées au transport et à la distribution des produits achetés par l'entreprise entre ses fournisseurs de Catégorie 1 et ses opérations, ainsi que d'autres services tels que la logistique entrante, la logistique sortante, le transport et la distribution entre les sites de l'entreprise.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Les indicateurs utilisés pour démontrer que le compartiment a promu des caractéristiques environnementales et/ou sociales sont les suivants :

- Part des investissements conformes à la politique d'exclusion de Montpensier Arbevel : 100 %.
- Part des investissements ayant une note B ou supérieure (sur une échelle allant de CCC à AAA) : 100 %.
- Part des investissements impliqués dans une controverse de niveau « Rouge » selon MSCI : 0 %.
- Part des investissements soumis à la méthodologie ESG de Montpensier Arbevel : 100 %.

Indépendance du conseil d'administration : pourcentage de sociétés en portefeuille identifiées dont la majorité des administrateurs sont indépendants des employés, des actionnaires majoritaires et des gouvernements.

Rémunération liée aux objectifs ESG : pourcentage de sociétés en portefeuille identifiées comme ayant intégré les critères ESG dans la rémunération de leurs cadres dirigeants. Cette mesure est basée sur les rapports publiés par les sociétés. Elle vise strictement à relever si ces éléments sont ou non inclus dans le calcul de la rémunération variable et ne permet pas de vérifier leur efficacité.

Conformité au Pacte mondial : Pourcentage de sociétés en portefeuille identifiées comme respectant les principes du Pacte mondial des Nations unies

- ... et par rapport aux périodes précédentes ?

Voir plus haut.

- Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable ?

Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?

L'évaluation du principe de ne pas causer de préjudice important (« Do no significant harm » ou « DNSH » en anglais), repose sur :

- Notre analyse ISR Étape 1 : l'exclusion des entreprises impliquées dans des activités controversées : fabrication d'armes, extraction de charbon, tabac, divertissement pour adultes, jeux d'argent, OGM et huile de palme.
- Étape 2, c'est-à-dire l'exclusion des entreprises notées « CCC » ou « Vigilance Controverse Rouge » par MSCI ESG Research ;
- Prise en compte des PAI dans une approche qualitative de l'analyse ISR des titres. Les indicateurs relatifs aux principales incidences négatives des décisions d'investissement sur les facteurs de durabilité sont énumérés en annexe.

De plus, les entreprises présentant une analyse d'impact environnemental ou social MIA (Montpensier Impact Assessment) négative, ou qui sont des piliers environnementaux (E) ou sociaux (S), sont considérées comme dérogeant au principe DNSH.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

Vous pouvez aussi vous référer au Prospectus ainsi qu'au document pré-contractuel SFDR annexés au prospectus de l'OPC, disponibles sur le site Web de la société de gestion.

Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains ? Description détaillée :

Nous excluons de notre univers d'investissement les entreprises qui ne sont pas alignées sur certaines normes et conventions internationales, notamment le Pacte mondial des Nations unies (PMNU), les Principes directeurs de l'OCDE à l'intention des entreprises multinationales, les règles de l'Organisation internationale du travail (OIT) et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme (UNGPBHR).

Les entreprises qui font l'objet d'une controverse de niveau « Rouge » sont exclues de l'univers d'investissement. Parmi ces controverses de niveau « Rouge » figurent des entreprises qui ne respectent pas le Pacte mondial des Nations unies (droits de l'homme, normes du travail, environnement et lutte contre la corruption).

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Nous tenons compte des principaux indicateurs relatifs aux incidences négatives dans la politique d'exclusions sectorielles et normatives, l'analyse des pratiques de bonne gouvernance (en nous appuyant sur l'analyse exclusive « Montpensier Governance Flag » ou MGF), l'analyse qualitative exclusive de la contribution des entreprises à la transition environnementale et à la transition solidaire (analyse d'impact « Montpensier Impact Assessment » ou MIA et analyse de la contribution des entreprises par secteur « Montpensier Industry Contributor » ou MIC), et/ou dans l'analyse des éco-activités qui détermine la contribution à un ou plusieurs Objectifs de développement durable (ODD) de l'ONU.

La pertinence et la couverture de ces indicateurs varient selon le secteur et la région dans lesquels exercent les entreprises.

Les indicateurs relatifs aux principales incidences négatives des décisions d'investissement sur les facteurs de durabilité sont énumérés en annexe.

Les informations concernant les objectifs environnementaux, sociaux et de gouvernance (ESG) sont consultables sur le site Web de la société de gestion :

<https://www.montpensier.com/sites/default/files/public/documents/politique-esg.pdf>

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir :

Principaux investissements	Secteur	% des actifs	Pays
Schneider Electric	Biens et services industriels	4.62%	France
First Solar Inc	Énergie	4.10%	États-Unis
Xylem Inc	Biens et services industriels	4.06%	États-Unis

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxinomie de l'UE ?

• **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les données relatives à l'implication dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la taxinomie sont déterminées compte tenu uniquement des données publiées par les entreprises.

Les données concernant l'implication des entreprises dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la taxinomie ne sont pas encore disponibles.

À titre d'information, les actions d'entreprises identifiées comme impliquées dans des activités liées à l'énergie fossile et/ou nucléaire représentent 5.09% du portefeuille, soit 5.09% du portefeuille pour les actions d'entreprises tirant une partie de leur chiffre d'affaires de l'énergie nucléaire et 0.00% pour les actions d'entreprises impliquées dans l'énergie fossile.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines. Le chiffre d'affaires est estimé par MSCI ESG Research conformément à la méthodologie décrite ci-dessous. Les données de CapEx et OpEx ne prennent en compte que les données publiées par les entreprises.

Le pourcentage d'alignement sur la taxinomie indiqué ci-dessus représente la contribution moyenne pondérée du portefeuille à l'alignement sur la taxinomie européenne (sur la base du chiffre d'affaires, des dépenses d'investissement - CapEx - ou des dépenses d'exploitation - OpEx -) de tous les investissements durables, que leur objectif soit environnemental ou social.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental. Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Alignement sur la taxinomie européenne

L'alignement sur la taxinomie européenne est estimé par MSCI ESG Research, sur la base du pourcentage maximal des revenus d'une entreprise découlant de produits et services répondant à des objectifs environnementaux, sur la base du cadre MSCI Sustainable Impact Metrics.

Le pourcentage des ventes généré par les produits et services qui répondent aux objectifs environnementaux est réduit à 0 pour les entreprises qui ne respectent pas les critères de la taxinomie européenne consistant à « ne pas causer de préjudice important » et à adopter des « garanties sociales minimales ». Le même principe s'applique aux producteurs de tabac, dont le chiffre d'affaires découle à hauteur de 5% ou plus de la fourniture, distribution ou vente au détail de produits issus du tabac, et aux entreprises impliquées dans les armes controversées.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Le fonds ne dispose pas d'une proportion minimale d'investissements dans des activités transitoires ou habilitantes.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

	30/06/25	28/06/24	30/06/23
Alignement sur la taxinomie européenne	% des actifs sous gestion	% des actifs sous gestion	% des actifs sous gestion
M Climate Solutions	39.1%	65.8%	67.5%

Le pourcentage indiqué ci-dessus représente la contribution du portefeuille à l'alignement sur la taxinomie européenne (sur la base du chiffre d'affaires) de tous les investissements durables, que leur objectif soit environnemental ou social.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

À la date du présent rapport, 97.5% de l'actif net étaient investis dans des investissements durables ayant un objectif environnemental, tandis que 12.4% de l'actif net n'étaient pas alignés sur la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

À la date du présent rapport, 0.0% de l'actif net était investi dans des investissements durables ayant un objectif social, sachant qu'il s'agit d'un fonds thématique en actions mondiales, de toutes capitalisations, ciblant des entreprises effectivement impliquées dans la transition énergétique et environnementale pour le climat et pouvant avoir un impact réel en la matière.

Quels investissements étaient inclus dans la catégorie « Non durables », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

La trésorerie, les équivalents de trésorerie et les dérivés de couverture représentent 2.5% de l'actif net du fonds et n'offrent pas de garanties environnementales ou sociales minimales.

Quelles mesures ont-elles été prises pour atteindre l'objectif durable au cours de la période de référence ?

La société de gestion a appliqué la politique décrite dans les informations précontractuelles pour les produits financiers visés à l'Article 9, paragraphes 1 à 4a, du Règlement (UE) 2019/2088 et à l'Article 5, premier alinéa du Règlement (UE) 2020/852.

La politique en matière d'engagement des actionnaires de Montpensier Finance se compose d'une politique de vote et d'une politique d'engagement.

L'exercice de droits de vote est un élément important du dialogue avec les émetteurs. Il encourage les bonnes pratiques de gouvernance et promeut l'éthique professionnelle.

Montpensier Finance considère que l'exercice des droits de vote fait partie intégrante du processus de gestion des investissements et qu'il doit être effectué dans l'intérêt de ses clients. La politique en matière de droits de vote de Montpensier Finance vise la promotion de la valorisation à long terme de ses investissements dans le fonds.

Pour exercer les droits de vote attachés aux titres détenus par le fonds, les gestionnaires du fonds se réfèrent aux principes concernant les recommandations de gouvernance d'entreprise publiées par ISS Governance dans sa Politique de durabilité. ISS couvre toutes les entreprises détenues dans les portefeuilles des fonds gérés par Montpensier Finance.

Les réglementations en matière de gouvernance exigent aux gestionnaires de portefeuille d'exercer leurs fonctions de manière indépendante, en particulier concernant les émetteurs, et dans le strict intérêt des porteurs de parts ou actionnaires. Les gestionnaires de portefeuille sont particulièrement attentifs aux décisions susceptibles de nuire aux intérêts des porteurs de parts ou actionnaires.

La politique complète en matière de vote ainsi que le dernier rapport sur l'exercice des droits de vote sont disponibles sur notre site Web.

Montpensier Finance complète sa politique de vote par une politique d'engagement.

Les équipes de gestion du fonds sont encouragées à soulever toute question qui se pose auprès des entreprises au cours des réunions, en particulier lorsque les problèmes en matière d'ESG ne sont pas suffisamment pris en compte, afin d'encourager ces entreprises à améliorer leurs pratiques concernant les questions environnementales, sociales et de gouvernance, qui constituent des facteurs de croissance durable.

Les gestionnaires du fonds, assistés par les analystes ISR, établiront une entente positive et constructive à moyen et long termes avec les entreprises détenues dans le portefeuille.

Cette entente comporte de multiples facettes :

- ✓ Contacts avec l'entreprise ;
- ✓ Communication des intentions de vote des gestionnaires du fonds à la société avant l'assemblée générale.

Outre les initiatives d'engagement directes que nous menons généralement avec les petites et moyennes entreprises, Montpensier Finance participe également à des actions d'engagement par groupe mises en œuvre par ISS dans le cadre de son programme ISS ESG spécialement pour les grandes entreprises.

Ce dialogue est mis en place avec plusieurs objectifs :

- ✓ Encourager les entreprises à mettre en place un engagement ESG ;
- ✓ Encourager les entreprises à communiquer sur leurs pratiques ESG.

La politique complète en matière d'engagement ainsi que le dernier rapport sur l'engagement sont disponibles sur notre site Web. Le dernier rapport d'engagement est disponible à l'adresse suivante :

https://www.montpensier.com/sites/default/files/public/documents/engagement_rapport.pdf

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence de durabilité ?

Un indice de référence est un indice qui sert à mesurer si le produit financier atteint l'objectif de durabilité.

Le fonds n'utilise pas d'indice de référence durable. Sa performance en matière de durabilité est comparée à celle de son indice de référence : Stoxx Global 1800

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

N/A

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Objectif d'investissement durable

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance. La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> X Oui	<input type="radio"/> <input type="radio"/> Non
<input checked="" type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : <u>94.66%</u>	<input type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de _____ d'investissements durables
<input checked="" type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input checked="" type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelles mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint ?

Au cours de l'exercice financier, le produit a continuellement atteint son objectif d'investissement durable en cherchant à obtenir une note ESG supérieure à celle de son univers d'investissement BLOOMBERG EURO AGGREGATE CORPORATE 1-3 YEAR Index. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Le compartiment a maintenu la part prévue de son allocation investie dans l'utilisation d'obligations vertes.

L'objectif des obligations vertes consiste à financer les projets qui génèrent un impact sur l'environnement positif et quantifiable. L'indicateur clé mesurant l'impact des obligations vertes est le nombre de « Tonnes d'émissions de CO2 évitées par million d'euros investis en un an ». Au-delà de l'analyse financière quantitative et qualitative des obligations susceptibles de composer le portefeuille, le processus de sélection inclut une évaluation de la stratégie ESG au niveau de l'émetteur et une évaluation des obligations vertes suivant plusieurs points d'analyse :

1. Amundi a mis au point un système de notation ESG exclusif reposant sur une échelle de 7 lettres allant de A à G, où A correspond à la meilleure notation et G à la moins bonne notation. Tout émetteur assorti de la note G est exclu de tous les portefeuilles d'Amundi faisant l'objet d'une gestion active. Nous vérifions la notation ESG de l'émetteur et surveillons la conformité de la notation aux critères associés du fonds. Comme indiqué ci-dessus, les émetteurs ayant reçu la note G selon l'échelle de notation ESG d'Amundi ne sont pas éligibles à l'investissement. S'il existe des points faibles, l'équipe ESG Research effectuera une recherche de controverse plus détaillée concernant le pilier associé (E, S ou G).

2. L'évaluation des obligations vertes selon les critères suivants : (i) analyse du projet, via l'analyse de l'emplacement géographique des actifs, action sur les actifs, évaluation de tout impact supplémentaire du projet vert sur l'environnement, la biodiversité, les communautés locales ou autres aspects sociaux (principe consistant à « ne pas causer de préjudice important »), alignement sur les normes du secteur (par ex. alignement sur les principes des obligations vertes de l'International Capital Markets Association, l'initiative pour les obligations climat Climate Bond Initiative, la taxinomie de l'UE) ; (ii) analyse de l'émetteur aux niveaux de la stratégie ESG globale et de la controverse ; (iii) logique du financement vert (type de projets financés, allocation d'actifs verts, type d'instruments finançant les projets verts) ; et (iv) transparence (rapport sur les obligations vertes, existence d'évaluation par seconde partie)

3. La surveillance continue (investissement ex post), qui inclut la révision régulière de l'allocation, un rapport d'impact des obligations vertes, les controverses dans lesquelles l'émetteur est impliqué et la stratégie environnementale de l'émetteur.

Enfin, toutes les obligations vertes sélectionnées doivent respecter les critères et recommandations des principes des obligations vertes telles que publiées par l'International Capital Market Association. Veuillez consulter la Politique d'investissement responsable d'Amundi pour plus de renseignements sur ce qui précède.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.991 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.788 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.

- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

À la fin de la période, le portefeuille détient **86.14%** d'obligations vertes.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.18 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.799 (C).

À la fin de la période précédente, le portefeuille détenait 89.79% d'obligations vertes.

• **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- **Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?**

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

Principaux Investissements	Secteur	Sous-secteur	Pays	% des actifs
AM IMP ULT SH TERM GREEN BOND I	Obligations financières	Fonds communs de placement	France	7.61%

La liste inclut les investissements qui constituent **la proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

BAMIIM VAR 01/30 EMTN	Obligations d'entreprise	Banques	Italie	1.71%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds a un objectif d'investissement environnemental durable. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 22.02% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Le fonds maître n'investit pas dans des projets liés au gaz fossile ou à l'énergie nucléaire. Les chiffres indiqués ci-dessous sont au niveau de l'émetteur et non au niveau du projet.

Tous les projets financés de manière écologique sont conformes à la philosophie d'investissement de notre fonds. Toutefois, le fonds peut investir dans des sociétés qui sont également actives dans ces secteurs. Ces investissements peuvent ou non être alignés sur la taxinomie.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	90.42%	85.14%	77.98%
■ Alignés sur la taxinomie : gaz fossile	0.02%	0.22%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.98%	1.38%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	8.58%	13.26%	22.02%

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	94.47%	88.79%	78.35%
■ Alignés sur la taxinomie : gaz fossile	0.02%	0.24%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.01%	0.72%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	5.50%	10.25%	21.65%

Ce graphique représente 92.4% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.50%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **72.64%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

- **Quels investissements étaient inclus dans la catégorie « Non durables », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies.

- **Quelles mesures ont-elles été prises pour atteindre l'objectif durable au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur l'objectif d'investissement durable ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 9, paragraphes 1 à 4a, du Règlement (UE) 2019/2088 et à l'Article 5, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS IMPACT GREEN BOND

Identifiant d'entité juridique : 213800XAP1H8TNKVRE27

Objectif d'investissement durable

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance. La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> X Oui	<input type="checkbox"/> <input type="checkbox"/> Non
<input checked="" type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : <u>97.78%</u>	<input type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de ____ d'investissements durables
<input checked="" type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input checked="" type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : ____	<input type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelles mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **BLOOMBERG MSCI GLOBAL GREEN BOND HEDGED INDEX (ESG)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Le compartiment a maintenu la part prévue de son allocation investie dans l'utilisation d'obligations vertes.

L'objectif des obligations vertes consiste à financer les projets qui génèrent un impact sur l'environnement positif et quantifiable. L'indicateur clé mesurant l'impact des obligations vertes est le nombre de « Tonnes d'émissions de CO2 évitées par million d'euros investis en un an ». Au-delà de l'analyse financière quantitative et qualitative des obligations susceptibles de composer le portefeuille, le processus de sélection inclut une évaluation de la stratégie ESG au niveau de l'émetteur et une évaluation des obligations vertes suivant plusieurs points d'analyse :

1. Amundi a mis au point un système de notation ESG exclusif reposant sur une échelle de 7 lettres allant de A à G, où A correspond à la meilleure notation et G à la moins bonne notation. Tout émetteur assorti de la note G est exclu de tous les portefeuilles d'Amundi faisant l'objet d'une gestion active. Nous vérifions la notation ESG de l'émetteur et surveillons la conformité de la notation aux critères associés du fonds. Comme indiqué ci-dessus, les émetteurs ayant reçu la note G selon l'échelle de notation ESG d'Amundi ne sont pas éligibles à l'investissement. S'il existe des points faibles, l'équipe ESG Research effectuera une recherche de controverse plus détaillée concernant le pilier associé (E, S ou G).
2. L'évaluation des obligations vertes selon les critères suivants : (i) analyse du projet, via l'analyse de l'emplacement géographique des actifs, action sur les actifs, évaluation de tout impact supplémentaire du projet vert sur l'environnement, la biodiversité, les communautés locales ou autres aspects sociaux (principe consistant à « ne pas causer de préjudice important »), alignement sur les normes du secteur (par ex. alignement sur les principes des obligations vertes de l'International Capital Markets Association, l'initiative pour les obligations climat Climate Bond Initiative, la taxinomie de l'UE) ; (ii) analyse de l'émetteur aux niveaux de la stratégie ESG globale et de la controverse ; (iii) logique du financement vert (type de projets financés, allocation d'actifs verts, type d'instruments finançant les projets verts) ; et (iv) transparence (rapport sur les obligations vertes, existence d'évaluation par seconde partie)
3. La surveillance continue (investissement ex post), qui inclut la révision régulière de l'allocation, un rapport d'impact des obligations vertes, les controverses dans lesquelles l'émetteur est impliqué et la stratégie environnementale de l'émetteur.

Enfin, toutes les obligations vertes sélectionnées doivent respecter les critères et recommandations des principes des obligations vertes telles que publiées par l'International Capital Market Association. Veuillez consulter la Politique d'investissement responsable d'Amundi pour plus de renseignements sur ce qui précède.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.096 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.958 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;

- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

À la fin de la période, le portefeuille détient d'obligations vertes.

- **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.212 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.935 (C). À la fin de la période précédente, le portefeuille détenait 96.23% d'obligations vertes

- **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- **Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?**

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

Principaux Investissements	Secteur	Sous-secteur	Pays	% des actifs
ARI - IMPACT GREEN BOND - OR (D)	Obligations financières	Fonds communs de placement	France	102.42%

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 97.78% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Fonds communs de placement	102.42%
Forex	Forex	-2.40%
Liquidités	Liquidités	-0.03%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds a un objectif d'investissement environnemental durable. Bien que le fonds ne se soit pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue le fonds a investi 23.56% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Le fonds maître n'investit pas dans des projets liés au gaz fossile ou à l'énergie nucléaire. Les chiffres indiqués ci-dessous sont au niveau de l'émetteur et non au niveau du projet.

Tous les projets financés de manière écologique sont conformes à la philosophie d'investissement de notre fonds. Toutefois, le fonds peut investir dans des sociétés qui sont également actives dans ces secteurs. Ces investissements peuvent ou non être alignés sur la taxinomie.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	92.85%	89.58%	76.44%
■ Alignés sur la taxinomie : gaz fossile	0.02%	0.16%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.88%	1.08%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	6.24%	9.18%	23.56%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	92.34%	87.45%	76.07%
■ Alignés sur la taxinomie : gaz fossile	0.03%	0.29%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.10%	0.85%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	7.53%	11.41%	23.93%

Ce graphique représente 56.3% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.93%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **74.22%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan social au cours de la période.

Quels investissements étaient inclus dans la catégorie « Non durables », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies.

Quelles mesures ont-elles été prises pour atteindre l'objectif durable au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur l'objectif d'investissement durable ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CLIMATE TRANSITION GLOBAL EQUITY

Identifiant d'entité juridique : 213800AAWV9V2PNKC495

Caractéristiques environnementales et/ou sociales

***En raison de la liquidation du fonds, le rapport a été produit en date du 29 novembre 2024**

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 38.36% d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

La taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.31(D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.234(D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.243 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.171 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement

socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

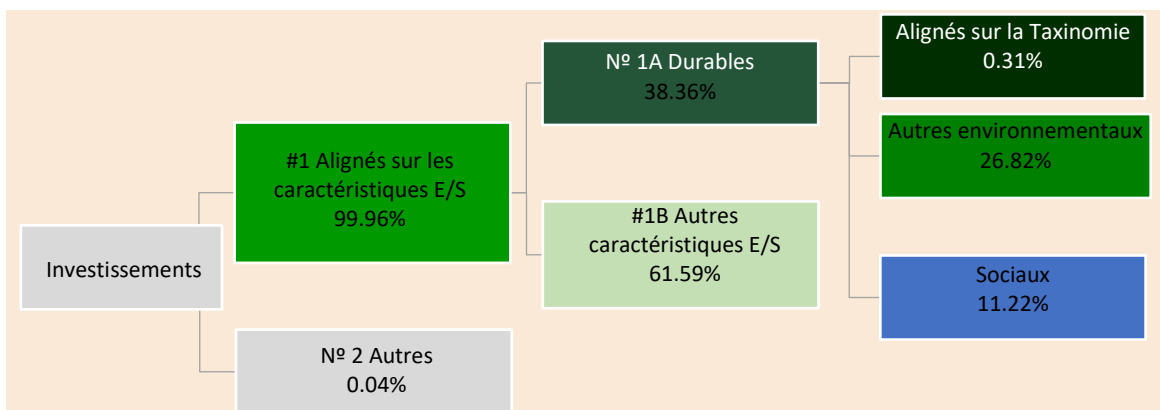

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
BANK OF AMERICA CORP	Obligations financières	Banques	États-Unis	4.69%
ALPHABET INC CL A	Services de communication	Médias et loisirs	États-Unis	4.40%
CARDINAL HEALTH INC	Santé	Matériel et services de santé	États-Unis	3.75%
CRH PLC UK	Matériaux	Matériaux de construction	Irlande	3.73%
KB FINANCIAL GROUP INC	Obligations financières	Banques	Korea	3.45%
CISCO SYSTEMS INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	3.34%
STANDARD CHARTERED PLC	Obligations financières	Banques	Royaume-Uni	3.27%
EVERSOURCE ENERGY	Services aux collectivités	Services aux collectivités – électricité	États-Unis	2.83%
DEUTSCHE TELEKOM NAM (XETRA)	Services de communication	Télécommunications	Allemagne	2.39%
SONY GROUP CORP (JT)	Consommation discrétionnaire	Biens de consommation durables et habillement	Japon	2.39%
EBAY INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	2.38%
ADVANCED MICRO DEVICES	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	2.28%
ALIBABA GROUP HOLDING LTD	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Îles Caïmans	2.26%
ABN AMRO BANK NV-CVA	Obligations financières	Banques	Netherlands	2.24%
SANOFI - PARIS	Santé	Pharmacie, biotechnologie et sciences de la vie	France	2.17%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 38.36% dans des investissements liés au développement durable

- **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	19.47%
Technologies de l'information	Matériel technologique et équipement	8.09%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	6.74%
Santé	Matériel et services de santé	5.86%
Industrie	Biens d'équipement	5.03%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	4.71%
Services de communication	Médias et loisirs	4.40%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.31% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.88%	99.51%	99.70%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.12%	0.49%	0.30%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.88%	99.51%	99.70%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.12%	0.49%	0.30%

Ce graphique représente 99.39% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.05% et la part d'investissements dans les activités habilitantes était de 0.01%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.04%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 26.82% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 11.22% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EQUITY JAPAN TARGET

Identifiant d'entité juridique :
529900LFY58YVU1ISY58

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 32.11% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **TOPIX (RI) Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.215 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.224 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.22 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.28 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes

évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

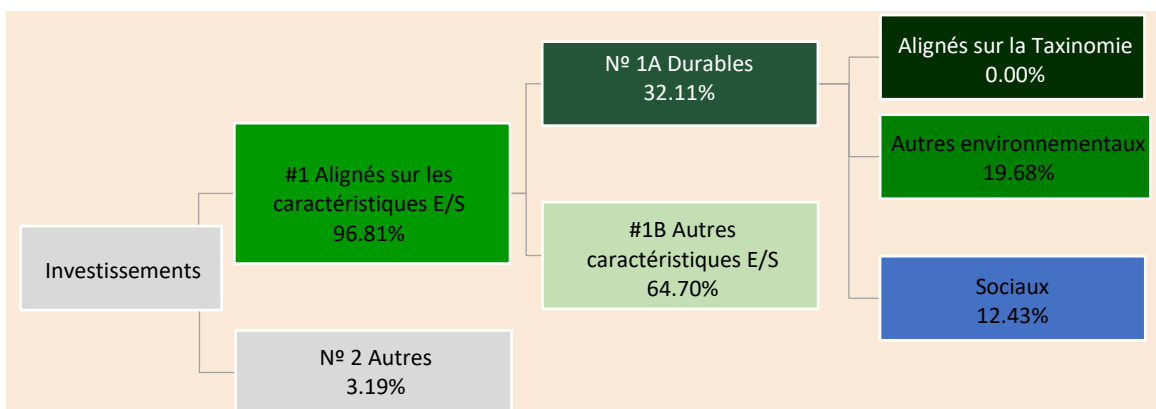

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
KYOCERA CORP	Technologies de l'information	Matériel technologique et équipement	Japon	3.83%
DAI NIPPON PRINTING CO LTD	Industrie	Services commerciaux et professionnels	Japon	3.65%
SHIZUOKA FINANCIAL GROUP INC	Obligations financières	Banques	Japon	3.04%
TOPPAN HOLDINGS INC	Industrie	Services commerciaux et professionnels	Japon	2.85%
NGK INSULATORS	Industrie	Biens d'équipement	Japon	2.83%
KYOTO FINANCIAL GROUP INC	Obligations financières	Banques	Japon	2.81%
SUBARU CORP	Consommation discrétionnaire	Automobiles et composants	Japon	2.78%
TODA CORP	Industrie	Biens d'équipement	Japon	2.48%
RICOH CO LTD	Technologies de l'information	Matériel technologique et équipement	Japon	2.43%
NIPPON KAYAKU CO LTD	Matériaux	Chimie	Japon	2.28%
TS TECH CO LTD	Consommation discrétionnaire	Automobiles et composants	Japon	2.19%
STANLEY ELECTRIC CO LTD	Consommation discrétionnaire	Automobiles et composants	Japon	2.07%
MEGMILK SNOW BRAND CO LTD	Biens de consommation de base	Alimentation, boissons et tabac	Japon	2.04%
ARTIENCE CO LTD	Matériaux	Chimie	Japon	2.01%
NOK CORP	Consommation discrétionnaire	Automobiles et composants	Japon	1.98%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 32.11% dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

<i>Secteur</i>	<i>Sous-secteur</i>	<i>% des actifs</i>

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :
 - du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	100.00%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.00%	0.00%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	100.00%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.00%	0.00%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **19.68%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 12.43% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS EUROLAND
EQUITY

Identifiant d'entité juridique :
54930017SRMTTD1P6F20

Objectif d'investissement durable

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>86.15%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EMU (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.240 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **1.072 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.174 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 1.03 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes

évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

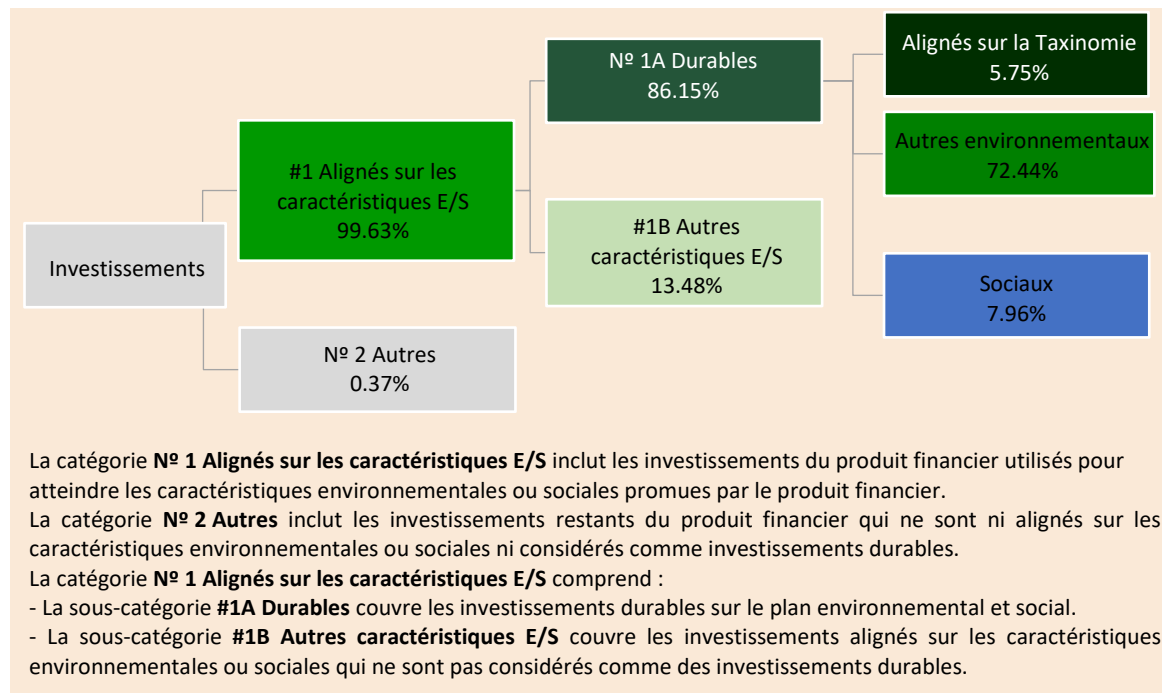

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SIEMENS AG-REG	Industrie	Biens d'équipement	Allemagne	4.97%
ALLIANZ SE-REG	Finance	Assurance	Allemagne	4.36%
SCHNEIDER ELECT SE	Industrie	Biens d'équipement	France	4.24%
BNP PARIBAS	Finance	Banques	France	3.84%
ASML HOLDING NV	Technologies de l'information	Semi-conducteurs & Équipements à semi-conducteurs	Pays-Bas	3.61%
ING GROEP NV	Finance	Banques	Netherlands	3.55%
KBC GROUP NV	Finance	Banques	Belgique	3.30%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 5.75% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :
 - du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	92.83%	90.28%	93.27%
■ Alignés sur la taxinomie : gaz fossile	0.10%	0.24%	0.07%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.45%	0.54%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	7.07%	9.03%	6.12%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	92.82%	90.27%	93.26%
■ Alignés sur la taxinomie : gaz fossile	0.10%	0.24%	0.07%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.45%	0.54%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	7.08%	9.04%	6.13%

Ce graphique représente 99.9% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.11% et la part d'investissements dans les activités habilitantes était de 4.89%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 3.18%.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **72.44%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 7.96% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

En quoi l'indice de référence diffère-t-il de l'indice du marché général ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?

Ce produit ne dispose pas d'un Indice de référence ESG.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS EUROPE EQUITY
SELECT

Identifiant d'entité juridique :

Objectif d'investissement durable

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

Oui

X Non

Il a réalisé des **investissements durables ayant un objectif environnemental** :

Il a **promu des caractéristiques environnementales/sociales (E/S)** a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de **72.10%** d'investissements durables

- dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
- dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a réalisé des **investissements durables ayant un objectif social** : _____

Il a promu des caractéristiques E/S, mais **n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI Europe Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.216 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.828 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.145 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.798 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous

effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

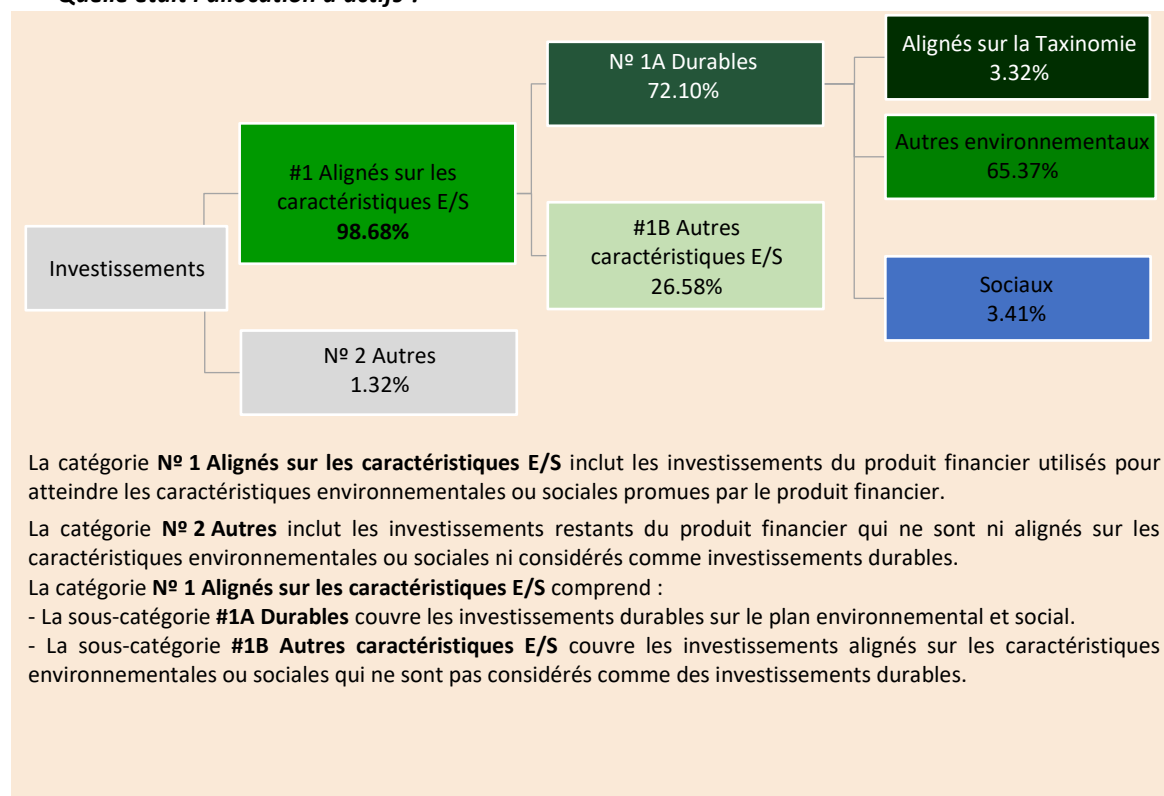

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SHELL PLC GBP	Énergie	Pétrole, gaz et combustibles	Royaume-Uni	4.57%
LEGRAND SA	Industrie	Biens d'équipement	France	4.29%
KBC GROUP NV	Finance	Banques	Belgique	3.84%
ALLIANZ SE-REG	Finance	Assurance	Allemagne	3.70%
ROCHE HLDG AG-GENUSS	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	3.55%
LONZA GROUP AG-REG	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	3.37%
MUENCHENER RUECKVER AG-REG	Obligations financières	Assurance	Allemagne	3.33%
LVMH MOET HENNESSY LOUIS VUI	Consommation discrétionnaire	Biens de consommation durables et habillement	France	3.17%
SIEMENS AG-REG	Industrie	Biens d'équipement	Allemagne	3.15%
ASML HOLDING NV	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Pays-Bas	3.13%
CRH PLC UK	Matériaux	Matériaux de construction	Irlande	3.04%
SEGRO PLC	Immobilier	Sociétés d'investissement immobilier	Royaume-Uni	2.90%
NESTLE SA-REG	Biens de consommation de base	Alimentation, boissons et tabac	Suisse	2.73%
BANK OF IRELAND GROUP PLC	Obligations financières	Banques	Irlande	2.61%
SANDOZ GROUP AG	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	2.29%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 72.10% dans des investissements liés au développement durable.

• Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	12.08%
Santé	Pharmacie, biotechnologie et sciences de la vie	11.42%
Obligations financières	Assurance	9.24%
Obligations financières	Banques	8.37%
Énergie	Pétrole, gaz et combustibles	7.25%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	5.16%
Services de communication	Médias et loisirs	3.59%
Services de communication	Télécommunications	3.59%
Services aux collectivités	Services multiples aux collectivités	3.55%

<i>Biens de consommation de base</i>	<i>Distribution et vente au détail de biens de consommation de base</i>	3.23%

<i>Services aux collectivités</i>	<i>Producteurs d'électricité indépendants et producteurs d'électricité renouvelable</i>	1.12%
<i>Forex</i>	<i>Forex</i>	0.00%
<i>Liquidités</i>	<i>Liquidités</i>	1.32%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.32% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :
 - du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	93.16%	90.98%	93.46%
■ Alignés sur la taxinomie : gaz fossile	0.09%	0.22%	0.06%
■ Alignés sur la taxinomie : nucléaire	0.00%	1.01%	0.48%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	6.76%	7.79%	6.01%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	93.92%	92.05%	94.36%
■ Alignés sur la taxinomie : gaz fossile	0.09%	0.22%	0.06%
■ Alignés sur la taxinomie : nucléaire	0.00%	1.04%	0.50%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	5.99%	6.69%	5.08%

Ce graphique représente 96.7% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.40% et la part d'investissements dans les activités habilitantes était de 3.94%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.57%.

 sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **65.37%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.41% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EUROLAND EQUITY SMALL CAP SELECT

Identifiant d'entité juridique : 529900IUDK1P871TPU43

Objectif d'investissement durable

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 72.77% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EMU SMALL CAP (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille.

L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante :
 - Exclusions légales sur les armes controversées
 - Entreprises qui contreviennent de façon grave et répétée à un ou plusieurs des 10 principes du Pacte mondial de l'ONU sans appliquer de mesures correctives crédibles ;
 - Exclusions sectorielles du groupe Amundi sur le charbon et le tabac (les détails de cette politique étant disponibles dans la Politique d'investissement responsable d'Amundi consultable sur le site Web www.amundi.fr)
2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.
3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.
4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.948 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.665 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.962 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.673 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

• **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

– **Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?**

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
GAZTRANSPORT ET TECHNIGAZ SA	Énergie	Pétrole, gaz et combustibles	France	3.86%
SPIE SA	Industrie	Services commerciaux et professionnels	France	3.64%
ANDRITZ AG	Industrie	Biens d'équipement	Autriche	3.20%
AM EURO LIQUIDITY S-T RESP - Z (C)	Obligations financières	Fonds communs de placement	France	3.12%
BAWAG GROUP AG	Obligations financières	Banques	Autriche	2.95%
BRUNELLO CUCINELLI SPA	Consommation discrétionnaire	Biens de consommation durables et habillement	Italie	2.61%

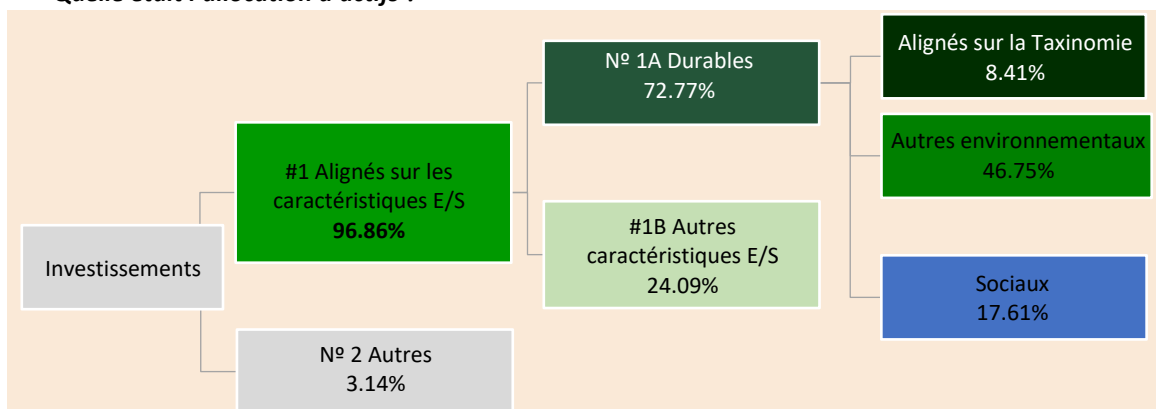

ASR NEDERLAND NV	Obligations financières	Assurance	Pays-Bas	2.37%
WIENERBERGER AG	Matériaux	Matériaux de construction	Autriche	2.33%
ARCADIS NV	Industrie	Services commerciaux et professionnels	Pays-Bas	2.31%
JUNGHEINRICH AG-DE-PFD	Industrie	Biens d'équipement	Allemagne	2.30%
BECHTLE AG	Technologies de l'information	Logiciels et services	Allemagne	2.27%
PIRELLI & C SPA	Consommation discrétionnaire	Automobiles et composants	Italie	2.27%
SCOUT24 SE	Services de communication	Médias et loisirs	Allemagne	2.26%
NORDEX SE	Industrie	Biens d'équipement	Allemagne	2.16%
BANKINTER SA	Obligations financières	Banques	Espagne	2.14%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 72.77% dans des investissements liés au développement durable.

• Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
<i>Industrie</i>	<i>Biens d'équipement</i>	<i>19.47%</i>
<i>Obligations financières</i>	<i>Banques</i>	<i>8.76%</i>
<i>Industrie</i>	<i>Services commerciaux et professionnels</i>	<i>8.65%</i>
<i>Services de communication</i>	<i>Médias et loisirs</i>	<i>4.99%</i>
<i>Immobilier</i>	<i>Sociétés d'investissement immobilier</i>	<i>4.74%</i>
<i>Consommation discrétionnaire</i>	<i>Biens de consommation durables et habillement</i>	<i>4.69%</i>
<i>Technologies de l'information</i>	<i>Logiciels et services</i>	<i>4.63%</i>
<i>Obligations financières</i>	<i>Assurance</i>	<i>4.33%</i>
<i>Obligations financières</i>	<i>Services financiers</i>	<i>3.97%</i>
<i>Énergie</i>	<i>Pétrole, gaz et combustibles</i>	<i>3.86%</i>
<i>Biens de consommation de base</i>	<i>Alimentation, boissons et tabac</i>	<i>3.63%</i>
<i>Matériaux</i>	<i>Matériaux de construction</i>	<i>3.61%</i>
<i>Obligations financières</i>	<i>Fonds communs de placement</i>	<i>3.12%</i>
<i>Santé</i>	<i>Matériel et services de santé</i>	<i>3.09%</i>
<i>Consommation discrétionnaire</i>	<i>Automobiles et composants</i>	<i>3.08%</i>
<i>Matériaux</i>	<i>Conteneurs et emballage</i>	<i>2.46%</i>
<i>Immobilier</i>	<i>Gestion et promotion immobilière</i>	<i>2.14%</i>

<i>Biens de consommation de base</i>	<i>Produits ménagers et personnels</i>	1.14%
<i>Services aux collectivités</i>	<i>Producteurs d'électricité indépendants et producteurs d'électricité renouvelable</i>	0.79%
<i>Santé</i>	<i>Pharmacie, biotechnologie et sciences de la vie</i>	0.78%
<i>Consommation discrétionnaire</i>	<i>Distribution et vente au détail de biens de consommation discrétionnaires</i>	0.01%
<i>Liquidités</i>	<i>Liquidités</i>	0.39%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 8.41% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.45% et la part d'investissements dans les activités habilitantes était de 7.47%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la Taxinomie était de 5.83%

■ sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **46.75%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 17.61% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS EUROPE EX UK
EQUITY

Identifiant d'entité juridique :
213800GUNJ834MSUJ48

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>79.63%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EUROPE EX UK Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.215 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.920 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

- **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.185 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.906 (C).

- **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont

identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

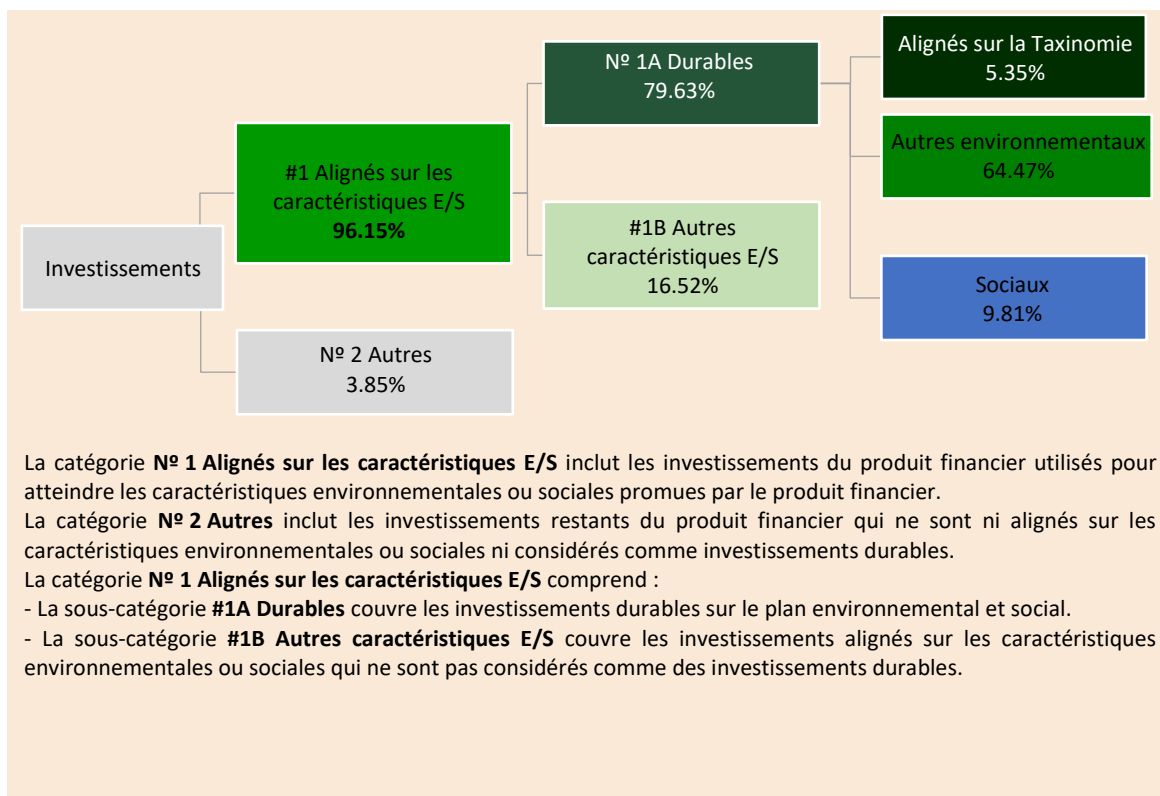

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
ALLIANZ SE-REG	Finance	Assurance	Allemagne	4.35%
SCHNEIDER ELECT SE	Industrie	Biens d'équipement	France	4.24%
NOVO NORDISK A/S-B	Santé	Pharmacie, biotechnologie et sciences de la vie	Danemark	4.04%
SIEMENS AG-REG	Industrie	Biens d'équipement	Allemagne	3.95%
ING GROEP NV	Finance	Banques	Netherlands	3.65%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour **l'énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 5.35% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Oui :

Dans le gaz fossile

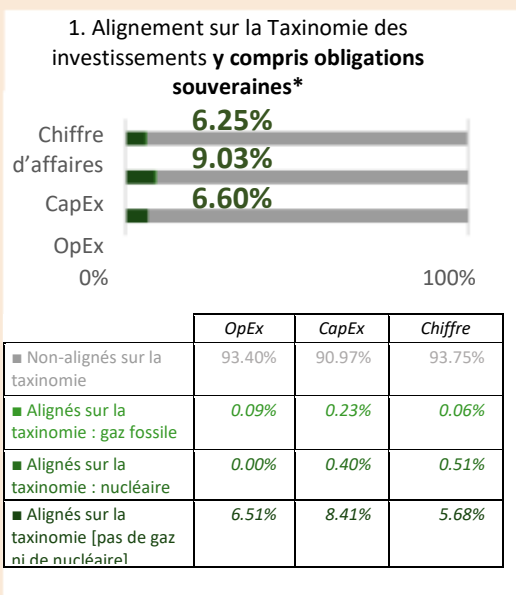

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.11% et la part d'investissements dans les activités habilitantes était de 4.54%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la Taxinomie était de 2.67%

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **64.47%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Les investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 9.81% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

• **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

• **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

• **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

• **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EUROPEAN EQUITY

Identifiant d'entité juridique : 213800CFWZ9RHAKLOD58

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

Oui **X Non**

<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 73.97% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EUROPE INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.032 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.828 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.914 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.798 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

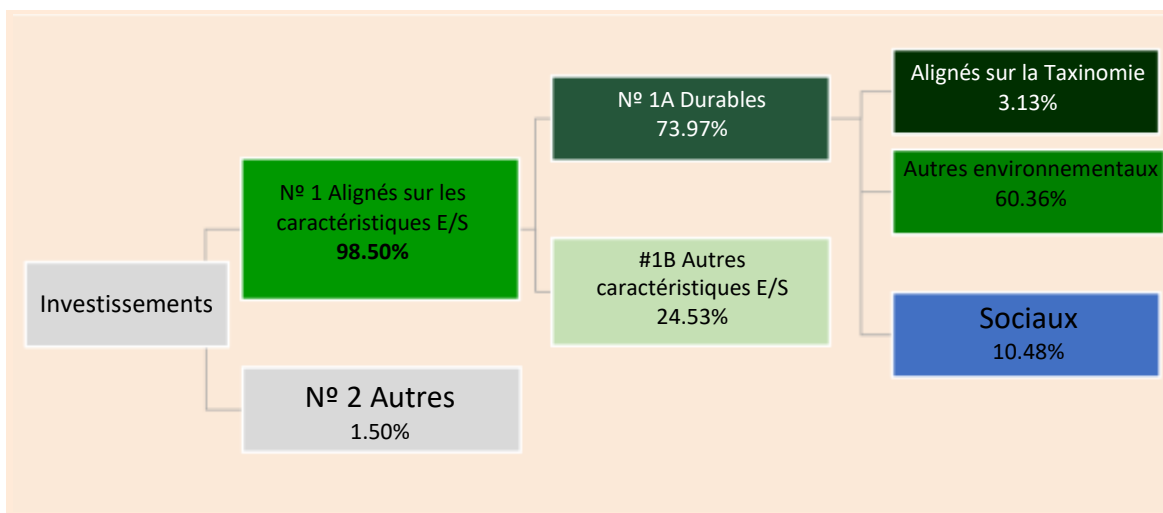

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
ASTRAZENECA GBP	Santé	Pharmacie, biotechnologie et sciences de la vie	Royaume-Uni	4.86%
SIEMENS AG-REG	Industrie	Biens d'équipement	Allemagne	4.12%
SHELL PLC GBP	Énergie	Pétrole, gaz et combustibles	Royaume-Uni	4.08%
NOVO NORDISK A/S-B	Santé	Pharmacie, biotechnologie et sciences de la vie	Danemark	3.66%
PRUDENTIAL PLC	Finance	Assurance	Royaume-Uni	3.38%
ALLIANZ SE-REG	Finance	Assurance	Allemagne	3.28%
KBC GROUP NV	Finance	Banques	Belgique	3.25%
SCHNEIDER ELECT SE	Industrie	Biens d'équipement	France	3.20%
SANOFI - PARIS	Santé	Pharmacie, biotechnologie et sciences de la vie	France	2.96%
VINCI SA (PARIS)	Industrie	Biens d'équipement	France	2.85%
LONZA GROUP AG-REG	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	2.82%
ING GROEP NV	Finance	Banques	Netherlands	2.67%
VEOLIA ENVIRONNEMENT	Services aux collectivités	Services multiples aux collectivités	France	2.65%
ASML HOLDING NV	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Pays-Bas	2.58%
MICHELIN (CGDE)	Consommation discrétionnaire	Automobiles et composants	France	2.47%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 73.97% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Santé	Pharmacie, biotechnologie et sciences de la vie	15.57%
Industrie	Biens d'équipement	14.40%
Obligations financières	Banques	10.13%
Biens de consommation de base	Alimentation, boissons et tabac	7.74%
Obligations financières	Assurance	6.66%
Consommation discrétionnaire	Biens de consommation durables et habillement	6.52%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	4.86%
Obligations financières	Services financiers	4.60%
Énergie	Pétrole, gaz et combustibles	4.08%

<i>Services aux collectivités</i>	<i>Services multiples aux collectivités</i>	2.65%
<i>Consommation discrétionnaire</i>	<i>Automobiles et composants</i>	2.47%
<i>Matériaux</i>	<i>Chimie</i>	2.42%
<i>Services aux collectivités</i>	<i>Producteurs d'électricité indépendants et producteurs d'électricité renouvelable</i>	2.39%
<i>Technologies de l'information</i>	<i>Logiciels et services</i>	2.34%
<i>Matériaux</i>	<i>Matériaux de construction</i>	2.21%
<i>Biens de consommation de base</i>	<i>Distribution et vente au détail de biens de consommation de base</i>	2.06%
<i>Industrie</i>	<i>Transport</i>	2.03%
<i>Matériaux</i>	<i>Conteneurs et emballage</i>	1.53%
<i>Matériaux</i>	<i>Métaux et exploitation minière</i>	1.46%
<i>Santé</i>	<i>Matériel et services de santé</i>	1.05%
<i>Biens de consommation de base</i>	<i>Produits ménagers et personnels</i>	0.98%
<i>Consommation discrétionnaire</i>	<i>Distribution et vente au détail de biens de consommation discrétionnaires</i>	0.35%
<i>Liquidités</i>	<i>Liquidités</i>	1.50%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.13% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.09% et la part d'investissements dans les activités habilitantes était de 2.82%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.65%.

sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **60.36%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 10.48% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EUROPE EQUITY GREEN TECHNOLOGY

Identifiant d'entité juridique : 222100X10NWGMIIJQ5D49

Caractéristiques environnementales et/ou sociales

La taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 84.06% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement MSCI Europe (dividends reinvested) Index. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers du marché général qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.138 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.798 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.188 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.77 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SPIE SA	Industrie	Services commerciaux et professionnels	France	4.01%

d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

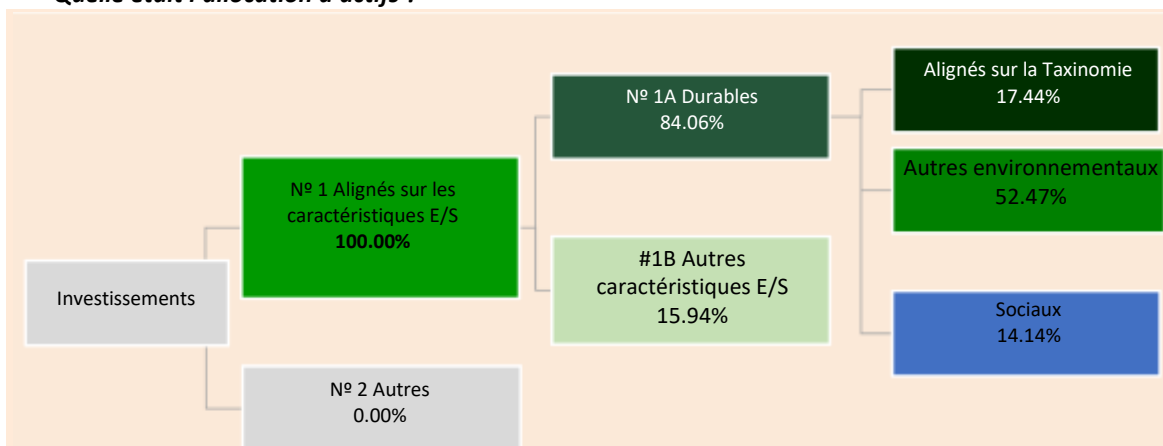

SAP SE / XETRA	Technologies de l'information	Logiciels et services	Allemagne	3.92%
PENNON GROUP PLC	Services aux collectivités	Services aux collectivités – eau	Royaume-Uni	3.90%
FERROVIAL SE	Industrie	Biens d'équipement	Netherlands	3.51%
LEGRAND SA	Industrie	Biens d'équipement	France	3.46%
EUROFINS SCIENTIFIC	Santé	Pharmacie, biotechnologie et sciences de la vie	Luxembourg	3.42%
KONE OYJ-B	Industrie	Biens d'équipement	Finlande	3.38%
UNITED UTILI GRP PLC	Services aux collectivités	Services aux collectivités – eau	Royaume-Uni	3.14%
MOWI ASA	Biens de consommation de base	Alimentation, boissons et tabac	Norvège	3.11%
GETLINK SE	Industrie	Transport	France	3.05%
SCHNEIDER ELECT SE	Industrie	Biens d'équipement	France	2.98%
SEVERN TRENT PLC	Services aux collectivités	Services aux collectivités – eau	Royaume-Uni	2.97%
NOVONESIS (NOVOZYMES) B	Matériaux	Chimie	Danemark	2.93%
ACEA SPA	Services aux collectivités	Services multiples aux collectivités	Italie	2.83%
INTERTEK GROUP PLC	Industrie	Services commerciaux et professionnels	Royaume-Uni	2.78%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 84.06% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier. La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables. La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
 - La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	23.71%
Services aux collectivités	Services aux collectivités – eau	10.01%
Industrie	Services commerciaux et professionnels	8.70%
Biens de consommation de base	Alimentation, boissons et tabac	8.29%
Technologies de l'information	Logiciels et services	7.78%
Immobilier	Sociétés d'investissement immobilier	7.44%
Services aux collectivités	Producteurs d'électricité indépendants et producteurs d'électricité renouvelable	5.02%
Services aux collectivités	Services aux collectivités – électricité	4.80%
Immobilier	Gestion et promotion immobilière	4.26%
Industrie	Transport	3.83%
Santé	Pharmacie, biotechnologie et sciences de la vie	3.42%
Matériaux	Chimie	2.93%
Matériaux	Produits papetiers et forestiers	2.92%
Services aux collectivités	Services multiples aux collectivités	2.83%
Consommation discrétionnaire	Biens de consommation durables et habillement	2.04%
Technologies de l'information	Matériel technologique et équipement	2.00%
Matériaux	Conteneurs et emballage	0.59%
Autres	Autres	0.00%
Liquidités	Liquidités	-0.55%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 17.44% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	81.67%	76.48%	77.79%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	18.33%	23.52%	22.21%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	83.34%	78.00%	78.22%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	16.66%	22.00%	21.78%

Ce graphique représente 97.2% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au gaz fossile incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.17% et la part d'investissements dans les activités habilitantes était de 11.13%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 13.85%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **52.47%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 14.14% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit n'a pas d'indice de référence ESG et est comparé à son univers de référence pour tous les thèmes environnementaux et sociaux.

Veillez vous référer à la question relative à la performance des indicateurs de durabilité.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EUROPEAN EQUITY VALUE

Identifiant d'entité juridique : 549300240RQEGYGAX021

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 71.08% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EUROPE VALUE (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.032 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.777 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.998 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.712 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes

évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
----------------------------	---------	--------------	------	--------------

La liste inclut les investissements qui constituent la proportion la plus importante

d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

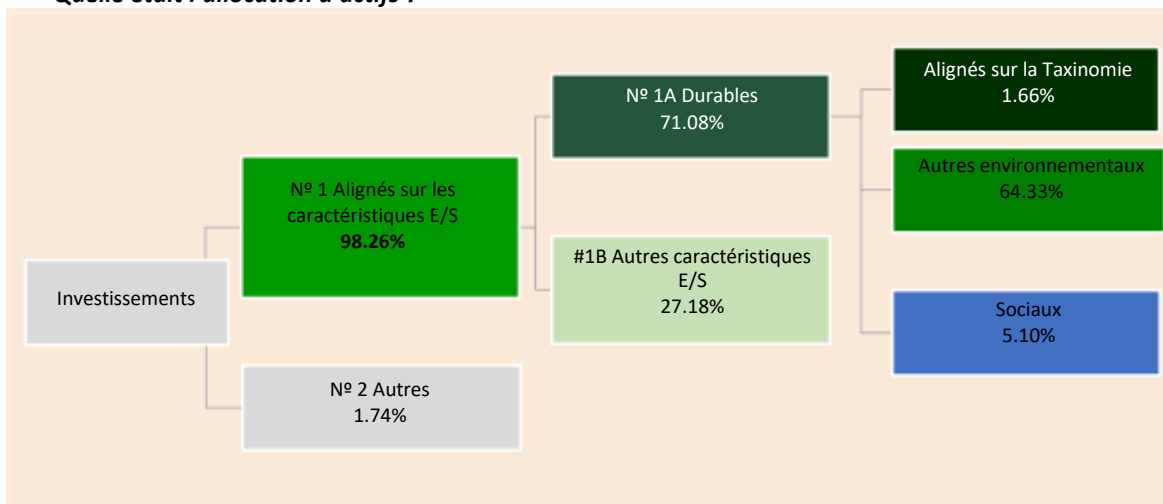

PRYSMIAN SPA	Industrie	Biens d'équipement	Italie	2.66%
INTL CONSOLD AIRLINES-GBP	Industrie	Transport	Espagne	2.58%
SIEMENS AG-REG	Industrie	Biens d'équipement	Allemagne	2.58%

ROCHE HLDG AG-GENUSS	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	2.52%
PUBLICIS GROUPE SA	Services de communication	Médias et loisirs	France	2.52%
SOCIETE GENERALE	Obligations financières	Banques	France	2.50%
BAYERISCHE MOTOREN WERKE AG	Consommation discrétionnaire	Automobiles et composants	Allemagne	2.50%
PRUDENTIAL PLC	Finance	Assurance	Royaume-Uni	2.49%
BNP PARIBAS	Finance	Banques	France	2.49%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 71.08% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;

- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.66% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.31%	91.49%	95.87%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.21%	0.17%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	4.69%	8.30%	3.96%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.31%	91.49%	95.87%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.21%	0.17%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	4.69%	8.30%	3.96%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.18% et la part d'investissements dans les activités habilitantes était de 3.43%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.25%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **64.33%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.10% à la fin de la période.

Les investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS EUROPE EQUITY
INCOME SELECT

Identifiant d'entité juridique :

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>79.89%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EUROPE**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.278 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.828 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.199 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.798 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction. Sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

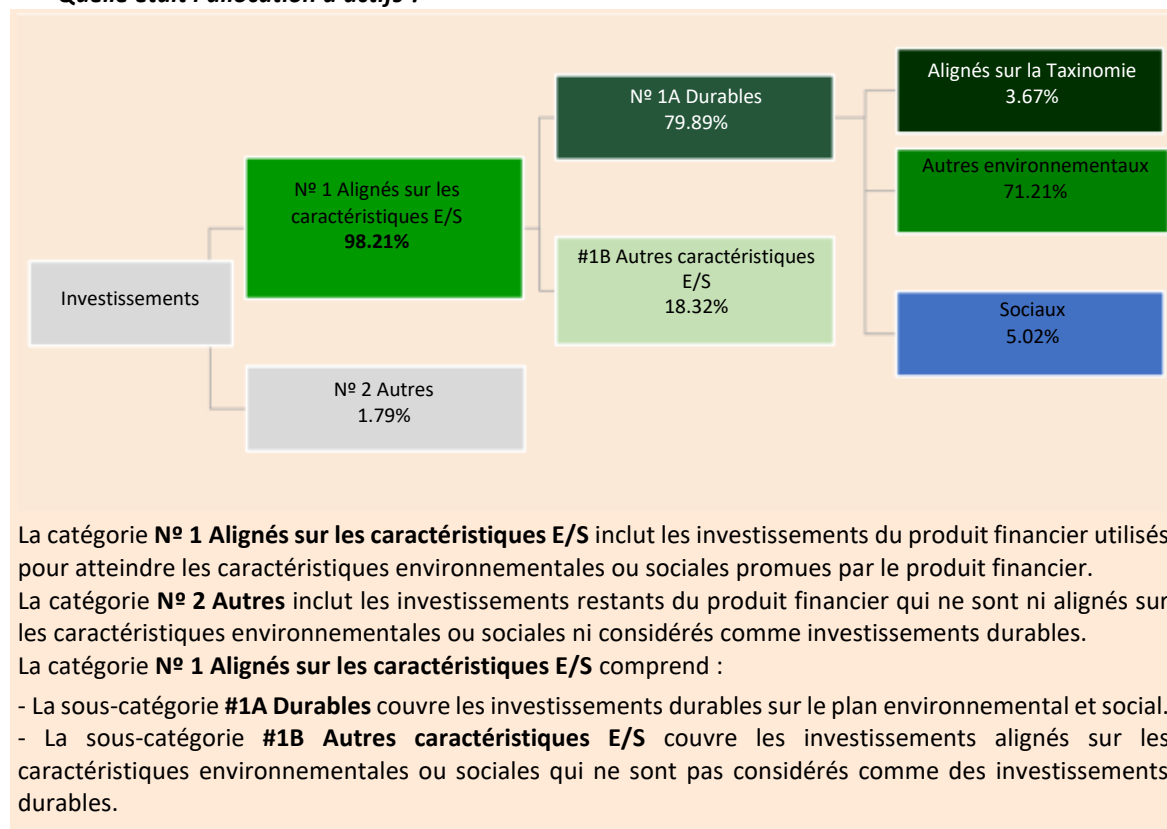

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
NOVARTIS AG-REG	Santé	Pharmacie, biotechnologie et sciences de la vie	Switzerland	5.17%
HSBC HOLDING PLC GBP	Obligations financières	Banques	Royaume-Uni	4.98%
ENEL SPA	Services aux collectivités	Services aux collectivités – électricité	Italie	4.07%
SIEMENS AG-REG	Industrie	Biens d'équipement	Allemagne	4.00%
CRH PLC UK	Matériaux	Matériaux de construction	Irlande	3.69%
COMPAGNIE DE SAINT GOBAIN	Industrie	Biens d'équipement	France	3.62%
RELX PLC	Industrie	Services commerciaux et professionnels	Royaume-Uni	3.50%
MUENCHENER RUECKVER AG-REG	Obligations financières	Assurance	Allemagne	3.41%
VINCI SA (PARIS)	Industrie	Biens d'équipement	France	3.34%
SSE PLC	Services aux collectivités	Services aux collectivités – électricité	Royaume-Uni	3.32%
TESCO PLC	Biens de consommation de base	Distribution et vente au détail de biens de consommation de base	Royaume-Uni	3.21%
AXA SA	Obligations financières	Assurance	France	3.20%
DANONE	Biens de consommation de base	Alimentation, boisson et tabac	France	3.14%
KONINKLIJKE KPN NV	Services de communication	Télécommunications	Pays-Bas	2.85%
SANOFI - PARIS	Santé	Pharmacie, biotechnologie et sciences de la vie	France	2.80%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 79,89 % dans des investissements liés au développement durable.

• Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	13.86%
Industrie	Biens d'équipement	13.75%
Santé	Pharmacie, biotechnologie et sciences de la vie	11.14%
Obligations financières	Assurance	8.92%
Services aux collectivités	Services aux collectivités – électricité	7.39%
Biens de consommation de base	Alimentation, boissons et tabac	5.23%
Services de communication	Télécommunications	5.14%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	4.62%
Énergie	Pétrole, gaz et combustibles	4.49%
Consommation discrétionnaire	Automobiles et composants	4.21%
Matériaux	Matériaux de construction	3.69%

Industrie	Services commerciaux et professionnels	3.50%
Biens de consommation de base	Distribution et vente au détail de biens de consommation de base	3.21%
Obligations financières	Services financiers	2.61%
Technologies de l'information	Logiciels et services	1.69%
Industrie	Transport	1.47%
Matériaux	Conteneurs et emballage	1.34%
Immobilier	Sociétés d'investissement immobilier	0.92%
Immobilier	Gestion et promotion immobilière	0.89%
Santé	Matériel et services de santé	0.11%
Forex	Forex	0.04%
Liquidités	Liquidités	1.79%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.67% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	91.98%	87.97%	93.65%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.24%	0.31%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	8.02%	11.79%	6.04%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	91.98%	87.97%	93.65%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.24%	0.31%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	8.02%	11.79%	6.04%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.12% et la part d'investissements dans les activités habilitantes était de 3.32%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.21%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 71.21% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.02% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EUROPEAN EQUITY SMALL CAP

Identifiant d'entité juridique : 549300YCBHBPCBFKKY81

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance. La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 64.06% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EUROPE (16) SMALL CAP (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.760 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.546 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.756 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.528 (C).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

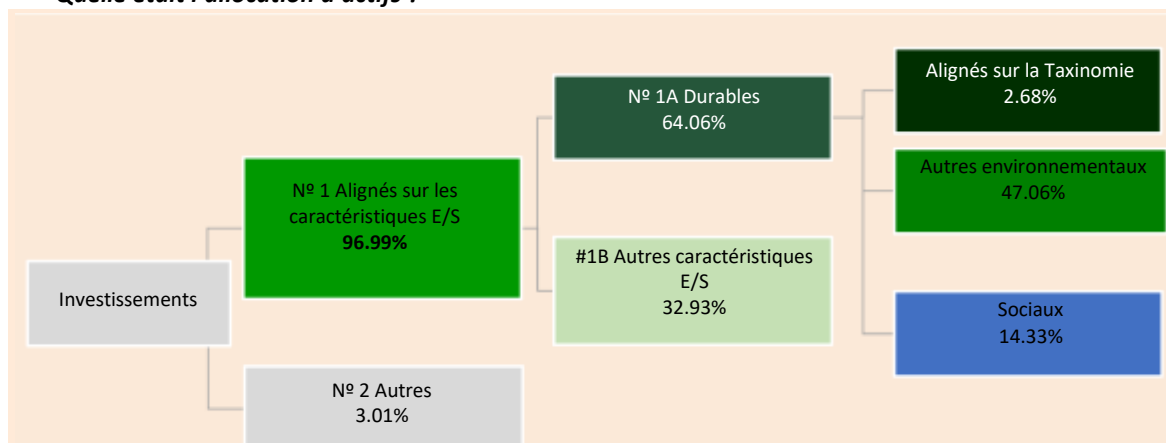

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 64.06% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	21.83%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.68% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	94.48%	93.29%	94.93%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.20%	0.09%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.14%	0.08%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	5.52%	6.36%	4.90%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.60%	94.42%	95.22%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.21%	0.09%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.14%	0.08%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	4.40%	5.23%	4.61%

Ce graphique représente 97.8% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.35% et la part d'investissements dans les activités habilitantes était de 3.01%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 3.02%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **47.06%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 14.33% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL EQUITY
RESPONSIBLE

Identifiant d'entité juridique :
549300PF1HPU3EW4TO97

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 58.78% d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement MSCI WORLD. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Ce produit est qualifié de produit ISR (investissement socialement responsable). Au cours de l'exercice, il a cherché à promouvoir les 3 dimensions (environnementale, sociale et de gouvernance) en tenant compte de la notation ESG des émetteurs dans la construction du portefeuille. L'objectif de la notation ESG des émetteurs est d'évaluer leur capacité à gérer l'incidence négative potentielle de leurs activités sur les facteurs de durabilité. Cette analyse a ainsi pour but d'évaluer leur comportement Environnemental et Social en termes de Gouvernance, en leur attribuant une note ESG comprise entre A (meilleure note) et G (moins bonne note), de manière à obtenir une évaluation plus globale des risques.

1. Le portefeuille a systématiquement appliqué la politique d'exclusion d'Amundi suivante : - Les exclusions légales sur les armes controversées - Les entreprises qui contreviennent de manière grave et répétée à un ou plusieurs des 10 principes du Pacte Mondial (UN Global Compact), sans mesures correctives crédibles ; - Les exclusions sectorielles du groupe Amundi sur le charbon et le tabac ; (les détails de cette politique sont disponibles dans la Politique d'Investissement Responsable d'Amundi disponible sur le site internet www.amundi.fr)

2. Aucun investissement n'a été réalisé auprès d'émetteurs ayant la note F ou G. Pour tout émetteur dont la notation a été revue à la baisse et ayant reçu la note F ou G, les titres déjà présents en portefeuille ont été vendus dans les délais convenus dans le prospectus et en tenant compte de l'intérêt financier des détenteurs.

3. La note ESG moyenne pondérée du portefeuille est en permanence supérieure à la note ESG moyenne pondérée de l'univers d'investissement du fonds après suppression de 20% des émetteurs les moins bien notés.

4. Le fonds a privilégié les émetteurs occupant une position de leader dans leur secteur d'activité d'après les critères ESG identifiés par l'équipe d'analystes extra-financiers de la société de gestion (approche « Best-in-class »). À l'exception des exclusions ci-dessus, tous les secteurs économiques sont représentés dans cette approche et l'OPC est par conséquent susceptible d'être exposé à certains secteurs controversés.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.594 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.185 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.622 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.179 (D).

- **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- **Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?**

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
SIEMENS ENERGY AG	Industrie	Biens d'équipement	Allemagne	3.09%
ECOLAB INC	Matériaux	Chimie	États-Unis	3.03%
WABTEC CORP	Industrie	Biens d'équipement	États-Unis	2.98%
BROADCOM INC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	2.97%
INTL BUSINESS MACHINES CORP	Technologies de l'information	Logiciels et services	États-Unis	2.93%
UNICREDIT SPA	Obligations financières	Banques	Italie	2.81%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets. Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental. Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.66% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.02% et la part d'investissements dans les activités habilitantes était de 3.30%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.44%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **49.49%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.63% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL EQUITY

Identifiant d'entité juridique :
549300R5QSNNJBY1T17

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Oui	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 43.64% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a promu des caractéristiques durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI ACWI**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.150 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.168 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.185 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.171 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaires d'investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire d'investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des

controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

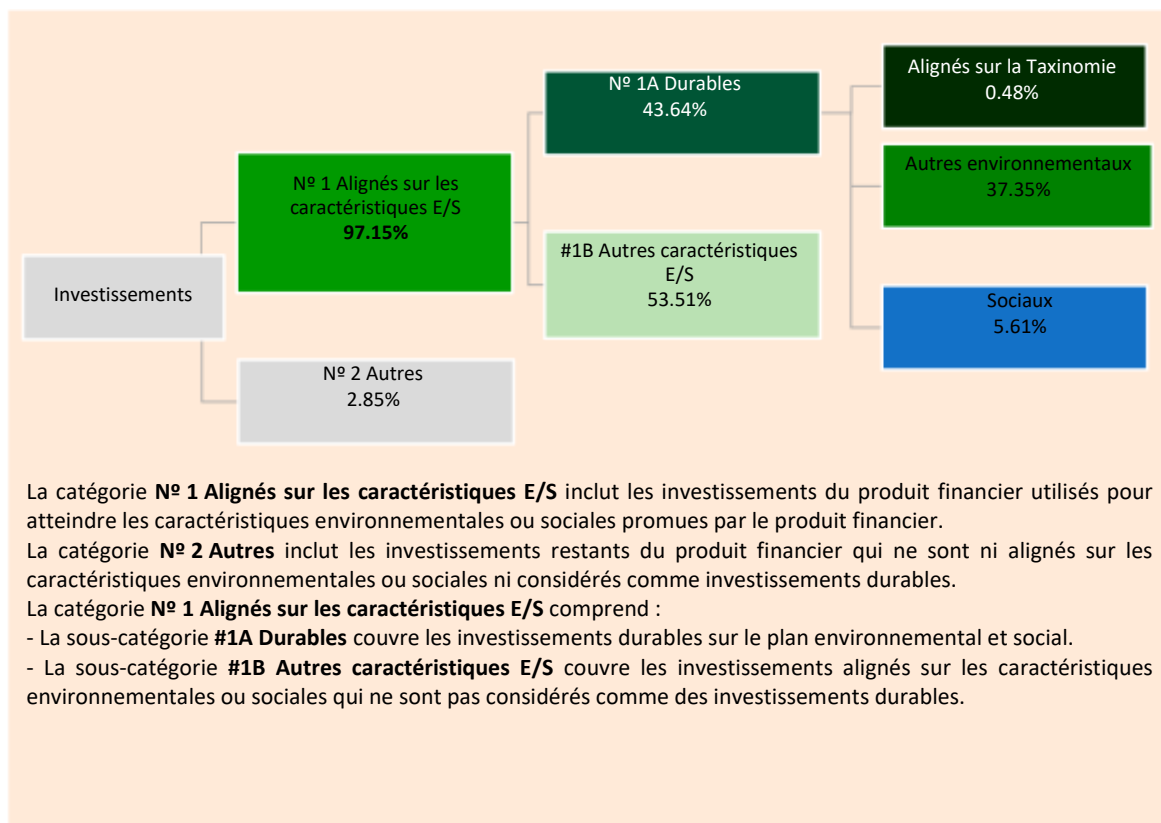

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.48% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.86%	99.03%	99.47%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.03%	0.03%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.14%	0.95%	0.50%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.86%	99.03%	99.97%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.03%	0.03%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.14%	0.95%	0.50%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.15% et la part d'investissements dans les activités habilitantes était de 0.07%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.04%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **37.55%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 5.61% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL EQUITY
SELECT

Identifiant d'entité juridique :
213800R05QUY7UX5U822

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Oui	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI WORLD NET TOTAL RETURN INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.228 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.185 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.292 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.179 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une

évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

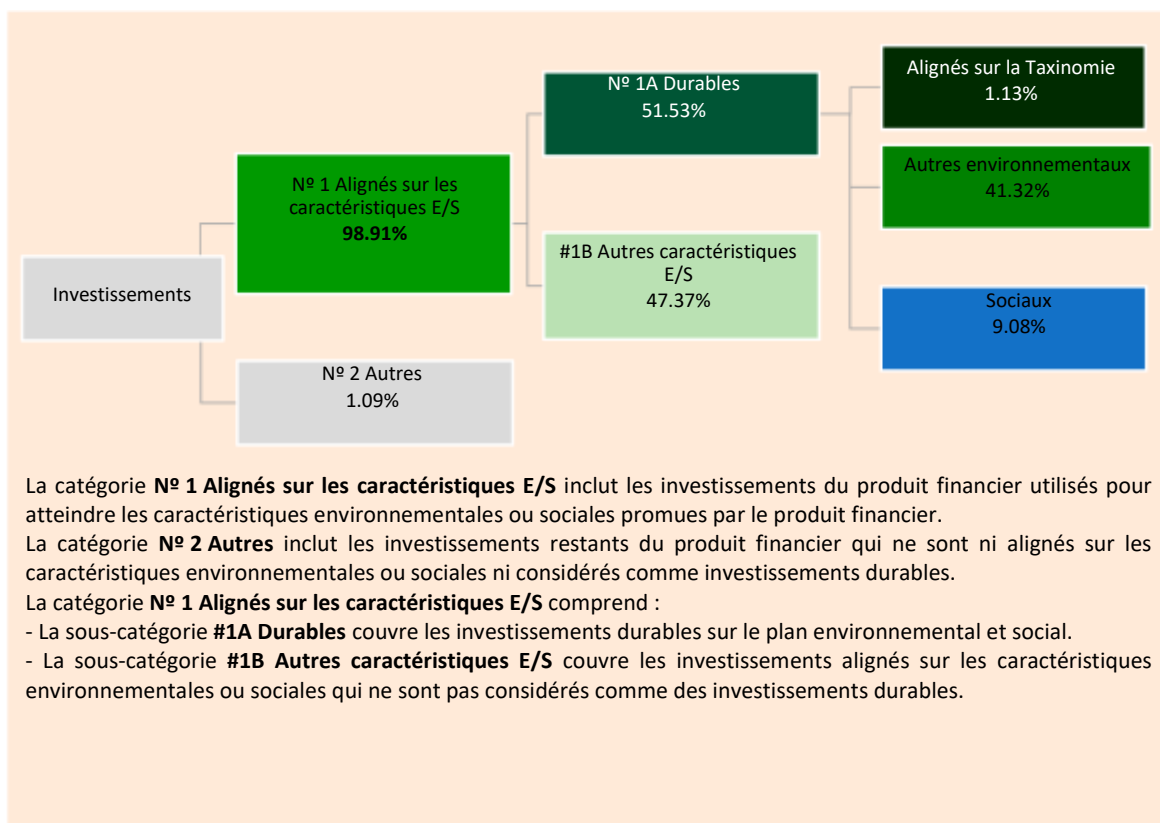

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	7.54%
NVIDIA CORP	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	4.92%
APPLE INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	3.57%
JPMORGAN CHASE & CO	Obligations financières	Banques	États-Unis	3.51%
ALPHABET INC CL A	Services de communication	Médias et loisirs	États-Unis	3.29%
WELLS FARGO & CO	Obligations financières	Banques	États-Unis	3.17%

<i>Services aux collectivités</i>	<i>Services aux collectivités – électricité</i>	0.92%
<i>Forex</i>	<i>Forex</i>	0.20%
<i>Liquidités</i>	<i>Liquidités</i>	1.29%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.13% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	98.51%	97.59%	98.42%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.03%	0.02%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	1.49%	2.38%	1.56%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	98.51%	97.59%	98.42%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.03%	0.02%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	1.49%	2.38%	1.56%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au gaz fossile incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.94%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.48%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **41.32%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 9.08% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL EQUITY
INCOME SELECT

Identifiant d'entité juridique :
549300JVYWQ1AGFG7O16

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 65.25% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI WORLD Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.697 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.185 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.644 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.179 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont

identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

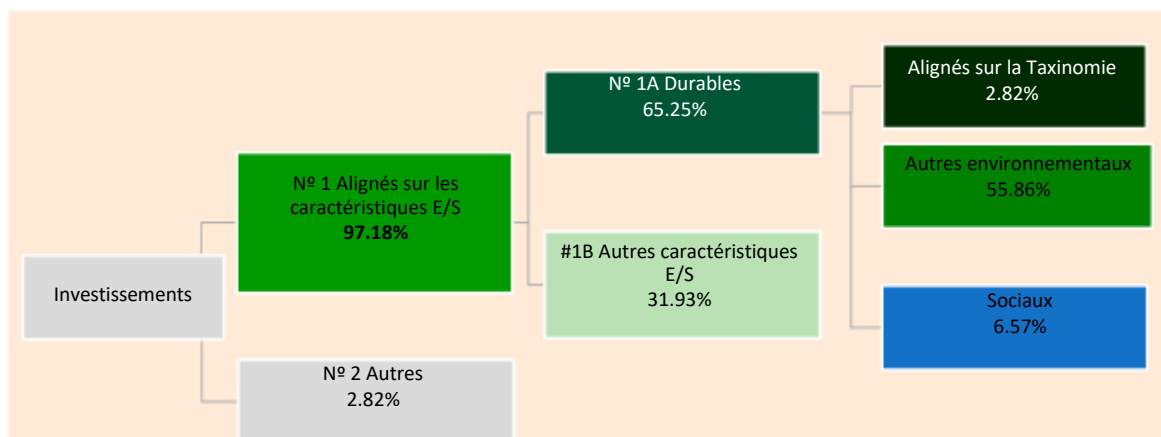

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	6.35%
AMUNDI MMST (USD)-IV	Obligations financières	Fonds communs de placement	Luxembourg	4.39%
JPMORGAN CHASE & CO	Obligations financières	Banques	États-Unis	3.46%
BROADCOM INC	Technologies de l'information	Semi-conducteurs et équipement pour semi-	États-Unis	2.56%
ORACLE CORP	Technologies de l'information	Logiciels et services	États-Unis	2.55%
CISCO SYSTEMS INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	2.41%
SUMITOMO MITSUI FINAN	Obligations financières	Banques	Japon	2.29%
SIEMENS AG-REG	Industrie	Biens	Allemagne	2.26%

DEUTSCHE TELEKOM NAM (XETRA)	Services de communication	Télécommunications	Allemagne	2.11%
TAIWAN SEMICONDUCTOR MANUFAC	Technologies de l'information	Semi-conducteurs et équipement pour semi-	Taiwan	2.06%
ABBVIE INC	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	1.93%
COMPAGNIE DE SAINT GOBAIN	Industrie	Biens d'équipement	France	1.92%
AXA SA	Obligations	Assurance	France	1.80%
IBERDROLA SA	Services aux	Services aux	Espagne	1.78%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 65,25 % dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	12.66%
Technologies de l'information	Logiciels et services	11.81%
Obligations financières	Banques	11.09%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	8.30%
Santé	Pharmacie, biotechnologie et sciences de la vie	6.85%
Obligations financières	Assurance	5.90%
Services aux collectivités	Services aux collectivités – électricité	4.44%
Obligations financières	Fonds communs de placement	4.39%
Services de communication	Télécommunications	3.64%

<i>Consommation discrétionnaire</i>	<i>Distribution et vente au détail de biens de consommation discrétionnaires</i>	3.58%

<i>Forex</i>	<i>Forex</i>	-0.79%
<i>Liquidités</i>	<i>Liquidités</i>	3.66%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 2.82% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.77%	94.24%	96.66%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.12%	0.12%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	4.23%	5.64%	3.22%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	95.72%	94.19%	96.64%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.11%	0.11%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	4.28%	5.70%	3.25%

Ce graphique représente 99.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.04% et la part d'investissements dans les activités habilitantes était de 2.54%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.51%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **55.86%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 6.57% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS JAPAN EQUITY SELECT

Identifiant d'entité juridique : 549300ELY8IPEE0JYT57

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 66.29% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **Topix Net Total Return Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.199 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.224 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.131 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.280 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont

identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- **Exclusion :** Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- **Intégration des facteurs ESG :** Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- **Engagement :** L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- **Vote :** La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

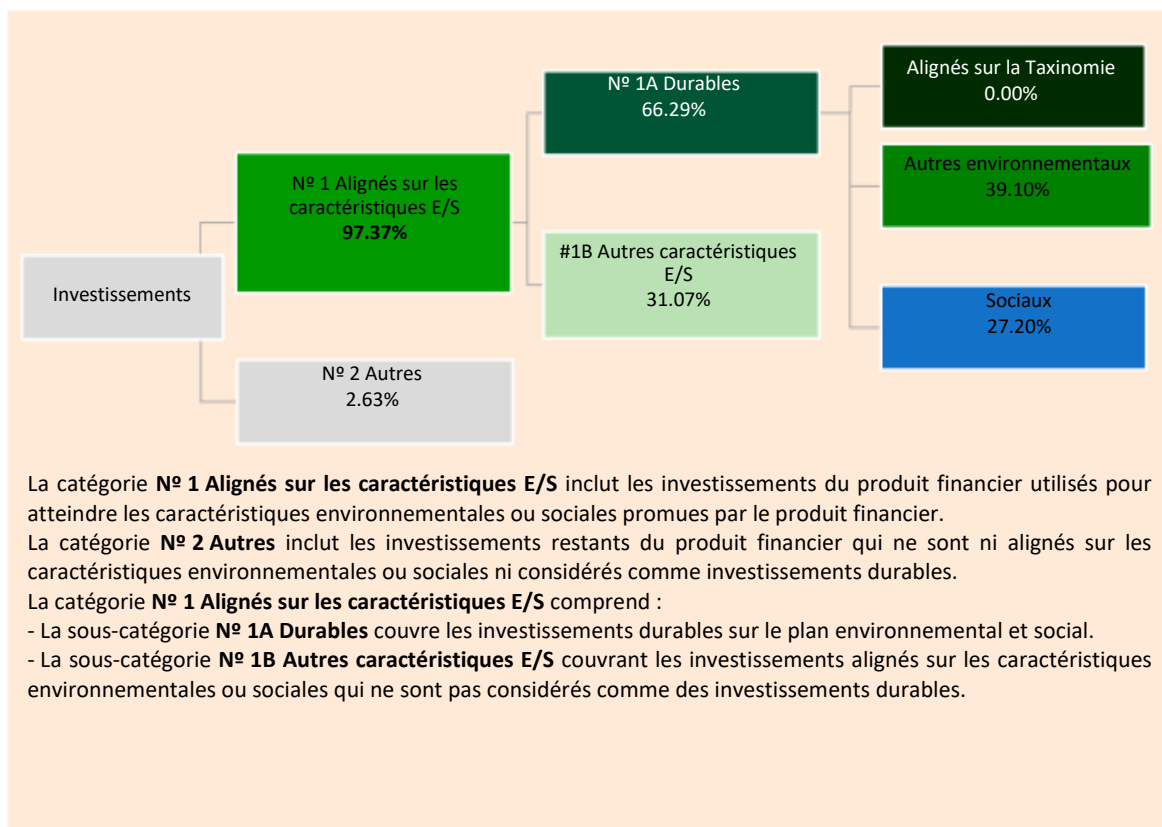

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
AJINOMOTO CO INC	Biens de consommation de base	Alimentation, boissons et tabac	Japon	4.15%
KOMATSU LTD	Industrie	Biens d'équipement	Japon	4.01%
MITSUBISHI UFJ FIN	Obligations financières	Banques	Japon	3.96%
SHIONOGI & CO LTD	Santé	Pharmacie, biotechnologie et sciences de la vie	Japon	3.76%
FAST RETAILING	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Japon	3.71%
ORIX CORP	Finance	Services financiers	Japon	3.69%
AICA KOGYO CO	Matériaux	Chimie	Japon	3.66%
TOYOTA TSUSHO CORP	Industrie	Biens d'équipement	Japon	3.66%
SONY GROUP CORP (JT)	Consommation discrétionnaire	Biens de consommation durables et habillement	Japon	3.55%
TOKIO MARINE HOLDINGS INC	Obligations financières	Assurance	Japon	3.40%
TAIKISHA LTD	Industrie	Biens d'équipement	Japon	2.97%
NOMURA RESEARCH INST	Technologies de l'information	Logiciels et services	Japon	2.97%
KDDI CORP	Services de communication	Télécommunications	Japon	2.91%
TDK CORP	Technologies de l'information	Matériel technologique et équipement	Japon	2.82%
RECRUIT HOLDINGS CO LTD	Industrie	Services commerciaux et professionnels	Japon	2.70%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 66,29 % dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	21.10%
Consommation discrétionnaire	Automobiles et composants	8.80%
Obligations financières	Banques	8.23%
Matériaux	Chimie	7.18%
Consommation discrétionnaire	Biens de consommation durables et habillement	6.18%
Obligations financières	Services financiers	5.75%
Santé	Matériel et services de santé	5.17%
Technologies de l'information	Matériel technologique et équipement	4.67%
Biens de consommation de base	Alimentation, boissons et tabac	4.15%

<i>Technologies de l'information</i>	<i>Semi-conducteurs et équipement pour semi-conducteurs</i>	3.77%
<i>Santé</i>	<i>Pharmacie, biotechnologie et sciences de la vie</i>	3.76%

<i>Obligations financières</i>	<i>Assurance</i>	3.40%
<i>Technologies de l'information</i>	<i>Logiciels et services</i>	2.97%
<i>Services de communication</i>	<i>Télécommunications</i>	2.91%
<i>Industrie</i>	<i>Services commerciaux et professionnels</i>	2.70%
<i>Immobilier</i>	<i>Gestion et promotion immobilière</i>	2.67%
<i>Forex</i>	<i>Forex</i>	0.27%
<i>Liquidités</i>	<i>Liquidités</i>	2.63%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

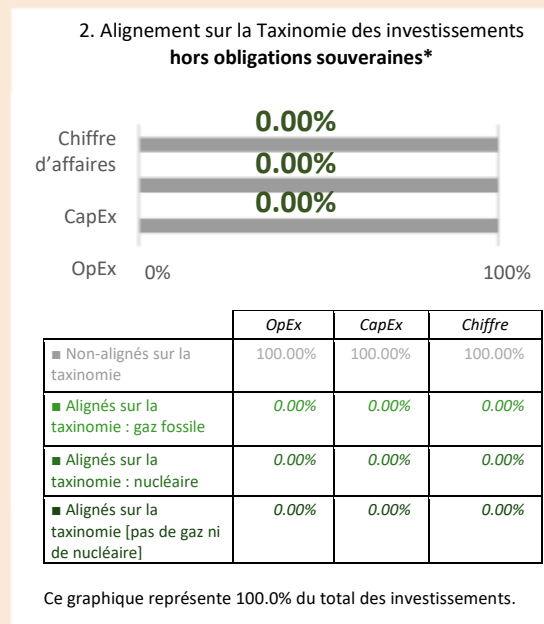

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **39.10%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 27.20% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS GLOBAL EQUITY

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="checkbox"/> <input type="checkbox"/> Oui	<input checked="" type="checkbox"/> <input type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 69.61% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment a promu les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'indice **MSCI World Climate Paris Aligned Net USD Index** (l'« Indice de référence»). Pour déterminer la note ESG du Compartiment et de l'Indice de référence, la performance ESG a été évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance.

En outre, le Compartiment a cherché à réduire l'intensité carbone de son portefeuille en alignant l'intensité de son empreinte carbone sur celle de l'indice de référence.

L'indice de référence est un indice de marché large qui évalue et inclut ses composants en fonction de caractéristiques environnementales et qui est, par conséquent, aligné sur les caractéristiques environnementales (c.-à-d. une intensité de carbone réduite) promues par le Compartiment.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'indice de référence du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.503 (C)**.
- La note ESG moyenne pondérée de l'Indice de référence est **0.013 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **55.75**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **64.97**

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.522 (C) et la note ESG moyenne pondérée de l'Indice de référence était de 0.012 (D). À la fin de la période précédente, l'intensité carbone moyenne pondérée du portefeuille était de 55.00 et l'intensité carbone moyenne pondérée de l'indice de référence était de 66.13.

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

Principaux Investissements	Secteur	Sous-secteur	Pays	% des actifs
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	6.95%
NVIDIA CORP	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	4.15%
JPMORGAN CHASE & CO	Obligations financières	Banques	États-Unis	3.76%
ORACLE CORP	Technologies de l'information	Logiciels et services	États-Unis	3.10%
BROADCOM INC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	2.79%
SCHNEIDER ELECT SE	Industrie	Biens d'équipement	France	2.56%
SONY GROUP CORP (JT)	Consommation discrétionnaire	Biens de consommation durables et habillement	Japon	2.54%
MASTERCARD INC-CL A	Obligations financières	Services financiers	États-Unis	2.52%
COCA-COLA EUROPACIFIC PARTNE	Biens de consommation de base	Alimentation, boissons et tabac	Royaume-Uni	2.47%
CISCO SYSTEMS INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	2.45%

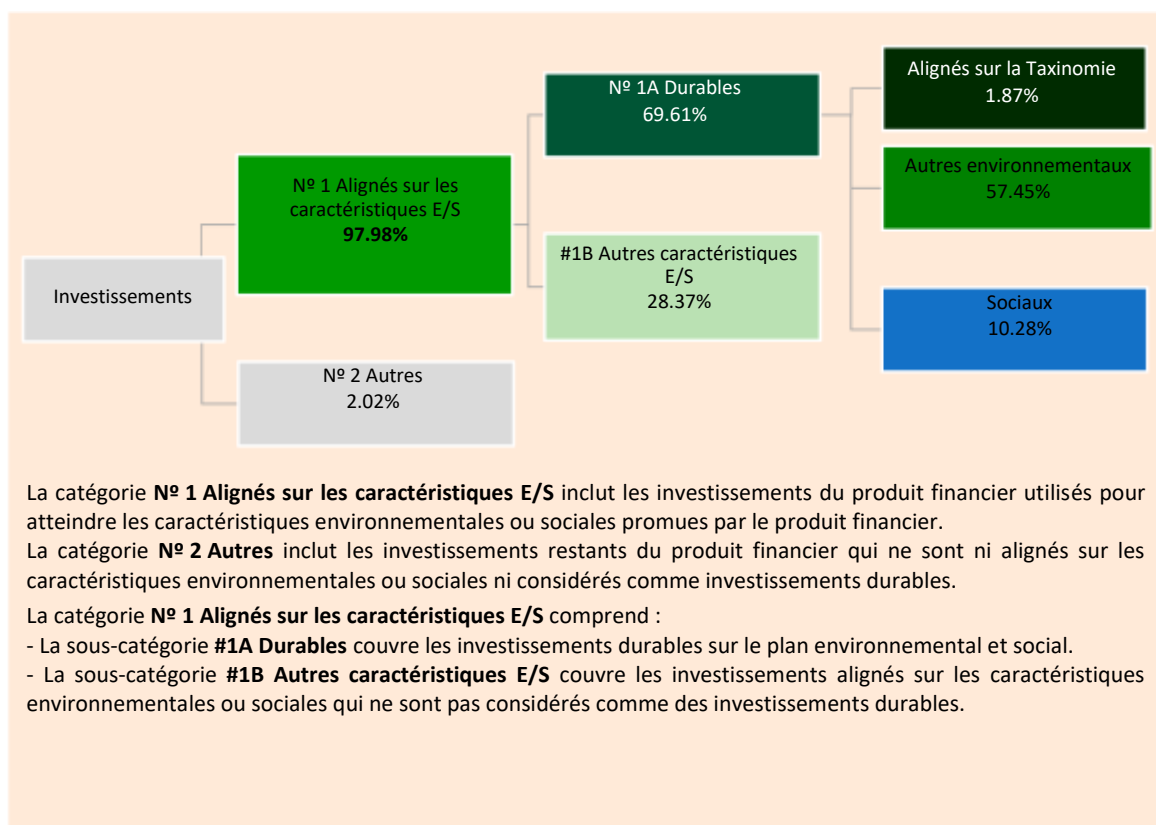

LLOYDS BANKING GROUP PLC	Obligations financières	Banques	Royaume-Uni	2.42%
TOKIO MARINE HOLDINGS INC	Obligations financières	Assurance	Japon	2.26%
XYLEM INC	Industrie	Biens d'équipement	États-Unis	2.14%
HOME DEPOT INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	2.09%
ABBVIE INC	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	1.98%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 69,61 % dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
<i>Industrie</i>	<i>Biens d'équipement</i>	17.63%
<i>Technologies de l'information</i>	<i>Semi-conducteurs et équipement pour semi-conducteurs</i>	13.73%
<i>Technologies de l'information</i>	<i>Logiciels et services</i>	11.39%
<i>Obligations financières</i>	<i>Banques</i>	9.27%
<i>Santé</i>	<i>Pharmacie, biotechnologie et sciences de la vie</i>	7.80%
<i>Consommation discrétionnaire</i>	<i>Distribution et vente au détail de biens de consommation discrétionnaires</i>	5.18%
<i>Obligations financières</i>	<i>Assurance</i>	4.86%
<i>Obligations financières</i>	<i>Services financiers</i>	4.48%
<i>Consommation discrétionnaire</i>	<i>Biens de consommation durables et habillement</i>	3.68%
<i>Technologies de l'information</i>	<i>Matériel technologique et équipement</i>	3.47%
<i>Santé</i>	<i>Matériel et services de santé</i>	3.41%
<i>Biens de consommation de base</i>	<i>Alimentation, boissons et tabac</i>	2.47%
<i>Services de communication</i>	<i>Télécommunications</i>	1.88%
<i>Services aux collectivités</i>	<i>Services multiples aux collectivités</i>	1.82%
<i>Biens de consommation de base</i>	<i>Produits ménagers et personnels</i>	1.82%
<i>Matériaux</i>	<i>Chimie</i>	1.71%
<i>Immobilier</i>	<i>Sociétés d'investissement immobilier</i>	1.61%
<i>Services de communication</i>	<i>Médias et loisirs</i>	1.15%
<i>Consommation discrétionnaire</i>	<i>Automobiles et composants</i>	0.60%
<i>Forex</i>	<i>Forex</i>	0.03%
<i>Liquidités</i>	<i>Liquidités</i>	2.02%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets. Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental. Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 1.87% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE.

L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.03% et la part d'investissements dans les activités habilitantes était de 2.97%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.70%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **57.45%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part des investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 10.28% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI World Climate Paris Aligned Net USD. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 55.75
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 64.97

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

- La note ESG moyenne pondérée du portefeuille est 0.503 (C).
- La note ESG moyenne pondérée du portefeuille est 0.013 (D).

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 55.75
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 64.97

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI World Climate Paris Aligned Net USD. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 55.75
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 64.97

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EUROPE EQUITY CLIMATE

Identifiant d'entité juridique : 5493003EV6H1NSIIXJ13

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Oui	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 79.53% d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment promeut les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'univers d'investissement. Pour déterminer la note ESG du Compartiment et de l'univers d'investissement, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance. Aux fins de cette évaluation, l'univers d'investissement est défini comme composé d'actions européennes cotées en Bourse.

En outre, le Compartiment cherche à réduire l'intensité carbone de son portefeuille en alignant l'intensité de son empreinte carbone sur celle de l'indice MSCI Europe Climate Paris Aligned (EUR). Cet Indice est un indice de marché large qui évalue et inclut des composants en fonction de caractéristiques environnementales et qui est, par conséquent, aligné sur les caractéristiques environnementales promues par le Compartiment, c.-à-d. une empreinte carbone réduite.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **1.330 (C)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.828 (C)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **61.84**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **135.18**

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 1.347 (C) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.798 (C). À la fin de la période précédente, l'intensité carbone moyenne pondérée du portefeuille était de 68.05 et l'indice de référence de l'intensité carbone moyenne pondérée était de 77.24

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et

2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les

38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.

- **Engagement** : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- **Vote** : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- **Surveillance des controverses** : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
ALLIANZ SE-REG	Finance	Assurance	Allemagne	3.93%
INTESA SANPAOLO	Obligations financières	Banques	Italie	3.84%
SCHNEIDER ELECT SE	Industrie	Biens d'équipement	France	3.79%
ASML HOLDING NV	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Pays-Bas	3.76%
RELX PLC	Industrie	Services commerciaux et professionnels	Royaume-Uni	3.72%
PUBLICIS GROUPE SA	Services de communication	Médias et loisirs	France	3.69%
SIEMENS AG-REG	Industrie	Biens d'équipement	Allemagne	3.59%
KBC GROUP NV	Finance	Banques	Belgique	3.50%
PRUDENTIAL PLC	Finance	Assurance	Royaume-Uni	3.45%
ASTRAZENECA GBP	Santé	Pharmacie, biotechnologie et sciences de la vie	Royaume-Uni	3.42%
L OREAL (PARIS)	Biens de consommation de base	Produits ménagers et personnels	France	3.30%
FINECOBANK SPA	Obligations financières	Banques	Italie	3.16%
DEUTSCHE BOERSE AG	Finance	Services financiers	Allemagne	3.12%

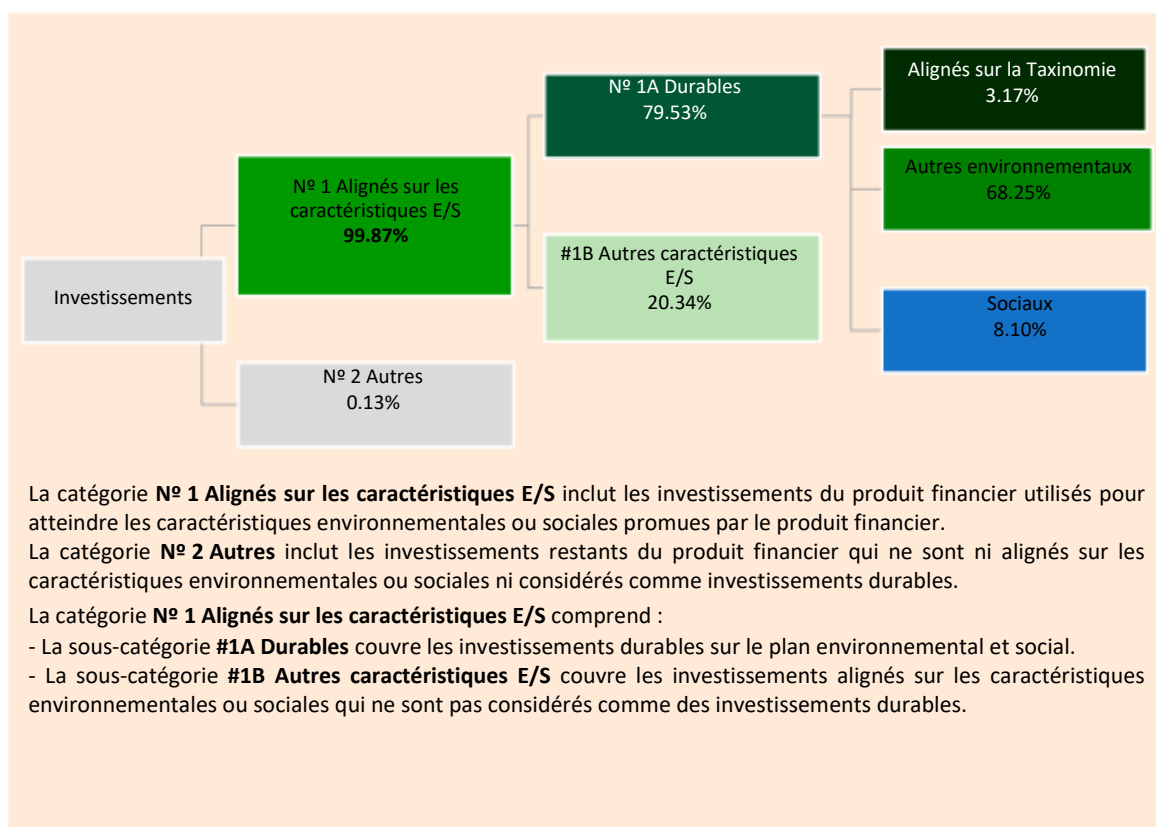

NOVO NORDISK A/S-B	Santé	Pharmacie, biotechnologie et sciences de la vie	Danemark	3.10%
TESCO PLC	Biens de consommation de base	Distribution et vente au détail de biens de consommation de base	Royaume-Uni	2.86%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 79,53 % dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	16.87%
Obligations financières	Banques	12.20%
Santé	Pharmacie, biotechnologie et sciences de la vie	11.77%
Obligations financières	Assurance	7.38%
Consommation discrétionnaire	Biens de consommation durables et habillement	6.29%
Services de communication	Médias et loisirs	6.03%

<i>Industrie</i>	<i>Services commerciaux et professionnels</i>	5.33%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 3.17% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets. Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	94.56%	93.71%	94.95%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.02%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.31%	0.36%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	5.44%	5.96%	4.68%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	94.56%	93.71%	94.95%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.02%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.31%	0.36%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	5.44%	5.96%	4.68%

Ce graphique représente 100.0% du total des investissements.

- * Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 4.84%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 1.09%.

¹Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **68.25%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 8.10% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI Europe Climate Paris Aligned (EUR). L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un

comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 61.84
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 135.18

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

- La note ESG moyenne pondérée du portefeuille est 1.330 (C).
- La note ESG moyenne pondérée de l'univers d'investissement ESG est 0.828 (C).

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 61.84
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 135.18

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI Europe Climate Paris Aligned (EUR). L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 61.84
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 135.18

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales.

L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS POLEN CAPITAL GLOBAL GROWTH

Identifiant d'entité juridique : 549300LSQ5T56F5I6810

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>46,56%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement MSCI World All Countries (ACWI) (Net Dividend) Index. Pour déterminer la note ESG du Compartiment et de l'Indice de référence, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance. L'Indice de référence est un indice de marché large qui n'évalue ni inclut de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui ne prétend pas être en adéquation avec les caractéristiques promues par le Compartiment. Aucun Indice de référence ESG n'a été désigné.

Quelles performances ont affiché les indicateurs de durabilité ?

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est -0.023 (D).
- La note ESG moyenne pondérée de l'indice de référence est -0.168 (D).

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits humains en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.197 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.171 (D)

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de

viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

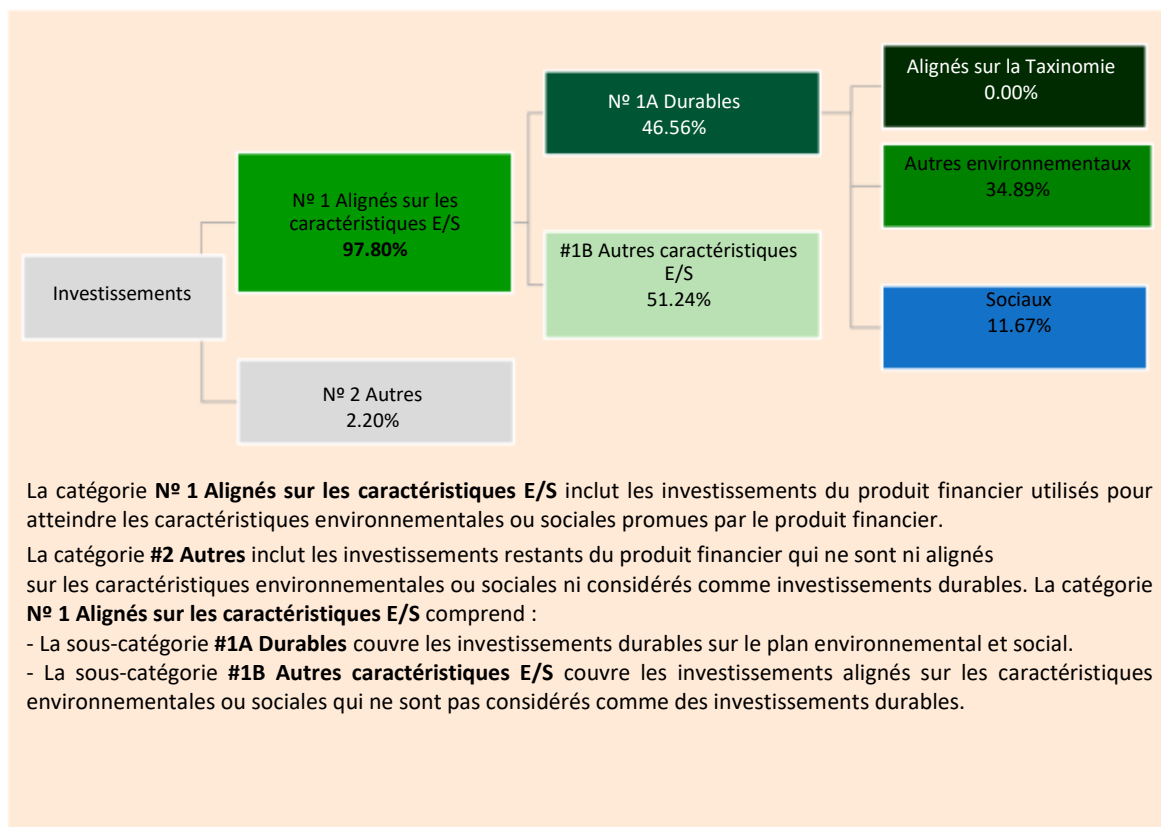

Principaux Investissements	Secteur	Sous-secteur	Pays	% des actifs
AMAZON.COM INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	7.57%
ORACLE CORP	Technologies de l'information	Logiciels et services	États-Unis	6.58%
PAYCOM SOFTWARE INC	Industrie	Services commerciaux et professionnels	États-Unis	5.59%
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	5.19%
SHOPIFY INC USD	Technologies de l'information	Logiciels et services	Canada	5.16%
VISA INC-CLASS A SHARES	Obligations financières	Services financiers	États-Unis	4.96%
MASTERCARD INC-CL A	Obligations financières	Services financiers	États-Unis	4.92%
AON PLC-CLASS A	Obligations financières	Assurance	Irlande	4.73%
ABBOTT LABORATORIES	Santé	Matériel et services de santé	États-Unis	4.26%
SAP SE / XETRA	Technologies de l'information	Logiciels et services	Allemagne	4.10%
MSCI INC	Obligations financières	Services financiers	États-Unis	3.85%
ADYEN NV	Obligations financières	Services financiers	Pays-Bas	3.64%
ZOETIS INC	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	3.34%
ADOBE INC	Technologies de l'information	Logiciels et services	États-Unis	3.27%
WORKDAY INC	Technologies de l'information	Logiciels et services	États-Unis	2.97%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 46,56 % dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Technologies de l'information	Logiciels et services	30.76%
Obligations financières	Services financiers	17.37%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	10.19%
Santé	Pharmacie, biotechnologie et sciences de la vie	9.75%
Obligations financières	Assurance	6.71%
Industrie	Services commerciaux et professionnels	6.55%
Santé	Matériel et services de santé	6.36%
Consommation discrétionnaire	Services aux consommateurs	4.03%
Services de communication	Médias et loisirs	2.58%
Immobilier	Gestion et promotion immobilière	2.49%

Biens de consommation de base	Produits ménagers et personnels	1.01%
Forex	Forex	0.51%
Liquidités	Liquidités	1.68%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	99.82%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.18%	0.00%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	99.82%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.18%	0.00%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **34.89%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 11.67% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US EQUITY DIVIDEND GROWTH

Identifiant d'entité juridique : 5493008HZKXKMO2U3E97

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="checkbox"/> Oui	<input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 23.85% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **RUSSELL 1000 VALUE (FRC) (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.300 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.476 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

- **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.137 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.479 (D).

- **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont

identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : du **01/07/2024** au **30/06/2025**

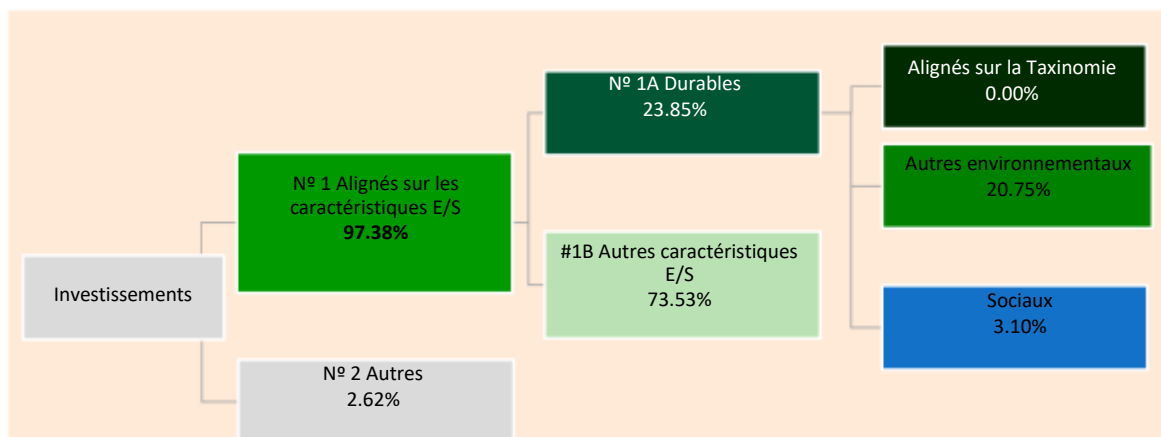

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
WELLS FARGO & CO	Obligations financières	Banques	États-Unis	4.67%
EXXON MOBIL CORP	Énergie	Pétrole, gaz et combustibles	États-Unis	4.47%
JPMORGAN CHASE & CO	Obligations financières	Banques	États-Unis	3.49%
CISCO SYSTEMS INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	3.43%
JOHNSON & JOHNSON	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	3.28%
UNITED PARCEL SERV.	Industrie	Transport	États-Unis	3.18%
3M CO	Industrie	Biens d'équipement	États-Unis	3.17%
BANK OF AMERICA CORP	Obligations financières	Banques	États-Unis	3.06%
STATE STREET CORP	Obligations financières	Services financiers	États-Unis	3.01%
WALT DISNEY CO/THE	Services de communication	Médias et loisirs	États-Unis	3.00%
ROCKWELL AUTOMATION INC	Industrie	Biens d'équipement	États-Unis	2.84%
MORGAN STANLEY	Obligations financières	Services financiers	États-Unis	2.81%
NORTHERN TRUST CORP	Obligations financières	Services financiers	États-Unis	2.50%
AMERIC.INTER.G ROUP	Obligations financières	Assurance	États-Unis	2.40%
UNION PACIFIC CORP	Industrie	Transport	États-Unis	2.28%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 23,85 % dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	13.60%
Obligations financières	Services financiers	10.33%
Industrie	Biens d'équipement	7.89%
Énergie	Pétrole, gaz et combustibles	7.41%
Santé	Pharmacie, biotechnologie et sciences de la vie	5.79%
Services de communication	Médias et loisirs	5.73%
Industrie	Transport	5.46%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	5.33%
Obligations financières	Assurance	4.00%
Technologies de l'information	Matériel technologique et équipement	3.93%

<i>Santé</i>	<i>Matériel et services de santé</i>	<i>3.72%</i>
<i>Matériaux</i>	<i>Chimie</i>	<i>3.14%</i>
<i>Biens de consommation de base</i>	<i>Alimentation, boissons et tabac</i>	<i>3.09%</i>
<i>Technologies de l'information</i>	<i>Logiciels et services</i>	<i>2.71%</i>
<i>Biens de consommation de base</i>	<i>Produits ménagers et personnels</i>	<i>2.28%</i>
<i>Technologies de l'information</i>	<i>Semi-conducteurs et équipement pour semi-conducteurs</i>	<i>1.82%</i>
<i>Services aux collectivités</i>	<i>Services multiples aux collectivités</i>	<i>1.77%</i>
<i>Biens de consommation de base</i>	<i>Distribution et vente au détail de biens de consommation de base</i>	<i>1.77%</i>
<i>Énergie</i>	<i>Équipement et services énergétiques</i>	<i>1.48%</i>
<i>Consommation discrétionnaire</i>	<i>Automobiles et composants</i>	<i>1.38%</i>
<i>Services de communication</i>	<i>Télécommunications</i>	<i>1.33%</i>
<i>Services aux collectivités</i>	<i>Services aux collectivités – électricité</i>	<i>1.01%</i>
<i>Immobilier</i>	<i>Sociétés d'investissement immobilier</i>	<i>0.86%</i>
<i>Consommation discrétionnaire</i>	<i>Biens de consommation durables et habillement</i>	<i>0.86%</i>
<i>Consommation discrétionnaire</i>	<i>Services aux consommateurs</i>	<i>0.68%</i>
<i>Liquidités</i>	<i>Liquidités</i>	<i>2.62%</i>

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

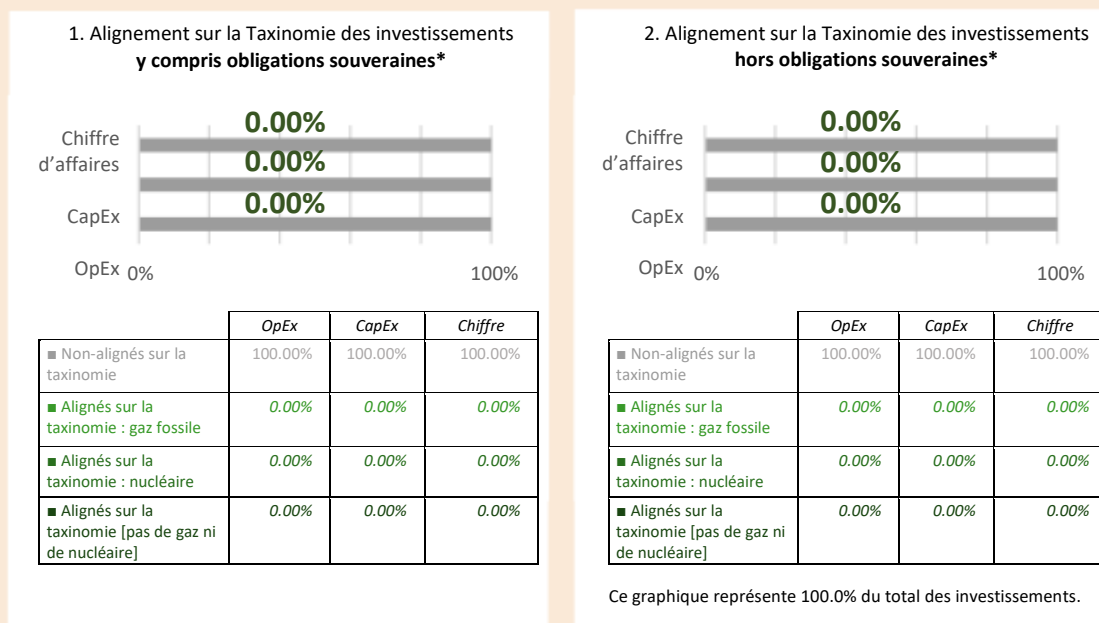

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **20.75%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 3.10% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US EQUITY SELECT

Identifiant d'entité juridique : 213800ETDMQDXO6WX979

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?

Oui

Non

Il a réalisé des investissements durables ayant un objectif environnemental : _____

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

Il a réalisé des investissements durables ayant un objectif social : _____

Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de **41.06%** d'investissements durables

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **S&P 500 (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Quelles performances ont affichées les indicateurs de durabilité ?

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.100 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.459 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

... et par rapport aux périodes précédentes ?

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.107 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.433 (D).

Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse

ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

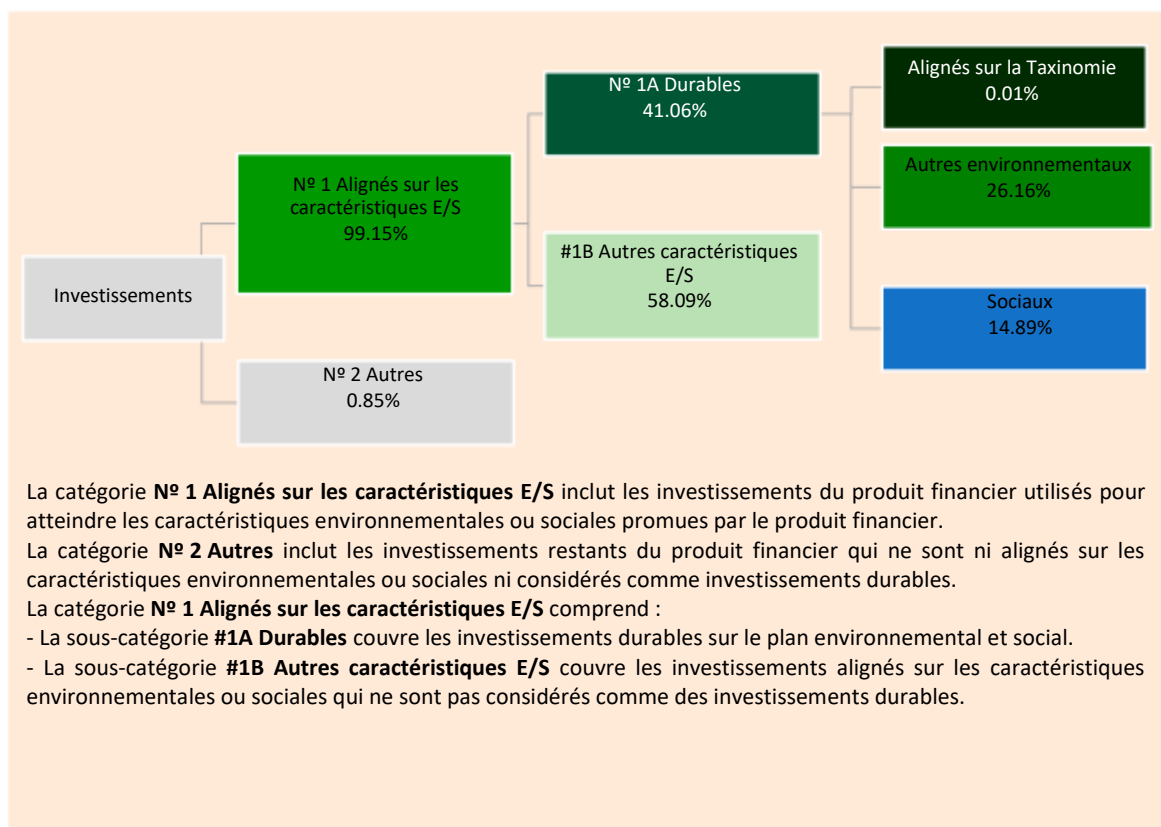

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
NVIDIA CORP	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	6.07%
CISCO SYSTEMS INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	5.02%
STATE STREET CORP	Obligations financières	Services financiers	États-Unis	4.21%
US BANCORP	Finance	Banques	États-Unis	4.18%
ORACLE CORP	Technologies de l'information	Logiciels et services	États-Unis	3.76%
UNION PACIFIC CORP	Industrie	Transport	États-Unis	3.18%
ELI LILLY & CO	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	2.95%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.01% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

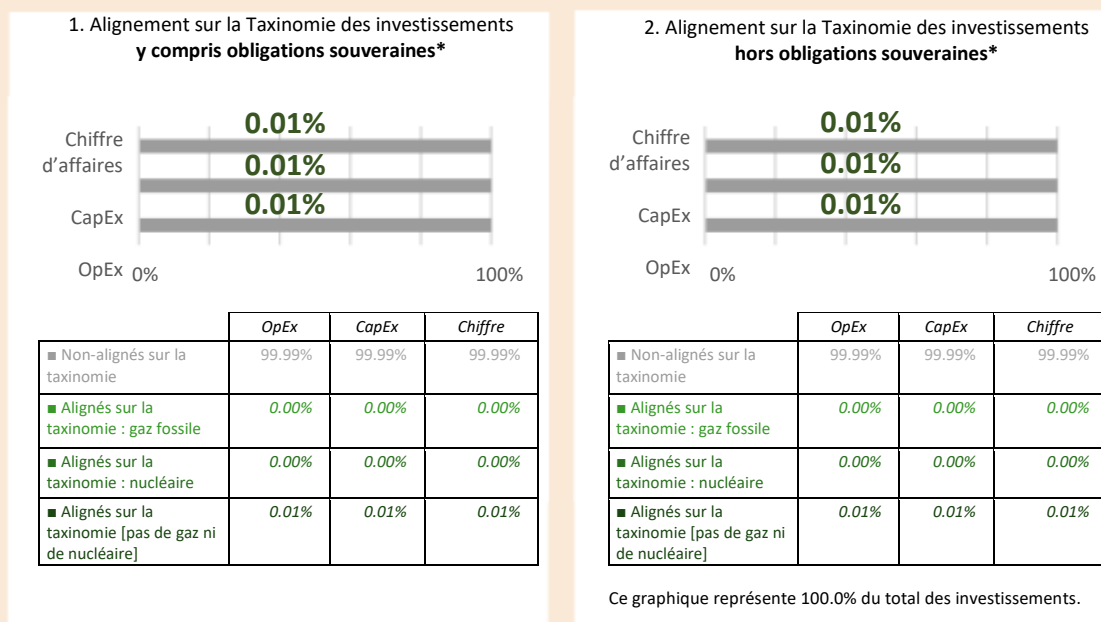

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- Quelle était la part d'investissements dans les activités transitoires et habilitantes ?

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **26.16%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 14.89% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US EQUITY FUNDAMENTAL GROWTH

Identifiant d'entité juridique : 54930019NOJ42Y83JC39

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 34,58% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **RUSSELL 1000 GROWTH (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

- **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.259 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.419 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

- **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.359 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.386 (D).

- **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse

ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

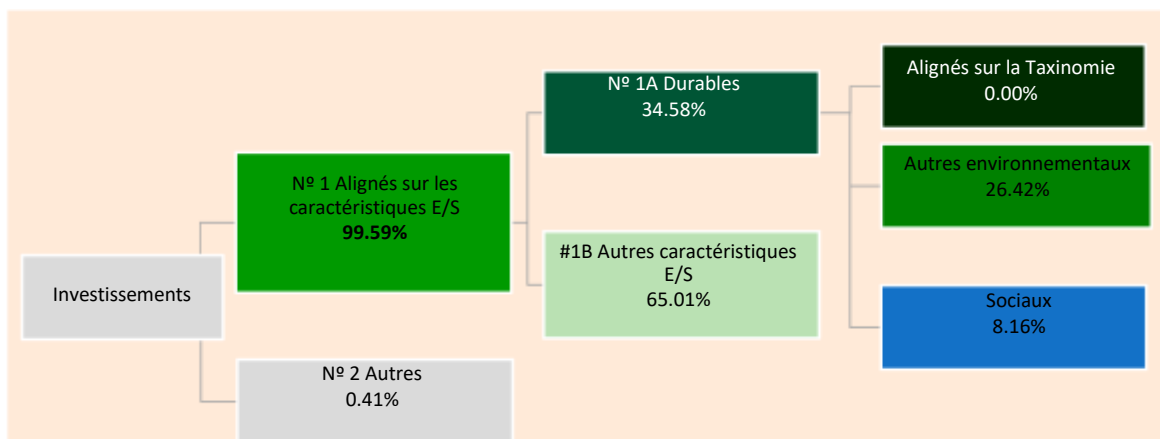

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	7.59%
AMAZON.COM INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	7.25%
APPLE INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	4.46%

BOOKING HOLDINGS INC	Consommation discrétionnaire	Services aux consommateurs	États-Unis	2.76%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 34,58 % dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Technologies de l'information	Logiciels et services	21.73%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	15.53%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	10.30%
Technologies de l'information	Matériel technologique et équipement	9.51%
Obligations financières	Services financiers	9.40%
Services de communication	Médias et loisirs	7.88%
Santé	Pharmacie, biotechnologie et sciences de la vie	7.33%
Industrie	Transport	4.27%
Industrie	Biens d'équipement	3.89%
Santé	Matériel et services de santé	2.84%
Consommation discrétionnaire	Services aux consommateurs	2.76%

Industrie	Services commerciaux et professionnels	2.57%
Obligations financières	Assurance	1.03%
Matériaux	Chimie	0.38%
Forex	Forex	0.16%
Liquidités	Liquidités	0.41%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	99.95%	100.00%

■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.05%	0.00%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	99.95%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.05%	0.00%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **26.42%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 8.16% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US EQUITY RESEARCH

Identifiant d'entité juridique : 5493005S070A64LD3058

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 41.18% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **S&P 500 (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.176 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.459 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.167 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.433 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	6.64%
INTL BUSINESS MACHINES CORP	Technologies de l'information	Logiciels et services	États-Unis	5.60%
AMAZON.COM INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	5.54%

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

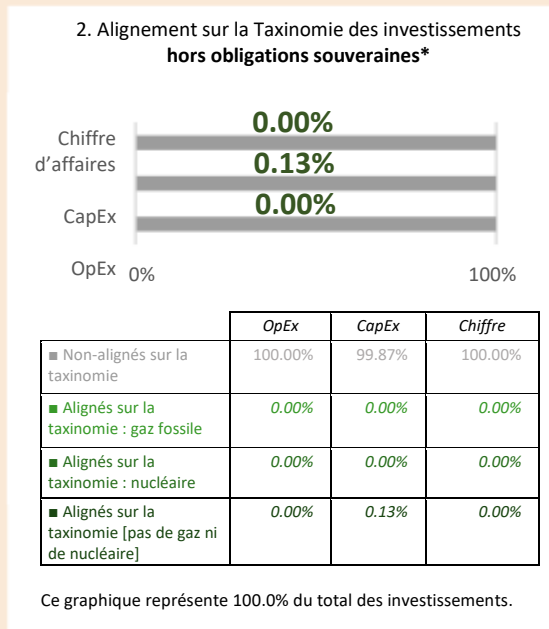

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **26.22%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 14.95% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit :
AMUNDI FUNDS US EQUITY

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 27.73% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **RUSSELL 1000 VALUE INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.162 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.476 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.020 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.479 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
JPMORGAN CHASE & CO	Obligations financières	Banques	États-Unis	4.93%
JOHNSON & JOHNSON	Santé	Pharmacie, biotechnologie et sciences de la vie	États-Unis	4.75%
BANK OF AMERICA CORP	Obligations financières	Banques	États-Unis	4.72%
CISCO SYSTEMS INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	4.49%

<i>Liquidités</i>	<i>Liquidités</i>	0.92%

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au gaz fossile incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.03% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.03% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **22.77%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 4.92% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS US PIONEER FUND

Identifiant d'entité juridique : 54930046EO6XR0RZBB11

Caractéristiques environnementales et/ou sociales

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 36.13% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **S&P 500 (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.224 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.459 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.258 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.433 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

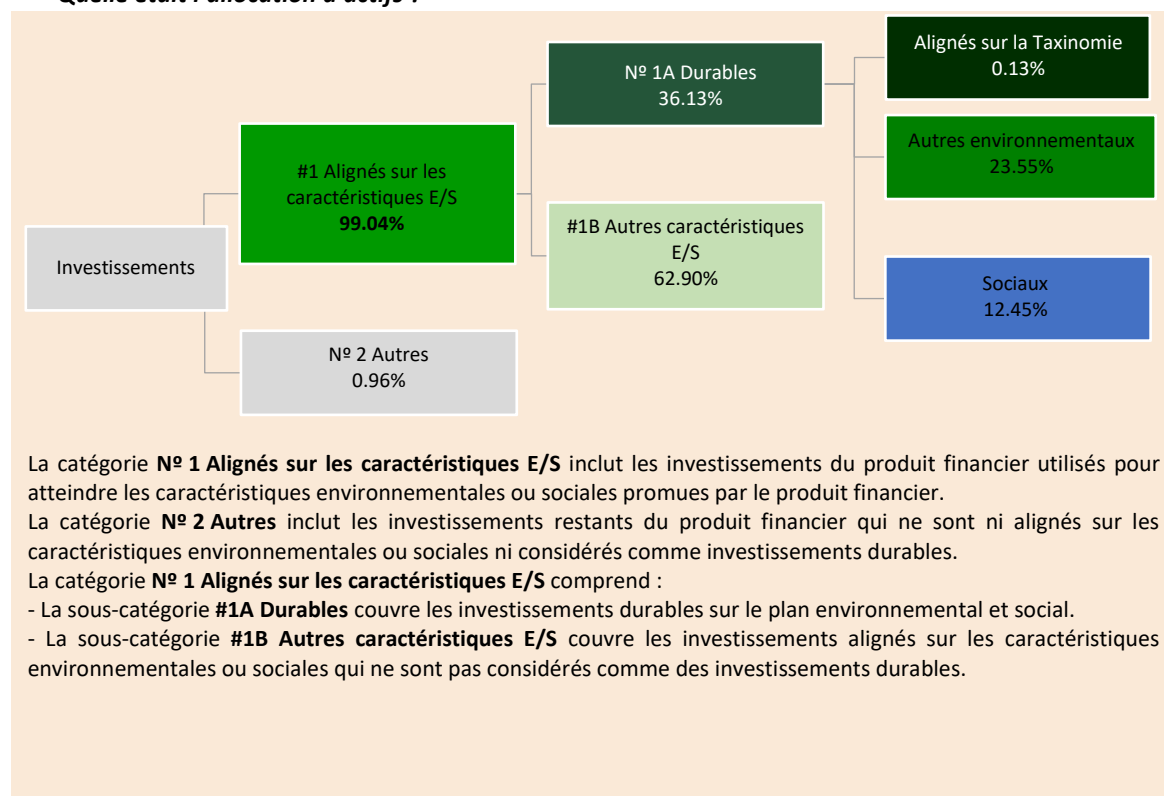

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
NVIDIA CORP	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	7.59%
MICROSOFT CORP	Technologies de l'information	Logiciels et services	États-Unis	5.89%
AMAZON.COM INC	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	États-Unis	4.97%
TRUIST FINANCIAL CORP	Finance	Banques	États-Unis	4.31%
MARTIN MARIETTA MATERIALS	Matériaux	Matériaux de construction	États-Unis	4.29%
ALPHABET INC CL A	Services de communication	Médias et loisirs	États-Unis	4.00%
FREEMPORT-MCMORAN INC	Matériaux	Métaux et exploitation minière	États-Unis	3.92%
APPLE INC	Technologies de l'information	Matériel technologique et équipement	États-Unis	3.68%
QUANTA SERVICES INC	Industrie	Biens d'équipement	États-Unis	3.01%
UNITED PARCEL SERV.	Industrie	Transport	États-Unis	2.90%
BROADCOM INC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	États-Unis	2.66%
VISA INC-CLASS A SHARES	Obligations financières	Services financiers	États-Unis	2.48%
INTL BUSINESS MACHINES CORP	Technologies de l'information	Logiciels et services	États-Unis	2.45%
GOLDMAN SACHS GROUP INC	Obligations financières	Services financiers	États-Unis	2.37%
GE VERNOVA INC	Industrie	Biens d'équipement	États-Unis	2.37%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 36,13 % dans des investissements liés au développement durable.

• Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	15.33%
Technologies de l'information	Logiciels et services	12.73%
Industrie	Biens d'équipement	11.63%
Obligations financières	Services financiers	8.52%
Technologies de l'information	Matériel technologique et équipement	6.60%
Obligations financières	Banques	6.31%
Matériaux	Métaux et exploitation minière	6.18%

<i>Consommation discrétionnaire</i>	<i>Distribution et vente au détail de biens de consommation discrétionnaires</i>	6.04%
<i>Industrie</i>	<i>Transport</i>	4.54%
<i>Matériaux</i>	<i>Matériaux de construction</i>	4.29%
<i>Santé</i>	<i>Pharmacie, biotechnologie et sciences de la vie</i>	4.28%
<i>Services de communication</i>	<i>Médias et loisirs</i>	4.00%
<i>Services aux collectivités</i>	<i>Services aux collectivités – électricité</i>	2.16%
<i>Biens de consommation de base</i>	<i>Distribution et vente au détail de biens de consommation de base</i>	2.10%
<i>Consommation discrétionnaire</i>	<i>Services aux consommateurs</i>	1.24%
<i>Consommation discrétionnaire</i>	<i>Biens de consommation durables et habillement</i>	1.18%
<i>Santé</i>	<i>Matériel et services de santé</i>	0.91%
<i>Forex</i>	<i>Forex</i>	0.50%
<i>Énergie</i>	<i>Pétrole, gaz et combustibles</i>	0.50%
<i>Liquidités</i>	<i>Liquidités</i>	0.96%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.13% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.87%	99.77%	99.87%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.13%	0.23%	0.13%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.87%	99.77%	99.87%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.13%	0.23%	0.13%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.13%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.13%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **23.55%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 12.45% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CHINA NEW ENERGY

Identifiant d'entité juridique : 2138004KPA84GFEEKY44

Caractéristiques environnementales et/ou sociales

La taxinomie de l'UE est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>30.86%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI CHINA A ONSHORE NR USD INDEX**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.424 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.946 (E)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et

déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

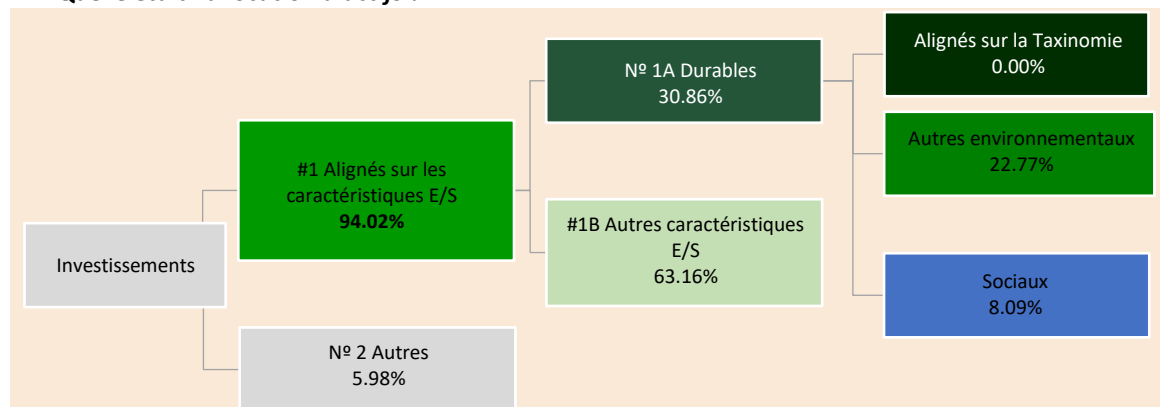

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
CONTEMPORARY AMPEREX TECHN-A NTH-SZSE	Industrie	Biens d'équipement	Chine	8.54%
BYD CO LTD -A NTH-SZSE	Consommation discrétionnaire	Automobiles et composants	Chine	7.90%
EVE ENERGY CO LTD-A NTH-SZSE	Industrie	Biens d'équipement	Chine	7.61%
SUNGROW POWER SUPPLY CO LT-A NTH-SZSE	Industrie	Biens d'équipement	Chine	6.37%
SHENZHEN KEDALI INDUSTRY C-A NTH-SZSE	Consommation discrétionnaire	Automobiles et composants	Chine	3.86%
BANK OF HANGZHOU CO LTD-A NT-SS	Obligations financières	Banques	Chine	3.67%
CHINA YANGTZE PO-A NT-SS	Services aux collectivités	Producteurs d'électricité indépendants et producteurs d'électricité renouvelable	Chine	3.48%
GF SECURITIES CO LTD-A NT-SZ	Obligations financières	Services financiers	Chine	3.42%
SERES GROUP CO L-A NTH-SSE	Consommation discrétionnaire	Automobiles et composants	Chine	3.38%
BAIC BLUEPARK NEW ENERGY -A NTH-SSE	Consommation discrétionnaire	Automobiles et composants	Chine	3.29%
SHENZHEN INOVANCE TECHNOLO-A NTH-SZSE	Industrie	Biens d'équipement	Chine	2.91%
HANGZHOU FIRST APPLIED MAT-A NTH-SSE	Technologies de l'information	Semi-conducteurs & Équipements à semi-conducteurs	Chine	2.84%
LUXSHARE PRECISIONIndustr-A NT-SZ	Technologies de l'information	Matériel technologique et équipement	Chine	2.83%
NINGBO DEYE TECHNOLOGY CO-A NTH-SSE	Industrie	Biens d'équipement	Chine	2.55%
FLAT GLASS GROUP CO LTD-A NTH-SSE	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Chine	2.48%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 30.86% dans des investissements liés au développement durable.

• Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	41.95%
Consommation discrétionnaire	Automobiles et composants	22.55%
Obligations financières	Banques	8.41%
Obligations financières	Services financiers	5.56%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	5.32%
Services aux collectivités	Producteurs d'électricité indépendants et producteurs d'électricité renouvelable	4.35%
Technologies de l'information	Matériel technologique et équipement	4.00%
Matériaux	Chimie	3.76%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

<i>Services aux collectivités</i>	<i>Services aux collectivités – gaz</i>	0.10%
<i>Autres</i>	<i>Autres</i>	-0.10%
<i>Liquidités</i>	<i>Liquidités</i>	4.11%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **22.77%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 8.09% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS ASIA EQUITY FOCUS

Identifiant d'entité juridique : 529900JOPK0BJB1JIC13

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

Oui **Non**

<p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____</p> <p><input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____</p>	<p><input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 44.08% d'investissements durables</p> <p><input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE</p> <p><input checked="" type="checkbox"/> ayant un objectif social</p> <p><input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables</p>
---	---

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI AC ASIA EX JAPAN (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.068 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.016 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.017 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.086 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

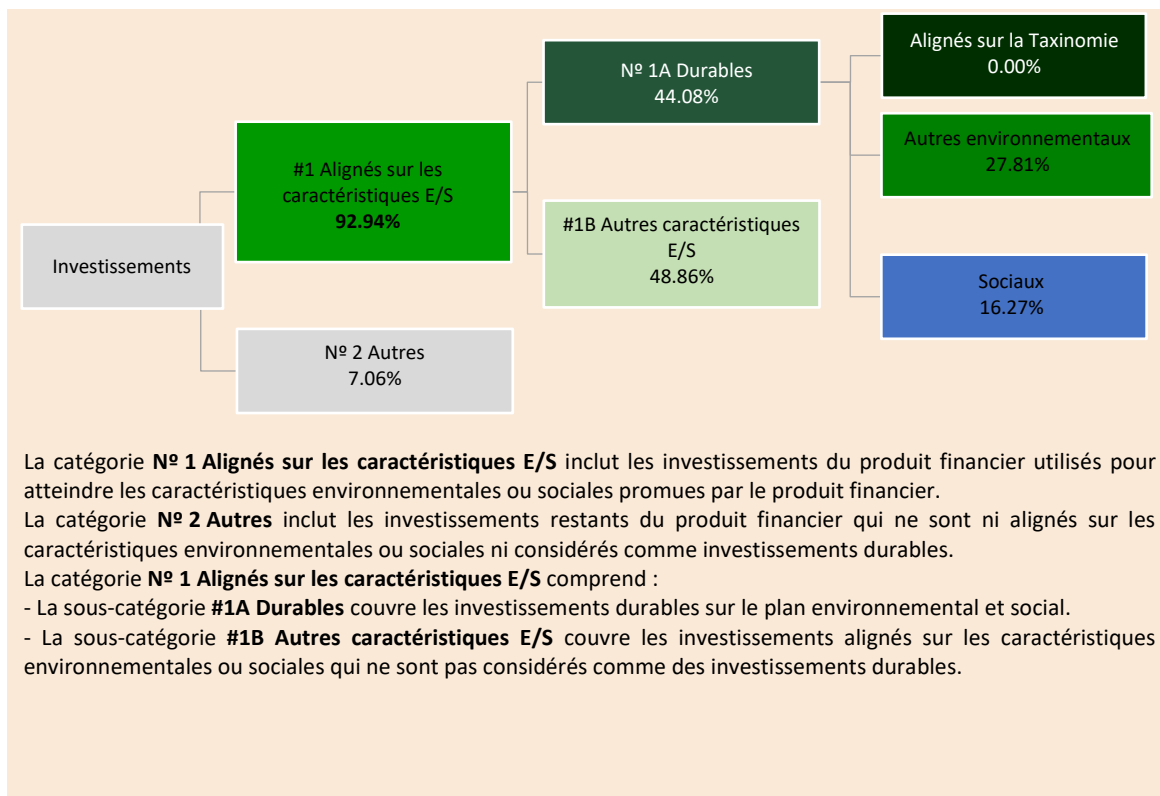

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TAIWAN SEMICONDUCTOR MANUFAC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taiwan	9.78%
TENCENT HOLDINGS LTD	Services de communication	Médias et loisirs	Îles Caïmans	7.15%
ALIBABA GROUP HOLDING LTD	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Îles Caïmans	3.81%
XIAOMI CORP	Technologies de l'information	Matériel technologique et équipement	Îles Caïmans	2.73%
HDFC BANK LIMITED	Finance	Banques	Inde	2.68%
SAMSUNG ELECTRONICS LTD	Technologies de l'information	Matériel technologique et équipement	Korea	2.46%
SK HYNIX INC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Korea	2.34%
AIA GROUP LTD	Obligations financières	Assurance	Hong Kong	2.20%
SEA LTD-ADR	Services de communication	Médias et loisirs	Îles Caïmans	2.09%
BHARTI AIRTEL LTD	Services de communication	Télécommunications	Inde	1.81%
ICICI BANK LTD-US-ADR	Obligations financières	Banques	Inde	1.78%
CHINA CONSTRUCTION BANK	Obligations financières	Banques	Chine	1.75%
BYD CO LTD-H	Consommation discrétionnaire	Automobiles et composants	Chine	1.56%
CTBC FINANCIAL HOLDING CO LTD	Obligations financières	Banques	Taiwan	1.49%
NETEASE INC	Services de communication	Médias et loisirs	Îles Caïmans	1.44%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 44.08% dans des investissements liés au développement durable.

- **Quelle était l'allocation d'actifs ?**

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	15.18%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	14.48%
Services de communication	Médias et loisirs	11.63%
Technologies de l'information	Matériel technologique et équipement	10.07%
Industrie	Biens d'équipement	5.70%
Consommation discrétionnaire	Automobiles et composants	5.47%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	5.42%
Consommation discrétionnaire	Services aux consommateurs	4.94%
Services de communication	Télécommunications	4.35%
Obligations financières	Assurance	3.07%

Immobilier	Gestion et promotion immobilière	2.85%
Santé	Pharmacie, biotechnologie et sciences de la vie	2.58%
Santé	Matériel et services de santé	2.54%
Biens de consommation de base	Alimentation, boissons et tabac	2.15%
Obligations financières	Fonds communs de placement	1.71%
Technologies de l'information	Logiciels et services	1.27%
Industrie	Transport	0.96%
Obligations financières	Services financiers	0.74%
Matériaux	Métaux et exploitation minière	0.37%
Biens de consommation de base	Distribution et vente au détail de biens de consommation de base	0.27%
Forex	Forex	0.03%
Autres	Autres	-0.40%
Liquidités	Liquidités	4.65%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

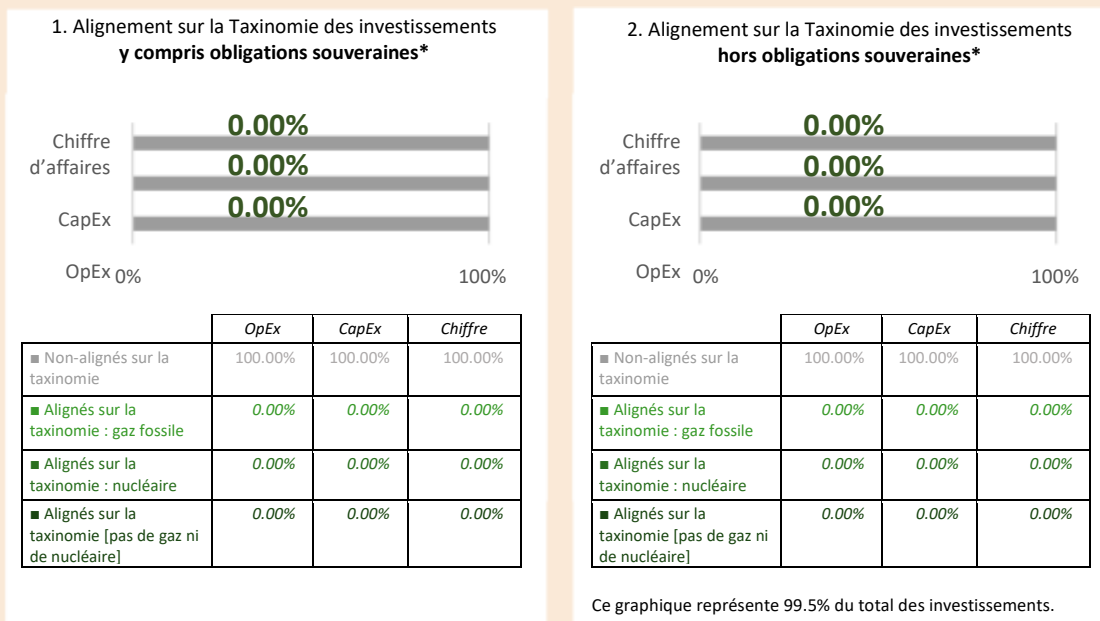

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

• **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **27.81%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 16.27% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS CHINA A SHARES

Identifiant d'entité juridique : 213800SWM4W1H6YGZF46

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

Oui **X Non**

Il a réalisé des **investissements durables ayant un objectif environnemental** : _____

Il a promu des **caractéristiques environnementales/sociales (E/S)** a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de **29.65%** d'investissements durables

dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

ayant un objectif social

Il a réalisé des **investissements durables ayant un objectif social** : _____

Il a promu des **caractéristiques E/S, mais n'a pas réalisé d'investissements durables**

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son indice de référence **MSCI China A Onshore NR USD Index**. Pour déterminer la note ESG du Produit et de l'indice de référence, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'indice de référence est un indice de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'indice de référence du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.538 (E)**.
- La note ESG moyenne pondérée de l'indice de référence est **-0.946 (E)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.608 (E) et la note ESG moyenne pondérée de l'indice de référence ESG était de -1.533 (E).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
CONTEMPORARY AMPEREX TECHN-A NTH-SZSE	Industrie	Biens d'équipement	Chine	5.60%
CHINA MERCHANTS BANK NT-SS	Obligations financières	Banques	Chine	4.22%
PING AN INSURANCE-A NT-SS	Obligations financières	Assurance	Chine	4.06%
JIANGSU HENGLI HYDRAULIC C-A NTH-SSE	Industrie	Biens d'équipement	Chine	3.10%

Quelle était la proportion d'investissements liés à la durabilité ?

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Le fonds a investi 29.65% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Industrie	Biens d'équipement	17.56%
Obligations financières	Banques	12.44%
Technologies de l'information	Matériel technologique et équipement	9.37%
Consommation discrétionnaire	Automobiles et composants	8.03%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	7.21%
Obligations financières	Services financiers	5.21%
Obligations financières	Assurance	5.03%
Biens de consommation de base	Alimentation, boissons et tabac	5.01%

<i>Technologies de l'information</i>	<i>Logiciels et services</i>	<i>4.19%</i>
<i>Santé</i>	<i>Matériel et services de santé</i>	<i>3.20%</i>
<i>Matériaux</i>	<i>Métaux et exploitation minière</i>	<i>2.38%</i>
<i>Santé</i>	<i>Pharmacie, biotechnologie et sciences de la vie</i>	<i>2.21%</i>

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	100.00%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.00%	0.00%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	100.00%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.00%	0.00%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **18.52%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 11.13% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
CHINA EQUITY

Identifiant d'entité juridique :
549300Y1J7CKLI10B145

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 37.06% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI CHINA 10/40 Index**. Pour déterminer la note ESG du Produit et de l'indice de référence, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'indice de référence est un indice de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'indice de référence du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.367 (D)**.
- La note ESG moyenne pondérée de l'indice de référence est **-0.529 (E)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.468 (D) et la note ESG moyenne pondérée de l'indice de référence était de -0.732 (E).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

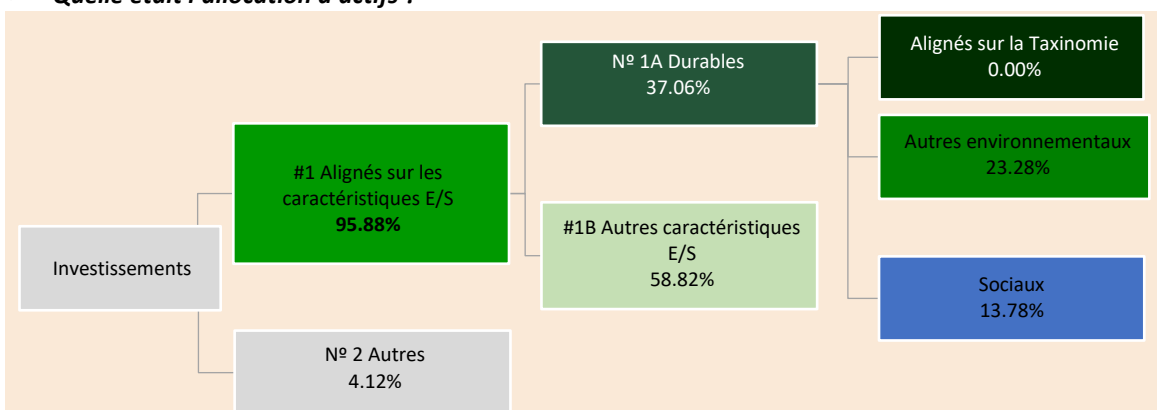

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TENCENT HOLDINGS LTD	Services de communication	Médias et loisirs	Îles Caïmans	9.64%
ALIBABA GROUP HOLDING LTD	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Îles Caïmans	7.81%

Quelle était la proportion d'investissements liés à la durabilité ?

ds a investi 37.06% dans des investissements liés au développement durable.

Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Services de communication	Médias et loisirs	17.72%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	14.30%
Consommation discrétionnaire	Services aux consommateurs	9.96%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	100.00%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.00%	0.00%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	100.00%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.00%	0.00%

Ce graphique représente 98.4% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **23.28%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 13.78% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
EMERGING EUROPE MIDDLE EAST AND
AFRICA

Identifiant d'entité juridique :
549300QA3E8RYX3KUC78

Caractéristiques environnementales et/ou sociales

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 30.92% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EM Europe & Middle East 10/40 Index**. Pour déterminer la note ESG du Produit et de l'indice de référence, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'indice de référence est un indice de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'indice de référence du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.074 (D)**.
- La note ESG moyenne pondérée du de l'indice de référence **-0.190 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.24 (D) et la note ESG moyenne pondérée de l'indice de référence était de -0.3 (D)

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

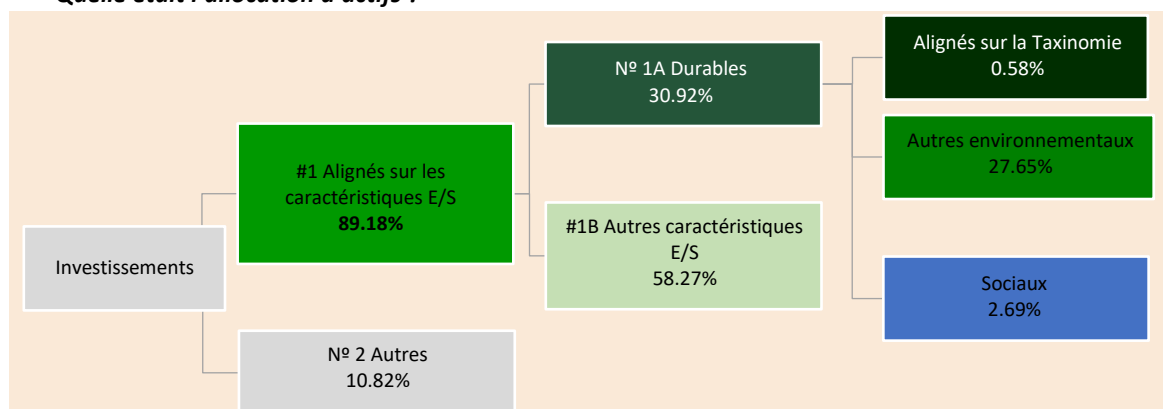

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
EUROBANK ERGASIAS SA	Obligations financières	Banques	Grèce	4.67%
EMAAR PROPERTIES	Immobilier	Gestion et promotion immobilière	Émirats arabes unis	4.31%
PKO BANK POLSKI	Obligations financières	Banques	Pologne	4.07%
CEZ AS	Services aux collectivités	Services aux collectivités – électricité	République tchèque	3.65%
THE SAUDI NATIONAL BANK	Obligations financières	Banques	Arabie saoudite	3.12%
NATIONAL BANK OF GREECE SA NEW	Obligations financières	Banques	Grèce	3.09%
GOLD FIELDS LTD	Matériaux	Métaux et exploitation minière	Afrique du Sud	2.64%

RIYADH CABLES GROUP CO	Industrie	Biens d'équipement	Arabie saoudite	1.77%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 30.92% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvre les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	33.57%
Matériaux	Métaux et exploitation minière	9.44%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	7.19%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.58% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	94.85%	93.43%	96.60%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.01%	0.42%
■ Alignés sur la taxinomie : nucléaire	2.49%	0.68%	1.19%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	2.65%	5.88%	1.79%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	96.40%	95.75%	97.50%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.01%	0.43%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.06%	0.06%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	3.60%	4.19%	2.01%

Ce graphique représente 96.3% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.38% et la part d'investissements dans les activités habilitantes était de 2.10%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente, le pourcentage d'investissements alignés sur la Taxinomie était de 0.12%

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **27.65%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 2.69% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS EQUITY SELECT

Identifiant d'entité juridique : 213800T17Z9VUK8N7648

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Caractéristiques environnementales et/ou sociales

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Oui	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 54.13% d'investissements durables <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EM (EMERGING MARKETS) (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.394 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.022 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.356 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.099 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

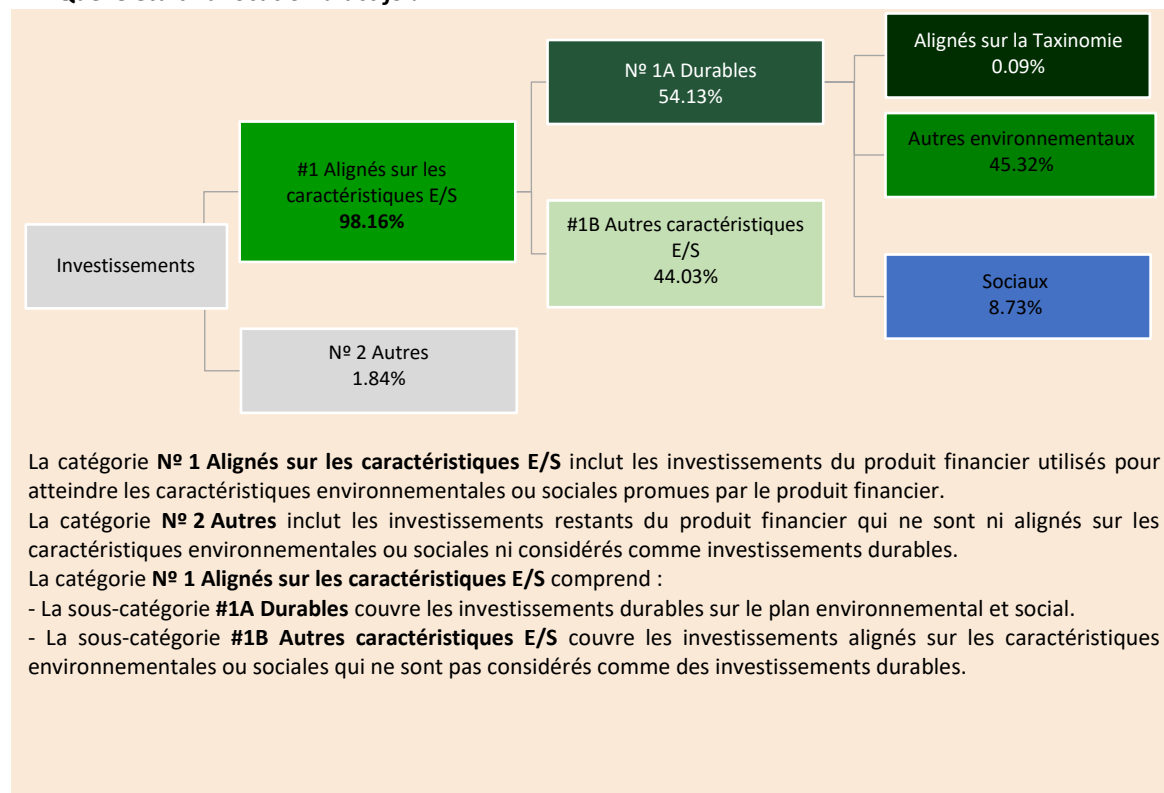

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TAIWAN SEMICONDUCTOR SP ADR	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taiwan	6.81%
CHINA CONSTRUCTION BANK	Obligations financières	Banques	Chine	4.12%
ALIBABA GROUP HOLDING LTD	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Îles Caïmans	3.64%
SK HYNIX INC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Korea	3.56%
SAMSUNG ELECTRONIC CO. LTD	Technologies de l'information	Matériel technologique et équipement	Korea	3.17%
AXIS BANK LTD	Finance	Banques	Inde	2.86%
PROSUS NV	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Pays-Bas	2.70%
TAIWAN SEMICONDUCTOR MANUFACTURING CO. LTD	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taiwan	2.58%
EUROBANK ERGASIAS SA	Obligations financières	Banques	Grèce	2.34%
CMOC GROUP LTD-H	Matériaux	Métaux et exploitation minière	Chine	2.17%
NETEASE INC-ADR	Services de communication	Médias et loisirs	Îles Caïmans	2.13%
HDFC BANK LIMITED	Finance	Banques	Inde	2.06%
CIA SANEAMENTO BASICO DE SP	Services aux collectivités	Services aux collectivités – eau	Brésil	2.01%
GOLD FIELDS LTD	Matériaux	Métaux et exploitation minière	Afrique du Sud	1.93%
AGRICULTURAL BANK OF CHINA-H	Obligations financières	Banques	Chine	1.92%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 54.13% dans des investissements liés au développement durable.

• Quelle était l'allocation d'actifs ?

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	20.56%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	15.06%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	8.94%
Matériaux	Métaux et exploitation minière	8.73%
Services de communication	Médias et loisirs	7.79%
Technologies de l'information	Matériel technologique et équipement	7.00%
Énergie	Pétrole, gaz et combustibles	4.56%
Industrie	Biens d'équipement	3.20%
Obligations financières	Services financiers	3.07%

<i>Consommation discrétionnaire</i>	<i>Automobiles et composants</i>	2.95%
<i>Biens de consommation de base</i>	<i>Alimentation, boissons et tabac</i>	2.41%
<i>Services aux collectivités</i>	<i>Services aux collectivités – eau</i>	2.01%
<i>Obligations financières</i>	<i>Assurance</i>	1.64%
<i>Technologies de l'information</i>	<i>Logiciels et services</i>	1.53%
<i>Industrie</i>	<i>Transport</i>	1.16%
<i>Matériaux</i>	<i>Produits papetiers et forestiers</i>	1.15%
<i>Services aux collectivités</i>	<i>Services aux collectivités – électricité</i>	0.99%
<i>Consommation discrétionnaire</i>	<i>Services aux consommateurs</i>	0.90%
<i>Services de communication</i>	<i>Télécommunications</i>	0.78%
<i>Consommation discrétionnaire</i>	<i>Biens de consommation durables et habillement</i>	0.71%
<i>Immobilier</i>	<i>Gestion et promotion immobilière</i>	0.69%
<i>Santé</i>	<i>Pharmacie, biotechnologie et sciences de la vie</i>	0.57%
<i>Biens de consommation de base</i>	<i>Distribution et vente au détail de biens de consommation de base</i>	0.55%
<i>Matériaux</i>	<i>Chimie</i>	0.50%
<i>Matériaux</i>	<i>Matériaux de construction</i>	0.42%
<i>Santé</i>	<i>Matériel et services de santé</i>	0.36%
<i>Services aux collectivités</i>	<i>Producteurs d'électricité indépendants et producteurs d'électricité renouvelable</i>	0.30%
<i>Liquidités</i>	<i>Liquidités</i>	1.46%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.09% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.61%	99.75%	99.90%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.03%	0.02%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.39%	0.22%	0.07%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.61%	99.74%	99.90%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.03%	0.02%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.39%	0.22%	0.08%

Ce graphique représente 98.1% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au gaz fossile incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :
 - du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.10%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **45.32%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 8.73% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS EQUITY FOCUS

Identifiant d'entité juridique : 529900SQFJZNLOBO8Z15

Caractéristiques environnementales et/ou sociales

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 46.19% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement MSCI EM (EMERGING MARKETS). Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance. L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.122 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.022 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.103 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.099 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes

évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

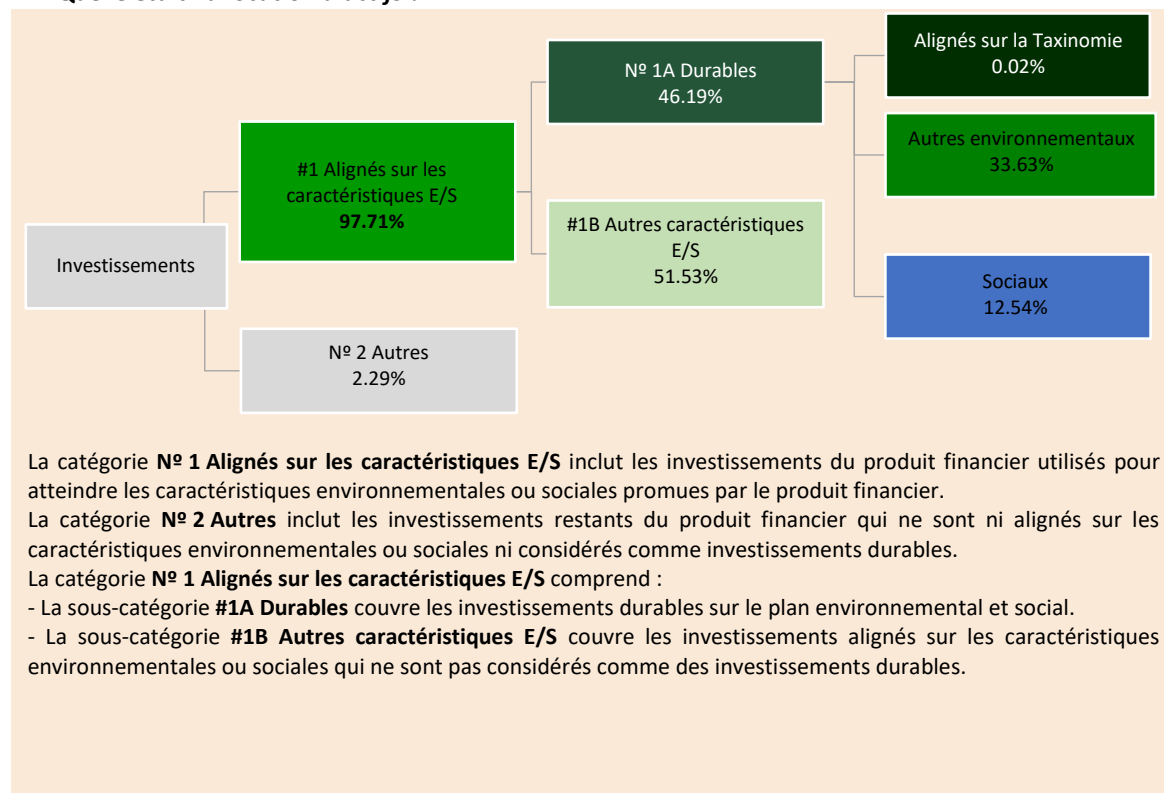

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TAIWAN SEMICONDUCTOR MANUFAC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taiwan	9.73%
TENCENT HOLDINGS LTD	Services de communication	Médias et loisirs	Îles Caïmans	5.52%
HDFC BANK LIMITED	Finance	Banques	Inde	2.73%
SAMSUNG ELECT-PFD	Technologies de l'information	Matériel technologique et équipement	Korea	1.84%
ALIBABA GROUP HOLDING LTD	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Îles Caïmans	1.83%
XIAOMI CORP	Technologies de l'information	Matériel technologique et équipement	Îles Caïmans	1.66%
CHINA CONSTRUCT BANK	Obligations financières	Banques	Chine	1.62%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.02% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.04%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **33.63%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 12.54% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Caractéristiques environnementales et/ou sociales

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 48.83% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE

<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EM (EMERGING MARKETS) EX CHINA (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.275 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.159 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.193 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.097 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- Avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur ; et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- Ne pas faire l'objet de controverse relative à la biodiversité et à la pollution.

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les

entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires d'investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

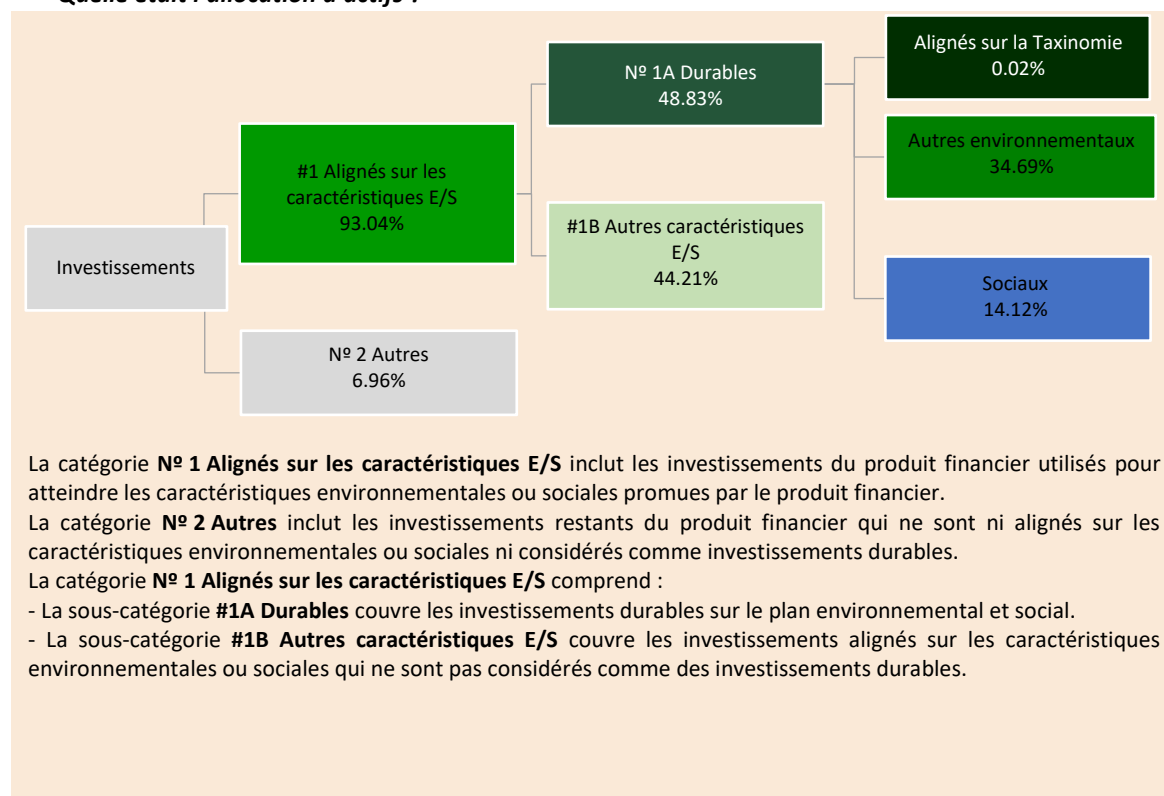

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TAIWAN SEMICONDUCTOR MANUFAC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taiwan	9.40%

<i>Liquidités</i>	<i>Liquidités</i>	<i>3.08%</i>

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.02% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Où se situe le pourcentage d'investissements alignés sur la taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **34.69%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 14.12% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice de marché large ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelle a été la performance de ce produit financier par rapport à l'indice de marché large ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un **indice de référence** est un indice qui sert à mesurer si le produit financier atteint l'objectif de durabilité.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING WORLD EQUITY

Identifiant d'entité juridique : 529900FMUS31WLI1V843

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 48.04% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EMERGING MARKETS FREE Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds.

Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle performance ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.135 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.022 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

● **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.130 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.099 (D).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

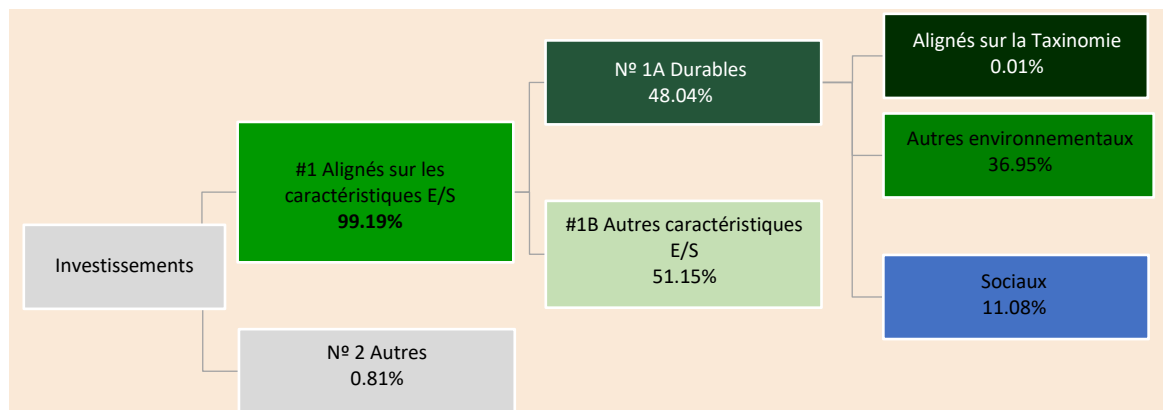

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TAIWAN SEMICONDUCTOR MANUFAC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taiwan	9.69%
TENCENT HOLDINGS LTD	Services de communication	Médias et loisirs	Îles Caïmans	5.49%
HDFC BANK LIMITED	Finance	Banques	Inde	2.27%
ALPHA BANK SA	Obligations financières	Banques	Grèce	1.83%
SAMSUNG ELECTRONICS	Technologies de l'information	Matériel technologique et équipement	Korea	1.70%
EMBRAER SA- SPON ADR	Industrie	Biens d'équipement	Brésil	1.65%
XIAOMI CORP	Technologies de l'information	Matériel technologique et équipement	Îles Caïmans	1.62%
ALIBABA GROUP HOLDING LTD	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Îles Caïmans	1.54%
GRUPO FINANCIERO BANORTE-O	Finance	Banques	Mexique	1.44%
NASPERS LTD-N SHS	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Afrique du Sud	1.38%
EMAAR PROPERTIES	Immobilier	Gestion et promotion immobilière	Émirats arabes unis	1.35%
SK HYNIX INC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Korea	1.33%
SAMSUNG ELECT-PFD	Technologies de l'information	Matériel technologique et équipement	Korea	1.24%
ALDAR PROPERTIES PJSC	Immobilier	Gestion et promotion immobilière	Émirats arabes unis	1.23%
GOLD FIELDS LTD	Matériaux	Métaux et exploitation minière	Afrique du Sud	1.18%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 48.04% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	17.44%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	11.86%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.01% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

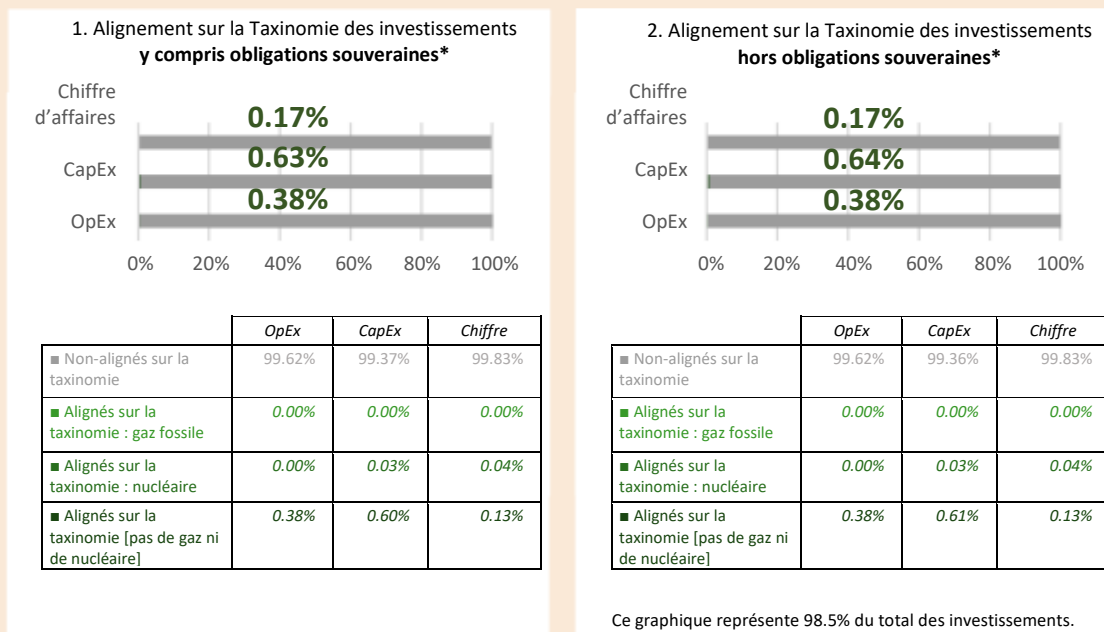

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.01% et la part d'investissements dans les activités habilitantes était de 0.10%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.02%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **36.95%** à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 11.08% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS
LATIN AMERICA EQUITY

Identifiant d'entité juridique :
529900S2PKB89W9KIR25

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 46.08% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **MSCI EM LATIN AMERICA (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.267 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **0.181 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.217 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de 0.158 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

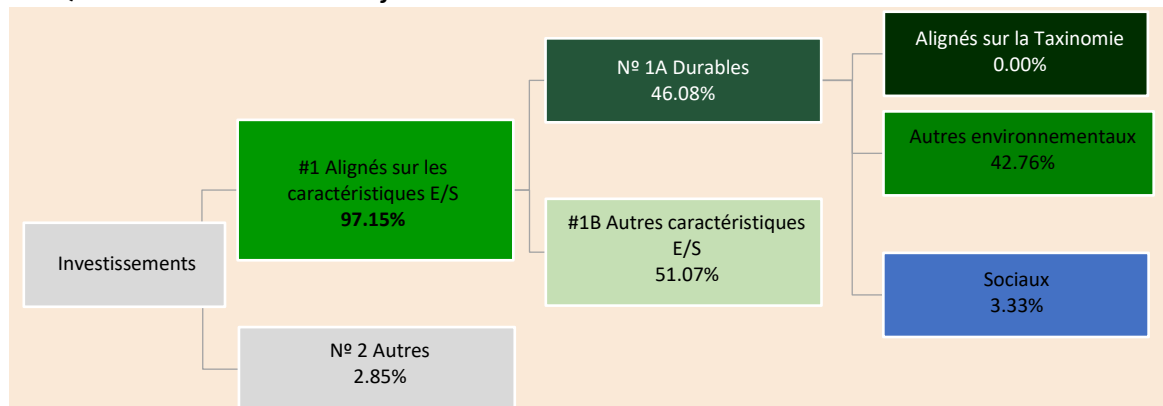

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
GRUPO FINANCIERO BANORTE-O	Finance	Banques	Mexique	6.09%
PETROBRAS SA-ADR	Énergie	Pétrole, gaz et combustibles	Brésil	4.84%
ITAUSA SA	Obligations financières	Banques	Brazil	4.43%
EMBRAER SA- SPON ADR	Industrie	Biens d'équipement	Brésil	4.35%
GRUPO MEXICO	Matériaux	Métaux et exploitation minière	Mexique	4.04%
FOMENTO ECON-ADR	Biens de consommation de base	Alimentation, boissons et tabac	Mexique	3.57%
CIA SANEAMENTO BASICO DE SP	Services aux collectivités	Services aux collectivités – eau	Brésil	3.28%
CREDICORP LTD	Obligations financières	Banques	Bermuda	2.72%
BCO BRADESCO SA-PFD	Obligations financières	Banques	Brazil	2.57%
B3 SA - BRASIL BOLSA BALCAO	Finance	Services financiers	Brésil	2.47%
NU HOLDINGS LTD/CAYMAN ISL-A	Obligations financières	Banques	Îles Caïmans	2.40%
VIBRA ENERGIA SA	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Brésil	2.08%
WALMART DE MEXICO SAB DE CV	Biens de consommation de base	Distribution et vente au détail de biens de consommation de base	Mexique	1.93%
PRIO SA	Énergie	Pétrole, gaz et combustibles	Brésil	1.93%
PETROBRAS - PETROLEO BRAS-PFD	Énergie	Pétrole, gaz et combustibles	Brésil	1.78%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 46.08% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	24.09%
Biens de consommation de base	Alimentation, boissons et tabac	9.53%
Énergie	Pétrole, gaz et combustibles	8.55%
Matériaux	Métaux et exploitation minière	7.07%
Services aux collectivités	Services aux collectivités – électricité	6.46%
Obligations financières	Services financiers	5.63%
Services aux collectivités	Services aux collectivités – eau	4.66%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les **activités alignées sur la taxinomie** sont exprimées en pourcentage :
 - **du chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - **des dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - **des dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

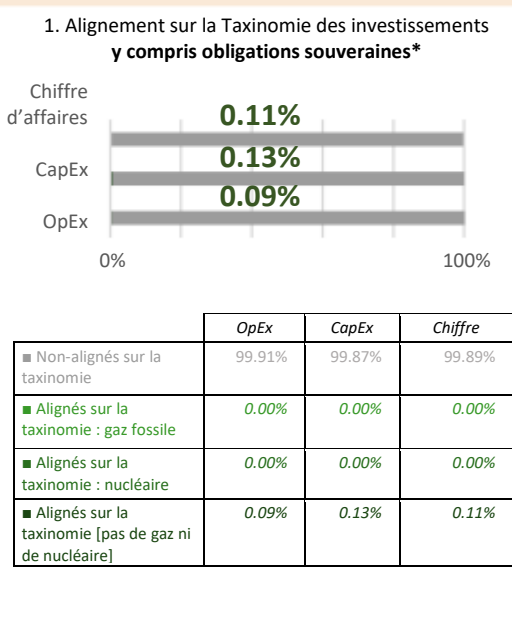

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

- **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.10% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.01%.

 sont des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

- **Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?**

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de **42.76%** à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

- **Quelle était la part d'investissements durables sur le plan social ?**

La proportion des investissements durables sur le plan social était de 3.33% à la fin de la période.

- **Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?**

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

- **Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?**

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence ?

Un **indice de référence** est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***En quoi l'indice de référence diffère-t-il de l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

- ***Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?***

Ce produit ne dispose pas d'un Indice de référence ESG.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS EQUITY CLIMATE

Identifiant d'entité juridique : 213800ZEFKN1WHE3HL26

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de <u>49.11%</u> d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment a promu les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'indice **MSCI Emerging Markets Climate Paris Aligned** (l'« Indice de référence) et de l'univers d'investissement du compartiment. Pour déterminer la note ESG du Compartiment, de l'Indice de référence et de l'univers d'investissement, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement a été défini comme l'indice **MSCI Emerging Markets**, qui n'est pas un indice de référence ESG. En outre, le Compartiment a cherché à réduire l'intensité carbone de son portefeuille en alignant l'intensité de son empreinte carbone sur celle de l'indice de référence. L'indice de référence est un indice de marché large qui évalue et inclut des composants en fonction de caractéristiques environnementales et qui est, par conséquent, aligné sur les caractéristiques environnementales promues par le Compartiment.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'indice de référence du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.367 (D)**.
- La note ESG moyenne pondérée de l'Indice de référence est **0.084 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

L'indicateur de durabilité utilisé est l'intensité de l'empreinte carbone du portefeuille, qui est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice de référence. Par conséquent, les titres présentant une empreinte environnementale relativement faible avaient une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **98.84**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **110.55**

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.324 (D.) et la note ESG moyenne pondérée de l'Indice de référence était de 0.044 (D). À la fin de la période précédente, l'intensité carbone moyenne pondérée du portefeuille était de 113.98 et l'indice de référence de l'intensité carbone moyenne pondérée était de 128.61.

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions,

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- **Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :**

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.

- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TAIWAN SEMICONDUCTOR-SP ADR	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taiwan	7.86%
AMUNDI MMST (USD)-OV	Obligations financières	Fonds communs de placement	Luxembourg	6.62%
TENCENT HOLDINGS LTD	Services de communication	Médias et loisirs	Îles Caïmans	6.52%
NASPERS LTD-N SHS	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Afrique du Sud	3.20%
MAKEMYTRIP LTD	Consommation discrétionnaire	Services aux consommateurs	Île Maurice	2.54%
INFOSYS LTD-US-ADR	Technologies de l'information	Logiciels et services	Inde	2.45%
HDFC BANK LTD-ADR	Obligations financières	Banques	Inde	2.42%
BGF RETAIL CO LTD	Biens de consommation de base	Distribution et vente au détail de biens de consommation de base	Korea	2.28%
HANA FINANCIAL HLDG	Obligations financières	Banques	Korea	2.11%
CIA SANEAMENTO BASICO DE SP	Services aux collectivités	Services aux collectivités – eau	Brésil	2.02%
GRUPO FINANCIERO BANORTE-O	Finance	Banques	Mexique	1.96%
NETEASE INC	Services de communication	Médias et loisirs	Îles Caïmans	1.90%
SAMSUNG ELECTRONICS	Technologies de l'information	Matériel technologique et équipement	Korea	1.84%
SK HYNIX INC	Technologies de l'information	Semi-conducteurs et équipement	Korea	1.62%

		pour semi-conducteurs		
INTL CONTAINER TERM SVCS INC	Industrie	Transport	Philippines	1.59%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 49.11% dans des investissements liés au développement durable.

- Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	18.59%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	11.75%
Services de communication	Médias et loisirs	9.15%
Consommation discrétionnaire	Services aux consommateurs	7.72%
Obligations financières	Fonds communs de placement	6.62%
Technologies de l'information	Matériel technologique et équipement	5.78%

<i>Biens de consommation de base</i>	<i>Distribution et vente au détail de biens de consommation de base</i>	4.78%
<i>Consommation discrétionnaire</i>	<i>Distribution et vente au détail de biens de consommation discrétionnaires</i>	4.20%
<i>Technologies de l'information</i>	<i>Logiciels et services</i>	3.94%
<i>Immobilier</i>	<i>Gestion et promotion immobilière</i>	3.72%
<i>Biens de consommation de base</i>	<i>Alimentation, boissons et tabac</i>	3.20%
<i>Services de communication</i>	<i>Télécommunications</i>	2.57%
<i>Obligations financières</i>	<i>Services financiers</i>	2.11%
<i>Services aux collectivités</i>	<i>Services aux collectivités – eau</i>	2.02%
<i>Obligations financières</i>	<i>Assurance</i>	1.65%
<i>Industrie</i>	<i>Transport</i>	1.59%

<i>Forex</i>	<i>Forex</i>	0.01%
<i>Liquidités</i>	<i>Liquidités</i>	1.80%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.07% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

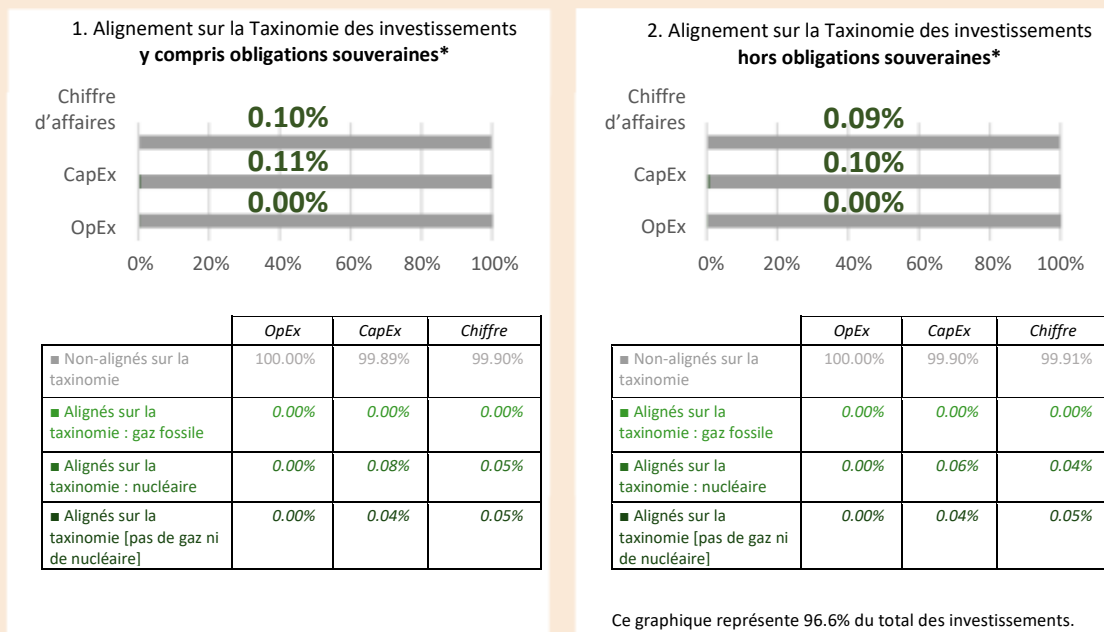

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.01%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 40.15% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une partie de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 8.90% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et les résultats atteints.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promet.

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI Emerging Markets Climate Paris Aligned. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **98.84**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **110.56**

• *En quoi l'indice de référence diffère-t-il de l'indice du marché général ?*

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales. L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

- La note ESG moyenne pondérée du portefeuille est 0.367 (D).
- La note ESG moyenne pondérée de l'Indice de référence est 0.084 (D).

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est 98.84
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est 110.56

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

L'objectif d'investissement durable est atteint en alignant les objectifs de réduction de l'empreinte carbone du fonds sur l'indice MSCI Emerging Markets Climate Paris Aligned Index. L'intensité de l'empreinte carbone du portefeuille est calculée comme une moyenne pondérée des actifs du portefeuille et comparée à l'intensité de l'empreinte carbone pondérée des actifs de l'Indice.

Par conséquent, les titres présentant une empreinte environnementale relativement faible ont une probabilité plus élevée d'être sélectionnés dans le portefeuille, comparés aux titres présentant une empreinte environnementale relativement élevée. De plus, le fonds exclut les entreprises sur la base d'un comportement controversé et/ou de produits controversés, conformément à la Politique d'investissement responsable.

- L'intensité de l'empreinte carbone moyenne pondérée du portefeuille est **98.84**
- L'intensité de l'empreinte carbone moyenne pondérée de l'Indice de référence est **110.56**

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Un indice du marché général n'évalue pas ses composantes en fonction de caractéristiques environnementales et ne les inclut pas en vertu de telles caractéristiques. Par conséquent, il ne s'aligne pas sur les caractéristiques environnementales. L'indice utilisé est un indice de référence aligné sur Paris (« Paris Aligned ») qui comporte des objectifs spécifiques liés à la réduction des émissions et à la transition vers une économie sobre en carbone à travers la sélection et la pondération de composantes sous-jacentes.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS EMERGING MARKETS EQUITY GROWTH OPPORTUNITIES

Identifiant d'entité juridique : 549300ZD1W6MTTH0G211

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 36.26% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son univers d'investissement **80% MSCI EM (EMERGING MARKETS) + 20% MSCI FRONTIER MARKETS Index**. Pour déterminer la note ESG du Produit et de l'univers d'investissement ESG, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'univers d'investissement est un univers de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.023 (D)**.
- La note ESG moyenne pondérée de l'univers d'investissement ESG est **-0.079 (D)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de 0.040 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.130 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions

et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

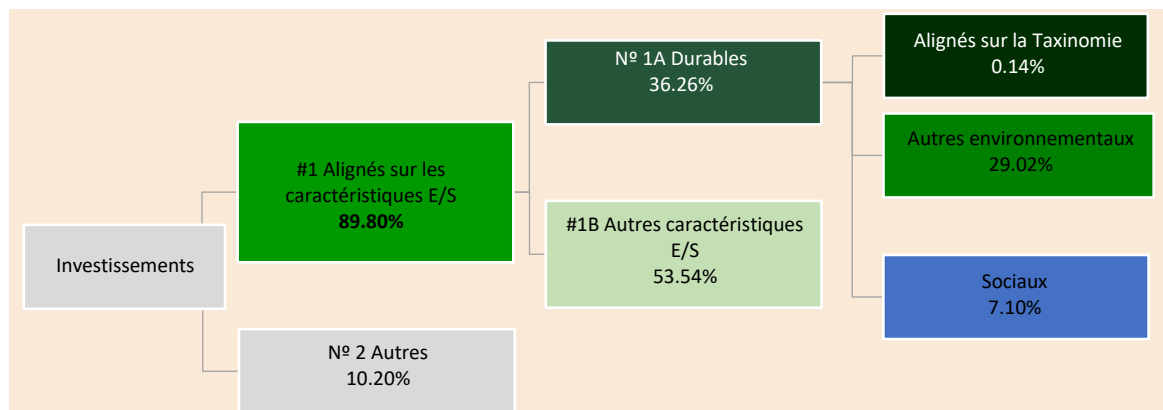

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
TAIWAN SEMICONDUCTOR MANUFAC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Taiwan	9.13%
TENCENT HOLDINGS LTD	Services de communication	Médias et loisirs	Îles Caïmans	5.10%
SK HYNIX INC	Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	Korea	2.57%
SAMSUNG ELECTRONICS	Technologies de l'information	Matériel technologique et équipement	Korea	2.31%
XIAOMI CORP	Technologies de l'information	Matériel technologique et équipement	Îles Caïmans	2.11%
CONTEMPORARY AMPEREX TECHN-A NTH- SZSE	Industrie	Biens d'équipement	Chine	2.10%
VINHOMES JSC	Immobilier	Gestion et promotion immobilière	Vietnam	1.80%
SHRIRAM FINANCE LTD	Obligations financières	Services financiers	Inde	1.77%
AXIS BANK LTD	Finance	Banques	Inde	1.76%
PIRAEUS FINANCIAL HOLDINGS S	Obligations financières	Banques	Grèce	1.63%
VINCOM RETAIL JS	Immobilier	Gestion et promotion immobilière	Vietnam	1.55%
SEA LTD-ADR	Services de communication	Médias et loisirs	Îles Caïmans	1.50%
VISHAL MEGA MART LTD	Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	Inde	1.32%
GOLD FIELDS LTD	Matériaux	Métaux et exploitation minière	Afrique du Sud	1.30%
ETERNAL LTD	Consommation discrétionnaire	Services aux consommateurs	Inde	1.27%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 36.26% dans des investissements liés au développement durable.

• **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	14.79%
Technologies de l'information	Semi-conducteurs et équipement pour semi-conducteurs	13.97%
Technologies de l'information	Matériel technologique et équipement	8.19%
Services de communication	Médias et loisirs	8.07%
Industrie	Biens d'équipement	7.59%
Consommation discrétionnaire	Distribution et vente au détail de biens de consommation discrétionnaires	7.58%
Obligations financières	Services financiers	6.13%

Liquidités	Liquidités	0.87%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.14% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

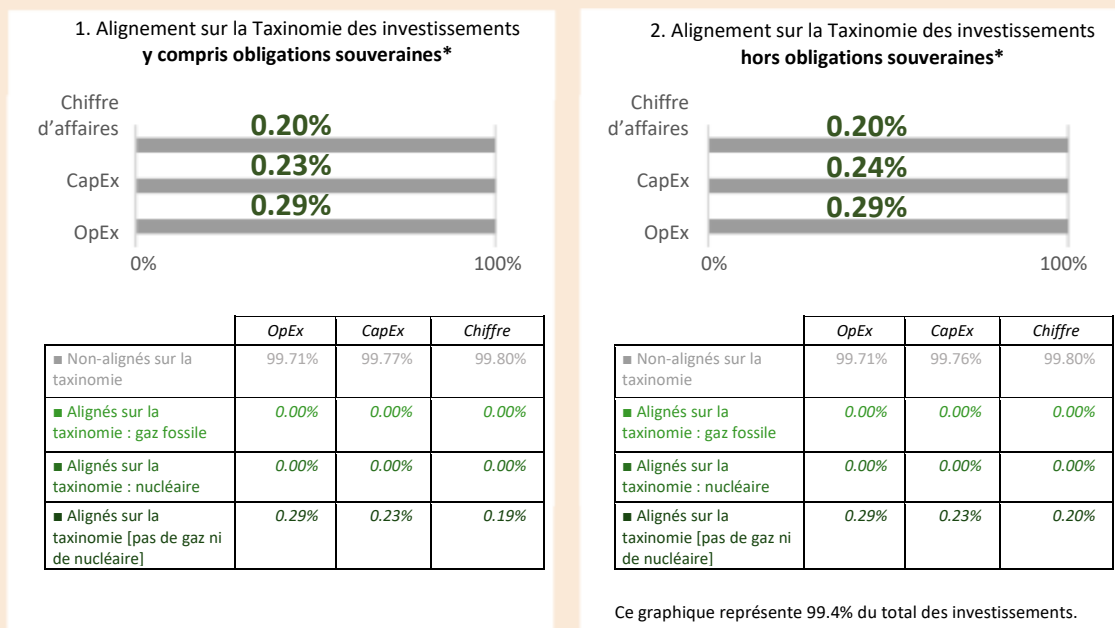

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.14%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.01%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 29.2% à la fin de la période. Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 7.10% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS RUSSIAN EQUITY

Identifiant d'entité juridique : 549300SIBXZF8M2U7K58

Caractéristiques environnementales et/ou sociales

Le compartiment n'a pas respecté l'engagement d'avoir au moins 75 % d'actifs alignés sur les caractéristiques E/S et ne s'est pas engagé à avoir un minimum d'investissements durables en raison de la suspension du calcul de la VNI dans le contexte de l'invasion de l'Ukraine par la Russie.

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?	
<input checked="" type="radio"/> <input type="radio"/> Oui	<input checked="" type="radio"/> <input type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____ <input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 8.49% d'investissements durables <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE <input checked="" type="checkbox"/> ayant un objectif social <input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Au cours de l'exercice financier, le produit n'a cessé de promouvoir les caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de son indice de référence **MSCI RUSSIA 10/40 (OFFICIAL)**. Pour déterminer la note ESG du Produit et de l'indice de référence, la performance ESG a été évaluée de manière continue en comparant la performance moyenne d'un titre par rapport au secteur de l'émetteur du titre, pour chacune des trois caractéristiques, à savoir environnementale, sociale et de gouvernance.

L'indice de référence est un indice de marché large qui n'évalue ni n'inclut pas de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui n'a par conséquent pas pour vocation d'être conforme aux caractéristiques promues par le fonds. Aucun indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affichées les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'indice de référence du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **-0.529 (E)**.
- La note ESG moyenne pondérée de l'indice de référence **-1.943 (F)**.

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.511 (E) et la note ESG moyenne pondérée de l'indice de référence ESG était de -1.862 (F).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note

ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un

critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la proportion la plus importante d'investissements du produit financier au cours de la période de référence, à savoir : du 01/07/2024 au 30/06/2025

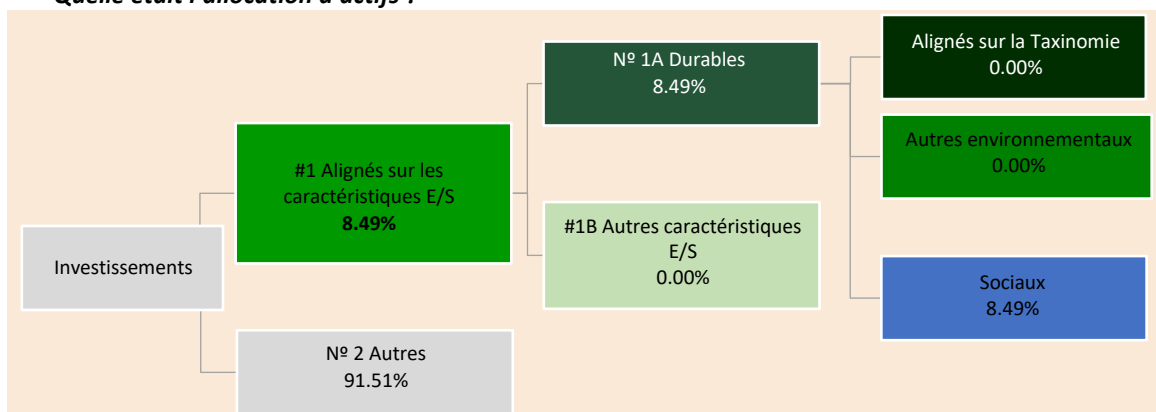

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
HALYK SAVINGS BK GDR	Obligations financières	Banques	Kazakhstan	8.40%
CIAN PLC-ADR DLST	Services de communication	Médias et loisirs	Chypre	1.07%
GAZPROM-RUB	Énergie	Pétrole, gaz et combustibles	Russia	0.00%

Quelle était la proportion d'investissements liés à la durabilité ?

Le compartiment n'a pas respecté l'engagement d'avoir au moins 75 % d'actifs alignés sur les caractéristiques E/S et ne s'est pas engagé à avoir un minimum d'investissements durables en raison de la suspension du calcul de la VNI dans le contexte de l'invasion de l'Ukraine par la Russie.

- **Quelle était l'allocation d'actifs ?**

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

- **Dans quels secteurs économiques ont été réalisés les investissements ?**

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	8.40%
Services de communication	Médias et loisirs	1.07%
Énergie	Pétrole, gaz et combustibles	0.00%
Liquidités	Liquidités	90.53%

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la Taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.00%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

Ce produit ne s'est pas engagé à réaliser d'investissements durables sur le plan environnemental au cours de la période.

Quelle était la part des investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 8.49% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisé par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS SBI FM INDIA EQUITY

Identifiant d'entité juridique : 529900VCX77NSWARZC34

Caractéristiques environnementales et/ou sociales

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause pas de préjudice important à aucun de ces objectifs et que les sociétés détenues appliquent des pratiques de bonne gouvernance.

La **taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input type="radio"/> Oui	<input type="radio"/> <input checked="" type="radio"/> X Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 38.21% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment promeut des caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'indice MSCI India 10/40. Pour déterminer la note ESG du Compartiment et de l'Indice de référence, la performance ESG est évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance. L'Indice de référence est un indice de marché large qui n'a pas évalué ni inclus de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui ne prétendait pas être en adéquation avec les caractéristiques promues par le Compartiment. Aucun Indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelles performances ont affiché les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est -0.066 (D).
- La note ESG moyenne pondérée de l'indice de référence est -0.289 (D).

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents, à savoir sa stratégie de développement du capital humain et le respect des droits de l'homme en général.
- Dimension de gouvernance : cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

À la fin de la période précédente, la note ESG moyenne pondérée du portefeuille était de -0.117 (D) et la note ESG moyenne pondérée de l'univers d'investissement ESG était de -0.38 (D).

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et

des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

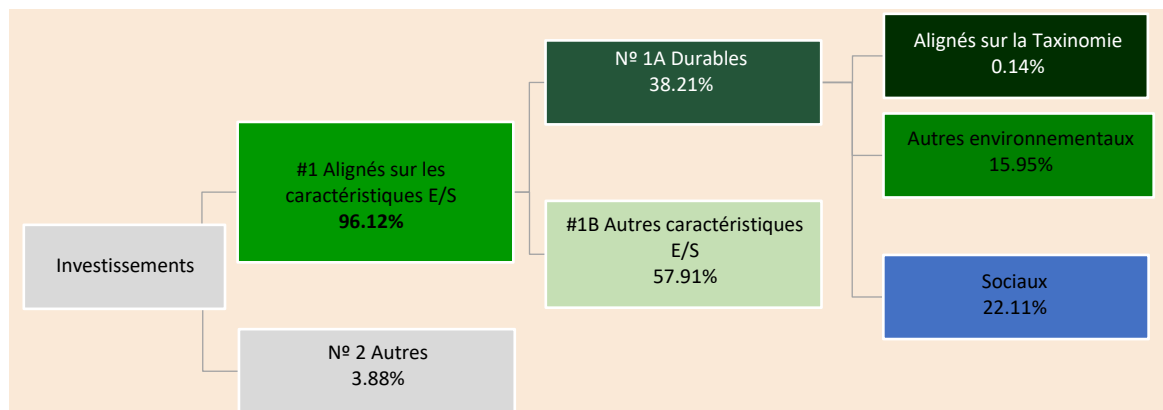

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
HDFC BANK LIMITED	Finance	Banques	Inde	9.36%
RELIANCE INDUSTRIES LTD	Énergie	Pétrole, gaz et combustibles	Inde	7.62%
ICICI BANK LTD	Obligations financières	Banques	Inde	7.50%
INFOSYS LTD	Technologies de l'information	Logiciels et services	Inde	5.07%
LARSEN & TOUBRO LTD	Industrie	Biens d'équipement	Inde	4.79%
MARUTI SUZUKI INDIA LTD	Consommation discrétionnaire	Automobiles et composants	Inde	4.03%
AXIS BANK LTD	Finance	Banques	Inde	3.57%
KOTAK MAHINDRA BANK LTD	Obligations financières	Banques	Inde	3.55%
TATA CONSULTANCY SVS	Technologies de l'information	Logiciels et services	Inde	3.44%
ULTRATECH CEMENT LTD	Matériaux	Matériaux de construction	Inde	2.43%
STATE BANK OF INDIA LTD	Obligations financières	Banques	Inde	2.30%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Le fonds promeut des caractéristiques tant environnementales que sociales. Si le fonds ne s'est pas engagé à réaliser des investissements alignés sur la Taxinomie de l'UE, au cours de la période sous revue, il a cependant investi 0.14% dans des investissements durables alignés sur la Taxinomie de l'UE. De tels investissements ont contribué aux objectifs d'atténuation du changement climatique de la taxinomie de l'UE. L'alignement des sociétés bénéficiaires d'investissements sur les objectifs de la Taxinomie de l'UE susmentionnés est évalué à l'aide du chiffre d'affaires (ou des revenus) et/ou des données d'utilisation des produits des obligations vertes.

Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?**

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxinomie de l'UE que si elles contribuent à limiter le changement climatique (« réduction du changement climatique ») et ne causent pas de préjudice important à tout objectif de la Taxinomie de l'UE. L'intégralité des critères relatifs aux activités économiques liées au gaz fossile et à l'énergie nucléaire conformes à la Taxinomie de l'UE sont définis dans le Règlement délégué (UE) 2022/1214 de la Commission.

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au **gaz fossile** incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :

- du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
- des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
- des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.52%	99.87%	99.86%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.48%	0.13%	0.14%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	99.52%	99.87%	99.86%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.48%	0.13%	0.14%

Ce graphique représente 100.0% du total des investissements.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

• **Quelle était la part d'investissements dans les activités transitoires et habilitantes ?**

Au 30/06/2025, en utilisant le chiffre d'affaires et/ou les données d'utilisation des produits des obligations vertes comme indicateur, la part d'investissements du fonds dans les activités transitoires était de 0.00% et la part d'investissements dans les activités habilitantes était de 0.14%. Le pourcentage communiqué d'alignement des investissements du fonds sur la Taxinomie de l'UE n'a pas été audité par le réviseur d'entreprises agréé du fonds ni par aucun tiers.

• **Comment se situe le pourcentage d'investissements alignés sur la Taxinomie de l'UE par rapport aux périodes de référence précédentes ?**

À la fin de la période précédente : le pourcentage d'investissements alignés sur la Taxinomie était de 0.00%.

■ sont des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental visés par le Règlement (UE) 2020/852.

Quelle était la part des investissements durables ayant un objectif environnemental qui n'étaient pas alignés sur la Taxinomie de l'UE ?

La part des investissements durables ayant un objectif environnemental et non alignés sur la taxinomie était de 15.95% à la fin de la période.

Cela tient du fait que certains émetteurs sont considérés comme investissements durables en vertu du Règlement SFDR mais qu'une portion de leurs activités n'est pas alignée sur les standards de la taxinomie de l'UE, ou que les données correspondantes ne sont pas encore disponibles en vue d'une évaluation relative à la taxinomie de l'UE.

Quelle était la part d'investissements durables sur le plan social ?

La proportion des investissements durables sur le plan social était de 22.11% à la fin de la période.

Quels investissements étaient inclus dans la catégorie « Autres », quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales ?

Sont inclus dans la catégorie « N° 2 Autres » les liquidités et autres instruments détenus aux fins de gestion de la liquidité et des risques du portefeuille. Pour les obligations et actions non notées, des garanties environnementales et sociales minimales ont été mises en place par le biais d'un filtrage des émetteurs en rapport aux activités controversées définies dans les principes du Pacte mondial des Nations unies. Elle peut également inclure des titres sans notation ESG pour lesquels les données nécessaires à la mesure de la réalisation des caractéristiques environnementales ou sociales ne sont pas disponibles.

Quelles mesures ont-elles été prises pour réaliser les caractéristiques environnementales et/ou sociales au cours de la période de référence ?

Des indicateurs de durabilité sont mis à disposition de manière continue dans le système de gestion du portefeuille pour permettre aux gestionnaires du portefeuille d'évaluer l'impact de leurs décisions d'investissement.

Ces indicateurs sont intégrés au cadre de contrôle d'AMUNDI, en répartissant les responsabilités entre le premier niveau de contrôles réalisés par les équipes Investissement elles-mêmes, et le second niveau de contrôles réalisés par les équipes Risque, qui surveillent la conformité aux caractéristiques environnementales ou sociales promues en permanence par le fonds.

En outre, la Politique d'investissement responsable d'AMUNDI définit une approche active en matière d'engagement qui promeut le dialogue avec les sociétés bénéficiaires des investissements, y compris celles qui sont incluses dans le portefeuille de ce produit. Notre Rapport annuel en matière d'engagement, disponible à la page <https://about.amundi.com/esg-documentation>, fournit des informations détaillées sur cet engagement et ses résultats.

Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?

Ce produit ne dispose pas d'un Indice de référence ESG.

- **En quoi l'indice de référence diffère-t-il de l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport aux indicateurs de durabilité pour déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice de référence ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

- **Quelles ont été les performances de ce produit financier par rapport à l'indice du marché général ?**

Ce produit ne dispose pas d'un Indice de référence ESG.

Un indice de référence est un indice qui sert à mesurer si le produit financier réalise les caractéristiques environnementales et/ou sociales qu'il promeut.

Informations périodiques pour les produits financiers visés à l'Article 8, paragraphes 1, 2 et 2a, du Règlement (UE) 2019/2088 et à l'Article 6, premier paragraphe du Règlement (UE) 2020/852

Dénomination du produit : AMUNDI FUNDS INDIA EQUITY CONTRA

Identifiant d'entité juridique : 2138003DI3YLX6A5FL63

Caractéristiques environnementales et/ou sociales

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements respectent les pratiques de bonne gouvernance.

La **Taxinomie de l'UE** est un système de classification institué par le Règlement (UE) 2020/852, qui dresse une liste d'**activités économiques durables sur le plan environnemental**. Ce règlement ne comprend pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la Taxinomie.

Le produit financier avait-il un objectif d'investissement durable ?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Oui	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> Non
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif environnemental : _____	<input checked="" type="checkbox"/> Il a promu des caractéristiques environnementales/sociales (E/S) a et, bien qu'il n'ait pas eu pour objectif l'investissement durable, il contenait une part de 38.11% d'investissements durables
<input type="checkbox"/> dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui sont considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE	<input checked="" type="checkbox"/> ayant un objectif environnemental dans des activités économiques qui ne sont pas considérées comme durables sur le plan environnemental au titre de la Taxinomie de l'UE
<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social : _____	<input checked="" type="checkbox"/> ayant un objectif social
<input type="checkbox"/>	<input type="checkbox"/> Il a promu des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été réalisées ?

Le Compartiment a promu des caractéristiques environnementales et/ou sociales en cherchant à atteindre une note ESG supérieure à celle de l'indice S&P BSE 500 Total Return (l'« Indice de référence »). Pour déterminer la note ESG du Compartiment et de l'Indice de référence, la performance ESG a été évaluée en comparant la performance moyenne d'un titre par rapport à celle du secteur de l'émetteur du titre, pour chacune des trois caractéristiques ESG, à savoir environnementale, sociale et de gouvernance. L'Indice de référence est un indice de marché large qui n'a pas évalué ni inclus de composantes en fonction de caractéristiques environnementales et/ou sociales, et qui ne prétendait pas être en adéquation avec les caractéristiques promues par le Compartiment. Aucun Indice de référence ESG n'a été désigné.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

• **Quelle performance ont affichée les indicateurs de durabilité ?**

Amundi a développé son propre processus de notation ESG interne, qui suit une approche « Best-in-class ». Les notations adaptées à chaque secteur d'activité ont pour objectif d'évaluer la dynamique dans laquelle interviennent les entreprises.

L'indicateur de durabilité employé est la note ESG du Produit mesurée en comparaison avec la note ESG de l'univers d'investissement ESG du Produit.

À la fin de la période :

- La note ESG moyenne pondérée du portefeuille est **0.111 (D)**
- La note ESG moyenne pondérée de l'indice de référence est **-0.294 (D)**

La notation ESG Amundi utilisée pour déterminer la note ESG est une note ESG quantitative qui se décline en sept niveaux allant de A (les meilleures notes de l'univers) à G (les pires notes). Sur l'échelle de notation ESG d'Amundi, les titres figurant sur la liste d'exclusion correspondent à G. Pour les entreprises émettrices, la performance ESG est évaluée de manière globale et au niveau des critères pertinents par comparaison avec la performance moyenne du secteur, en combinant les trois dimensions ESG :

- Dimension environnementale : cette dimension examine la capacité des émetteurs à contrôler leur impact environnemental direct et indirect, en limitant leur consommation d'énergie, en réduisant leurs émissions de gaz à effet de serre, en luttant contre l'appauvrissement des ressources et en protégeant la biodiversité.
- Dimension sociale : cette dimension évalue le fonctionnement d'un émetteur dans deux domaines différents : sa stratégie de développement du capital humain et le respect des droits de l'homme en général ;
- Dimension de gouvernance cette dimension évalue la capacité de l'émetteur à garantir les fondements d'un cadre de gouvernance d'entreprise efficace et à générer de la valeur sur le long terme.

La méthodologie appliquée par la notation ESG d'Amundi utilise 38 critères qui sont soit génériques (communs à toutes les entreprises, indépendamment de leur activité) soit spécifiques au secteur, et qui sont pondérés en fonction du secteur et considérés en termes d'impact sur la réputation, l'efficacité opérationnelle et les réglementations concernant un émetteur. Les notations ESG d'Amundi sont susceptibles d'être exprimées de manière globale pour les trois dimensions E, S et G, ou individuellement pour tout facteur environnemental ou social.

• **... et par rapport aux périodes précédentes ?**

C'est le premier rapport périodique SFDR produit pour ce compartiment.

• **Quels étaient les objectifs des investissements durables que le produit financier entendait partiellement réaliser, et comment l'investissement durable a-t-il contribué à ces objectifs ?**

Les objectifs des investissements durables sont d'investir dans des sociétés détenues qui cherchent à respecter deux critères :

1. suivre les bonnes pratiques environnementales et sociales ; et
2. éviter de fabriquer des produits ou de fournir des services qui nuisent à l'environnement et à la société.

Pour que la société bénéficiaire d'investissements soit réputée contribuer à l'objectif susmentionné, elle doit figurer parmi les meilleures performances de son secteur d'activité pour au moins l'un de ses facteurs environnementaux ou sociaux importants.

La définition de « meilleures performances » repose sur la méthode ESG exclusive d'Amundi, dont l'objectif est de mesurer la performance ESG d'une société bénéficiaire d'investissements. Pour être considérée comme l'une des « meilleures performances », une société bénéficiaire d'investissements doit afficher l'une des trois premières notes (A, B ou C, sur une échelle de notation allant de A à G) dans son secteur pour au moins un facteur environnemental ou social important. Les facteurs environnementaux et sociaux sont identifiés à l'échelle des secteurs. L'identification des facteurs importants est basée sur le cadre d'analyse ESG d'Amundi qui combine des données extra-financières et une analyse qualitative du secteur associé et des questions de durabilité. Les facteurs identifiés comme importants représentent plus de 10 % de la note ESG globale. Par exemple pour le secteur de l'énergie, les facteurs importants sont les suivants : émissions et énergie, biodiversité et pollution, santé et sécurité, communautés locales et droits humains. Pour un

aperçu plus complet des secteurs et des facteurs, veuillez consulter la Déclaration réglementaire ESG d'Amundi disponible sur www.amundi.lu.

Pour contribuer aux objectifs ci-dessus, la société bénéficiaire d'investissements ne doit pas avoir d'exposition significative aux activités (par ex. tabac, armes, jeux de hasard, charbon, aviation, production de viande, fabrication d'engrais et de pesticides, production de plastique à usage unique) incompatibles avec ces critères.

Le caractère durable d'un investissement est évalué au niveau de la société bénéficiaire d'investissements.

- ***Dans quelle mesure les investissements durables que le produit financier a partiellement réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?***

Pour s'assurer que les investissements durables ne causent pas de préjudice important (principe « Do no significant harm » ou « DNSH » en anglais), Amundi utilise deux filtres :

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 des normes techniques réglementaires (RTS) lorsqu'il existe des données fiables (par ex. Intensité des GES des sociétés bénéficiaire des investissements) via une combinaison d'indicateurs (par ex. intensité carbone) et des seuils ou règles spécifiques (par ex. que l'intensité carbone de la société bénéficiaire des investissements n'appartient pas au dernier décile du secteur).

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

Au-delà des facteurs de durabilité spécifiques couverts par le premier filtre, Amundi a défini un second filtre, qui ne tient pas compte des indicateurs obligatoires des Principales incidences négatives ci-dessus, afin de vérifier que la société n'affiche pas de mauvaises performances d'un point de vue environnemental ou social global par rapport aux autres entreprises de son secteur, ce qui correspond à un score environnemental ou social supérieur ou égal à E selon la notation ESG d'Amundi.

- ***Comment les indicateurs concernant les incidences négatives sur les facteurs de durabilité ont-ils été pris en considération ?***

Les indicateurs d'incidences négatives ont été pris en compte comme détaillé dans le premier filtre DNSH ci-dessus.

Le premier filtre DNSH repose sur le contrôle des indicateurs obligatoires des Principales incidences négatives de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 lorsqu'il existe des données fiables via la combinaison des indicateurs suivants et de seuils ou règles spécifiques :

- avoir une intensité en CO2 qui n'appartient pas au dernier décile par rapport aux autres entreprises du secteur (ne s'applique qu'aux secteurs à forte intensité), et
- avoir un Conseil d'administration dont le niveau de diversité n'appartient pas au dernier décile par rapport aux autres sociétés du secteur, et
- ne pas faire l'objet de controverse relative aux conditions de travail et aux droits de l'homme.
- ne pas faire l'objet de controverse relative à la biodiversité et à la pollution

Dans sa politique d'exclusion qui fait partie intégrante de sa Politique d'investissement responsable, Amundi tient d'ores et déjà compte de Principales incidences négatives spécifiques. Ces exclusions, qui s'appliquent en sus des tests détaillés ci-dessus, couvrent les sujets suivants : exclusions sur les armes controversées, les violations des principes du Pacte mondial des Nations Unies, le charbon et le tabac.

- ***Les investissements durables étaient-ils conformes aux Principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux Principes directeurs des Nations unies relatifs aux entreprises et aux droits de l'homme ? Description détaillée :***

Oui, les Principes directeurs de l'OCDE à l'intention des entreprises multinationales et les Principes directeurs des Nations unies relatifs aux entreprises et aux droits humains sont intégrés à notre méthode de notation ESG. Notre outil de notation ESG exclusif évalue les émetteurs à l'aide des données disponibles auprès de nos fournisseurs de données. Par exemple, le modèle dispose d'un critère dédié appelé « Implication dans la communauté et droits humains » qui s'applique à tous les secteurs en plus d'autres critères liés aux droits humains, y compris les chaînes d'approvisionnement socialement responsables, les conditions de travail et les relations de travail. En outre, nous

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme ainsi qu'à la lutte contre la corruption et les actes de corruption.

effectuons un contrôle des controverses au moins une fois par trimestre, y compris sur les entreprises identifiées pour des violations des droits humains. En cas de controverse, les analystes évaluent la situation, lui donnent une note (à l'aide de notre méthode de notation exclusive) et déterminent la marche à suivre. Les notes de controverse sont mises à jour chaque trimestre pour suivre les tendances et les efforts de correction.

La Taxinomie de l'UE définit un principe consistant à « ne pas causer de préjudice important » (« Do not significant harm » ou DNSH) en vertu duquel les investissements alignés sur la Taxinomie ne doivent pas causer de préjudice important aux objectifs de la Taxinomie de l'UE et s'accompagnent de critères de l'UE spécifiques.

Le principe consistant à « ne pas causer de préjudice important » ne s'applique qu'aux investissements sous-jacents du produit financier qui tiennent compte des critères de l'UE pour les activités économiques durables sur le plan environnemental. Les investissements sous-jacents de la portion restante de ce produit financier ne tiennent pas compte des critères de l'UE en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable doit également se conformer au principe consistant à ne pas causer de préjudice important aux objectifs environnementaux ou sociaux.

Dans quelle mesure ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité ?

Le produit tient compte de toutes les Principales incidences négatives obligatoires en vertu de l'Annexe 1, Tableau 1 du Règlement délégué (UE) 2022/1288 applicables à la stratégie du produit et s'appuie sur une combinaison de politiques d'exclusion (normatives et sectorielles) et d'approches d'engagement et de vote :

- Exclusion : Amundi a défini des règles d'exclusion normatives, basées sur l'activité et les secteurs, qui couvrent certains des principaux indicateurs négatifs de durabilité énumérés par le Règlement Disclosure (sur la publication d'informations).
- Intégration des facteurs ESG : Amundi a adopté des normes d'intégration ESG minimales appliquées par défaut à ses fonds de type ouvert activement gérés (exclusion des émetteurs ayant la note G et meilleure note ESG moyenne pondérée supérieure à celle de l'indice de référence applicable). Les 38 critères employés dans la stratégie de notation ESG d'Amundi ont également été conçus pour tenir compte des principaux impacts sur les facteurs de durabilité, ainsi que de la qualité de la réduction entreprise en la matière.
- Engagement : L'engagement est un processus continu et ciblé qui vise à influencer les activités ou le comportement des sociétés bénéficiaires des investissements. L'objectif des activités d'engagement peut se diviser en deux catégories : impliquer un émetteur pour améliorer la manière dont il intègre la dimension environnementale et sociale ou impliquer un émetteur pour améliorer son impact sur les questions environnementales, sociales et liées aux droits humains ou d'autres questions de durabilité qui sont importantes pour la société au sens large et l'économie mondiale.
- Vote : La politique de vote d'Amundi répond à une analyse globale de toutes les questions à long terme qui peuvent influencer la création de valeur, y compris les questions ESG importantes. Pour plus d'informations, veuillez consulter la Politique de vote d'Amundi.
- Surveillance des controverses : Amundi a développé un système de suivi des controverses qui s'appuie sur trois fournisseurs de données externes pour suivre systématiquement l'évolution des controverses et leur niveau de gravité. Cette approche quantitative est ensuite enrichie d'une évaluation approfondie de chaque controverse grave, menée par des analystes ESG, puis d'un examen périodique de son évolution. Cette approche s'applique à tous les fonds d'Amundi.

Pour de plus amples détails sur le mode de prise en compte des indicateurs relatifs aux Principales incidences négatives obligatoires, veuillez consulter la Déclaration sur la publication d'informations en matière de finance durable d'Amundi disponible sur www.amundi.com.

Quels étaient les principaux investissements de ce produit financier ?

La liste inclut les investissements qui constituent la **proportion la plus importante d'investissements** du produit financier au cours de la période de référence, à savoir : **du 01/07/2024 au 30/06/2025**

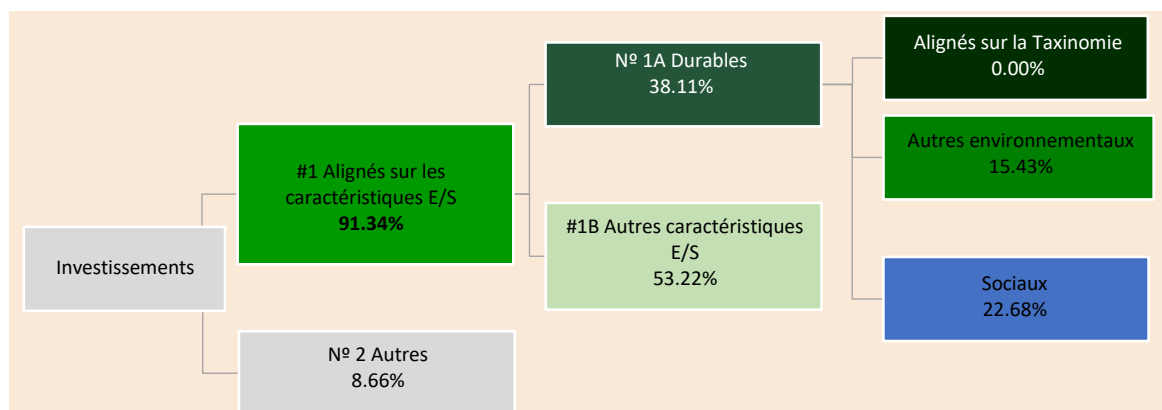

Principaux investissements	Secteur	Sous-secteur	Pays	% des actifs
RELIANCE INDUSTRIES LTD	Énergie	Pétrole, gaz et combustibles	Inde	7.11%
HDFC BANK LIMITED	Finance	Banques	Inde	7.05%
KOTAK MAHINDRA BANK LTD	Obligations financières	Banques	Inde	4.59%
NUVOCO VISTAS CORP LTD	Matériaux	Matériaux de construction	Inde	3.49%
AXIS BANK LTD	Finance	Banques	Inde	3.43%
TECH MAHINDRA LTD	Technologies de l'information	Logiciels et services	Inde	3.38%
BIOCON LTD	Santé	Pharmacie, biotechnologie et sciences de la vie	Inde	2.91%
BANK OF BARODA	Obligations financières	Banques	Inde	2.77%
MAHINDRA LIFESPACE DEVELOPER	Immobilier	Gestion et promotion immobilière	Inde	2.75%
INFOSYS LTD	Technologies de l'information	Logiciels et services	Inde	2.58%
MARUTI SUZUKI INDIA LTD	Consommation discrétionnaire	Automobiles et composants	Inde	2.36%
DALMIA BHARAT LTD	Matériaux	Matériaux de construction	Inde	2.35%
TUBE INVESTMENTS OF INDIA LT	Consommation discrétionnaire	Automobiles et composants	Inde	2.34%
BAJAJ FINSERV LTD	Obligations financières	Services financiers	Inde	2.16%
WENDT INDIA LTD	Industrie	Biens d'équipement	Inde	2.16%

Quelle était la proportion d'investissements liés à la durabilité ?

Le fonds a investi 38.11% dans des investissements liés au développement durable.

• Quelle était l'allocation d'actifs ?

La catégorie **N° 1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **N° 2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme investissements durables.

La catégorie **N° 1 Alignés sur les caractéristiques E/S** comprend :

- la sous-catégorie **N° 1A Durables** couvrant les investissements durables sur le plan environnemental et social ;
- La sous-catégorie **#1B Autres caractéristiques E/S** couvre les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

L'allocation d'actifs décrit la part des investissements réalisés dans des actifs spécifiques.

• Dans quels secteurs économiques ont été réalisés les investissements ?

Secteur	Sous-secteur	% des actifs
Obligations financières	Banques	20.57%
Énergie	Pétrole, gaz et combustibles	9.14%
Consommation discrétionnaire	Automobiles et composants	8.52%
Technologies de l'information	Logiciels et services	7.77%
Matériaux	Chimie	6.00%
Santé	Pharmacie, biotechnologie et sciences de la vie	5.88%
Matériaux	Matériaux de construction	5.84%
Obligations financières	Services financiers	4.62%

<i>Immobilier</i>	<i>Gestion et promotion immobilière</i>	4.32%
<i>Industrie</i>	<i>Biens d'équipement</i>	3.66%

<i>Autres</i>	<i>Autres</i>	-1.84%
<i>Liquidités</i>	<i>Liquidités</i>	6.78%

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la Taxinomie de l'UE ?

Au cours de la période considérée, le fonds a investi 0.00 % dans des investissements durables alignés sur la Taxinomie de l'UE.

- Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire qui sont conformes à la Taxinomie de l'UE¹ ?

Oui :

Dans le gaz fossile

Dans l'énergie nucléaire

Non

Aux fins d'observer la Taxinomie de l'UE, les critères applicables au gaz fossile incluent des limites aux émissions et le passage à une énergie entièrement renouvelable ou à des combustibles à faible teneur en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sécurité et de gestion des déchets.

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solution de remplacement sobre en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

Les activités alignées sur la taxinomie sont exprimées en pourcentage :
 - du chiffre d'affaires pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires d'investissements ;
 - des dépenses d'investissement (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple ; et
 - des dépenses d'exploitation (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements alignés sur la Taxinomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la taxinomie, le premier graphique montre l'alignement sur la Taxinomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxinomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

1. Alignement sur la Taxinomie des investissements y compris obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	100.00%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.00%	0.00%

2. Alignement sur la Taxinomie des investissements hors obligations souveraines*

	OpEx	CapEx	Chiffre
■ Non-alignés sur la taxinomie	100.00%	100.00%	100.00%
■ Alignés sur la taxinomie : gaz fossile	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie : nucléaire	0.00%	0.00%	0.00%
■ Alignés sur la taxinomie [pas de gaz ni de nucléaire]	0.00%	0.00%	0.00%

Ce graphique représente 99.8% du total des investissements

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.
