■ Troisième trimestre 2024

Le troisième trimestre s'est terminé avec un recul marqué de l'inflation, des signes de ralentissement économique et des changements dans les politiques monétaires appliquées par les banques centrales. L'économie américaine, qui avait surpris par sa résilience sur plusieurs trimestres, a commencé à montrer des signes de faiblesse. Le marché a intégré un risque de récession. L'Europe, notamment l'Allemagne, a commencé à décevoir du fait d'un manque de dynamisme se traduisant par une croissance apathique. Les marchés financiers, malgré une forte volatilité en août, ont rebondi à la fin du trimestre, soutenus par les attentes de baisse des taux d'intérêt et le plan de relance de l'économie chinoise. Ce trimestre a également été marqué par les incertitudes politiques, en particulier les élections américaines à venir, le conflit en cours en Ukraine et le risque d'une guerre totale au Moyen-Orient. L'or a atteint des chiffres records, passant la barre des 2600 \$ l'once.

États-Unis

L'économie américaine a montré des signes de ralentissement et l'inflation a continué à diminuer. L'indice des prix à la consommation (IPC) est passé de 3% en juin à 2.5% en août, en chiffres annuels, et l'indicateur PCE (Personal Consumption Expenditures) utilisé par la Réserve fédérale (Fed) a chuté à 2.2% (auparavant à 2.7% pour l'indice de base). Les prévisions indiquent un retour à l'objectif de 2% en 2025. Le principal changement a été observé sur le marché du travail, avec des chiffres de chômage pires que prévu en août et des signes de fragilité persistant en septembre. La création de postes a ralenti, tandis que les inscriptions au chômage augmentaient légèrement, créant des incertitudes concernant la solidité de l'économie américaine. En outre, la contraction du secteur manufacturier s'est poursuivie, l'indice ISM chutant à 47.2 en août, pour le cinquième mois de repli de l'activité. La consommation des ménages a également montré des signes de ralentissement, surtout imputables au recul de la confiance des consommateurs, affectés par la crainte de voir un repli du marché de l'emploi.

La tendance à la baisse de l'inflation, combinée à la détérioration du marché du travail, a convaincu la Fed de changer d'approche. Son président, Jerome Powell, a prévenu de cette situation lors du symposium de Jackson Hole. En septembre, la Fed a abaissé ses taux directeurs de 50 points de base, de 5.25% à 4.75%, confirmant son intention de soutenir l'économie et de garantir le plein emploi.

Les élections américaines du 5 novembre ajoutent une dose d'incertitude. Kamala Harris a opéré avec succès une transition en tant que successeur de Joe Biden. Elle a donné un nouvel élan à la campagne des Démocrates et se retrouve à présent au coude à coude avec Donald Trump. L'ancien président a été victime de deux tentatives d'assassinat, qui ont exacerbé les tensions dans un pays déjà profondément divisé. Les propositions des candidats, en particulier en matière de fiscalité, de réglementation économique et de politiques environnementales, sont examinées de près par les investisseurs. Les mesures environnementales avancées par Kamala Harris, ainsi que les promesses de réductions d'impôts de Donald Trump, pourraient influencer de manière déterminante la trajectoire économique du pays.

Zone euro

En Europe, le troisième trimestre a été témoin d'une consolidation de la reprise amorcée au printemps. La croissance reste toutefois modérée. Le PIB de la zone euro n'a progressé que de 0.6% en août, avec des divergences marquées entre les principales économies. Les enquêtes prévisionnelles telles que l'indice PMI HCOB (Hamburg Commercial Bank) pointent désormais vers un repli de l'activité avec une orientation négative dans les services. L'Allemagne, qui constitue la principale économie de la zone euro, continue à montrer des signes de faiblesse, avec une croissance proche de zéro et un secteur industriel mou. La Bundesbank estime que l'économie est proche de la récession. L'indice PMI manufacturier allemand a poursuivi son effondrement en août, passant de 42.4 à 40.3. La situation est plus positive en France et en Espagne, où la consommation intérieure a soutenu la croissance, surtout dans le tourisme et la consommation (avec l'aide de l'« effet JO » pour la France).

L'inflation de la zone euro a poursuivi sa tendance à la baisse, avec un taux moyen de 2.2% en août, contre 2.6% en juillet. L'inflation sous-jacente est restée stable, à 2.8%, et le secteur des services est toujours la principale source de pressions inflationnistes, tandis que les biens manufacturés et l'énergie contribuent au recul. Fin septembre, les chiffres de l'inflation en France étaient bien inférieurs aux prévisions, à 1.5% sur une base annuelle, contre 2% dans les prévisions des économistes (mesure européenne).

Dans ce contexte de faible croissance et de recul continu de l'inflation, la Banque centrale européenne (BCE) a de nouveau abaissé ses taux directeurs en septembre, réduisant le taux de dépôt de 3.75% à 3.5%. Cependant, Christine Lagarde a prévenu que l'étendue des réductions à venir dépendrait de l'évolution de l'inflation, ainsi que de la dynamique des salaires.

Marchés émergents

En Chine, les données du troisième trimestre n'ont pas été à la hauteur des attentes, la production industrielle affichant une croissance de 4.5% au lieu des 4.7% prévus en août, et les ventes au détail se sont avérées décevantes. Le marché immobilier reste au cœur du problème, avec la chute des prix et le déclin des volumes de transactions. Cette situation pèse sur la consommation et sur l'emploi. Tentant de relancer une demande intérieure en berne, Beijing a annoncé plusieurs mesures fortes fin septembre afin de stimuler le crédit hypothécaire et la consommation tout en soutenant le marché boursier chinois.

En Inde, l'activité reste dynamique, avec une croissance de 6.7% entre avril et juin, et des prévisions dépassant 6% cette année, malgré des chiffres inférieurs à ceux de l'année dernière. Les réformes économiques et la demande intérieure contribuent à cette dynamique, bien que les pressions inflationnistes persistent, en particulier dans le secteur agroalimentaire. Les autres marchés émergents ont enregistré des résultats contrastés, en particulier l'Amérique latine, où l'inflation reste un problème majeur. Au Brésil, la banque centrale veut durcir les conditions financières, contrairement aux préconisations du gouvernement.

Taux

Le troisième trimestre 2024 a marqué un tournant pour les marchés obligataires, avec le début d'un cycle de baisse des taux par les banques centrales. Aux États-Unis, les rendements obligataires ont chuté, les taux à 10 ans ayant initialement grimpé à 4.5% avant de revenir brutalement à environ 3.75%. Les rendements des bons du Trésor à 2 ans, plus sensibles aux décisions de la Fed, ont baissé de 4.8% à 3.6% entre juin et septembre. Ce mouvement a été accéléré par les données décevantes en matière d'emploi et la résurgence d'un risque de récession, le marché intégrant aux cours de nouvelles baisses de taux de la Fed. Nous observons par conséquent un raidissement des courbes de taux américaines, tandis que la Fed réduit son bilan et que le marché anticipe la baisse de ses taux directeurs.

En Europe, les mesures d'abaissement de taux ont été moins agressives, mais la tendance reste la même. Le taux allemand à 10 ans a reculé à environ 2.1%, rejoint par le taux à 2 ans, tandis que le taux français plafonnait en dessous de 3%, pénalisé par la dégradation de la note de crédit nationale, une détérioration notable du déficit de 2024 avoisinant les 6.3% du PIB et des incertitudes importantes au sujet du budget en l'absence d'un gouvernement de majorité. Les écarts de taux entre pays européens sont restés relativement stables, mais celui qui sépare la France et l'Allemagne a grimpé pour avoisiner les 80 points de base. Les marchés de crédit sont toujours volatils, bien que la performance soit positive. La qualité du bilan et le développement de marges retiennent particulièrement l'attention des investisseurs, dans un environnement économique désormais plus incertain.

Actions

Sur les marchés d'actions, le trimestre s'est caractérisé par une volatilité accrue, surtout dans le secteur des technologies. Une brève correction s'est produite début août, suite à la hausse de taux inattendue de la Banque du Japon et aux statistiques décevantes du chômage américain. Le secteur des semi-conducteurs a également subi une forte correction après les résultats de Nvidia perçus comme décevants en août, alors qu'il s'agit de l'un des piliers du secteur. En outre, des doutes émergent quant à la rentabilité des investissements massifs dans l'IA. Cependant, le S&P 500 (en USD) poursuit sa progression, soutenu par les secteurs de la santé et de la consommation de base (+20% depuis le début de l'année). Nous observons un rééquilibrage de la performance entre les différents secteurs et styles.

En Europe, l'Euro Stoxx 50 a affiché une brusque hausse, grâce à un solide rebond dans les actions des articles de luxe, stimulé à la fin du trimestre par le plan de relance de l'économie chinoise, ce qui suggère une amélioration des données de la consommation. Le secteur bancaire a poursuivi sa croissance sur le trimestre, dans un contexte de raidissement des courbes de taux. Le CAC 40 se redresse légèrement à la fin de la période, encouragé par le secteur du luxe. Le Dax 30 allemand et le FTSE 100 britannique ont terminé la période à la hausse.

Au Japon, les indices d'actions, sur lesquels ont pesé la réévaluation express du yen et le mini effondrement boursier survenu début août, suite à la hausse de taux surprise opérée par la Banque du Japon, ont terminé la période en affichant une baisse marquée. Après des mois de sous-performance et des indices enregistrant leurs niveaux les plus faibles des 5 dernières années, les actions chinoises ont très fortement rebondi fin septembre, gagnant ainsi 20% en quelques séances, suite aux annonces de la banque centrale et aux mesures de soutien du marché. De son côté, l'Inde continue à battre des records, avec une hausse notable du NIFTY 50, le principal indice d'actions indien, qui a progressé de 7.5% sur le trimestre.

■ Quatrième trimestre 2024

Le quatrième trimestre 2024 a été marqué par la victoire du camp Républicain avec Donald Trump aux États-Unis et par la croissance continue en Amérique. Cette dynamique contraste avec la faiblesse observée en Europe et en Chine. Les banques centrales ont poursuivi leurs cycles de réduction des taux tout en restant vigilantes face au risque de résurgence de l'inflation. Les risques géopolitiques sont toujours très présents. Les marchés financiers ont dans l'ensemble continué sur leurs tendances positives, et 2024 sera finalement une bonne année pour les investisseurs.

Contexte macroéconomique

États-Unis : changement politique et résilience économique

L'économie américaine a encore une fois fait preuve de résilience au quatrième trimestre, malgré certaines faiblesses persistantes. La croissance du PIB a rebondi de 2.8% au troisième trimestre, confirmant sa tendance positive pour 2024. Les principaux indicateurs, tels que l'indice ISM manufacturier, sont restés en repli, à 48.4 en novembre, reflétant un manque de dynamisme dans l'industrie, mais se sont améliorés en décembre (49.3). Toutefois, le secteur des services, qui avait jusque-là bien tenu, montre à présent des signes de faiblesse. L'indice ISM des services s'est positionné à 52.1 en novembre, en baisse par rapport au chiffre de 56 enregistré en octobre, décevant pour un consensus à 55.5. La consommation, un facteur clé de l'économie, reste solide grâce à la stabilité des revenus des ménages, mais doit faire face à des pressions inflationnistes persistantes. L'opinion des consommateurs se maintient à un niveau élevé, comme l'a montré l'indice de confiance des consommateurs du Michigan, qui a progressé de 2.8 points en décembre par rapport au mois de novembre. Sur le marché du travail, la création d'emplois a nettement dépassé les attentes, pour atteindre 227,000 postes en novembre, démontrant ainsi une remarquable résilience et contribuant aux perspectives favorables de la consommation. Le taux de chômage a toutefois légèrement augmenté, à 4.2% (en hausse de 0.1% sur la période), mais reste sous contrôle.

L'indice des prix à la consommation a cessé de chuter à la fin de l'année, grimpant à 2.6% en octobre et à 2.7% en décembre, et les pressions sous-jacentes sont restées élevées. Mais la Réserve fédérale a poursuivi sa politique de réduction progressive des taux, en abaissant son taux directeur de 0.5 point de pourcentage à 4.5% sur le trimestre. La Fed ne considère plus le marché du travail comme un facteur inflationniste et la contribution du logement comme ayant un effet différé qui s'estompera. Mais elle reste prudente car sa mesure d'inflation privilégiée, l'indice PCE de base, se maintient à 2.8%. La Fed cherche à retrouver une situation neutre, tout en surveillant le risque de retour de l'inflation avec la mise en œuvre de politiques de droits de douane et d'immigration par la nouvelle administration Trump.

Europe : faible croissance et instabilité politique

L'Europe continue à naviguer dans un environnement économique morose, marqué par l'affaiblissement de la demande extérieure, les tensions commerciales accrues, les divergences économiques internes et un contexte politique relativement instable. La dynamique de la croissance s'est améliorée avec la publication du PIB de la zone euro pour le troisième trimestre confirmant sa hausse de 0.9% en glissement annuel. Le marché du travail a continué à s'améliorer, avec un taux de chômage de 6.3% dans la zone euro. Les indicateurs avancés (HCOB) pour le secteur manufacturier dans la zone euro sont restés en repli et étaient inférieurs aux prévisions lors de leur publication à la fin de l'année. Les services ont également suscité de la déception, en s'orientant vers un ralentissement à court terme. L'Allemagne reste en récession pour la deuxième année consécutive, avec une contraction de 0.3% du PIB du troisième trimestre en glissement annuel. Le secteur industriel, pilier de l'économie allemande, fait face à une demande morose, exacerbée par les tensions commerciales avec la Chine et les États-Unis. Le secteur automobile a été particulièrement affecté et connaît une multiplication des suppressions de postes. Le gouvernement d'Olaf Scholz a perdu sa majorité, ce qui a découlé sur de nouvelles élections législatives le 23 février 2025. En France, l'« effet JO » s'est estompé, laissant la place aux incertitudes politiques. Les prévisions de déficit public continuent d'empirer, atteignant un chiffre de 6.1% du PIB en 2024. Les critiques ont été bon train contre le gouvernement Barnier, qui n'a pas réussi à faire passer le budget 2025. La dette française a finalement donné lieu à une dégradation de sa note par Moody's quelques heures après la nomination de François Bayrou en tant que Premier ministre.

Tandis que l'inflation progressait pour passer de 2% en octobre à 2.3% en novembre (variation annuelle de l'indice des prix harmonisé), la Banque centrale européenne a abaissé ses taux directeurs de 50 points de base sur le trimestre, plaçant le taux de dépôt à 3.00%. La Banque d'Angleterre a réduit son taux directeur de 25 points de base à 4.75%.

Marchés émergents :

En Chine, le gouvernement a continué à soutenir le secteur immobilier, en concentrant ses efforts sur l'assainissement des bilans des banques et des finances publiques locales. Toutefois, la faiblesse du secteur immobilier pèse toujours sur la confiance des ménages. La Chine est également confrontée au risque de déflation (inflation à 0.3% en octobre puis 0.2% en novembre, en glissement annuel) tandis que la dynamique des exportations s'essouffle et pourrait se détériorer encore davantage avec une hausse des droits de douane américains du fait du retour au pouvoir de Donald Trump. Cet environnement continue à freiner la croissance, qui sera sans doute inférieure à l'objectif de 5%.

En Inde, la dynamique économique d'ensemble reste positive (soutenue par des investissements massifs dans les infrastructures), malgré un PIB de 5.4% pour le troisième trimestre 2024, par opposition aux 6.5% prévus. Les tensions sur le marché du travail et le ralentissement observé dans certains secteurs stratégiques tels que les technologies amenuisent les perspectives de croissance.

Au Brésil, une croissance soutenue se maintient, amenant le Fonds monétaire international à relever ses prévisions pour 2024, de 2.1% à 3%. La banque centrale, face à une résurgence de l'inflation, a relevé ses taux d'intérêt de 50 points pour porter le taux SELIC à 12%.

Marchés financiers

Marchés obligataires : tendances divergentes entre les États-Unis et l'Europe

Aux États-Unis, les rendements des bons du Trésor ont poursuivi leur hausse pour atteindre 4.58% à la fin de la période. Cette tendance s'explique par la résilience de l'économie américaine et par l'anticipation d'un élargissement du déficit budgétaire dans le cadre des annonces de baisses d'impôts du futur président Donald Trump, ainsi que par le risque de retour à l'inflation en 2025. Les taux à court terme à 2 ans ont suivi une trajectoire similaire, grimpant à 4.36% en décembre, et reflétant un environnement inflationniste persistant, qui a limité le cycle de baisses de taux de la Fed.

En Europe, les disparités sont considérables, dans un contexte de recul de l'inflation plus rapide que prévu et de faiblesse de la croissance, ce qui suggère des baisses de taux supplémentaires de la part de la BCE. Les rendements des obligations allemandes à 10 ans ont reculé à 2.1%, tandis que les obligations françaises (OAT) atteignaient 2.9%, avant de remonter à 3.20% à la fin de la période. L'écart entre les obligations françaises et les obligations allemandes s'est creusé pour dépasser les 80 points de base après la motion de censure du gouvernement Barnier. En revanche, l'écart entre les taux des obligations souveraines italiennes et espagnoles, d'une part, et allemandes d'autre part, s'est resserré, entraînant un glissement de la dette française. Les taux à court terme de la zone euro sont volatils : en Allemagne, ils ont fluctué tout au long du trimestre, se stabilisant à 2.09% en décembre, tandis que les taux français terminaient le trimestre à 2.28%. Ces mouvements reflètent les ajustements face aux divergences économiques entre les États membres et la politique accommodante de la BCE.

Marchés d'actions : performances contrastées à l'échelle du globe

Aux États-Unis, les indices boursiers ont atteint de nouveaux sommets, stimulés par les attentes quant à une politique fiscale et une déréglementation favorables aux entreprises américaines, ainsi que par la performance des actions technologiques. Le S&P 500 a dépassé le seuil des 6,000 points avant de redescendre, affichant un gain en USD de 3.03% sur le trimestre. Les mégacapitalisations se sont envolées de plus de 14%, stimulant fortement le marché. Le Nasdaq, particulièrement exposé aux grandes entreprises technologiques et à l'intelligence artificielle, a surperformé, avec une progression de 6.27% (en USD). La victoire électorale des Républicains a entraîné des flux internationaux importants à destination des actions américaines. Ces performances illustrent la recherche du « Trump Trade » et le regain de confiance vis-à-vis de l'économie américaine, ainsi que l'intérêt des investisseurs pour les actions de croissance.

En Europe, les indices ont été pénalisés par les incertitudes politiques et les données économiques décevantes. L'Eurostoxx 50 a terminé le trimestre en baisse de 1.17% (en EUR). Les divergences sectorielles étaient marquées et les géants européens (les « Granolas ») ont reculé de 7.6%. Le CAC 40 a clôturé en baisse de 2.55% sur le trimestre, en conséquence de performances décevantes dans les secteurs du luxe et de l'automobile, combinées à une décote liée aux incertitudes politiques. L'indice DAX allemand, davantage exposé aux technologies et à la finance, se démarque par une performance positive notable de 3.8%.

Les chiffres figurant sur ce rapport sont historiques et ne sont pas forcément représentatifs des performances futures.

En Asie, l'indice Nikkei 225 a chuté de 5.6% (en USD) au quatrième trimestre, du fait de la volatilité du yen et du caractère imprévisible des décisions de la Banque du Japon. Le rebond des actions chinoises débuté fin septembre, après l'annonce de mesures importantes pour stabiliser le secteur immobilier, s'est poursuivi début octobre, avant de s'interrompre. Les investisseurs attendent désormais des mesures concrètes. Ce rebond illustre cependant un regain de confiance dans la capacité de Beijing à stabiliser son économie, après plusieurs trimestres de ralentissement.

Perspectives pour 2025

Le début de l'année 2025 sera défini par les politiques initiales de Donald Trump. Selon qu'il privilégie un axe fiscal (réductions d'impôts massives) et la déréglementation de certains secteurs, ou bien des politiques protectionnistes et migratoires renforcées, les implications économiques pourraient être très différentes. Dans ce contexte, les banques centrales, et notamment la Fed, resteront prudentes, tandis que les investisseurs devront faire face à des perspectives économiques incertaines et à une volatilité accrue sur les marchés financiers.

■ Premier trimestre 2025

L'économie américaine a montré des signes de faiblesse au premier trimestre 2025, tandis que la Fed maintenait ses taux inchangés face au retour des pressions inflationnistes. L'Europe a profité de cette situation, la BCE continuant à baisser ses taux directeurs, pendant que les gouvernements coordonnaient leurs efforts de relance. La Chine a également annoncé un plan visant à stimuler la consommation. Les marchés financiers ont été perturbés par la prise de fonction de Donald Trump et ses décisions parfois contradictoires. Après avoir battu des records, les indices d'actions américains se sont consolidés et ont sous-performé l'Europe et la Chine. Les taux d'intérêt à long terme ont affiché une solide performance dans la zone euro et sont restés stables aux États-Unis.

États-Unis

Après une phase presque euphorique suite à l'élection de Donald Trump, l'économie américaine a maintenu un rythme positif, mais montre clairement des signes de faiblesse, perturbée par un flot de décisions parfois contradictoires de la part de la nouvelle administration. Le mois de mars a marqué un tournant, avec une baisse de confiance des ménages, la stabilisation des salaires et une forte hausse des prévisions d'inflation.

Les indicateurs de croissance économique tels que l'indice ISM et l'indice PMI de S&P sont opposés, bien que nous ayons été témoins d'une légère amélioration dans les perspectives du secteur manufacturier à la fin du trimestre. Toutefois, la guerre commerciale déclarée par Washington réduit la visibilité dans les affaires. Le taux de chômage est resté stable, à 4.1%, mais les hausses de salaires ont ralenti, du fait d'une réduction d'effectifs des fonctionnaires fédéraux et de l'expulsion de millions de travailleurs illégaux, ce qui maintient la pression sur l'emploi peu qualifié.

Dans ce contexte incertain, la Fed procrastine, choisissant de maintenir ses taux directeurs inchangés, au grand désarroi du président Donald Trump. Toutefois, face à la volatilité sur le marché obligataire, elle a ralenti la cadence de réduction dans son bilan. La publication, fin mars, du taux d'inflation sous-jacente exprimé par le PCE, l'indice de référence privilégié de la Fed, a dépassé les attentes, à 2.8% sur une base annuelle, ce qui devrait encourager cette dernière à ne pas abaisser ses taux en avril. Les marchés anticipent de deux à trois baisses de taux au deuxième semestre 2025.

Europe

L'économie européenne fait face à des défis considérables, avec une croissance faible et des signes de ralentissement dans plusieurs pays au premier trimestre. L'indice PMI HCOB indique toujours un repli dans le secteur manufacturier, mais les perspectives s'améliorent clairement en Allemagne, où l'industrie stagne depuis la pandémie.

Les dirigeants européens ont fait preuve de cohésion face aux mesures protectionnistes des États-Unis et au risque de retrait de son aide militaire au profit de l'Ukraine. Créant un événement historique, seulement quelques jours après les élections législatives allemandes (23 février), les freins aux dépenses publiques ont été levés et le futur chancelier Friedrich Merz (CDU), soutenu par la coalition avec le SPD et les Verts, a lancé un vaste plan de redressement. Sur les 500 milliards d'euros d'investissements annoncés, 100 milliards d'euros seront consacrés à la défense, ce qui constitue un changement radical. Cette décision budgétaire sans précédent devrait soutenir la croissance potentielle de l'Allemagne et, par la même occasion, celle de la zone euro. Par conséquent, les économistes qui avaient revu leurs prévisions à la baisse en janvier les ont à nouveau relevées en mars.

L'inflation semble avoir repris sa tendance à la baisse dans la zone euro et l'indice des prix harmonisé (de février, publié en mars) est redescendu à 2.3% (contre 2.4% en janvier). L'inflation reste déterminée par les services (3.7%) mais la contribution de l'énergie est désormais faible. L'inflation sous-jacente est à présent à 2.4% et devrait atteindre 2% d'ici la fin de l'année.

Notant la tendance à la baisse de l'inflation, et malgré les risques liés à la guerre commerciale avec les États-Unis, la Banque centrale européenne (BCE) a baissé ses taux de 50 points de base sur le trimestre, le taux de dépôt passant de 3% à 2.5% dans un contexte de ralentissement dans la zone euro, tout en prévenant qu'elle restait vigilante concernant l'évolution de l'inflation.

La Banque d'Angleterre (BoE) a baissé ses taux d'intérêt de 25 pb, les ramenant ainsi à 4.5%. Cette décision fait suite aux révisions à la baisse des prévisions de croissance, la BoE diminuant ses projections pour 2025, qui passent de 1.5% à 0.75%.

Asie

L'économie japonaise a continué à montrer des signes encourageants avec une amélioration de la consommation et des exportations dynamiques (avant les droits de douane américains), sans oublier la stabilisation de l'inflation, malgré le recul de l'indice. La Banque du Japon a maintenu ses taux directeurs inchangés mais la normalisation n'est pas terminée.

Les perspectives économiques continuent de se détériorer en Chine. Les récentes données de l'indice PMI, en baisse depuis décembre, indiquent un nouvel affaiblissement de l'économie. Pour y répondre, le Congrès national du peuple a conçu des plans d'aide à l'économie via des dépenses budgétaires, le soutien monétaire et l'allocation de ressources supplémentaires à la demande intérieure. Ces décisions ont impliqué une révision à la hausse des perspectives de croissances pour 2025 et 2026. Toutefois, le risque de ralentissement au deuxième trimestre, avec une consommation médiocre et l'impact des tarifs douaniers américains, devrait encourager la PBoC à agir.

En Inde, la réduction des dépenses publiques a légèrement diminué les perspectives de croissance. L'inflation était inférieure aux prévisions en février, à 3.6%, soit une décélération par rapport aux 4.3% du mois de janvier. Ce recul est principalement imputable à un brusque ralentissement des prix de l'alimentation. La Banque de réserve de l'Inde pourrait abaisser ses taux plus vite que prévu, à partir d'avril.

Actions

Le MSCI ACWI a chuté de 2% au cours du trimestre (en USD). La rotation initiée fin 2024 en faveur de l'Europe (MSCI Europe en hausse de 10%) et de la Chine (MSCI China en hausse de 14.5%) s'est poursuivie au début de cette année, parallèlement à la consolidation des actions américaines majeures (MSCI USA en baisse de 5%). Après avoir enregistré un nouveau plafond à 6,144 points le 19 février, le S&P 500 a terminé le trimestre en baisse de 4.6% et le Nasdaq 100 perdait 8%. En revanche, les actions européennes ont affiché une performance positive. En effet, l'Eurostoxx 50 a gagné 7.2% et une nette surperformance a été observée en Allemagne, avec un indice DAX 30 en hausse de 11.3%. Une performance tout aussi positive a été relevée sur les marchés émergents (MSCI EM en hausse de 2%), sous l'impulsion de la Chine.

La sous-performance des actions américaines peut être expliquée par plusieurs facteurs : (1) un effondrement des valeurs des « Sept Magnifiques », qui ont perdu près de 16% sur le trimestre ; (2) les divergences de trajectoire entre la Fed et la BCE ; et (3) les plans de relance en Allemagne et en Chine, qui ont dopé les prévisions de bénéfices à court et à moyen termes. Enfin, les perspectives de cessez-le-feu en Ukraine pourraient diminuer la prime de risque pour les actifs européens et entraîner un repositionnement des marchés.

De plus, l'avalanche d'annonces parfois contradictoires de la part de Donald Trump génère une volatilité accrue, qui a poussé le VIX à progresser de 22% (+ 5 points). Les investisseurs ont revu leurs prévisions étant donné les nouveaux tarifs douaniers, qui ont entraîné une chute dans le secteur automobile, en particulier au Japon et en Corée (indice Nikkei en baisse de 11%). En réponse au risque de retrait des États-Unis en Ukraine, des investissements massifs dans le réarmement de l'Europe, avec notamment le plan « ReArm Europe » de 800 milliards d'euros, ont consolidé le secteur de la défense.

Obligations

Le premier trimestre a été marqué par une forte volatilité dans les taux d'intérêt, avec la hausse des taux à long terme dans la zone euro en mars, tandis que les rendements américains chutaient dans l'ensemble. Nous observons une convergence des taux à long terme.

Les rendements des bons du Trésor à 2 et 10 ans, qui avaient brusquement augmenté fin 2024, ont chuté de 36 pb chacun, terminant respectivement à 3.8% et 4.2%, les investisseurs anticipant désormais un recul de la croissance.

Dans la zone euro, la tendance à la baisse des taux d'intérêt s'est inversée, après l'annonce d'une augmentation du déficit budgétaire allemand et du fait de l'anticipation de hausse des émissions obligataires. Les taux du Bund à 10 ans ont gagné plus de 37 pb, mais l'extrémité courte est restée ancrée à 2%, dans l'attente des baisses de taux directeur de la BCE. Le raidissement des courbes de la zone euro s'est par conséquent accentué. Les écarts sont restés stables avec un rétrécissement de 11 pb pour l'écart entre l'OAT française et le Bund allemand à 10 ans.

Le crédit s'est initialement montré résilient sur cette période des taux souverains, mais les écarts ont ensuite commencé à s'élargir, en particulier pour les hauts rendements américains, avec une chute des actions et une hausse de la volatilité.

Change, or et pétrole

Le marché du change s'est révélé volatil dans le cadre des fluctuations de taux d'intérêt. La perspective d'une divergence entre la Fed et la BCE a dans un premier temps renforcé le dollar (EUR/USD 1.02), avant que l'augmentation marquée des taux allemands à long terme ne ramène l'euro à 1.08 face au dollar.

La situation géopolitique et la chute du dollar ont joué en faveur de l'or, qui a gagné 19% pour atteindre un plafond historique à 3,124 \$ l'once.

Les cours du pétrole ont chuté de 5%, dans un contexte de prévisions de hausse de la production de l'OPEP et des États-Unis, ainsi que d'une interruption dans les combats au Moyen-Orient, pour remonter ensuite, parallèlement aux nouvelles sanctions contre la Russie.

■ Deuxième trimestre 2025

Le trimestre a été marqué par la guerre commerciale déclarée par les États-Unis. Cette situation a assombri les perspectives de croissance et renforcé les craintes de voir l'inflation s'installer à nouveau. La Fed a préféré attendre de voir avant d'intervenir, contrairement à la BCE qui a poursuivi l'abaissement de ses taux directeurs. La réaction de la Chine et les revirements de Washington ont alimenté les incertitudes sur les marchés, marqués par un repli considérable du dollar et des actions, ainsi que la forte pression sur les taux d'intérêt à long terme. Les opérations militaires entre Israël / les États-Unis et l'Iran ont entraîné une forte volatilité dans les cours du pétrole. Malgré ces perturbations, les marchés se sont montrés résilients et ont bien tenu dans l'ensemble.

Contexte macroéconomique

États-Unis

L'annonce par Donald Trump le 2 avril de tarifs douaniers prohibitifs pour la majorité des partenaires commerciaux des États-Unis a constitué un choc pour les entreprises, les consommateurs et les investisseurs. Après le ralentissement sur les marchés et au niveau du dollar, la suspension de cette décision pour une période de 90 jours à partir du 9 avril a aidé à faire baisser les tensions, mais les perspectives de croissance pour l'économie américaine ont été revues à la baisse. La publication des chiffres de la croissance, avec le PIB du premier trimestre, a confirmé ce ralentissement avec une contraction de 5%. La Réserve fédérale prévoit désormais une croissance de 1.4% pour 2025. Le FMI table sur 1.8% et la Banque mondiale sur 1.4%, ce qui indique des incertitudes considérables parmi les économistes. Le nouveau budget négocié avec le Congrès, baptisé le « Big Beautiful Bill », devrait réduire les impôts de 4.5 billions de dollars et augmenter la dette nationale de 3.3 billions de dollars.

La consommation des ménages, soutenue par un marché de l'emploi toujours résilient, reste solide mais affiche des signes de faiblesse. La création nette de postes se ralentit mais le taux de chômage reste stable à 4.2%. Les indicateurs avancés (ISM1 manufacturier stable à 48.5 et ISM non-manufacturier en baisse à 49.5) confirment néanmoins une détérioration des perspectives. À la fin du trimestre, les données cycliques ont enregistré un ralentissement dans la consommation et la production industrielle. Ainsi, les ventes au détail américaines ont reculé de 0.9% en mai par rapport à avril. La production industrielle était par ailleurs quasiment stagnante en mai et les nouvelles constructions sont en baisse.

Les mesures de l'inflation ont fourni des signaux mitigés. L'indice des prix à la consommation de base pour mai s'est révélé inférieur aux attentes, à 2.4% (contre 2.5% pour les prévisions). Toutefois, l'inflation mesurée par le PCE, la jauge privilégiée de la Fed, semble se redresser à nouveau. L'inflation de base mesurée par le PCE a affiché une hausse de 2.7% en cumul annuel, contre un chiffre de 2.6% prévu par le consensus. Dans ce contexte, la Fed a décidé d'attendre la suite des événements et de maintenir ses taux directeurs inchangés, entre 4.25% et 4.50%, malgré les fortes pressions de la Maison Blanche.

Europe

L'accélération de la croissance en Europe semble contrariée par la guerre commerciale américaine, malgré une hausse sans précédent des dépenses publiques en Allemagne. La croissance du premier trimestre dans la zone euro a dépassé les prévisions, à 1.5% sur une base annuelle. Les perspectives de croissance pour 2025 ont désormais été revues à la hausse par la Banque centrale européenne (BCE) qui table sur 0.9% pour 2025. La solidité du marché du travail, avec un taux de chômage qui se situe à un plancher historique, à 6.3%, devrait stimuler la consommation et soutenir la croissance. Après la chute survenue en avril, les enquêtes montrent une bonne résilience dans la zone euro. Les perspectives du secteur manufacturier se sont stabilisées, l'indicateur PMI2 HCOB atteignant 50.2 en juin, contre un chiffre de 49.4 en mai, signalant une légère amélioration dans les commandes manufacturières. En Allemagne, l'indice ZEW a fortement progressé en juin, grimant à 22.3 points par rapport au mois de mai, pour atteindre 47.5, indiquant une amélioration des attentes, confirmée par l'indice IFO du climat des affaires. Nous observons des faiblesses en France, tandis que les perspectives s'améliorent en Allemagne. Cette détérioration des perspectives françaises a été confirmée par l'enquête trimestrielle de la Banque de France.

Le nouveau gouvernement allemand a adopté un projet de budget 2025 et des mesures budgétaires ambitieuses à moyen terme. Ces mesures se concentrent sur des réductions d'impôt pour les entreprises et soutiennent les prix de l'énergie pour les ménages et les entreprises, dans le but de doper la confiance et d'améliorer le potentiel de croissance de l'économie. Le déficit budgétaire 2025 devrait atteindre 3.2% du PIB.

Le ralentissement de l'inflation dans la zone euro a été confirmé par les données du mois de mai, avec une hausse de seulement 1.9%, le secteur des services apportant la principale contribution. La BCE a revu à la baisse ses prévisions d'inflation pour 2026 à 1.6%, puis à 2% pour 2027, et a réduit son taux de dépôt de 50 pb sur le trimestre.

Au Royaume-Uni, la Banque d'Angleterre (BoE) a maintenu le statu quo, gardant son taux directeur inchangé à 4.25%. Cependant, le ralentissement des prix de l'immobilier, couplé à la confiance des consommateurs en berne, pourrait inciter la BoE à abaisser ses taux au troisième trimestre.

Asie

Le Japon a enregistré une contraction du PIB au premier trimestre et les mouvements sont restés moroses en mai. Le PIB a baissé de 0.2% en glissement trimestriel, pénalisé par de faibles exportations. Ce chiffre ne reflète pas encore entièrement l'impact des tarifs douaniers américains. L'inflation sous-jacente s'est accélérée en avril, à 3.5% en glissement annuel (contre 3.2% en mars). Toutefois, une croissance maussade annonce une reprise très progressive. La Banque du Japon (BoJ) a maintenu son taux directeur à 0.5% du fait du ralentissement de l'économie japonaise et de l'inflation. Aucune hausse de taux imminente n'a été annoncée, sauf peut-être en janvier 2026, si le redressement cyclique est confirmé. De plus, afin de limiter la volatilité des taux à long terme, la BoJ a décidé de réduire son bilan plus lentement. Enfin, le ministre des Finances a annoncé une diminution de l'émission d'échéances très longues pour que les obligations à 30 ans subissent moins de pression.

¹ Un indice ISM au-dessus de 50% indique l'expansion de l'activité manufacturière comparé au mois précédent. Un indice ISM au-dessous de 50% suggère la contraction de l'activité manufacturière comparé au mois précédent.

² L'indice PMI® HCOB de l'activité des services en Allemagne se fonde sur une question unique, qui consiste à comparer le niveau d'activité avec celui du mois précédent. Un indice inférieur à 50.0 indique une contraction, et plus il est en dessous de 50.0, plus le taux de repli est rapide.

La guerre commerciale avec les États-Unis a affecté les perspectives économiques en Chine. L'indice Caixin du secteur manufacturier publié début juin se situait en dessous des prévisions à 48,9, anticipant une nouvelle détérioration. Le secteur des services n'a connu qu'une légère expansion. Toutefois, le déclin des prix de l'immobilier se poursuit, incitant les autorités à soutenir encore davantage le marché. Le taux de chômage officiel est stable, à 5,1%, et des ventes au détail en hausse de 6,4% ont été signalées. La déflation a cependant été confirmée. Les prix à la production ont baissé de 3,3% et les prix à la consommation ont également reculé de 0,1% pour le mois de mai. Par conséquent, la banque centrale chinoise (PBoC) a repris son assouplissement monétaire dans un contexte d'incertitude commerciale, en baissant son taux à 1 ans à 3% et son taux à 5 ans à 3,5%. En outre, l'excédent commercial est resté largement inchangé à 750 milliards de yuans en mai et le pays se fixe deux objectifs, à savoir le maintien du taux de chômage urbain à environ 5-5,5%, d'une part, et la création de 12 millions d'emplois d'ici la fin de l'année, d'autre part.

En Inde, les perspectives économiques restent solides et le HSBC composite pour juin dépassait les prévisions à 61, contre un chiffre attendu de 59,4. La chute de l'inflation persiste, celle-ci ayant atteint son niveau le plus faible sur les 6 dernières années. Elle se positionnait à 2,8% en mai en glissement annuel, contre 3,2% en avril, du fait du ralentissement dans les prix de l'agroalimentaire. L'inflation sous-jacente est aussi en baisse. Cet environnement a permis à la Banque de réserve de l'Inde (RBI) d'abaisser son taux directeur de 50 points de base. La prochaine réunion se tiendra début août et donnera lieu à l'annonce d'une pause probable dans la politique monétaire.

Marchés financiers

Actions

Les marchés des actions ont été témoins d'une extrême volatilité début avril, suite à l'annonce des tarifs douaniers, puis de leur report, mais les performances ont été positives sur le trimestre. En mai, les marchés américains ont surperformé l'Europe et l'Asie, stimulés par les bons résultats des « Sept Magnifiques ». Cette tendance a été confirmée en juin lorsque les indices américains ont affiché des plafonds historiques. Le S&P 500 a gagné 10,6% fin mars et le Nasdaq 100 a progressé de 17,6%. En revanche, dans la zone euro, l'Eurostoxx 50 n'a gagné que 1%, tiré vers le haut par le DAX 30 (en hausse de 7,9%) mais vers le bas par le CAC 40 (en baisse de 1,6%). Du côté des devises, l'euro s'est de nouveau apprécié face au dollar, de 9% sur le trimestre, portant son augmentation à 13% depuis le début de l'année. Par conséquent, lorsqu'elles étaient exprimées en euros, les performances du marché américain se sont révélées médiocres. Après avoir dépassé 50% en avril, l'indice de volatilité, le VIX, est retourné en dessous de 17% à la fin de la période, reflétant un certain regain d'optimisme. Les marchés émergents ont progressé de 11,5% en dollars. En Asie, la tendance est positive dans l'ensemble, notamment en Corée et à Taïwan. Le marché chinois est resté volatil et a terminé le trimestre en baisse d'une moyenne de 2% en dollars, du fait de l'absence de relance budgétaire.

Obligations

Le deuxième trimestre a été témoin d'une chute des taux à court terme et d'une forte volatilité sur les taux américains à long terme. Les mouvements sur les taux à court terme sont liés aux prévisions de baisses de taux de la Fed et de la BCE, au recul de l'inflation et aux perspectives de ralentissement de la croissance mondiale. La volatilité reste élevée, en particulier pour les bons du Trésor américain, et est alimentée par les incertitudes (géo)politiques et budgétaires. Aux États-Unis, le taux à 10 ans a terminé le trimestre aux environs de 4,23% à la mi-juin, après une hausse à 4,6%. Le taux à 2 ans a clôturé à 3,72%. Les investisseurs attendent un assouplissement monétaire au deuxième semestre et un ralentissement de la croissance nominale américaine. Dans la zone euro, le Bund allemand à 10 ans a atteint 2,61% et son homologue à 2 ans a chuté de 22 pb comparé à la fin de l'année (et de 19 pb par rapport à fin mars) pour atteindre 1,86%, tandis que la BCE poursuit son cycle de baisses de taux, ramenant ses taux de dépôt à 2%. Les écarts des taux souverains dans la zone euro restent stables, excepté pour l'Italie, qui a enregistré une baisse de 26 pb. Les obligations d'entreprise ont maintenu leur performance positive, surtout les obligations à haut rendement.

Change et marchandises

L'euro s'est renforcé de 9% face au dollar et a émergé comme une alternative mondiale possible à ce dernier, passant de 1,08 à 1,18 sur le trimestre. La livre sterling poursuit également son appréciation face au billet vert et a gagné près de 6,5% depuis fin mars. Le yuan reste stable, proche de 7,2 face au dollar et le yen s'est légèrement renforcé face au dollar.

L'or a confirmé son statut de valeur refuge en battant les records, avec un prix atteignant 3,450 dollars l'once en avril et en mai, et se stabilisant à 3,303 dollars l'once fin juin. L'or a gagné 25,9% depuis le début de l'année.

Le prix du baril de pétrole s'est révélé très volatil sur la période, du fait de la guerre entre Israël / les États-Unis et l'Iran. Mais le cours du pétrole a considérablement baissé sur le trimestre en conséquence de la détérioration des perspectives économiques, et surtout de la hausse des quotas de production de l'OPEP, notamment de l'Arabie saoudite. Le baril de Brent a perdu 10 \$ (en baisse de 9,5%) sur le trimestre, terminant à environ 68 \$, après avoir frôlé la barre symbolique des 60 \$ le 5 mai, soit son niveau le plus bas depuis février 2021, pour remonter à 80 \$ début juin.

Luxembourg, 28 octobre 2025

Les notes annexes font partie intégrante de ces états financiers.

1 INTRODUCTION

Amundi Funds (le « Fonds ») est organisé en société d'investissement à capital variable (SICAV) sous les lois du Grand-Duché de Luxembourg. Le Fonds, initialement dénommé Groupe Indosuez Funds FCP, est un fonds commun de placement sans personnalité morale créé le 18 juillet 1985, transformé conformément à l'article 110 (2) de la loi du 30 mars 1988 relative aux organismes de placement collectif puis renommé GIF SICAV II le 15 mars 1999. L'acte de transformation et les statuts (les « statuts ») ont été publiés au Mémorial du Recueil des Sociétés et Associations le 28 avril 1999. Le Fonds a ensuite pris la dénomination de GIF SICAV le 1^{er} décembre 1999, puis de Crédit Agricole Funds le 8 décembre 2000, et il est devenu CAAM Funds le 1^{er} juillet 2007. Le 2 mars 2010, en accord avec la décision prise par les actionnaires lors de l'assemblée générale extraordinaire tenue le 23 novembre 2009 et par décision du conseil d'administration prise le 23 décembre 2009, CAAM Funds a été renommé Amundi Funds.

Les amendements apportés aux statuts ont été publiés au Mémorial du Recueil des Sociétés et Associations, respectivement le 14 janvier 2000, le 17 janvier 2001 et le 13 juin 2007 en ce qui concerne les trois premiers changements de nom et le 3 avril 2010 en ce qui concerne le dernier en date. Un dernier amendement a été apporté aux statuts le 14 mars 2012 et a été publié au Mémorial C du Recueil des Sociétés et Associations, numéro 943 en date du 12 avril 2012. Le Fonds est régi par la partie I de la loi du 17 décembre 2010 (la « Loi 2010 ») sur les organismes de placement collectif.

Les compartiments suivants ont été lancés au cours de l'exercice :

Amundi Funds China New Energy, le 24 septembre 2024
Amundi Funds India Equity Contra, le 25 février 2025

Les compartiments suivants ont été renommés le 12 septembre 2024 :

Amundi Funds Euro Government Bond a été renommé Amundi Funds Euro Government Bond Responsible
Amundi Funds Euro Corporate Short Term Impact Green Bond a été renommé Amundi Funds Impact Euro Corporate Short Term Green Bond
Amundi Funds Absolute Return Credit a été renommé Amundi Funds Multi Sector Credit

Les compartiments suivants ont été renommés le 28 avril 2025 :

Amundi Funds European Equity ESG Improvers a été renommé Amundi Funds Europe Equity Select
Amundi Funds Euroland Equity Small Cap a été renommé Amundi Funds Euroland Equity Small Cap Select
Amundi Funds European Equity Green Technology a été renommé Amundi Funds Europe Equity Green Technology

Le compartiment suivant a été renommé le 16 mai 2025 :

Amundi Funds Target Coupon a été renommé Amundi Funds Euro Bond Income et a été dissocié en tant que fonds nourricier de son Fonds maître Amundi Revenus.

Les compartiments suivants ont été liquidés au cours de l'exercice :

Amundi Funds Global Macro Bonds & Currencies Low Vol, le 22 juillet 2024
Amundi Funds Climate Transition Global Equity, le 6 décembre 2024

Selon la confirmation du dépositaire, les soldes suivants sont présents au 30 juin 2025 pour les Compartiments liquidés, y compris ceux liquidés au cours des années précédentes :

- Amundi Funds Equity Korea : USD 11,814.03 et EUR -1,200.00
- Amundi Funds Equity Emerging Conservative : USD 20,349.81
- Amundi Funds Global Macro Bonds & Currencies : EUR 35,834.65
- Amundi Funds Climate Transition Global Equity : EUR 2,724.61 et USD 45.86
- Amundi Funds Global Macro Bonds & Currencies Low Vol : EUR 6,300.83

L'objectif d'Amundi Funds Protect 90 est de permettre une participation à l'évolution des marchés financiers tout en offrant une protection partielle permanente de votre investissement sur toute période de trois ans. Plus précisément, le Compartiment est conçu pour garantir que le prix de l'action ne descende pas en dessous de 90 % de la valeur liquidative la plus élevée atteinte depuis le dernier jour ouvré du mois d'avril précédent, conformément au prospectus.

Étant donné la part cumulée importante des titres russes et ukrainiens en portefeuille et suite à la décision du Conseil d'administration de la SICAV :

- Amundi Funds Russian Equity : le calcul de la VNI a été suspendu le 28 février 2022 et la dernière VNI officielle disponible date du 25 février 2022.

Après cette date, aucune souscription ou demande de rachat n'a été acceptée pour ce Compartiment.

- Amundi Funds Emerging Europe Middle East and Africa : la classe distincte (ISIN LU2600584523) créée le 11 avril 2023, dans laquelle ont été transférés tous les actifs et passifs russes illiquides, existe toujours.

Cette classe est encore en cours de liquidation et les souscriptions et rachats ne sont toujours pas acceptés. La totalité des frais associés restent annulés ou bien sont pris en charge par la Société de gestion. Aucune avance sur les produits de la liquidation n'a été prévue pour les actionnaires.

En référence au prospectus en date de mai 2025, le Fonds est composé de 114 compartiments en activité, chacun d'eux investissant sur un marché ou sur un groupe de marchés spécifique.

Equity Japan Target, Euroland Equity, Europe Equity Select, Euroland Equity Small Cap Select, Europe ex UK Equity, European Equity, Europe Equity Green Technology, European Equity Value, Europe Equity Income Select, European Equity Small Cap, Global Equity Responsible, Global Equity, Global Equity Select, Global Equity Income Select, Japan Equity Select, Japan Equity Value, Montpensier Great European Models SRI, Montpensier M Climate Solutions, Global Equity Climate, Europe Equity Climate, Polen Capital Global Growth, US Equity Dividend Growth, US Equity Select, US Equity Fundamental Growth, US Equity Research, US Equity Research Value, US Pioneer Fund, China New Energy, Asia Equity Focus, China A Shares, China Equity, Emerging Europe Middle East and Africa, Emerging Markets Equity Select, Emerging Markets Equity Focus, Emerging Markets Equity Focus ex China, Emerging World Equity, Equity MENA, Latin America Equity, Emerging Markets Equity Climate, Emerging Markets Equity Growth Opportunities, Russian Equity, SBI FM India Equity, India Equity Contra, Euroland Equity Dynamic Multi Factors, Euroland Equity Risk Parity, European Equity Conservative, European Equity Dynamic Multi Factors, Global Equity Conservative, Global Equity Dynamic Multi Factors, European Convertible Bond, Montpensier Global Convertible Bond, Euro Aggregate Bond, Euro Corporate Bond Select, Euro Government Bond Responsible, Euro Inflation Bond, Impact Euro Corporate Short Term Green Bond, Strategic Bond, Euro High Yield Bond, Euro High Yield Short Term Bond, Euro Subordinated Bond Responsible, Global High Yield Bond Responsible, Global Subordinated Bond, Pioneer Global High Yield Bond, US High Yield Bond, Global Aggregate Bond, Global Government Bond, Global Corporate Bond, Global Corporate Bond Select, Global High Yield Bond, Global Inflation Short Duration Bond, Global Short Term Bond, Global Bond Flexible, Impact Green Bond, Multi Sector Credit, Global Corporate Bond Climate, Optimal Yield, Optimal Yield Short Term, Strategic Income, US Corporate Bond Climate, US Bond, US Corporate Bond Select, US Short Term Bond, Asia Bond Income Responsible, China RMB Aggregate Bond, Emerging Markets Blended Bond, Emerging Markets Bond, Emerging Markets Corporate Bond, Emerging Markets Corporate High Yield Bond, Emerging Markets Green Bond, Emerging Markets Hard Currency Bond, Emerging Markets Local Currency Bond, Emerging Markets Short Term Bond, Asia Multi-Asset Target Income, Euro Multi-Asset Target Income, Global Multi-Asset, Global Multi-Asset Conservative, Global Multi-Asset Target Income, Income Opportunities, Multi-Asset Real Return, Multi-Asset Conservative Responsible, Multi-Asset Climate, Pioneer Flexible Opportunities, Real Assets Target Income, Euro Bond Income, Absolute Return Forex, Absolute Return Multi-Strategy, Absolute Return Global Opportunities Bond, Multi-Strategy Growth, Quantitative Global Absolute Return Bond, Volatility Euro, Volatility World, Protect 90, Cash EUR et Cash USD.

Dans chaque Compartiment, la SICAV peut créer et émettre des classes d'actions avec des caractéristiques et des conditions d'éligibilité des investisseurs très variées. Chaque classe d'actions est identifiée en premier lieu par l'un des intitulés principaux des classes d'actions (décrits dans le tableau ci-dessous) puis par les suffixes applicables.

Intitulé des classes (à compter du 1er juin 2019)	Investisseurs	Approbation du Conseil nécessaire	Investissement initial minimum ¹	Commission de souscription maximum ²	Commission d'échange maximum ⁴	Commission de rachat maximum
Q-A	Tous types d'investisseurs	Non ³	-	4.50%	3.00%	-
Q-D	Clients existants uniquement	Non	-	3.00%	3.00%	-
Q-F	Clients de distributeurs agréés	Non	-	-	1.00%	-
Q-H	Clients de distributeurs agréés	Oui	-	1.00%	1.00%	-

Pour obtenir une liste complète des Compartiments et classes d'actions actuellement disponibles, consultez le site Internet www.amundi.lu/amundi-funds.

¹ Aux fins d'investissement initial minimum, nous additionnons les investissements d'un investisseur donné (ou d'un groupe d'entités détenues à 100 % par la même maison mère) dans l'ensemble de la SICAV (toutes les classes d'actions et tous les Compartiments). Les minimums sont appliqués en USD ou avec le montant équivalent dans toute autre devise.

² Pour les compartiments Volatility Euro et Volatility World, ce minimum est susceptible d'aller jusqu'à 2.00% de plus, si le Conseil établit que les nouveaux investissements peuvent avoir un effet négatif sur les intérêts des actionnaires existants.

³ Pour les classes d'actions I2 et A2, l'approbation du Conseil n'est pas nécessaire.

⁴ Pour les classes d'actions A4, l'échange est possible uniquement avec des classes d'actions A4 d'un autre Compartiment de l'OPCVM.

2 PRINCIPALES CONVENTIONS COMPTABLES

■ PRÉSENTATION DES ÉTATS FINANCIERS

Les états financiers du Fonds ont été préparés conformément aux dispositions réglementaires en vigueur au Luxembourg concernant les organismes de placement collectif. Les états financiers sont présentés sur la base de la dernière valeur nette d'inventaire (« VNI ») calculée pendant la période comptable. Conformément au prospectus en date de juin 2025, les VNI ont été calculées d'après les dernières valeurs de marché et les derniers cours de change connus au moment du calcul, à savoir :

- Pour tous les Compartiments : VNI officielle au 30 juin 2025.

Dans le rapport annuel au 30 juin 2025, les Compartiments fusionnés ou liquidés au cours de l'exercice font l'objet d'une présentation séparée dans l'État des opérations et des variations de l'actif net, et ils ont été inclus dans les chiffres combinés.

Les états financiers du Fonds et de chacun de ses Compartiments ont été préparés sur la base du postulat comptable de continuité de l'exploitation.

- **Investissements entre Compartiments** - Au 30 juin 2025, les investissements réalisés par des Compartiments dans d'autres Compartiments de la SICAV s'élevaient à EUR 872,305,258.53, correspondant à 1.07% de la valeur nette d'inventaire totale. La VNI combinée totale en fin d'exercice, investissements croisés exclus, s'élevait donc à EUR 80,999,072,304.47.
- **Portefeuille-titres** - Les valeurs mobilières cotées en bourse ou sur un marché réglementé sont évaluées à leur dernier cours connu. Lorsque lesdits cours ne sont pas représentatifs ou lorsque les titres ne sont pas cotés, les valeurs mobilières sont valorisées à leur valeur probable de réalisation, déterminée avec soin et en toute bonne foi par le Conseil d'administration.
- **Conversion d'éléments exprimés dans des devises étrangères** - Les états financiers du Fonds sont exprimés en euros (EUR). En conséquence, les avoirs nets de chaque compartiment, exprimés en devise étrangère, sont convertis et combinés en euros au cours de change en vigueur à la clôture de l'exercice financier. Les coûts d'opération et d'acquisition des titres du portefeuille, exprimés en devise étrangère, sont convertis dans la devise de référence du Compartiment concerné au cours de change en vigueur à la date d'opération ou d'acquisition, le cas échéant. La valeur de marché des titres du portefeuille et des autres actifs et passifs, exprimée en devise étrangère, est convertie dans la devise de référence du Compartiment au cours de change en vigueur à la clôture de l'exercice financier. Les différences de change résultant desdites conversions sont comptabilisées à la rubrique « Réévaluation de l'actif net consolidé » dans l'État des opérations et des variations de l'actif net.
- **Retour sur investissement** - Les dividendes sont comptabilisés comme des rendements à la date où ils sont déclarés, dans la mesure où les informations afférentes peuvent être obtenues par le Fonds. Les intérêts sont courus sur une base journalière.
- **Allocation des frais et charges** - Chaque Compartiment est facturé des frais et charges qui lui sont spécifiquement imputables. Les frais et charges qui ne sont pas imputables à un Compartiment particulier sont répartis entre les Compartiments sur une base équitable, au prorata de leurs actifs nets respectifs.
- **Contrats de mise en pension** - Les contrats de mise en pension sont équivalents à des emprunts garantis par des actifs sous-jacents enregistrés dans le portefeuille du Compartiment, lequel reste exposé au risque de marché. Les contrats de prise en pension de titres (reverse repos) sont semblables à des prêts garantis. Dans ce cas, le Compartiment n'est pas exposé au risque de dépréciation de la valeur des actifs sous-jacents. Les contrats de mise en pension et de prise en pension de titres sont considérés comme des emprunts et des prêts, respectivement, du montant des liquidités reçues et/ou payées.
- **Contrats de futures** - Les contrats de futures non échus sont évalués à leur dernier cours connu à la date d'évaluation ou à la date de clôture, et les plus-values et moins-values latentes qui en résultent sont comptabilisées dans l'État de l'actif net. Les bénéfices/(pertes) nets réalisés et la variation nette des bénéfices/(pertes) non réalisés sur contrats de futures sont comptabilisés dans l'État des opérations et des variations de l'actif net.
- **Contrats d'options de type futures** - Les contrats d'options de type futures sont évalués au cours coté sur une Bourse officielle. Les dépôts de sécurité initiaux sont payés en espèces à la passation du contrat. Les flux de trésorerie positifs ou négatifs ultérieurs, appelés marges de variation, sont périodiquement payés ou reçus par le Compartiment et dépendent des changements de la valeur de marché des contrats d'options de type futures. À la clôture du contrat, le compartiment concerné enregistre un gain ou une perte réalisé équivalant à la différence entre les produits (ou les coûts) découlant de la transaction de clôture et de la transaction d'ouverture. Les plus-values et moins-values nettes non réalisées sur contrats d'options de type futures sont comptabilisées dans l'État de l'actif net. Les bénéfices/(pertes) nets réalisés et la variation nette des bénéfices/(pertes) non réalisés sur contrats d'options de type futures sont comptabilisés dans l'État des opérations et des variations de l'actif net.
- **Contrats de change à terme** - Les contrats de change à terme non arrivés à expiration sont évalués aux taux de change en vigueur à la date d'évaluation ou à la date de clôture, et les plus-values et moins-values latentes qui en résultent sont comptabilisées dans l'État de l'actif net. Les bénéfices/(pertes) nets réalisés et la variation nette des bénéfices/(pertes) non réalisés sur contrats de change à terme sont comptabilisés dans l'État des opérations et des variations de l'actif net.
- **Évaluation des options et des options sur swaps** - Les options officiellement cotées en Bourse ou sur tout autre marché réglementé qui fonctionne de manière régulière, qui est reconnu et qui est ouvert au public, sont évaluées sur la base de leur cours de clôture à la date d'évaluation ou, en l'absence de cours disponible, sur la base des derniers cours connus. Les options de gré à gré, y compris les options sur swaps, sont évaluées au prix du marché d'après les éléments définis dans les contrats correspondants. Si les derniers cours connus des options cotées ou les cours calculés pour les options de gré à gré ne sont pas représentatifs, l'évaluation s'appuiera sur la possible valeur de réalisation estimée par le Conseil d'administration de la SICAV, avec prudence et en toute bonne foi. Les bénéfices/(pertes) nets réalisés et la variation nette des bénéfices/(pertes) non réalisés sur options de gré à gré et options sur swaps sont comptabilisés dans l'État des opérations et des variations de l'actif net.
- **Swaps** - Le Fonds est autorisé à contracter des swaps de variance, des credit default swaps, des swaps sur rendement total, d'inflation, d'actif, de taux d'intérêt ou de devises. Ces swaps sont comptabilisés à la valeur de marché d'après l'évaluation des éléments définis dans les contrats. Le bénéfice net non réalisé est inclus à la rubrique « Plus-value nette non réalisée sur swaps et CFD » de l'État des actifs nets, et la perte nette non réalisée est incluse à la rubrique « Moins-value nette non réalisée sur swaps et CFD » de l'État de l'actif net. Les bénéfices/(pertes) nets réalisés et la variation nette des bénéfices/(pertes) non réalisés sur swaps sont comptabilisés dans l'État des opérations et des variations de l'actif net.
- **Instruments du marché monétaire** - Le marché monétaire couvre des instruments financiers qui présentent une grande liquidité et des échéances très courtes. Il est utilisé par les opérateurs comme moyen pour emprunter et prêter à court terme, avec des échéances généralement comprises entre 24 heures et un peu moins d'un an. Pour les instruments monétaires, l'accroissement (différence entre le coût et la valeur amortie) est comptabilisé à la rubrique « Variation nette de la plus ou moins-value non réalisée sur les placements et sur les dettes dérivés de contrats de prise en pension » dans l'État des opérations et des variations de l'actif net pour les titres détenus en fin d'exercice. Si les instruments ont été vendus ou remboursés, ce résultat est comptabilisé en « Bénéfice/(perte) net(te) réalisé(e) sur vente de titres » dans l'État des opérations et des variations de l'actif net.
- **Titres TBA (To Be Announced)** Les positions TBA font référence à la pratique de négociation courante sur le marché des titres adossés à des créances hypothécaires selon laquelle un titre est acheté à partir d'un groupe de crédits hypothécaires (par ex. Ginnie Mae, Fannie Mae ou Freddie Mac) pour un prix fixe à une date future. Au moment de l'achat, le titre en question n'est pas précisément connu, seules ses principales caractéristiques sont spécifiées. Bien que le prix ait été déterminé au moment de l'achat, la valeur principale n'a pas encore été fixée. Les positions TBA sont indiquées dans le portefeuille de titres. L'achat de ce type de titres n'a pas été réglé et, par conséquent, le montant correspondant à la dette due au moment du règlement de la transaction figure à la rubrique « Dettes à payer aux courtiers » dans l'État de l'actif net. Les bénéfices/(pertes) réalisés sur les titres TBA et les variations de la plus- ou moins-value non réalisée sont comptabilisés dans l'État des opérations et des variations de l'actif net, respectivement aux rubriques « Bénéfice/(perte) net(te) réalisé(e) sur vente de titres » et « Variation nette de la plus- ou moins-value non réalisée sur les placements et sur les dettes dérivés de contrats de prise en pension ». Risque lié aux MBS / ABS Les titres adossés à des créances hypothécaires et les titres adossés à des actifs (MBS et ABS) comportent en général un risque de remboursement anticipé et de prolongement et peuvent aussi comporter des risques de liquidité, de crédit et de taux d'intérêt supérieurs à la moyenne.

- **Bénéfice/(perte) net(te) réalisé(e) sur vente de titres** - Le montant de la rubrique « Bénéfice/(perte) net(te) réalisé(e) sur vente de titres » de l'État des opérations et des variations de l'actif net reflète la différence entre le coût et le produit des titres vendus, en tenant compte des impacts liés au marché et à la devise.
- **Coûts de transactions** - Les coûts de transaction comprennent les frais de courtage et les frais facturés par le dépositaire pour les opérations sur titres et les opérations sur produits dérivés. Les coûts d'opération sont exclus des coûts d'achat et de vente relatifs aux titres et aux produits dérivés. Tous ces frais sont comptabilisés à la rubrique « Frais de courtage et de transaction » dans l'État des opérations et des variations de l'actif net. Voir note 23 qui décrit les frais de réception et transmission d'ordres.
- **Contrats sur différence (CFD)** - À chaque date d'évaluation, la différence de cours entre le cours d'ouverture et le prix courant du marché du titre ou de l'indice sous-jacent vis-à-vis du contrat sur différence (CFD, de l'anglais Contract for difference) est enregistrée à la valeur de marché (gain ou perte non réalisé) du contrat ; lorsque le compartiment réalise une transaction de clôture, la différence entre le montant notionnel d'ouverture et le montant notionnel de clôture du titre sous-jacent est comptabilisée comme gain ou perte réalisé aux rubriques Bénéfice/(perte) net(te) réalisé(e) sur swaps et sur CFD dans l'État des opérations et des variations de l'actif net. Les dépôts de sécurité peuvent être effectués en espèces à la passation du contrat sur différence. Les paiements ultérieurs, appelés marges de variation, sont périodiquement versés ou reçus par le compartiment et dépendent des changements de la valeur de marché des contrats sur différence en cours.
- **Prêt de titres** - Dans les transactions de prêt et d'emprunt de titres, un prêteur transfère des titres ou instruments financiers à un emprunteur, sous réserve que l'emprunteur s'engage à restituer des titres ou instruments financiers équivalents à une date future ou au moment demandé par le prêteur. L'emprunteur doit fournir une garantie, qui se prolonge tout au long de la période de prêt et est au minimum équivalente à l'évaluation globale des titres prêtés, majorée de toute marge de sécurité jugée appropriée en fonction de la qualité de la garantie.

3 COURS DE CHANGE UTILISÉS AU 30 JUIN 2025

Les cours de change utilisés pour établir les données consolidées sont les suivants :

1 JPY = 0.005898 EUR
1 USD = 0.851898 EUR

4 COMMISSIONS DE GESTION, D'ADMINISTRATION ET DE DISTRIBUTION

Structure des frais - La commission d'administration est exprimée en pourcentage de la VNI des Compartiments et des classes d'actions et couvre toutes les dépenses administratives du Fonds.

Ces dépenses comprennent la rémunération de l'agent administratif, de l'agent domiciliaire, de l'agent de transfert et de l'agent de registre pour les services rendus au Fonds, la rémunération du dépositaire pour les services rendus au Fonds ainsi que toutes les autres dépenses administratives encourues dans l'exercice de l'exploitation du Fonds, incluant, cette liste n'étant pas limitative :

- les honoraires des auditeurs et conseillers juridiques du Fonds (y compris les frais relatifs aux obligations de conformité légales et statutaires) ;
- les frais de traduction, d'impression et de distribution aux investisseurs relatifs aux rapports annuels et semestriels, au prospectus du Fonds et au Document d'information clé de chaque classe d'actions et à tous les suppléments y afférents ainsi qu'à toute notification envoyée aux investisseurs ;
- tous les frais d'information des actionnaires, y compris les frais liés à la publication du cours des actions dans la presse financière et à la production d'éléments d'information à l'attention des souscripteurs et des distributeurs ;
- tous les frais et charges engagés dans l'immatriculation et la maintenance de l'immatriculation du Fonds auprès d'une autorité compétente ou d'une Bourse, à des fins de conformité aux obligations réglementaires, et le remboursement desdits frais et charges encourus par tout représentant local ;
- les frais de tout représentant ou correspondant local dont les services sont requis par la législation en vigueur ;
- les frais liés à toutes mesures exceptionnelles, parmi lesquelles toutes expertises ou procédure judiciaire visant à protéger les intérêts des actionnaires ;
- les frais liés à la traduction, distribution et publication de tout avis aux actionnaires.

La commission d'administration est payée à terme échu à Amundi Luxembourg S.A. selon une fréquence déterminée par la Société de gestion et calculée quotidiennement pour chaque Compartiment et classe d'actions.

Les commissions de gestion, exprimées en pourcentage de la VNI, sont payées à terme échu à Amundi Luxembourg S.A., selon une fréquence déterminée par la Société de gestion, et calculées quotidiennement pour chaque Compartiment d'après la VNI quotidienne de chaque classe d'actions.

Amundi Luxembourg S.A. est chargée de verser les commissions aux Gestionnaires des investissements.

En plus des commissions de gestion versées par le Fonds à Amundi Luxembourg S.A., certains Compartiments investissent une partie de leurs avoirs dans d'autres OPC et sont ainsi soumis aux commissions de gestion appliquées à ces Compartiments, sauf pour les investissements entre Compartiments.

Les commissions de distribution sont calculées et cumulées chaque Jour de transaction aux taux annuels établis ci-dessous, et sont payées à terme échu à Amundi Luxembourg S.A., selon une fréquence déterminée par la Société de gestion. Amundi Luxembourg S.A. est chargée de verser ces frais aux distributeurs.

En outre, la société de gestion peut décider de verser une rémunération aux distributeurs sur ses propres frais.

Les commissions de gestion, d'administration et de distribution, exprimées en pourcentage de la VNI et applicables au 30 juin 2025, correspondent aux taux maximums établis sur le site www.amundi.lu/Amundi-Funds, excepté pour les Compartiments Amundi Funds Cash EUR et Amundi Funds Cash USD, pour lesquels les taux annuels ci-dessous sont appliqués :

Les taux de commission de gestion et de commission d'administration appliqués aux Compartiments ci-dessus ont été modifiés au cours de l'année.

À la suite de la suspension du calcul de la valeur nette d'inventaire d'Amundi Funds Russian Equity, Amundi Luxembourg S.A. a décidé de renoncer à ses frais de gestion. Cette renonciation s'applique également à la classe d'actions séparée (ISIN LU2600584523) d'Amundi Funds Emerging Europe Middle East and Africa, à laquelle tous les actifs et passifs russes illiquides ont été transférés.

Conformément à l'article 46(3) de la Loi du 17 décembre 2010, les taux de commission de gestion pour les fonds sous-jacent de Amundi Funds Protect 90 dont le garant fait partie du Groupe Crédit Agricole, sont les suivants :

	Taux annuel

5 COMMISSIONS DE PERFORMANCE

Les commissions de performance sont calculés séparément pour chaque classe d'actions. Ils sont cumulés chaque jour, déduits et payés annuellement pour chaque classe d'actions. Les frais de performance de chaque Compartiment sont calculés en comparant la VNI de la classe d'actions correspondante avec l'indicateur de référence.

Le mécanisme appliqué est détaillé sur le site Internet www.amundi.lu/Amundi-Funds

Les Compartiments et les Classes d'actions faisant l'objet d'une commission de performance sont répertoriés sur le site Internet www.amundi.lu/Amundi-Funds.

Pour toutes les classes autorisées à Hong Kong, veuillez noter qu'aucune commission de performance n'est appliquée.

Les commissions de performance sont incluses sous la rubrique « Commissions de performance » dans l'État des opérations et des variations de l'actif net et figurent également dans la section (non audité) Règlement des commissions de performance.

6 FISCALITÉ DU FONDS

Taxe d'abonnement

Par ailleurs, le Fonds est redevable au Luxembourg d'un impôt de 0.05% par an relativement aux Compartiments en actions, aux Compartiments obligataires, aux Compartiments multi-actifs, aux Compartiments protégés et aux Compartiments à rendement absolu (à l'exception des investissements réalisés par lesdits Compartiments dans d'autres organismes de placement collectif établis au Luxembourg et déjà assujettis à la *taxe d'abonnement* en vertu de la loi, et de 0.01% par an relativement aux Compartiments en liquidités et aux classes d'actions H, I, J, M, O, OR, SE, X et Z de tous les Compartiments (« Taxe d'abonnement »), ledit impôt étant dû trimestriellement sur la base de la VNI du Fonds à la fin du trimestre calendaire correspondant.

Le bénéfice de la taxe d'abonnement de 0.01% par an est accessible aux actionnaires admis aux classes d'actions H, I, J, M, O, OR, SE, X ou Z au titre des dispositions légales, réglementaires et fiscales du Luxembourg dont le Fonds a connaissance au moment de l'admission d'un investisseur auxdites classes d'actions.

Il ne peut cependant être donné aucune garantie pour le passé ni pour le futur, et l'éligibilité des investisseurs est sujette à l'interprétation, de temps à autre, de toute autorité compétente au sujet du statut d'un investisseur éligible aux classes H, I, J, M, O, OR, SE, X ou Z. Ladite reclassification effectuée par une autorité compétente en ce qui concerne le statut d'un investisseur pourrait exposer l'intégralité de la classe d'actions à un taux de taxe d'abonnement de 0.05% par an.

Fiscalité indienne

Chaque compartiment peut être soumis à l'impôt sur les sociétés dans certains pays dans lesquels il investit. Les plus-values réalisées lors de la cession de titres indiens détenus par un compartiment sont soumises à l'impôt sur les plus-values en Inde, lequel est indiqué dans l'« État des opérations et des variations de l'actif net » sous la rubrique « Impôts ». L'impôt est calculé sur les gains nets réalisés, et les pertes nettes réalisées excédant les gains à la fin de l'exercice fiscal indien peuvent, sous certaines conditions, être reportées pendant jusqu'à 8 exercices fiscaux consécutifs pour compenser de futurs gains. À cet égard, les moins-values à court terme (c'est-à-dire lorsque les actions sont détenues pendant moins de 12 mois) peuvent être imputées sur des plus-values à court ou à long terme, tandis que les moins-values à long terme ne peuvent être imputées que sur des plus-values à long terme. Le droit fiscal indien impose un impôt de ^{**2 %**}^{**1} (plus surtaxe et prélèvements pour la santé et l'éducation) sur les gains nets réalisés lors de la vente de titres indiens dans l'année suivant leur acquisition, et un impôt de ^{**12,5 %**}^{**2} (plus surtaxes) si les titres sont vendus après une détention de plus de 12 mois. Cet impôt de 12,5 % sur les plus-values à long terme sur titres indiens est en vigueur depuis le 1er avril 2018.

La décision de comptabiliser des provisions fiscales indiennes est définie pour chaque compartiment dans le cadre d'une procédure détaillée.

Le cas échéant, des provisions quotidiennes sont enregistrées dans les comptes du compartiment et présentées dans la rubrique « Autres passifs » de l'État de l'actif net.

¹ 15 % jusqu'au 15 août 2024

² 10 % jusqu'au 15 août 2024

7 AUTRES REVENUS

Les montants des autres revenus figurant dans l'État des opérations et des variations de l'actif net comprennent principalement le produit des prêts de titres et les reprises sur provisions relatives aux commissions de performance.

8 AUTRES DÉPENSES

Les autres dépenses figurant dans l'État des opérations et des variations des actifs nets comprennent principalement les autres impôts et les coûts des prêts de titres. Les montants des autres dépenses dans l'État des opérations et des variations de l'actif net des Compartiments Amundi Funds Emerging Markets Equity Select, Amundi Funds Emerging Markets Equity Focus, Amundi Funds Emerging World Equity, Amundi Funds SBI FM India Equity, Amundi funds India Equity Contra, Amundi Funds Emerging Markets Blended Bond et Amundi Funds Multi-Asset Climate incluent principalement les paiements de taxes indiennes.

9 CONTRATS DE PRISE EN PENSION

Pendant l'exercice se terminant le 30 juin 2025, certains Compartiments ont souscrit des contrats de prise en pension, dont le montant est indiqué ci-dessous dans la devise du compartiment correspondant, et par lesquels ils prêtent à des établissements financiers une certaine somme assortie d'une garantie. Au 30 juin 2025, les prêts accordés en vertu desdits contrats sont garantis par les actifs sous-jacents suivants :

Les pays des contreparties sont répertoriés conformément à la norme ISO 3166-1.

Le montant correspondant à des titres « Investment grade » fait référence à des obligations notées au moins BBB- par S&P ou Baa3 par Moody's.

Voir la note 17 pour plus d'informations sur les garanties.
