Classe I - Code ISIN : (C) FR0007477146

OPCVM de droit français géré par Amundi Asset Management, société de Amundi

Objectifs et politique d'investissement

Classification AMF ("Autorité des Marchés Financiers") : Obligations et autres titres de créance internationaux

En souscrivant à AMUNDI GLOBAL MACRO 2 - I, vous investissez dans des titres obligataires internationaux et sur les marchés de devises, au travers d'AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR.

En effet, votre investissement est réalisé en quasi-totalité dans le compartiment AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR d'Amundi Funds, SICAV de droit Luxembourgeois, et accessoirement en liquidités.

L'objectif de votre fonds est de réaliser une performance supérieure à celle de l'indice €STR capitalisé quotidiennement sur un horizon de placement minimum d'un an, après prise en compte des frais courants, et dans le respect d'un budget de risque mesuré en volatilité.

La performance de AMUNDI GLOBAL MACRO 2 - I peut être inférieure à celle de AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR en raison notamment de ses propres frais.

La stratégie de votre fonds est identique à celle d'AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR, à savoir :

"L'objectif du Compartiment est de réaliser une performance annuelle supérieure à celle de l'indice €STR capitalisé quotidiennement.

Pour atteindre cet objectif, le Compartiment investit dans tous les types d'instruments de dette, d'instruments financiers dont la valeur et les paiements de revenus sont liés à et garantis (ou « adossés ») par un panier spécifique d'actifs sous-jacents (« titres adossés à des actifs »), de fonds d'investissements à hauteur de 10 % de son actif net, de liquidités et/ou de dépôts, tout en s'exposant aux devises de l'OCDE. Il combine plusieurs techniques et stratégies d'analyse visant à générer une performance indépendante des tendances du marché. L'emploi de produits dérivés fera partie intégrante de la politique et des stratégies d'investissement du Compartiment à des fins d'arbitrage, de couverture et/ou de surexposition. La gestion active de ce Compartiment peut entraîner des frais de transaction significatifs qui auront un impact sur la performance."

L'OPC est géré activement. L'indice est utilisé à posteriori comme indicateur de comparaison des performances. La stratégie de gestion est discrétionnaire et sans contrainte relative à l'indice.

Le résultat net et les plus-values nettes réalisées du fonds sont systématiquement réinvestis chaque année.

Vous pouvez demander le remboursement de vos parts chaque jour, les opérations de rachat sont exécutées de façon quotidienne.

Recommandation : ce fonds pourrait ne pas convenir aux investisseurs qui prévoient de retirer leur apport avant 1 an.

Les dispositions en matière de souscription/rachat d'AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR, dans lequel est investi votre fonds, sont expliquées dans la partie Conditions de souscriptions et de rachats du prospectus d'AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR.

Les risques importants pour l'OPCVM non pris en compte dans l'indicateur sont :

- Risque de crédit : il représente le risque de dégradation soudaine de la qualité de signature d'un émetteur ou celui de sa défaillance.
- Risque de liquidité : dans le cas particulier où les volumes d'échange sur les marchés financiers sont très faibles, toute opération d'achat ou vente sur ces derniers peut entraîner d'importantes variations du marché.
- Risque de contrepartie : il représente le risque de défaillance d'un intervenant de marché l'empêchant d'honorer ses engagements vis-à-vis de votre portefeuille.
- L'utilisation de produits complexes tels que les produits dérivés peut entraîner une amplification des mouvements de titres dans votre portefeuille.

La survenance de l'un de ces risques peut entraîner une baisse de la valeur liquidative du portefeuille.

Compte rendu d'activité

Juillet 2021

En juillet, la reprise économique mondiale s'est poursuivie, sur fond de progrès réguliers des campagnes vaccinales et d'assouplissement des restrictions de l'activité dans plusieurs grands pays développés. La propagation du variant Delta, plus contagieux, a toutefois pesé sur le moral des investisseurs. Aux Etats-Unis, les marchés des actions et des obligations ont produit des performances contrastées : l'indice S&P 500 a atteint de nouveaux plus hauts historiques, tandis que les rendements des bons du Trésor américain sont tombés à des plus bas inédits depuis février. En termes de données économiques, l'inflation américaine a été plus élevée que prévu pour le quatrième mois consécutif, la hausse de l'IPC global atteignant 5,4 % en glissement annuel en juin. Le redressement du marché du travail s'est accéléré, avec 850 000 emplois créés en juin, ce qui reste toutefois moins que prévu. La saison des résultats du deuxième trimestre a également donné des raisons de se montrer optimiste puisque 90 % des entreprises du S&P 500 ont produit des résultats supérieurs aux prévisions des analystes à fin juillet. En Europe, les données du PMI ont laissé espérer une accélération de la reprise de la zone euro. L'activité économique a progressé à son rythme le plus rapide en 21 ans, la nette amélioration dans le secteur des services ayant largement compensé le léger recul de l'indice PMI manufacturier, lié aux perturbations de la chaîne d'approvisionnement. En juillet, les obligations du Trésor américain ont continué sur leur lancée, le rendement de l'obligation à 10 ans reculant de 0,25 %, à 1,22 %, soit le plus bas niveau depuis février. La courbe s'est bombée lors du rally, le taux à 10 ans ayant surperformé les échéances à 5 ans et 30 ans. Jerome Powell, président de la Fed, a de nouveau évoqué le caractère transitoire de l'inflation lors de la présentation de son rapport semestriel sur la politique monétaire à l'occasion d'une visite au Congrès en milieu du mois, et même le chiffre plus élevé que prévu de l'IPC américain (5,4 %) en juin n'a pas réussi à briser l'élan du rally obligataire. Le rally a également été généralisé sur d'autres marchés développés, notamment le Royaume-Uni et la zone euro. Le rendement du Gilt à 10 ans a terminé le mois à 0,56 %, soit une baisse de 0,17 %. Dans la zone euro, la BCE a annoncé en milieu de mois son nouvel objectif d'inflation symétrique de 2 %, tout en publiant de nouvelles directives prévisionnelles. Le rendement du Bund à 10 ans a baissé de 0,26 %, à -0,46 %. L'obligation d'Etat italienne à 10 ans a sous-performé le Bund, d'où une légère augmentation du spread BTP-Bund de 8bp, à 108bp. En juillet, le crédit d'entreprise a affiché une performance totale positive, entièrement liée à la baisse des rendements obligations d'Etat dans le monde. La performance relative a été négative, les spreads s'étant légèrement élargis sur l'ensemble des marchés et des notations. Le crédit européen a surperformé le crédit américain, lequel a fait l'objet de prises de bénéfices après plusieurs mois de solide performance. La dette subordonnée a surperformé, notamment les obligations hybrides non financières, qui ont fait l'objet d'une forte demande. La dette des marchés émergents a continué de sous-performer : les réformes chinoises du secteur des cours de soutien ont déclenché un regain de volatilité en fin de mois, dans le sillage de la surveillance accrue du secteur technologique et des mesures prises pour stabiliser le marché immobilier. Sur le mois, l'USD (DXY) a légèrement baissé (-0,3 %), en partie en raison d'un taux de chômage plus élevé que prévu (5,9 % contre une prévision de 5,6 %) et de la confirmation par Jerome Powell lors de son témoignage au Congrès que la hausse des prix à la consommation au mois de juin était transitoire. Alors que le dollar s'est replié, l'euro a progressé de 0,1 % ce mois-ci, les données économiques dressant un tableau mitigé de la zone euro. En juillet, la livre sterling s'est appréciée de 0,5 % face à l'USD, soutenue par l'optimisme entourant la réouverture de l'économie britannique annoncée le 5 juillet par Boris Johnson, Premier ministre britannique. Le yen a progressé de 1,3 % par rapport à l'USD, soutenu par l'aversion pour le risque qui a envahi les marchés. Les devises des pays émergents ont baissé de 1 % en moyenne par rapport à l'USD. Le real brésilien, qui s'était sensiblement apprécié depuis le début de l'année, a reperdu une partie du terrain gagné au cours du mois.

Août 2021

Le rapport sur l'emploi publié début août a montré que l'économie américaine avait créé 943 000 emplois en juillet, un chiffre record depuis le début de l'année et supérieur aux estimations du consensus. Divers indices d'inflation aux États-Unis ont montré que l'inflation atteignait des sommets inégalés depuis le début des années 1990, certains indicateurs d'inflation affichant plus de 5 %. Le rendement du Trésor américain à 10 ans a commencé à augmenter dans le sillage de ces anticipations. Toutefois, cette tendance a été stoppée par l'annonce par l'administration Biden du retrait immédiat des forces américaines d'Afghanistan - contre toute attente, la milice talibane a pris le pouvoir quelques heures après le départ des Américains. Ces événements ont donné lieu à un regain d'incertitude quant à la stabilité politique au Moyen-Orient, après que les talibans se sont emparés d'une importante cache d'équipements de l'armée afghane, soutenue et entraînée par les

OPCVM AMUNDI GLOBAL MACRO 2

États-Unis. Conséquence sur les marchés : le retour de la volatilité des rendements du Trésor américain, qui ont chuté au lendemain de la prise de pouvoir par les talibans avant de remonter, pour terminer le mois à 1,31 %, contre 1,22 % à fin juillet. En Europe, la période estivale a été marquée par une actualité plutôt calme, les efforts continus des gouvernements pour vacciner le plus grand nombre de personnes possible contribuant à créer un climat d'optimisme quant à une réouverture complète plus tôt que prévu. L'inflation dans la zone euro est désormais bien supérieure au taux cible de 2 % de la BCE, le taux du mois d'août ayant été supérieur aux prévisions (3 %), soit son niveau le plus élevé depuis dix ans. Il existe maintenant des différences significatives entre les marchés développés en termes d'inflation ; le Japon a enregistré une inflation annuelle de -0,3 % en juillet et au Royaume-Uni, l'inflation a décéléré pour passer de 2,5 % en juin à 2,0 % en juillet. Cela étant, les rendements de la plupart des obligations des marchés développés ont augmenté au cours du mois ; les rendements du Trésor américain à 10 ans, du bund allemand et des gilts britanniques ont augmenté respectivement de 9 points de base, de 8 points de base et de 15 points de base, tandis que le Japon a fait figure d'exception, le rendement à 10 ans étant resté inchangé. Les obligations d'entreprises Investment Grade ont enregistré des rendements mitigés, les obligations américaines et européennes ayant vu leurs spreads augmenter légèrement, tandis que les obligations de rang inférieur ont encore enregistré de bonnes performances et ont surperformé les obligations d'État. Le mois a également été favorable aux obligations des marchés émergents, ainsi qu'à la moitié environ des devises des marchés émergents. La plupart des devises des marchés développés se sont dépréciées par rapport à l'USD, à l'exception de la NOK et du NZD. Les rendements du fonds ont été négatifs, principalement en raison d'une position long peu importante sur la durée des placements dans un contexte de hausse des rendements et des positions short sur les couvertures de crédit à court terme dans un contexte de resserrement des spreads.

Septembre 2021

Le thème de l'inflation continue d'être un élément majeur à l'échelle mondiale, avec les effets de goulots observés sur les chaînes d'approvisionnement et de transport qui perdurent en raison de la pandémie de Covid-19 et de ses effets secondaires en matière de pénurie de main d'œuvre notamment. La plupart des indices d'inflation évolue désormais au-dessus de leur moyenne à long terme, comme au Royaume-Uni où les prix de l'énergie ont enregistré des augmentations record. Les derniers chiffres d'inflation étaient globalement conformes aux attentes de la Réserve Fédérale aux États-Unis, tandis que dans l'ensemble de l'Europe la pression inflationniste se renforce, laissant supposer une révision des prévisions à la hausse pour 2022. Les banques centrales des principaux pays développés, considèrent cependant que l'inflation n'est que transitoire, et que les niveaux actuels sont en grande partie dus à un effet de base après l'effondrement des prix observé en 2020. Aux États-Unis, la Réserve Fédérale (FED) devrait annoncer dans les prochaines semaines un ralentissement progressif de son programme d'achats obligataires, qui devrait se terminer l'été prochain. Si les objectifs d'inflation ont été atteints, la situation en matière d'emploi et légèrement différente et seule une amélioration durable validera la fin du programme. Deux présidents régionaux de la FED, Kaplan et Rosengren, impliqués dans une controverse financière, ont annoncé leur démission et pourraient être remplacés par de nouveaux membres tout autant, voir plus fermes, en matière de politique monétaire. En Europe, la Banque Centrale Européenne (BCE) a annoncé qu'elle pourrait réduire modérément les achats d'obligations sous son programme du PEPP. Le rythme passerait alors de 20-25 milliards d'euros à 10-15 milliards d'euros par semaine, et cette diminution devrait avoir lieu au cours des trois prochains mois. Dans les autres régions, la Banque d'Angleterre est devenue davantage « hawkish » et a déclaré être préoccupée par la persistance de l'inflation. Toujours en Europe, la Norges Bank a été la première banque centrale des pays développés à augmenter ses taux depuis le début de la pandémie de Covid-19, les taux directeurs passant de 0% à 0,25%. Au cours du mois de septembre, les obligations souveraines des marchés développés ont vu leurs taux de rendement se tendre fortement : +0.18% pour les bons du trésor américain à 10 ans, +0.31% pour les Gilts britanniques à 10 ans et jusqu'à +0.34% pour les obligations australiennes de même maturité. Dans cet environnement, mêlant crainte d'inflation et ralentissement économique, les obligations d'entreprises de bonne qualité ont enregistré des performances absolues négatives mais ont surperformé les obligations souveraines avec des écarts de rendements qui continuaient de se réduire (Entre 0.01% et 0.03% selon les régions). Les obligations émergentes ont suivi la tendance observée sur les marchés développés et ont ainsi vu leurs taux d'intérêts augmenter générant des performances négatives sur le mois. Sur les devises, le dollar américain s'est fortement apprécié, gagnant plus de 2% par rapport à la livre Britannique et au dollar néo-zélandais, les plus gros perdants du mois dans les pays développés. A l'exception du Rouble, les devises émergentes pâtissaient également de la vigueur du dollar. Dans cet environnement, le fonds a généré une performance légèrement négative mais supérieure à son indice de référence, avec une contribution positive de l'ensemble de nos stratégies. Sur les taux, le fonds a fortement bénéficié de sa sous pondération relative en sensibilité dans ce contexte de forte tension observée sur les rendements obligataires

OPCVM AMUNDI GLOBAL MACRO 2

souverains. Notre exposition aux obligations indexées à l'inflation ainsi que notre surpondération à l'Italie étaient d'autres facteurs de surperformance sur le mois. La contribution de notre allocation en crédit était également positive, bien supportée par les écarts de rendements qui continuaient de se resserrer avec les obligations souveraines. Le fonds a également profité de certaines stratégies de devises et notamment de notre exposition longue au Dollar et de nos stratégies de valeurs relatives, en Europe notamment (Acheteur de NOK, vendeur de CHF). Le fonds a cependant légèrement souffert de son exposition à certaines devises émergentes telles que le Peso mexicain ou la Lire turque.

Octobre 2021

En octobre, le marché est resté centré sur l'inflation, avec une hausse du pétrole - parmi d'autres indicateurs - à 84 \$ le baril. Cependant, les données très attendues des emplois non agricoles aux États-Unis ont montré que 194 000 nouveaux postes ont été créés, bien en deçà des attentes de 500 000 emplois. Cela a alors conduit à des spéculations selon lesquelles les États-Unis pourraient être sur le point d'entrer dans une période de stagflation, renforçant la pression sur la Réserve Fédérale américaine pour agir contre l'inflation. Au Royaume-Uni, l'inflation a continué d'évoluer légèrement au-dessus de 3%, ouvrant la porte à une 1ère hausse de taux dans un futur proche. Ailleurs, Bank of New Zealand a monté ses taux de 0,25% à 0,5% alors que Bank of Canada a mis fin à son programme d'achat d'obligations. Au cours du mois d'octobre, les obligations d'État des marchés développés ont vu leurs taux augmenter : +6 points de base à 1,55% pour le Trésor américain à 10 ans et +9 points de base à -0,11% pour les Bunds allemands à 10 ans. Les obligations australiennes à 10 ans ont encore une fois connu la plus forte hausse de +60 points de base à 2,09 %. Le mouvement de taux s'est accompagné d'un fort aplatissement des courbes (hausse des taux sur la partie courte / baisse de taux sur la partie longue). La BCE a réaffirmé l'achat d'obligations PEPP mais à un rythme inférieur à celui des trimestres précédents, faisant bondir les taux italiens et espagnols de +31 points de base et +15 points de base respectivement au cours du mois. L'UE a également émis une grande quantité d'obligations vertes, dépassant les 12 milliards d'euros pour le mois. Les obligations d'entreprises Investment Grade ont très peu fluctué par rapport aux obligations d'État, les spreads s'étant légèrement élargis de 1 point de base. Ces résultats masquent néanmoins des différences régionales puisque les obligations d'entreprises américaines et britanniques ont enregistré des performances positives, tandis que les obligations d'entreprises européennes ont terminé dans le rouge. Les obligations souveraines des marchés émergents libellées en devises externes ont affiché des rendements négatifs. Le dollar s'est déprécié par rapport aux devises des principaux pays développés, à l'exception de l'euro, du yen et de la couronne danoise. La couronne norvégienne se montre la plus grande gagnante du mois, enregistrant une appréciation de 4% par rapport au dollar. Le fonds affiche une performance légèrement négative mais surperforme son indice de référence sur le mois. Notre sous-pondération en duration a contribué à la surperformance, alors que les taux ont continué à augmenter, notamment en Europe où les taux allemands 10 ans ont monté de 9pbs. Le portefeuille a aussi tiré profit de l'aplatissement prononcé des courbes de taux. L'allocation crédit a eu une performance neutre avec des spreads très stables sur le mois pour les obligations d'entreprise investment-grade. Les devises ont aussi contribué positivement, notamment sur les pays développés (notre position vendeuse de Yen japonais a performé grâce à son affaiblissement de 2.2% contre l'USD).

Novembre 2021

Le mois de novembre a vu la résurgence du nombre de cas de COVID en Europe, entraînant la mise en place de nouvelles mesures de confinement en Autriche ou en Allemagne notamment. En fin de mois, la découverte d'un nouveau variant en Afrique du Sud, prénommé Omicron, et les incertitudes concernant l'efficacité des vaccins et la transmissibilité du virus, déclencha une vague de correction sur la plupart des marchés, dans un contexte de liquidité médiocre dû aux fêtes de Thanksgiving aux États-Unis. Les craintes liées au virus ont fortement pesé sur la plupart des actifs risqués tels que le pétrole, dont les cours ont baissé de plus de 15% sur le mois ; les indices actions (le MSCI World perdant 2,3% sur le mois) ; les obligations d'entreprises à haut rendement (-1.4%) ainsi que la dette sur les marchés émergents (-1% sur la dette externe). A l'inverse, les valeurs refuges ont rebondi suite à ce fort mouvement d'aversion au risque. Les obligations souveraines des marchés développés ont particulièrement bien performé : le rendement du bons du Trésor américain à 10 ans a chuté de 11 points de base et son équivalent allemand de 24 points de base, tandis que le rendement des obligations du gouvernement australien de même maturité se détendait fortement de 0.40%. Sur les marchés des devises, le dollar américain s'est apprécié par rapport aux devises des principaux pays développés à l'exception du yen. Aux États-Unis, l'indice des prix à la consommation du mois d'octobre a atteint 6,2 % par rapport à l'année précédente ; soit le plus haut niveau enregistré en 31 ans. Les ventes au détail ont fait preuve de résilience, progressant de 1,7%, tandis que le marché du travail affichait une bonne dynamique. La part d'emplois non agricoles a augmenté de 531 000 en octobre, bien au-dessus des estimations de

OPCVM AMUNDI GLOBAL MACRO 2

450 000 emplois, alors que seuls 199 000 Américains ont déposé une demande aux prestations de chômage au mois de novembre ; plus bas niveau depuis 1969. Enfin, le président Joe Biden a signé un projet de loi bipartisan de 550 milliards de dollars visant à moderniser les infrastructures existantes mais aussi à déployer des stations de recharge pour véhicules électriques à travers le pays. En Europe, l'activité des entreprises de la zone euro a accéléré en Novembre (Estimation PMI flash à 55.8) mais d'autres indicateurs faisaient apparaître une certaine divergence sur la vigueur de l'activité économique. En France, les chiffres du climat des affaires se redressaient tandis qu'outre-Rhin, la baisse de l'indice IFO montrait une tendance opposée. Comme aux Etats-Unis, la tendance inflationniste se renforçait avec une augmentation des prix à la consommation de 4.1% sur un an en zone euro. Au Royaume Uni, la Banque d'Angleterre a surpris le marché en annonçant maintenir ses taux inchangés malgré la hausse de l'inflation. Suite à cette annonce, les anticipations de hausse de taux pour 2022 ont été fortement révisées à la baisse. Le mois de novembre a également marqué le début de la Conférence des Nations Unies sur le changement climatique (COP26). Les dirigeants d'environ 200 pays se sont alors réunis à Glasgow, en Écosse, dans le but de prendre des mesures décisives pour limiter le réchauffement climatique à 1,5 °C au-dessus des niveaux préindustriels. Le fonds affiche une performance légèrement négative et sous performe son indice de référence sur le mois. Dans cet environnement de marché, nos 3 principales stratégies ont contribué négativement à la performance du fonds. Sur les taux, la contribution positive de nos stratégies de courbe, aux Etats-Unis notamment où le fonds est surpondéré sur les maturités longues, n'était pas suffisante pour compenser l'impact négatif de notre sous pondération en sensibilité dans un marché qui a vu les rendements souverains sur les marchés développés se détendre fortement. Notre allocation crédit a également eu un impact négatif avec un fort écartement des spreads qui s'est propagé à tous les secteurs ainsi qu'au sein des pays émergents. Sur les devises, notre exposition positive au Dollar n'a pas permis de compenser ni la faiblesse de certaines devises liées aux matières premières (Couronne norvégienne, Dollar australien), ni la chute de la Lire turque qui a souffert d'une baisse des taux directeurs plus importante que prévue, malgré une inflation galopante.

Décembre 2021

La propagation du variant Omicron, le changement de tons des principales banques centrales dans les pays développés et des données macroéconomiques en repli ont animé les marchés en cette fin d'année 2021. Les inquiétudes autour du nouveau variant Omicron se sont poursuivies, conduisant à l'annonce de nouvelles restrictions dans de nombreux pays et notamment en Europe. Malgré une transmission accrue par rapport au précédent variant Delta, des symptômes plus légers et des durées d'hospitalisation plus courtes ont été enregistrés, ce qui devrait limiter l'impact sur la croissance économique. Après un début de mois volatil, les marchés se sont progressivement redressés dans la perspective de la fin de l'année, profitant aux actifs risqués. Aux Etats-Unis, alors que la hausse des prix à la consommation a atteint 6,8% par rapport à l'année précédente, la Réserve Fédérale américaine a officiellement reconnu que l'inflation pourrait perdurer et a annoncé une accélération de la réduction du programme de rachats d'actifs à 30 milliards de dollars par mois. Sur le plan de l'emploi, 210 000 nouveaux postes ont été créés, bien en deçà des estimations de 568 000 emplois. Le congrès américain a également voté le relèvement du plafond de la dette en milieu de mois. En Europe, la Banque Centrale Européenne (BCE) a signalé que le programme d'achat d'urgence lié à la pandémie (PEPP) resterait au niveau actuel de 60 milliards d'euros par mois et se terminerait en mars comme prévu. Le programme d'achat d'actifs (APP) de la BCE accélèrera au deuxième trimestre pour pallier à la fin du PEPP, avant de ralentir à nouveau à 20 milliards d'euros au quatrième trimestre. L'indice PMI global européen est passé de 55,4 en novembre à 53,4 en décembre. L'inflation s'est maintenue à 4,9%, bien au-dessus de l'objectif de 2 % de la BCE, alors que les prix de l'énergie restaient élevés. Au Royaume-Uni, la Banque d'Angleterre a de nouveau surpris les marchés par une hausse de 15 à 25 points de base, évoquant une inflation persistante. Les rendements obligataires de la plupart des marchés développés ont augmenté : +7 points de base pour les bons du Trésor américain, +17 points de base pour le Bund allemand et +16 points de base pour les gilts britanniques à 10 ans. Les rendements obligataires canadiens et australiens de même échéance ont reculé respectivement de 14 et 2 points de base. Sur le crédit les écarts de rendement par rapport aux obligations souveraines se sont resserrés de façon généralisée, les obligations à haut rendement et la dette subordonnée enregistrant les meilleures performances. L'ensemble des obligations émergentes émises en devises locales ou externes a enregistré une performance positive au cours du mois de décembre. Sur le marché des devises, le dollar américain s'est généralement déprécié face aux autres devises des marchés développés et émergents. Le fonds affiche une performance légèrement négative mais surperforme son indice de référence sur le mois. Dans cet environnement de marché, l'ensemble de nos stratégies ont contribué positivement à la performance du fonds. Sur les taux, notre sous pondération en sensibilité était la principale source de surperformance suite à la remontée quasi généralisée des rendements obligataires dans les pays développés. Le fonds a également profité de la bonne tenue de notre allocation aux obligations

OPCVM AMUNDI GLOBAL MACRO 2

indexées sur l'inflation ; la pression sur les prix à la consommation restant forte. Notre allocation aux actifs plus risqués était également positive, bien soutenue par un regain d'optimisme sur l'impact du variant Omicron sur la croissance économique mondiale. Cette révision bénéficiait aux obligations émergentes et d'entreprises qui voyaient leurs écarts de rendement avec les obligations souveraines des pays développés se resserrer fortement. Sur les devises, la surperformance provenait essentiellement de notre préférence pour les devises cycliques qui ont fortement rebondi sur le mois comme ce fut le cas pour la couronne norvégienne (NOK) ou le Dollar australien (AUD), au profit de devises plus défensive (Franc Suisse et Yen). Le fonds profitait également de la vigueur du Peso mexicain ainsi que du rebond quasi généralisé des devises émergentes.

Janvier 2022

En janvier, les marchés ont digéré la possibilité d'un resserrement agressif de la part de la Réserve fédérale américaine (la Fed) alors que les pressions inflationnistes persistent. Les tensions géopolitiques entre la Russie et l'Ukraine se sont renforcées. L'indice des prix à la consommation (IPC) des États-Unis a bondi à des valeurs jamais atteintes en 40 ans : 7% par rapport à l'année précédente, alors que le chômage est tombé à 3,9% - proche de son niveau pré-pandémique. Ceci a incité la Fed à annoncer l'approche du cycle de normalisation des taux. Elle n'a pas explicitement exclu certaines mesures telles qu'une hausse du taux directeur à chaque réunion de l'année ou une augmentation par tranches supérieures à 25 points de base. Le président de la Fed, M. Powell, a déclaré que le taux des fonds fédéraux sera le principal moyen de resserrer la politique. Le programme d'achat d'actifs prendra fin début mars et le resserrement quantitatif n'interviendra qu'après le début du cycle de hausse des taux au mois de juin. En Europe, l'inflation s'est maintenue bien au-dessus de l'objectif de 5% de la BCE. L'indice PMI global européen est passé de 53,3 en décembre à 52,4 en janvier, alors que la pression du variant Omicron vient s'ajouter à la hausse des prix de l'énergie et aux contraintes de la chaîne d'approvisionnement. La santé économique de l'Europe est à la traîne des États-Unis, conduisant la BCE à rester plus accommodante que la Fed. La nomination de Sergio Mattarella pour un second mandat à la présidence de l'Italie a réduit l'écart entre les obligations d'État italiennes et allemandes. Du côté des autres marchés développés, la Banque du Canada, la Banque du Japon et la Norges Bank sont toutes restées en attente. Répondant à la pression à la baisse sur la croissance liée aux nouveaux cas de Covid-19 et à la politique de tolérance zéro en place, la Banque populaire de Chine a réduit les opérations d'open market, avec le taux de repo à 7 jours et les taux des facilités de prêt à moyen terme à 1 an de 10 bps - première fois depuis mars 2020. Au cours du mois de janvier, les rendements obligataires des marchés développés ont augmenté : +19 points de base pour le Bund allemand, +27 points de base pour les bons du Trésor américain et +33 points de base pour les gilts britanniques à 10 ans. Le rendement à 2 ans américain a quant à lui augmenté de 45 points de base, entraînant un aplatissement important de la courbe. Les obligations des marchés émergents ont enregistré des performances négatives, tout comme les obligations global corporate. Sur le marché des devises, le dollar américain s'est apprécié face à l'ensemble des principales devises des marchés développés. Du côté émergent, les devises ont enregistré des rendements mitigés - certaines tels que le peso chilien et le réal brésilien ayant surperformé le dollar. Dans cet environnement, le fonds affiche une performance négative mais surperforme fortement son indice de référence sur le mois, avec une contribution notable de nos stratégies de taux et de devises tandis que nos stratégies de crédit étaient négatives. Sur les taux, notre sous pondération en sensibilité, ainsi que nos stratégies de courbe, notamment aux États Unis, où le fonds était positionné pour un aplatissement de la courbe, était source de surperformance. Notre allocation en devises a eu un impact positif grâce à notre exposition positive au dollar, nos expositions en devises émergentes, notamment nos positions acheteuses (forint hongrois, peso chilien) ou vendeuses (dollar de taïwan, shekel israélien) et nos stratégies de valeurs relatives telles que notre position acheteuse sur la couronne norvégienne et vendeuse sur le franc suisse ou acheteuse sur le dollar australien et vendeuse sur le dollar néozélandais. En revanche, notre allocation crédit a eu une performance négative avec un fort écartement des spreads qui s'est propagé à tous les secteurs ainsi qu'au sein des pays émergents.

Février 2022

Au cours du mois de février, les nouvelles hawkish des banques centrales et d'inflation ont été mises de côté, alors que toute l'attention s'est tournée vers la Russie et l'Ukraine. Après des semaines de confrontation, l'invasion militaire russe de grande échelle a provoqué un choc sur les marchés, déclenchant une flambée des prix des matières premières et une chute des actifs risqués. En réponse à l'agression russe, les pays occidentaux ont imposé une série de sanctions sans précédent. Cet incident majeur marque un pic dans les tensions géopolitiques et renforce l'incertitude des perspectives économiques mondiales. Sur le plan économique, 467 000 nouveaux emplois ont été créés aux États-Unis au cours du mois de janvier, bien au-dessus du consensus. En parallèle, l'indice des prix à la consommation a augmenté au-delà des prévisions

OPCVM AMUNDI GLOBAL MACRO 2

et le taux d'inflation annuel a atteint 7,5 % - son plus haut niveau en quatre décennies. La Banque Centrale Européenne a laissé sa politique monétaire inchangée. Néanmoins, elle reste unanimement préoccupée par les chiffres de l'inflation : l'indice des prix à la consommation de la zone euro a bondi à 5,1% sur 12 mois, bien au-dessus de l'objectif de 2%. La décision de la Banque d'Angleterre de lever ses taux d'intérêt de 25 points de base prouve là-encore que l'inflation était au premier plan des décisions des banques centrales. Les rendements obligataires des marchés développés ont encore augmenté : +12 points de base pour le Bund allemand, +11 points de base pour les Gilts britanniques et +5 points de base pour les bons du Trésor américain à 10 ans. Face au contexte d'aversion au risque et d'incertitude renforcées, les obligations des marchés émergents ont enregistré des performances fortement négatives, tout comme le crédit aux entreprises. Comme attendu, les marchés du crédit européens ont été largement plus touchés que les marchés américains. La hausse des prix des matières premières a soutenu l'appréciation de certaines devises telles que la Couronne norvégienne ou le Dollar australien. Le Yen japonais et le Franc suisse ont repris leur rôle traditionnel de monnaies refuges et se sont appréciés. Dans les économies émergentes, le Rouble s'est effondré de 21%, et dans une moindre mesure, les devises d'Europe de l'Est ont été négativement affectées. Le fonds affiche une performance négative sur le mois, avec une contribution positive de nos stratégies de taux tandis que nos stratégies de crédit étaient négatives. Sur les taux, notre sensibilité négative, était source de surperformance. En revanche, notre allocation crédit a eu une performance négative avec un fort écartement des spreads qui s'est propagé à tous les secteurs.

Mars 2022

La guerre en Ukraine s'est poursuivie au cours du mois de mars alors que les actifs risqués se sont bien maintenus, en dépit de la course à la hausse des taux et l'importante volatilité des marchés. Aux Etats-Unis, l'indice des prix à la consommation du mois de février a atteint son plus haut niveau en 40 ans (7,9 % en glissement annuel), alors que 678 000 nouveaux emplois ont été créés, au-dessus du consensus. Ceci a incité la Réserve fédérale américaine à relever ses taux de 25 points de base pour la première fois depuis 2018. Les projections de la Fed prévoient 7 hausses en 2022 et 3 autres en 2023. La Fed a officiellement mis fin à l'assouplissement quantitatif et a signalé le début d'une réduction de ses avoirs en titres du Trésor, en dette d'agence et en MBS au cours des réunions à venir. Afin de refroidir les prix du pétrole, la Maison Blanche a décidé de puiser 180 millions de barils de pétrole supplémentaires du stock d'urgence américain. Il s'agit d'une mesure sans précédent, alors que la coalition OPEP+ s'en tenait à son plan d'augmenter progressivement la production de pétrole de 400 000 barils par jour en avril. En Europe, alors que le taux d'inflation de 5,9 % reste bien au-dessus de l'objectif, la BCE a surpris le marché en annonçant qu'elle pourrait mettre fin à ses achats nets d'actifs au troisième trimestre si les données à venir confirment la persistance de l'inflation à moyen terme. Elle a ainsi annoncé une réduction plus rapide de son programme d'achat d'actifs au deuxième trimestre, via un nouveau plan visant 40 milliards d'euros d'achats en avril, 30 milliards d'euros en mai et 20 milliards d'euros en juin. Dans le même temps, la BCE souhaite garder davantage de flexibilité sur le calendrier des hausses de taux. D'autres banques centrales de marchés développés, telles que la Banque d'Angleterre, la Banque du Canada et la Norges Bank, ont quant à elles procédé à une hausse de taux à 0,75 %, 0,5 % et 0,75 %, respectivement. En parallèle, la Chine a mis en place le confinement le plus strict à Shanghai depuis celui de Wuhan, alors que le pays lutte contre sa pire pandémie de covid en 2 ans. Dans ce contexte, les rendements obligataires des marchés développés ont encore augmenté: +41 points de base pour le Bund allemand à 10 ans et +20 points de base pour son équivalent britannique et +51 points de base pour les bons du Trésor américain à 10 ans et +90 points de base pour les bons du Trésor américain à 2 ans (plus haut niveau depuis février 2019). Dans ce contexte, la courbe des taux américaine s'est fortement aplatie, le segment 2-10 ans finissant même le mois en territoire négatif. Les spreads de crédit (périphériques, corporate et émergents) se sont resserrés, mais leur performance absolue s'est montrée négative en raison de la hausse des taux. Le dollar américain s'est apprécié par rapport à la plupart des devises des principaux marchés développés. Avec des prix de matières premières toujours en hausse, le NZD, l'AUD et la NOK ont surperformé les devises importatrices d'énergie telles que le JPY et l'EUR dans le G10. Les devises basées sur les matières premières comme le BRL, le ZAR, le MXN et le COP ont été les gagnantes sur les marchés émergents. En mars le fonds a réalisé une performance positive avec une contribution positive de notre allocation crédit (resserrement des spreads de crédit) et notre position à l'achat sur l'USD.

OPCVM AMUNDI GLOBAL MACRO 2

Avril 2022

Au cours du mois d'avril, les marchés financiers sont restés marqués par la guerre en Ukraine et l'inflation. Les banques centrales ont maintenu leur discours hawkish, mettant l'accent sur les risques liés aux perspectives d'inflation, en dépit des risques pesant sur la croissance. Dans un contexte de forte volatilité des marchés et de mouvement à la hausse des taux, les actifs risqués ont affiché une performance négative. Aux États-Unis, le PIB réel s'est contracté au premier trimestre à un taux annuel de -1,4 %, nettement plus bas que le consensus de marché. Alors que l'inflation atteint un niveau record en 40 ans de +8,5% en glissement annuel, la Réserve fédérale a confirmé l'intention de réduire drastiquement son bilan (9 000 milliards de dollars) et de remonter les taux par tranche de 50pbs. En zone euro, l'inflation a atteint de nouveaux records à +7,5% en glissement annuel, tandis que l'économie n'a progressé que de 0,2% au premier trimestre. En dépit des membres de la BCE reconnaissant désormais la nécessité d'augmenter les taux directeurs, aucune nouvelle accélération du retrait des mesures de relance n'a été évoquée par la BCE au mois d'avril. Celle-ci a confirmé les directives précédentes au sujet du QE (qui prendra probablement fin au troisième trimestre) et de la politique en place. Les taux d'intérêt devraient alors augmenter "quelque temps" après la fin du QE. La question de la date et de l'ampleur reste ouverte, mais le mois de juin est identifié comme étant une période possible. La Banque du Japon a laissé ses perspectives inchangées et a introduit des achats quotidiens afin de défendre son contrôle de la courbe des taux, tandis que la Banque de réserve de Nouvelle-Zélande et la Banque du Canada ont augmenté les taux directeurs de 50 points de base. Parallèlement à cela, la Chine poursuit sa politique zéro Covid avec des confinements stricts à travers le pays. Ces régulations risquent de peser sur la croissance économique et les chaînes d'approvisionnement. Les autorités ont annoncé des mesures de relance plus poussées, telles qu'un programme de dépenses infrastructurelles afin d'atténuer l'impact sur l'économie. Dans ce contexte, les rendements obligataires des marchés développés ont à nouveau augmenté ce mois-ci : +39 points de base pour le Bund allemand à 10 ans, +30 points de base pour les Gilts britanniques et +60 points de base pour les bons du Trésor américain, renforçant la pentification des courbes. Au-delà de la tension autour de l'élection présidentielle française, la tendance à l'écartement des spreads des pays périphériques contre l'Allemagne s'est poursuivie. Sur le crédit, les obligations des marchés émergents ont enregistré des performances négatives, tout comme les obligations d'entreprises. Le dollar américain s'est fortement apprécié par rapport aux principaux marchés développés et émergents, alors que le yen japonais a chuté à son plus bas niveau en 20 ans. Le fonds affiche une performance négative dans un marché où tous les actifs terminent le mois en retrait. Les stratégies de taux et crédit sont les principaux moteurs de sous-performance. Sur les taux, la duration positive (<1an) a légèrement cédé dans un contexte de hausse générale des rendements obligataires. L'allocation crédit a souffert de l'écartement indiscriminé des spreads sur tous le spectre obligataire.

Mai 2022

Au cours du mois de mai, la guerre de la Russie en Ukraine s'est poursuivie dans un contexte de turbulences pour les marchés mondiaux. Les thèmes clés restent l'inflation, la croissance économique et l'orientation de la politique monétaire. Aux États-Unis, l'indice PMI composite atteint 53,8 en mai 2022, contre 56,0 au mois d'avril. L'indice global des prix à la consommation a augmenté de 8,3 % en avril en glissement annuel, encore une fois au-dessus du consensus. L'issue de la dernière réunion du FOMC de la Réserve fédérale a été conforme aux attentes. La Fed a relevé ses taux de 50 points de base (première hausse d'une telle ampleur depuis 2000) et a annoncé la liquidation de son bilan à partir de juin. Le rythme de réduction mensuelle, fixé à 47,5 milliards de dollars en juin, devrait passer à 95 milliards de dollars dans trois mois. Dans la zone euro, l'inflation a atteint de nouveaux records en mai (+8,1% contre 7,4% au mois d'avril) alors que l'indice PMI composite est tombé à 54,9, contre 55,8 en avril. Dans son communiqué, Christine Lagarde confirme que les achats nets, dans le cadre du programme d'achats d'actifs, devraient prendre fin au troisième trimestre, permettant ainsi une remontée des taux en juillet. Après deux mois de confinement, les restrictions liées au Covid-19 ont été considérablement assouplies à Shanghai. À la suite du rapport du mois d'avril reflétant une large détérioration de l'économie, la PBoC a réduit son taux préférentiel de référence sur 5 ans de 15 points de base après avoir abaissé le plancher du taux hypothécaire de 20 points de base. Comme prévu, la Banque de réserve de Nouvelle-Zélande et la Banque d'Angleterre ont décidé de relever le taux directeur au comptant de 2 % et 1 %, respectivement. Dans ce contexte, le rendement du Bund allemand à 10 ans a augmenté de 18 points de base, celui des Gilts britanniques de même maturité de 20 points de base tandis que le rendement des bons du Trésor américain à 10 ans a diminué de 9 points de base. Les spreads de crédit continuent globalement de se creuser, à l'exception de certains marchés émergents libellés en devises fortes où les spreads obligataires se sont resserrés. Le dollar américain s'est déprécié face aux principaux marchés développés. Les devises des blocs de matières premières ont surperformé, alors que le prix des matières premières se montre toujours à la hausse. Sur le mois de Mai, le fonds affiche une performance légèrement

OPCVM AMUNDI GLOBAL MACRO 2

positive. Les stratégies de taux terminent le mois avec une contribution légèrement positive, avec notamment une sensibilité basse, qui nous a permis de ne pas souffrir de la volatilité des taux sur le mois. Les positions crédit ont aussi eu une contribution légèrement avec des spreads IG stable.

Juin 2022

Le mois de juin reste marqué par l'inflation élevée, les mesures généralisées des banques centrales afin de tenter de la maîtriser, ainsi que les inquiétudes grandissantes autour de la croissance économique. Dans ce contexte, les prix des actions et des obligations ont terminé en retrait. Aux États-Unis, l'indice des prix à la consommation de mai s'est montré plus fort que prévu tandis que le renforcement des attentes d'inflation à long terme du Michigan est devenu préoccupant. Le président de la Réserve Fédérale américaine (Fed), Jérôme Powell, a annoncé une hausse des taux de 75 points de base, la plus forte augmentation depuis 1994. Avec l'objectif de ramener l'inflation à 2%, la Fed s'attend désormais à une croissance américaine de 1,7% en 2022, contre 2,8% précédemment. Dans la zone euro, l'inflation a atteint un nouveau record au mois de juin (+8,8% contre 8,1% en mai). L'indice PMI composite est tombé de 54,8 en mai à 52 en juin, démontrant que la croissance a ralenti, tout en restant positive. Christine Lagarde, présidente de la Banque centrale européenne (BCE), a annoncé une hausse de 25 points de base pour le mois de juillet et a fait allusion à une hausse de 50 points de base en septembre si les perspectives d'inflation ne s'améliorent pas rapidement. La BCE arrêtera également ses achats de titres dans le cadre du programme APP à partir du 1er juillet. Aussi, à l'issue d'une réunion d'urgence tenue le 15 juin, la BCE a annoncé le développement d'un outil anti-fragmentation afin de contenir la hausse des spreads. La Banque nationale suisse (BNS) a surpris les marchés en relevant ses taux de 50 points de base à -0,25%. La Banque d'Angleterre a également augmenté ses taux de 25 points de base à 1,25%. Dans ce contexte, les rendements obligataires ont augmenté ce mois-ci : +21 points de base pour le Bund allemand à 10 ans, +13 points de base pour les Gilts britanniques à 10 ans et +17 points de base pour les bons du Trésor américain de même maturité. Cependant, les obligations périphériques européennes ont résisté à la tendance. L'Italie et l'Espagne affichent une baisse de leurs rendements à 10 ans de respectivement 7 et 2 points de base. Face à une volatilité croissante et généralisée, les spreads d'obligations d'entreprise se sont écartés, alors que les perspectives des consommateurs se sont assombries avec la hausse du coût de la vie. Les obligations des marchés émergents ont vu leurs rendements s'écartier et leurs rendements absolus augmenter suite aux inquiétudes sur la croissance. Sur les devises, le dollar s'est fortement apprécié, le franc suisse a surpris à la suite de la hausse des taux de la BNS, tandis que le yen a perdu plus de 5%. Dans ce contexte de marché difficile, le fonds termine le mois en retrait, notamment affecté par la baisse des actifs risqués.

Suppression Indice de référence applicable à l'objectif de gestion du fonds : €STR (Euro Short Term Rate) : exprime le taux du marché euro au jour le jour. Il est calculé par la Banque Centrale Européenne et représente le taux sans risque de la zone euro. L'€STR capitalisé intègre en complément l'impact du réinvestissement des intérêts selon la méthode OIS (Overnight Indexed Swap). L'administrateur de l'indice de référence est la BCE (Banque Centrale Européenne). En tant que banque centrale cet administrateur bénéficie de l'exemption de l'article 2.2 du règlement benchmark et à ce titre n'a pas à être inscrit sur le registre de l'ESMA. Des informations complémentaires sur l'indice de référence sont accessibles via le site internet de l'administrateur de l'indice de référence : https://www.ecb.europa.eu/stats/financial_markets_and_interest_rates/euro_short-term_rate/html/index.fr.html.

Modification Pour les parts I-C et P-C Le calcul de la commission de surperformance s'applique au niveau de chaque part concernée et à chaque date d'établissement de la Valeur Liquidative. Celui-ci est basé sur la comparaison (ci-après la « Comparaison ») entre : • L'actif net calculé au niveau de la part (avant prélèvement de la commission de surperformance) et • L'actif de référence (ci-après « l'Actif de Référence ») qui représente et réplique l'actif net calculé au niveau de la part (avant prélèvement de la commission de surperformance) au 1er jour de la période d'observation, retraité des souscriptions/rachats à chaque valorisation, auquel est appliqué la performance de l'indicateur de référence €STR + 8,5 bps. Ainsi, à compter du 03/01/2022, la Comparaison est effectuée sur une période d'observation de cinq années maximum, dont la date anniversaire correspond au jour d'établissement de la dernière valeur liquidative du mois de juin. Ainsi, exceptionnellement, la première « année » débutera le 03/01/2022 et s'achèvera le 30/06/2023 puis, chaque année débutera sur la première Valeurs Liquidative du mois de juillet et s'achèvera avec la dernière Valeurs Liquidative du mois de juin chaque année. Toutes les périodes d'observations qui s'ouvrent à compter du 03/01/2022 intègrent les nouvelles modalités ci-dessous. Au cours de la vie de la part, une nouvelle période d'observation de 5 années maximum s'ouvre : • En cas de versement de la provision annuelle à une date anniversaire. • En cas de sous-performance cumulée constatée à l'issue d'une période de 5 ans. Toute sous-performance de plus de 5 ans est oubliée. La commission de surperformance représentera 15 % de l'écart entre l'actif net calculé au niveau de la part (avant prélèvement de la commission de surperformance) et l'Actif de Référence si les conditions cumulatives suivantes sont remplies : • Cet écart est positif • La performance relative, depuis le début de la période d'observation telle que définie ci-dessus, de la part par rapport à l'actif de référence est positive ou nulle. Les sous-performances passées sur les 5 dernières années doivent ainsi être compensées avant qu'une provision puisse à nouveau être enregistrée. Cette commission fera l'objet d'une provision lors du calcul de la Valeur Liquidative. En cas de rachat au cours de la période d'observation, la quote-part de la provision constituée, correspondant au nombre de part rachetées, est définitivement acquise à la société de gestion. Celle-ci peut être versée à la société de gestion à chaque date anniversaire. Si, au cours de la période d'observation, l'actif net calculé de la part (avant prélèvement de la commission de surperformance) est inférieur à celui de l'Actif de Référence, la commission de surperformance sera nulle et fera l'objet d'une reprise de provision lors du calcul de la Valeur Liquidative. Les reprises sur provision sont plafonnées à hauteur des dotations antérieures. Sur la période d'observation, toutes provisions telles que définies ci-dessus deviennent exigibles à date d'anniversaire et seront payées à la Société de Gestion. La commission de surperformance est perçue par la société de gestion même si la performance de la part/action sur la période d'observation est négative, tout en restant supérieure à la performance de l'Actif de Référence. Les 3 exemples ci-dessous illustrent la méthode décrite pour des périodes d'observation de 5 ans : Cas d'une sous-performance non compensée.

Procédure de sélection de brokers et des contreparties

Notre société de gestion et sa filiale de « Négociation » attachent une grande importance à la sélection des prestataires transactionnels que sont les intermédiaires ("brokers") ou contreparties.

Ses méthodes de sélection sont les suivantes :

- Les intermédiaires ("brokers") sont sélectionnés par zone géographique, puis par métier. Les contreparties sont sélectionnées par métier.
- Les intermédiaires ("brokers") et les contreparties se voient attribuer une note interne trimestrielle. Les directions de notre société intervenant dans le processus de notation sont directement concernées par les prestations fournies par ces prestataires. C'est la filiale de « Négociation » de notre société qui organise et détermine cette notation sur base des notes décernées par chaque responsable d'équipe concernée selon les critères suivants :

Pour les équipes de gérants, d'analystes financiers et de stratégestes :

- Relation commerciale générale, compréhension des besoins, pertinence des contacts,
- Qualité des conseils de marchés et opportunités, suivi des conseils,
- Qualité de la recherche et des publications,
- Univers des valeurs couvertes, visites des sociétés et de leur direction.

Pour les équipes de négociateurs :

- Qualité des personnels, connaissance du marché et information sur les sociétés, confidentialité,
- Proposition de prix,
- Qualité des exécutions,
- Qualité du traitement des opérations, connectivité, technicité et réactivité.

Les directions « Compliance » et « Middle Office » de notre société disposent d'un droit de véto.

Accréditation d'un nouveau prestataire (intermédiaire ou contrepartie) transactionnel

La filiale de « Négociation » se charge d'instruire les dossiers d'habilitation et d'obtenir l'accord des directions « Risques » et « Compliance ». Lorsque le prestataire transactionnel (intermédiaire ou contrepartie) est habilité, il fait l'objet d'une notation lors du trimestre suivant.

Comités de suivi des prestataires (intermédiaires et contreparties) transactionnels

Ces comités de suivi ont lieu chaque trimestre, sous l'égide du responsable de la filiale de « Négociation ».

Les objectifs de ces comités sont les suivants :

- Valider l'activité écoulée et la nouvelle sélection à mettre en œuvre pour le trimestre suivant,
- Décider de l'appartenance des prestataires à un groupe qui se verra confier un certain nombre de transactions,
- Définir les perspectives de l'activité.

Dans ces perspectives, les comités de suivi passent en revue les statistiques et notes attribuées à chaque prestataire et prennent les décisions qui en découlent.

Rapport sur les frais d'intermédiation

Il est tenu à la disposition des porteurs un rapport relatif aux frais d'intermédiation. Ce rapport est consultable à l'adresse internet suivante : www.amundi.com.

Politique de Rémunérations

Politique et pratiques de rémunération du personnel du gestionnaire

La politique de rémunération mise en place au sein de Amundi Asset Management est conforme aux dispositions en matière de rémunération mentionnées dans la directive 2011/61/UE du Parlement Européen et du Conseil du 8 juin 2011 sur les gestionnaires de fonds d'investissement alternatifs (ci-après la « *Directive AIFM* »), et dans la directive 2014/91/UE du 23 juillet 2014 concernant les OPCVM (ci-après la « *Directive UCITS V* »). Ces règles, portant sur les structures, les pratiques et la politique de rémunération du gestionnaire ont notamment pour but de contribuer à renforcer la gestion saine, efficace et maîtrisée des risques pesant tant sur la société de gestion que sur les fonds gérés.

De plus, la politique de rémunération est conforme au Règlement (UE) 2019/2088 (« SFDR »), intégrant le risque de développement durable et les critères ESG dans le plan de contrôle d'Amundi, avec des responsabilités réparties entre le premier niveau de contrôles effectué par les équipes de Gestion et le deuxième niveau de contrôles effectué par les équipes Risques, qui peuvent vérifier à tout moment le respect des objectifs et des contraintes ESG d'un fonds.

Cette politique s'inscrit dans le cadre de la politique de rémunération du Groupe Amundi, revue chaque année par son Comité des Rémunérations. Lors de la séance du 2 février 2021, celui-ci a vérifié l'application de la politique applicable au titre de l'exercice 2020 et sa conformité avec les principes des Directives AIFM et UCITS V, et a approuvé la politique applicable au titre de l'exercice 2021.

La mise en œuvre de la politique de rémunération Amundi a fait l'objet, courant 2021, d'une évaluation interne, centrale et indépendante, conduite par l'Audit Interne Amundi.

1 Montant des rémunérations versées par le gestionnaire à son personnel

Sur l'exercice 2021, le montant total des rémunérations (incluant les rémunérations fixes et variable différées et non différées) versées par Amundi Asset Management à l'ensemble de son personnel (soit 1 400 collaborateurs au 31 décembre 2021) s'est élevé à 168 546 202 euros. Ce montant se décompose comme suit :

- Montant total des rémunérations fixes versées par Amundi Asset Management sur l'exercice : 111 175 491 euros, soit 66% du total des rémunérations versées par le gestionnaire à l'ensemble de son personnel, l'ont été sous la forme de rémunération fixe.
- Montant total des rémunérations variables différées et non différées versées par Amundi Asset Management sur l'exercice : 57 370 712 euros, soit 34% du total des rémunérations versées par le gestionnaire à l'ensemble de son personnel, l'ont été sous cette forme. L'ensemble du personnel est éligible au dispositif de rémunération variable.

Par ailleurs, du « carried interest » a été versé au cours de l'exercice 2021, et est pris en compte dans le montant total de rémunérations variables versées ci-dessus.

Sur le total des rémunérations (fixes et variables différées et non différées) versées sur l'exercice, 20 947 570 euros concernaient les « cadres dirigeants et cadres supérieurs » (soit 29 collaborateurs au 31 décembre 2021), 14 896 957 euros concernaient les « gérants décisionnaires » dont les activités ont une incidence significative sur le profil de risque des fonds gérés (soit 40 collaborateurs au 31 décembre 2021).

OPCVM AMUNDI GLOBAL MACRO 2

2 Incidences de la politique et des pratiques de rémunération sur le profil de risque et sur la gestion des conflits d'intérêt

Le Groupe Amundi s'est doté d'une politique et a mis en œuvre des pratiques de rémunération conformes aux dernières évolutions législatives, réglementaires et doctrinales issues des autorités de régulation pour l'ensemble de ses Sociétés de Gestion.

Le Groupe Amundi a également procédé à l'identification de son Personnel Identifié qui comprend l'ensemble des collaborateurs du Groupe Amundi exerçant un pouvoir de décision sur la gestion des sociétés ou des fonds gérés et susceptibles par conséquent d'avoir un impact significatif sur la performance ou le profil de risque.

Les rémunérations variables attribuées au personnel du Groupe Amundi sont déterminées en combinant l'évaluation des performances du collaborateur concerné, de l'unité opérationnelle auquel il appartient et des résultats d'ensemble du Groupe. Cette évaluation des performances individuelles prend en compte aussi bien des critères financiers que non financiers, ainsi que le respect des règles de saine gestion des risques.

Les critères pris en compte pour l'évaluation des performances et l'attribution des rémunérations variables dépendent de la nature de la fonction exercée :

1. Fonctions de sélection et de gestion de portefeuille

Critères financiers usuels :

- Performances brute et nette du fonds géré sur 1, 3 et 5 ans ;
- Ratio d'information et ratio de Sharpe sur 1, 3 et 5 ans ;
- Performance fees générées pendant l'exercice si pertinent ;
- Classements concurrentiels ;
- Contribution à la collecte nette réalisée sur l'exercice.

Critères non-financiers usuels :

- Respect des règles de risque, de conformité, et de la politique ESG, et des règles légales ;
- Innovation / développement produit ;
- Transversalité, partage des best practices et collaboration ;
- Contribution à l'engagement commercial ;
- Qualité du management.

2. Fonctions commerciales

Critères financiers usuels :

- Collecte nette ;
- Recettes ;
- Collecte brute; développement et fidélisation de la clientèle; gamme de produits ;

Critères non-financiers usuels :

- Prise en compte conjointe des intérêts d'Amundi et du client ;
- Satisfaction client et qualité de la relation commerciale ;
- Qualité du management ;
- Sécurisation/développement du fonds de commerce ;
- Transversalité et partage des best practices ;
- Esprit d'entreprise.

OPCVM AMUNDI GLOBAL MACRO 2

3. Fonctions de support et de contrôle

En ce qui concerne les fonctions de contrôle, l'évaluation de la performance et les attributions de rémunération variable sont indépendantes de la performance des secteurs d'activités qu'elles contrôlent.

Les critères habituellement pris en compte sont les suivants :

- Principalement des critères liés à l'atteinte d'objectifs qui leur sont propres (maîtrise des risques, qualité des contrôles, réalisation de projets, amélioration des outils et systèmes etc.)
- Lorsque des critères financiers sont utilisés, ils tournent essentiellement autour de la gestion et l'optimisation des charges.

Les critères de performance ci-dessus énoncés, et notamment ceux appliqués au Personnel Identifié en charge de la gestion, s'inscrivent plus largement dans le respect de la réglementation applicable aux fonds gérés ainsi que de la politique d'investissement du comité d'investissement du gestionnaire.

En outre, le Groupe Amundi a mis en place, pour l'ensemble de son personnel, des mesures visant à aligner les rémunérations sur la performance et les risques à long terme, et à limiter les risques de conflits d'intérêts.

A ce titre, notamment :

- est mis en place un barème de différé, conforme aux exigences des Directives AIFM et UCITS V
- la partie différée de la rémunération variable des collaborateurs du Personnel Identifié est versée en instruments indexés à 100% sur la performance d'un panier de fonds représentatif
- l'acquisition définitive de la partie différée est liée à la situation financière d'Amundi, à la continuité d'emploi du collaborateur dans le groupe ainsi qu'à sa gestion saine et maîtrisée des risques sur toute la période d'acquisition.

Respect par l'OPC de critères relatifs aux objectifs environnementaux, sociaux et de qualité de gouvernance (ESG)

Amundi applique des règles d'exclusion ciblées qui constituent le socle de sa responsabilité fiduciaire. Elles sont appliquées dans toutes ses stratégies de gestion active et consistent à exclure les entreprises qui ne sont conformes ni à notre politique ESG, ni aux conventions internationales et aux cadres reconnus sur le plan international, ni aux cadres de régulations nationales. Ces exclusions ciblées sont appliquées sous réserve de conformité aux lois et règlements applicables et sauf dispositions contractuelles contraires pour les produits ou services dédiés.

C'est ainsi qu'Amundi exclut les activités suivantes :

Tout investissement direct dans les entreprises impliquées dans la fabrication, le commerce, le stockage ou les services pour les mines antipersonnel, les bombes à sous-munitions, en conformité avec les conventions d'Ottawa et d'Oslo.

Les entreprises produisant, stockant, commercialisant des armes chimiques, des armes biologiques et des armes à l'uranium appauvri.

Les entreprises qui contreviennent gravement et de manière répétée à l'un ou plusieurs des 10 principes du Pacte Mondial, sans mesures correctives crédibles.

Ces émetteurs sont notés G sur l'échelle d'Amundi. De plus, Amundi met en œuvre des exclusions sectorielles ciblées, spécifiques aux industries du charbon et du tabac. Ces exclusions sectorielles s'appliquent à toutes les stratégies de gestion active sur lesquelles Amundi a la discrétion entière de gestion de portefeuille.

Politique Charbon

Amundi exclut :

- Les entreprises développant ou projetant de développer de nouvelles capacités en charbon thermique dans l'ensemble de la chaîne de valeur (producteurs, extracteurs, centrales, infrastructures de transport).
- Les entreprises dont plus de 25% du chiffre d'affaires provient de l'extraction de charbon thermique.
- Les entreprises dont l'extraction annuelle de charbon thermique est de 100 MT ou plus sans intention de réduction.
 - Toutes les entreprises dont le chiffre d'affaires lié à l'extraction de charbon thermique et à la production d'électricité à partir de charbon thermique est supérieur à 50% de leur chiffre d'affaires total sans analyse.
 - Toutes les entreprises de production d'électricité au charbon et d'extraction de charbon avec un seuil entre 25% et 50% et un score de transition énergétique détérioré.

OPCVM AMUNDI GLOBAL MACRO 2

Application en gestion passive :

• Fonds passifs ESG

Tous les ETF et fonds indiciels ESG appliquent chaque fois que possible la politique d'exclusion du secteur charbon d'Amundi (à l'exception des indices très concentrés).

• Fonds passifs non ESG

Le devoir fiduciaire en gestion passive est de reproduire le plus fidèlement possible un indice.

Le gestionnaire de portefeuille dispose ainsi d'une marge de manœuvre limitée et doit remplir les objectifs contractuels pour obtenir une exposition passive pleinement conforme à l'indice de référence demandé.

Par conséquent, les fonds indiciels et ETF d'Amundi répliquant des indices de référence standards (non ESG) ne peuvent pas appliquer d'exclusions sectorielles systématiques.

Cependant, dans le cadre des titres exclus de la « politique charbon thermique » sur l'univers d'investissement actif d'Amundi mais qui pourraient être présents dans des fonds passifs non ESG, Amundi a renforcé ses actions en matière de vote et d'engagement qui pourraient se traduire par un vote « contre » le management des entreprises concernées.

Politique sur le tabac

Depuis 2018, Amundi limite les notes ESG des entreprises du secteur du tabac à E, sur une échelle de A à G (les entreprises notées G étant exclues) afin de prendre en compte les inquiétudes liées à la santé publique, mais également la violation des droits de l'homme, la pauvreté, les conséquences environnementales, et le coût économique considérable associé au tabac, estimé à plus de 1 000 milliards de dollars par an dans le monde, selon les estimations de l'Organisation mondiale de la santé. Cette limite a pour but de pénaliser l'investissement dans ce type d'entreprises, ce qui doit être compensé par des investissements dans des entreprises plus vertueuses. La politique d'Amundi s'applique au secteur du tabac dans son entièreté, notamment les fournisseurs, les fabricants de cigarettes et les distributeurs.

En mai 2020, Amundi est devenu signataire du Tobacco-Free Finance Pledge, renforçant de fait sa politique d'exclusion au tabac. Amundi applique ainsi les règles suivantes :

- Règles d'exclusion : sont exclues les entreprises fabriquant des produits complets du tabac (seuils d'application : revenus supérieurs à 5%).
- Règles de limite : sont limitées à une note ESG de E (s'étalonnant de A à G) les entreprises impliquées dans les activités de fabrication, de fourniture et de distribution de tabac (seuils d'application : revenus supérieurs à 10%).

Des informations complémentaires sur les modalités de prise en compte des critères ESG par Amundi sont disponibles sur son site Internet : <https://legroupe.amundi.com>

Opinion

En exécution de la mission qui nous a été confiée par la société de gestion, nous avons effectué l'audit des comptes annuels de l'OPCVM constitué sous forme de fonds commun de placement nourricier AMUNDI GLOBAL MACRO 2 relatifs à l'exercice clos le 30 juin 2022, tels qu'ils sont joints au présent rapport.

Nous certifions que les comptes annuels sont, au regard des règles et principes comptables français, réguliers et sincères et donnent une image fidèle du résultat des opérations de l'exercice écoulé ainsi que de la situation financière et du patrimoine de l'OPCVM constitué sous forme de fonds commun de placement nourricier à la fin de cet exercice.

Fondement de l'opinion

Référentiel d'audit

Nous avons effectué notre audit selon les normes d'exercice professionnel applicables en France. Nous estimons que les éléments que nous avons collectés sont suffisants et appropriés pour fonder notre opinion. Les responsabilités qui nous incombent en vertu de ces normes sont indiquées dans la partie « *Responsabilités du commissaire aux comptes relatives à l'audit des comptes annuels* » du présent rapport.

Indépendance

Nous avons réalisé notre mission d'audit dans le respect des règles d'indépendance qui nous sont applicables, sur la période du 01/07/2021 à la date d'émission de notre rapport, et notamment nous n'avons pas fourni de services interdits par le code de déontologie de la profession de commissaire aux comptes.

Justification des appréciations

En application des dispositions des articles L.823-9 et R.823-7 du code de commerce relatives à la justification de nos appréciations, nous portons à votre connaissance que les appréciations qui, selon notre jugement professionnel ont été les plus importantes pour l'audit des comptes annuels de l'exercice, ont porté sur le caractère approprié des principes comptables appliqués ainsi que sur le caractère raisonnable des estimations significatives retenues et sur la présentation d'ensemble des comptes.

Les appréciations ainsi portées s'inscrivent dans le contexte de l'audit des comptes annuels pris dans leur ensemble et de la formation de notre opinion exprimée ci-avant. Nous n'exprimons pas d'opinion sur des éléments de ces comptes annuels pris isolément.

Vérifications spécifiques

Nous avons également procédé, conformément aux normes d'exercice professionnel applicables en France, aux vérifications spécifiques prévues par les textes légaux et réglementaires.

Nous n'avons pas d'observation à formuler sur la sincérité et la concordance avec les comptes annuels des informations données dans le rapport de gestion établi par la société de gestion.

Responsabilités de la direction et des personnes constituant le gouvernement d'entreprise relatives aux comptes annuels

Il appartient à la société de gestion d'établir des comptes annuels présentant une image fidèle conformément aux règles et principes comptables français ainsi que de mettre en place le contrôle interne qu'elle estime nécessaire à l'établissement de comptes annuels ne comportant pas d'anomalies significatives, que celles-ci proviennent de fraudes ou résultent d'erreurs.

Lors de l'établissement des comptes annuels, il incombe à la société de gestion d'évaluer la capacité de l'OPC à poursuivre son exploitation, de présenter dans ces comptes, le cas échéant, les informations nécessaires relatives à la continuité d'exploitation et d'appliquer la convention comptable de continuité d'exploitation, sauf s'il est prévu de liquider l'OPC ou de cesser son activité.

Les comptes annuels ont été arrêtés par la société de gestion.

Responsabilités du commissaire aux comptes relatives à l'audit des comptes annuels

Objectif et démarche d'audit

Il nous appartient d'établir un rapport sur les comptes annuels. Notre objectif est d'obtenir l'assurance raisonnable que les comptes annuels pris dans leur ensemble ne comportent pas d'anomalies significatives. L'assurance raisonnable correspond à un niveau élevé d'assurance, sans toutefois garantir qu'un audit réalisé conformément aux normes d'exercice professionnel permet de systématiquement détecter toute anomalie significative. Les anomalies peuvent provenir de fraudes ou résulter d'erreurs et sont considérées comme significatives lorsque l'on peut raisonnablement s'attendre à ce qu'elles puissent, prises individuellement ou en cumulé, influencer les décisions économiques que les utilisateurs des comptes prennent en se fondant sur ceux-ci.

Comme précisé par l'article L.823-10-1 du code de commerce, notre mission de certification des comptes ne consiste pas à garantir la viabilité ou la qualité de la gestion de l'OPC.

Dans le cadre d'un audit réalisé conformément aux normes d'exercice professionnel applicables en France, le commissaire aux comptes exerce son jugement professionnel tout au long de cet audit. En outre :

- il identifie et évalue les risques que les comptes annuels comportent des anomalies significatives, que celles-ci proviennent de fraudes ou résultent d'erreurs, définit et met en œuvre des procédures d'audit face à ces risques, et recueille des éléments qu'il estime suffisants et appropriés pour fonder son opinion. Le risque de non-détection d'une anomalie significative provenant d'une fraude est plus élevé que celui d'une anomalie significative résultant d'une erreur, car la fraude peut impliquer la collusion, la falsification, les omissions volontaires, les fausses déclarations ou le contournement du contrôle interne ;

*PricewaterhouseCoopers Audit, 63, rue de Villiers, 92208 Neuilly-sur-Seine Cedex
T: +33 (0) 1 56 57 58 59, F: +33 (0) 1 56 57 58 60, www.pwc.fr*

- il prend connaissance du contrôle interne pertinent pour l'audit afin de définir des procédures d'audit appropriées en la circonstance, et non dans le but d'exprimer une opinion sur l'efficacité du contrôle interne ;
- il apprécie le caractère approprié des méthodes comptables retenues et le caractère raisonnable des estimations comptables faites par la société de gestion, ainsi que les informations les concernant fournies dans les comptes annuels ;
- il apprécie le caractère approprié de l'application par la société de gestion de la convention comptable de continuité d'exploitation et, selon les éléments collectés, l'existence ou non d'une incertitude significative liée à des événements ou à des circonstances susceptibles de mettre en cause la capacité de l'OPC à poursuivre son exploitation. Cette appréciation s'appuie sur les éléments collectés jusqu'à la date de son rapport, étant toutefois rappelé que des circonstances ou événements ultérieurs pourraient mettre en cause la continuité d'exploitation. S'il conclut à l'existence d'une incertitude significative, il attire l'attention des lecteurs de son rapport sur les informations fournies dans les comptes annuels au sujet de cette incertitude ou, si ces informations ne sont pas fournies ou ne sont pas pertinentes, il formule une certification avec réserve ou un refus de certifier ;
- il apprécie la présentation d'ensemble des comptes annuels et évalue si les comptes annuels reflètent les opérations et événements sous-jacents de manière à en donner une image fidèle.

En application de la loi, nous vous signalons que nous n'avons pas été en mesure d'émettre le présent rapport dans les délais réglementaires compte tenu de la réception tardive de certains documents nécessaires à la finalisation de nos travaux.

Annexes aux comptes annuels

1. Règles et méthodes comptables

Les comptes annuels sont présentés sous la forme prévue par le règlement ANC n° 2014-01, modifié.

Les principes généraux de la comptabilité s'appliquent :

- image fidèle, comparabilité, continuité de l'activité,
- régularité, sincérité,
- prudence,
- permanence des méthodes d'un exercice à l'autre.

Le mode de comptabilisation retenu pour l'enregistrement des produits des titres à revenu fixe est celui des intérêts encaissés.

Les entrées et les cessions de titres sont comptabilisées frais exclus.

La devise de référence de la comptabilité du portefeuille est en euro.

La durée de l'exercice est de 12 mois.

Règles d'évaluation des actifs

Les instruments financiers sont enregistrés en comptabilité selon la méthode des coûts historiques et inscrits au bilan à leur valeur actuelle qui est déterminée par la dernière valeur de marché connue ou à défaut d'existence de marché par tous moyens externes ou par recours à des modèles financiers.

Les différences entre les valeurs actuelles utilisées lors du calcul de la valeur liquidative et les coûts historiques des valeurs mobilières à leur entrée en portefeuille sont enregistrées dans des comptes « différences d'estimation ».

Les valeurs qui ne sont pas dans la devise du portefeuille sont évaluées conformément au principe énoncé ci-dessous, puis converties dans la devise du portefeuille suivant le cours des devises au jour de l'évaluation.

OPC détenus :

Les parts ou actions d'OPC seront valorisées à la dernière valeur liquidative connue.

Instruments financiers à terme :

Instruments financiers à terme négociés sur un marché réglementé ou assimilé :

Les instruments financiers à terme négociés sur les marchés réglementés sont valorisés au cours de compensation du jour.

Instruments financiers à terme non négociés sur un marché réglementé ou assimilé :

Les Swaps :

Les contrats d'échange de taux d'intérêt et/ou de devises sont valorisés à leur valeur de marché en fonction du prix calculé par actualisation des flux d'intérêts futurs aux taux d'intérêts et/ou de devises de marché. Ce prix est corrigé du risque de signature.

Les swaps d'indice sont évalués de façon actuarielle sur la base d'un taux de référence fourni par la contrepartie.

Les autres swaps sont évalués à leur valeur de marché ou à une valeur estimée selon les modalités arrêtées par la société de gestion.

OPCVM AMUNDI GLOBAL MACRO 2

Engagements Hors Bilan :

Les contrats à terme ferme sont portés pour leur valeur de marché en engagements hors bilan au cours utilisé dans le portefeuille.

Les opérations à terme conditionnelles sont traduites en équivalent sous-jacent.

Les engagements sur contrats d'échange sont présentés à leur valeur nominale, ou en l'absence de valeur nominale pour un montant équivalent.

Frais de gestion

Les frais de gestion et de fonctionnement recouvrent l'ensemble des frais relatif à l'OPC : gestion financière, administrative, comptable, conservation, distribution, frais d'audit...

Ces frais sont imputés au compte de résultat de l'OPC.

Les frais de gestion n'incluent pas les frais de transaction. Pour plus de précision sur les frais effectivement facturés à l'OPC, se reporter au prospectus.

Ils sont enregistrés au prorata temporis à chaque calcul de valeur liquidative.

Le cumul de ces frais respecte le taux de frais maximum de l'actif net indiqué dans le prospectus ou le règlement du fonds :

FR0011261981 - AMUNDI GLOBAL MACRO 2 P : Taux de frais maximum de 0,60% TTC.

FR0007477146 - AMUNDI GLOBAL MACRO 2 I : Taux de frais maximum de 0,40% TTC.

Commission de surperformance :

Le calcul de la commission de surperformance s'applique au niveau de chaque part/action concernée et à chaque date d'établissement de la Valeur Liquidative. Celui-ci est basé sur la comparaison entre :

- L'actif net de la part (avant prélèvement de la commission de surperformance) et L' « actif de référence » qui représente l'actif net de la part (avant prélèvement de la commission de surperformance) au 1er jour de la période d'observation, retraité des souscriptions/rachats à chaque valorisation, auquel est appliqué la performance de l'indice de référence €STR + 0,085%.
- Cette comparaison est effectuée sur une période d'observation d'une année dont la date anniversaire correspond au jour d'établissement de la dernière valeur liquidative du mois de décembre.

Si, au cours de la période d'observation, l'actif net de la part (avant prélèvement de la commission de surperformance) est supérieur à celui de l'actif de référence défini ci-dessus, la commission de surperformance représentera 15 % de l'écart entre ces 2 actifs. Cette commission fera l'objet d'une provision lors du calcul de la valeur liquidative. En cas de rachat, la quote-part de la provision constituée, correspondant au nombre de parts rachetées, est définitivement acquise à la société de gestion.

Si, au cours de la période d'observation, l'actif net de la part (avant prélèvement de la commission de surperformance) est inférieur à celui de l'actif de référence, la commission de surperformance sera nulle et fera l'objet d'une reprise de provision lors du calcul de la valeur liquidative. Les reprises sur provision sont plafonnées à hauteur des dotations antérieures.

Cette commission de surperformance ne sera définitivement perçue que si, le jour de la dernière valeur liquidative de la période d'observation, l'actif net de la part (avant prélèvement de la commission de surperformance) est supérieur à celui de l'actif de référence.

OPCVM AMUNDI GLOBAL MACRO 2

Affectation des sommes distribuables

Définition des sommes distribuables

Les sommes distribuables sont constituées par :

Le résultat :

Le résultat net de l'exercice est égal au montant des intérêts, arrérages, primes et lots, dividendes, jetons de présence et tous autres produits relatifs aux titres constituant le portefeuille, majorés du produit des sommes momentanément disponibles et diminué du montant des frais de gestion et de la charge des emprunts. Il est augmenté du report à nouveau et majoré ou diminué du solde du compte de régularisation des revenus.

Les Plus et Moins-values :

Les plus-values réalisées, nettes de frais, diminuées des moins-values réalisées, nettes de frais, constatées au cours de l'exercice, augmentées des plus-values nettes de même nature constatées au cours d'exercices antérieurs n'ayant pas fait l'objet d'une distribution ou d'une capitalisation et diminuées ou augmentées du solde du compte de régularisation des plus-values.

Modalités d'affectation des sommes distribuables :

Caractéristiques principales du fonds

Ce document fournit des informations essentielles aux investisseurs de ce fonds. Il ne s'agit pas d'un document promotionnel. Les informations qu'il contient vous sont fournies conformément à une obligation légale, afin de vous aider à comprendre en quoi consiste un investissement dans ce fonds et quels risques y sont associés. Il vous est conseillé de le lire pour décider en connaissance de cause d'investir ou non.

AMUNDI GLOBAL MACRO 2

Classe P - Code ISIN : (C) FR0011261981

OPCVM de droit français géré par Amundi Asset Management, société de Amundi

Objectifs et politique d'investissement

Classification AMF ("Autorité des Marchés Financiers") : Obligations et autres titres de créance internationaux

En souscrivant à AMUNDI GLOBAL MACRO 2 - P, vous investissez dans des titres obligataires internationaux et sur les marchés de devises, au travers d'AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR.

En effet, votre investissement est réalisé en quasi-totalité dans le compartiment AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR d'Amundi Funds, SICAV de droit Luxembourgeois, et accessoirement en liquidités.

L'objectif de votre fonds est de réaliser une performance supérieure à celle de l'indice €STR capitalisé quotidiennement, sur un horizon de placement minimum d'un an, après prise en compte des frais courants, et dans le respect d'un budget de risque mesuré en volatilité.

La performance de AMUNDI GLOBAL MACRO 2 - P peut être inférieure à celle de AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR en raison notamment de ses propres frais.

La stratégie de votre fonds est identique à celle d'AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR, à savoir :

"L'objectif du Compartiment est de réaliser une performance annuelle supérieure à celle de l'indice €STR capitalisé quotidiennement.

Pour atteindre cet objectif, le Compartiment investit dans tous les types d'instruments de dette, d'instruments financiers dont la valeur et les paiements de revenus sont liés à et garantis (ou « adossés ») par un panier spécifique d'actifs sous-jacents (« titres adossés à des actifs »), de fonds d'investissements à hauteur de 10 % de son actif net, de liquidités et/ou de dépôts, tout en s'exposant aux devises de l'OCDE. Il combine plusieurs techniques et stratégies d'analyse visant à générer une performance indépendante des tendances du marché. L'emploi de produits dérivés fera partie intégrante de la politique et des stratégies d'investissement du Compartiment à des fins d'arbitrage, de couverture et/ou de surexposition. La gestion active de ce Compartiment peut entraîner des frais de transaction significatifs qui auront un impact sur la performance."

L'OPC est géré activement. L'indice est utilisé à postériori comme indicateur de comparaison des performances. La stratégie de gestion est discrétionnaire et sans contrainte relative à l'indice.

Le résultat net et les plus-values nettes réalisées du fonds sont systématiquement réinvestis chaque année.

Vous pouvez demander le remboursement de vos parts chaque jour, les opérations de rachat sont exécutées de façon quotidienne.

Recommandation : ce fonds pourrait ne pas convenir aux investisseurs qui prévoient de retirer leur apport avant 1 an.

Profil de risque et de rendement

Les risques importants pour l'OPCVM non pris en compte dans l'indicateur sont :

- Risque de crédit : il représente le risque de dégradation soudaine de la qualité de signature d'un émetteur ou celui de sa défaillance.
- Risque de liquidité : dans le cas particulier où les volumes d'échange sur les marchés financiers sont très faibles, toute opération d'achat ou vente sur ces derniers peut entraîner d'importantes variations du marché.
- Risque de contrepartie : il représente le risque de défaillance d'un intervenant de marché l'empêchant d'honorer ses engagements vis-à-vis de votre portefeuille.
- L'utilisation de produits complexes tels que les produits dérivés peut entraîner une amplification des mouvements de titres dans votre portefeuille.

La survenance de l'un de ces risques peut entraîner une baisse de la valeur liquidative du portefeuille.

Le niveau de risque de ce FCP reflète les prises de positions à l'achat et à la vente de la gestion sur les marchés de taux et changes dans le cadre de la marge de manœuvre préalablement définie.

Les données historiques utilisées pour le calcul de l'indicateur de risque numérique pourraient ne pas constituer une indication fiable du profil de risque futur de l'OPCVM.

La catégorie de risque associée à ce fonds n'est pas garantie et pourra évoluer dans le temps.

La catégorie la plus faible ne signifie pas « sans risque ».

Le capital initialement investi ne bénéficie d'aucune garantie.

Les dispositions en matière de souscription/rachat d'AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR, dans lequel est investi votre fonds, sont expliquées dans la partie Conditions de souscriptions et de rachats du prospectus de AMUNDI FUNDS GLOBAL MACRO BONDS & CURRENCIES LOW VOL - OR.

■ United States

In quarter three of 2021, US economic activity progressed at a solid pace, albeit decelerating in the second half of the quarter, a trend that was confirmed by economic indicators. PMI indices showed a moderate expansion in the Services and Industry sectors, which were affected by the spread of the Delta variant, a slowdown in demand and the significant disruption to supply chains, which penalised industrial production. Retail sales increased by 0.7% in August, while industrial production increased by 0.4% despite the supply bottlenecks. The unemployment rate stood at 5.2% in August, down from 5.4% in July as companies continued to recruit new employees. In August, the 12-month inflation rate stood at 5.2%, buoyed by base effects and temporary factors, but also by more structural increases. The US Federal Reserve refrained from announcing a timetable to reduce its asset purchases, but clearly suggested that such an announcement would take place during its monetary policy committee in November 2021.

In quarter four, US economic activity picked up again after the slowdown at the end of quarter three. Economic data confirmed the positive momentum, with both the Industry and Services sectors reporting a marked improvement in business climate. However, US production volumes remained constrained by severe supply chain disruptions and shortages of intermediate products, despite some signs of improvement during the quarter. Retail sales were up 0.3% in November after an increase of 1.7% in October, while industrial production rose 0.5%. The unemployment rate was at 4.2% in November, down from 4.6% in October as the US labour market continued to improve. Inflation accelerated in November to 6.8% year-on-year, buoyed by base effects and temporary factors but also by more structural causes. While Jerome Powell was confirmed for a second term as Chair of the Federal Reserve, in December the Federal Reserve announced that from January 2022, the pace of its reduction in asset purchasing would be doubled, to arrive at \$30 billion per month, with the end of net purchases scheduled for March 2022.

At the start of 2022, economic data showed a slowdown in economic activity at the start of January, due to the spread of the Omicron variant. However, the situation improved from February. Business sentiment indicators followed the same trajectory, despite industry indicators pointing to a slowdown. The US labour market continued to strengthen. Despite an easing of supply chain troubles, upward price pressures remained high due to significant supply and demand imbalances. Consumer confidence surveys (such as the Conference Board consumer confidence survey) reported concerns about economy, most likely due to soaring energy prices and the war in Ukraine. The sharp increase in household inflation expectations was reflected in the acceleration of the consumer price index, which stood very close to 8% year-on-year in February 2022. The conflict in the Ukraine was affecting the United States less hard than Europe, but rising commodity prices did hurt US consumers.

In the second quarter of 2022, the US economy was slowing as evidenced by deteriorating consumer confidence and persistent inflation (affecting disposable income), led by high costs of energy and services. The consumer inflation figures for May 2022 were at 40-year high, thereby maintaining pressures on the Federal Reserve to respond to an issue, which has become political in the country as President Biden faces mid-term elections this year. The Federal Reserve (Fed) hiked policy rates by 75 bps in June, and is likely to remain on the tightening trajectory in the near term. However, pressures continued to build up on economic growth as Manufacturing PMI for June declined. As a result, the Fed's task was getting difficult in light of its dual mandate to balance price stability with economic growth. Nonetheless, strong labour markets and low unemployment rates meant overall consumption was robust despite some clouds on the horizon.

■ Eurozone

In the Eurozone, economic activity grew at a steady pace in September 2021, confirming strong GDP growth in the third quarter. However, production and consumption figures weakened slightly, indicating a gradual slowdown. Corporate activity remained vigorous, following the easing of Covid restrictions during the summer. Nevertheless, global supply chain disruptions and shortages of intermediate products penalised Manufacturing, which limited production growth. Retail sales decreased by 2.3% in July (+3.1% year-on-year) after strong growth in June, while industrial production increased 1.5% (+7.7% year-on-year). The labour market remained weak, although employment protection schemes continued to keep the unemployment rate stable at 7.5% in August. Inflation reached 3.4% in September (first estimate), buoyed by base effects, stronger demand and disruption to international trade. The European Central Bank (ECB) maintained a highly accommodating position, nevertheless announcing a moderate reduction in its pandemic emergency purchase program (PEPP) in the fourth quarter of 2021. The European NGEU recovery fund made its first disbursements.

Economic activity decelerated in the Eurozone at the end of Q4 due to the significant rise in Covid-19 cases. Supply chain disruptions continued to adversely affect industrial production, along with shortages of intermediate products and strong upward pressure on prices. However, signs of possible easing emerged over the course of the quarter across the Eurozone. Retail sales were up 0.2% in October (+1.4% YoY), while industrial production rose by 1.1% (+3.3% YoY). The labour market continued to improve in the fourth quarter, with the unemployment rate falling to 7.3% in October, from the 7.4% seen in September. Inflation accelerated to 4.9% in November due to base effects, strong international trade disruptions, rebounding demand and high energy prices. The ECB announced a considerable reduction in its purchases: the PEPP program to be continued in quarter one at a slower pace than in the previous quarter before coming to an end in March 2022 and the asset purchase program (APP) to be gradually reduced as well.

GDP figures published in late January 2022 showed a significant slowdown in economic growth in the Eurozone during quarter four of 2021: German GDP contracted, while GDP in France, Spain and Italy grew much less than during quarter three of 2021. Figures for quarter one of 2022 showed a further slowdown in economic activity at the very start of the year due to the spread of the Omicron variant. However, from mid-January, business and consumer surveys indicated a significant improvement. PMI indices showed that the Services sector in particular suffered in January and rebounded in February, while the Industry sector was steadier. However, March saw further deterioration due to the war in Ukraine: the manufacturing PMI fell to a 14-month low, standing at 56.5. The labour market continued to improve, but inflation was a growing problem for households, with the consumer price index soaring to new highs as energy prices continued to rise. The spike in commodity prices and the sanctions imposed due to the war in Ukraine significantly increased the risk of stagflation in the Eurozone, with technical recession and sustained inflation above 5% a plausible scenario.

In the second quarter, stagflationary fears gained momentum after prices rose and the Eurozone's growth outlook came under pressure, aggravated by geopolitical tensions and Russia's decision to disrupt gas supply. As global leaders discussed ways to wean themselves from Russian gas in the long-term and reinforce defence lines in Eastern Europe, the short-term ramifications became apparent. While the latest composite EZ PMI reading came in at its lowest level in more than a year, consumer prices rose 8.6% (year on year) in June 2022. The effects of this decline in people's purchasing power were felt in French politics. President Macron lost his majority after the second round elections. On the other hand, the ECB's task is getting difficult as it tries to balance controlling inflation (partially caused by supply-side constraints) with preventing fragmentation across the EU. The ECB decided to end its net asset purchases under its asset purchase programme and created a new anti-fragmentation tool.

■ Emerging markets

The third quarter of 2021 ended with revised downward growth forecasts for emerging markets. The outlook for China in particular deteriorated due to weaker real estate market indicators, Covid and environmental policy restrictions, and the global semiconductor shortage. Mobility remained stable at the end of the quarter, albeit more in Asia than in Latin America, Central and Eastern Europe and Middle East regions. Inflation remained above the levels set by central banks, except in Asia, where upward momentum was more contained. With a more restrictive policy mix, monetary normalisation grew faster than expected, although real rates remained moderate. This was the case in countries that continued their rate hike cycles (Brazil, Peru, Chile, Russia, the Czech Republic and Hungary), or that had started them (South Korea, Mexico and Sri Lanka). In fiscal terms, budgetary support was limited, and many countries were seeing an increase in debt.

In the fourth quarter of 2021, the outlook for emerging economies continued to worsen. The Chinese economy, penalised by its own political constraints at the beginning of quarter four, showed a slight recovery. Chinese policymakers provided a surprise at the end of the year by returning to a broadly accommodating monetary policy (through, in particular, an RRR cut of 50 bp), and indicating that stability of growth via domestic demand would be the priority of their policy in 2022. On the inflation side, with the exception of Asia where inflationary pressures were contained, figures were still at very high levels, well above the central banks' targets in some countries, forcing central banks to continue their tight monetary policies. Rising energy, oil and food prices and supply chain disruptions remain the main causes of these high levels of inflation. Additional domestic factors were also feeding these inflationary pressures: price rises for property and wages, as well as currency depreciation. During the first quarter of 2022, the outlook for emerging economies continued to worsen. The Chinese economy posted a slight recovery and policymakers indicated again that growth via domestic demand would be the priority in 2022. The end of the first quarter was marked by a further increase in economic uncertainty due to the rapid spread of the Omicron variant. Some emerging countries introduced health measures that restricted people's mobility.

During the second quarter of 2022, emerging markets presented a diverging economic environment with inflation and central bank policies in the limelight. In China, the government's zero-tolerance for Covid affected economic activity. As a result, the Chinese Central Bank (PBoC) cut policy rates in May to support growth. While the June manufacturing PMI was strong, the growth outlook was shrouded by Covid policies. On the other hand, the Reserve Bank of India raised policy rates 50 bps in June, to control inflation. Elsewhere, Latin American exporters benefited from high commodity prices but continued to face persistent inflation. In Brazil, in addition to monetary tightening, fiscal support to offset the impact of high prices was witnessed. Geopolitics and Russia's invasion of Ukraine continued to impact costs of food and commodities in Eastern European countries. The Russian central bank reduced rates multiple times to save the economy reeling from western sanctions. In contrast, in Turkey, the political leadership vowed to pursue unorthodox policies to bring prices under control.

■ Fixed Income

The third quarter of 2021 was marked by a rise in long rates. The US 10-year rate rose by almost 17 bp to 1.5%. The rise in the German 10-year rate was less strong: +9 bp to reach -0.22%. The rise in interest rates was partly explained by the Fed's change in tone, as it confirmed its monetary tightening intentions. The ECB was in a different configuration, announcing a drop in its monthly purchases. Christine Lagarde made the point that this is a re-calibration of purchases, not a tapering. Furthermore, the ECB also paved the way for the December announcement of further monetary support in 2022 in order to avoid a tightening of financial conditions. During the fourth quarter, volatility in the interest rate markets returned, and bond yield curves flattened. Investors upwardly revised their expectations of a rise in interest rates upwardly following the persistence of inflation. Furthermore, the major central banks moved closer to market expectations by announcing a change in direction in their monetary policy with the end of Covid support measures. The Fed announced an acceleration in the normalisation of its monetary policy due to inflationary pressures and a favourable economic environment. The ECB wanted to end its pandemic-related emergency measures yet adopted a backstop strategy, while maintaining flexibility for the reinvestment of securities acquired as part of its emergency programme. Securities reaching maturity were to be freely reinvested by asset class and jurisdiction.

During the first quarter of 2022, the interest rate market experienced sharp rises in sovereign rates. The gap between short-term and medium-term US government bond yields narrowed sharply. Inflation was high and risks continued to rise, with investors expecting further interest rate hikes. The spike in oil, commodity and food prices further increased inflationary pressures. Jerome Powell, the Chair of the Federal Reserve, was clearly determined to do everything possible to lower inflation. Moreover, the ECB reiterated its desire to restore a more normal monetary policy despite the risk that the war in Ukraine could negatively affect Eurozone growth. The tapering of the ECB's asset purchase programme was accelerated. Against this backdrop, the positive performance of corporate bonds, buoyed by the hope of a short war between Russia and Ukraine, was worth noting.

In quarter two of 2022, fixed income markets danced to the tunes of inflation, central bank policies and growth concerns. While persistent inflation caused the 10Y UST yields to reach a ten-year high of 3.47% in June, growth concerns and the Fed's 75 bps rate hike, the largest since 1994, signalled central banks' seriousness in taming inflation, causing yields to close the quarter at 3.01%. Across the Atlantic, yields in German bunds followed a similar pattern. The ECB's tightening overtures were reflected in rising 10Y BTP-Bund spreads, causing it to announce a new anti-fragmentation tool. In credit, high-quality segments in the US fared better than the riskier names. The country should be better able to withstand the growth deceleration due to strong consumption. Elsewhere in emerging markets, sentiment remained weak owing to the continuing policy tightening in developed markets and a strengthening dollar.

■ Equities

In the third quarter of 2021, the barometer of global equities, the MSCI World AC index, fell by -0.8%, bringing its growth to +11.6% since the beginning of the year. In geographical terms, performance was mixed with generally stable developed markets (+0.2%) and sluggish emerging markets (-7.5%). Among the major developed markets, Japan led the way in the third quarter (+4.4%), buoyed by the announcement of a change in Prime Minister. Despite profit-taking in September, the United States and the Eurozone showed resilience over the quarter as a whole (respectively +0.1% and +0.2%). Conversely, the drop in the Chinese market (-18.5%) due to the domestic slowdown, an unprecedented tightening of regulations and the Evergrande troubles, weighed heavily on the emerging markets index. Among other emerging markets, Latin America (-9.1%) was affected by the Chinese slowdown and the prospect of monetary tightening by the Fed. In this context, India stood out, up at +12.1%, buoyed by the size of its domestic market and an ebb in the pandemic. At sectoral level in Europe (+0.1%), the main winner was Energy (+10.6%), buoyed by the rise in oil prices. In second place, Information Technology (+5.3%) continued to post well, despite profit-taking on semiconductors in September. Finally, Banks (+5.1%) benefited from the rise in interest rates. Conversely, sectors that were linked to China (Base Materials -4.4%, Luxury -8.1%) or were penalised by rate hikes (Utilities -3.5%, Real Estate -1.8%) underperformed.

In the fourth quarter of 2021, the MSCI World AC index jumped +6.7%, bringing its growth to +19.1% since the start of the year. This was due to companies' results' publications, which proved to be well above expectations in October. On the other hand, the acceleration in inflation and renewed concerns about the pandemic, led to profit-taking in November (-1.8%). However, the market picked up again in December (+3.6%). In geographical terms, performance was mixed with developed markets posting strong growth (+7.8%) and struggling emerging markets which (-1.3%), with China (-6.2%) once again lagging behind. Among developed markets, the United States stood out, with +9.7% for the MSCI US. Conversely, Japan, which had significantly outperformed in Q3, experienced some profit-taking in Q4 (-1.0%). Lastly, Europe achieved a good overall performance with +6.2%. However, this masked a significant dispersion, with France (+9.0%), Sweden (+9.1%) and Switzerland (+10.2%) up, while Germany (+2.7%) and particularly Spain (0%) underperformed. On a sectoral level in Europe (+6.2%), Defensives (+6.6%) slightly outperformed Cyclical (+5.9%), while growth stocks (+7.8%) outperformed value stocks (+4.4%). There was a recovery in Luxury stocks (+16.1%), Semiconductors (+11.8%) and also Utilities (+12.1%).

In the first quarter of 2022, the MSCI World AC index was down 5.1%. The index has been fell over three stages. At the start of 2022, growth stocks in particular had corrected because of the Fed's hardening stance. Towards the end of January, the publication of very good company results had helped the index to rebound. However, markets fell again from mid-February following the US warnings that an invasion of Ukraine by Russia was imminent, and again from 24 February 2022, when the Russian army moved into Ukraine. Some markets fell more than the average, such as most European cyclical markets and for the markets most exposed to Russia, such as Sweden (-13.7%) and Germany (-11.2%). The Netherlands was down -15.6%, while the UK (+3.5%) held up much better over the period as a whole. France was close to the global average (-6.8%). Overall, Europe (-5.9%) was down almost exactly as much as the MSCI World AC. The United States also came out close to the average (-5.5%). Japan (-2.5%) did worse than Asia Pacific ex-Japan (+0.6%). Finally, overall emerging markets (-6.5%) also posted growth levels close to the average, however with a wide range of performances: with +14.6% for Brazil and -13.9% for China.

For equities, the second quarter of 2022 was characterised by divergences prevailing across the markets. If persistent inflation was the main concern in quarter one, this was augmented in quarter two by economic growth worries, particularly in Europe and up to some extent in the US. The drop in US and European equities in quarter two was an indication of the repricing led by stagflationary concerns. Worries over central bank tightening and rising interest rates affected the more interest rate-sensitive information technology stocks, which had benefitted from the 'stay-at-home' theme during the Covid crisis. Simultaneously, growth fears caused cyclical sectors such as Consumer Discretionary and Real Estate to underperform in the developed world. On the other hand, Energy and Consumer Staples sectors were best placed to withstand the volatility. Regionally, Chinese stocks rose on the back of improving sentiment from economic reopening and favourable policy stances.

1 INTRODUCTION

Amundi Funds (the "Fund") is organised as a "Société d'Investissement à Capital Variable" ("SICAV") under the laws of the Grand Duchy of Luxembourg. The Fund, initially Groupe Indosuez Funds FCP, an unincorporated mutual investment fund ("Fonds Commun de Placement") created on 18 July 1985, was transformed, in accordance with Article 110 (2) of the law of 30 March 1988 on Undertakings for Collective Investment, and renamed GIF SICAV II on 15 March 1999. The deed of transformation and the Articles of Incorporation (the "Articles") were published in the Mémorial, Recueil des Sociétés et Associations on 28 April 1999. The name of the Fund was then changed to GIF SICAV on 1st December 1999, to Crédit Agricole Funds on 8 December 2000 and to CAAM Funds on 1st July 2007. As at 2 March 2010, in accordance with the decision taken by the shareholders in the framework of the Extraordinary General Meeting held on 23 November 2009 and with the decision of the Board of Directors taken on 23 December 2009, CAAM Funds was renamed Amundi Funds.

The amendments to the Articles have been published in the Mémorial, Recueil des Sociétés et Associations respectively on 14 January 2000, on 17 January 2001, and on 13 June 2007 for the first three name changes and on 3 April 2010 for the last one. A latest amendment to the Articles has been made on 14 March 2012 and has been published in the Mémorial, Recueil des Sociétés et Associations - C, number 943 and dated 12 April 2012. The Fund is subject to Part I of the amended law of 17 December 2010 on Undertakings for Collective Investment (the "2010 law").

■ PRESENTATION OF THE FINANCIAL STATEMENTS

The Fund's financial statements were prepared in accordance with the legal and regulatory provisions in force in Luxembourg concerning undertakings for collective investment.

The financial statements are presented on the basis of the latest Net Asset Value ("NAV") calculated during the financial period/year. In accordance with the prospectus dated May 2022, the NAVs were calculated using the latest market values and exchange rates known at the time of the calculation meaning:

- For all sub-funds: 30 June 2022.

In the annual report as at 30 June 2022, the sub-funds merged or liquidated during this year are shown separately in the Statement of Operations and Changes in Net Assets and are included in the combined figures.

The financial statements of the Fund and each of its Sub-Funds have been prepared on a going concern basis of accounting.

The objective of Amundi Funds Protect 90 is to provide a participation in financial markets evolution while also providing permanent partial protection of your investment over any given 3-year period. Specifically, the sub-fund is designed to ensure that its share price does not fall below 90% of the highest net asset value it has ever achieved, that for Protect 90 and as from 05/06/2020, sub-fund is designed to ensure that share price does not fall below 90% of the highest net asset value recorded as from 05/06/2020, as per prospectus.

- **Cross Sub-Funds investments** - As at 30 June 2022, the value of the investments made by sub-funds in other Sub-Funds of the SICAV amounts to EUR 742,671,421 corresponding to 0.99% of the total net asset value. Therefore, the total combined NAV at the year end without those cross investments would amount to EUR 74,015,714,165.
- **Securities portfolio** - Transferable securities listed on a Stock Exchange or on a regulated market are valued at their last known price. When these prices are not representative or when securities are not listed, they are valued at their reasonably probable realisation value, determined with care and in good faith by the Board of Directors.
- **Conversion of items expressed in foreign currencies** - The Fund's financial statements are expressed in Euro (EUR). Net assets of each Sub-Fund expressed in foreign currencies are therefore converted and combined in EUR at the exchange rate in force at the close of the financial year. Transactions and acquisition costs for portfolio securities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund concerned at the exchange rate in force on the date of transaction or acquisition, as appropriate. Valuation values for securities in the portfolio and of other assets and liabilities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund at the exchange rate in force at the end of the financial year. Currency differences resulting from these conversions are recorded under the caption "Reevaluation of consolidated Net Assets" in the Statement of Operations and Changes in Net Assets.
- **Return on investments** - Dividends are entered as yields on the date when they are declared and in so far as the appropriate information can be obtained by the Fund. Interest is accrued on a daily basis.
- **Distribution of costs and expenses** - Each Sub-Fund is charged with costs or expenses specifically attributable to it. Costs and expenses not attributable to a specific Sub-Fund are distributed between the Sub-Funds on an equitable basis, in proportion to their respective Net Assets.
- **Repurchase agreements** - Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the Sub-Fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the Sub-Fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.
- **Futures contracts** - Unexpired futures contracts are valued at their last known price on the date of valuation or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Futures-style options contracts** - Futures-style options contracts are valued at the quoted price available on an official stock exchange. Initial margin deposits are paid in cash upon entering into the contract. Subsequent positive or negative cash-flows, referred to as variation margins, are paid or received by the Sub-Fund periodically and are based on changes in the market value of future-style options contracts. When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction. Net unrealised appreciations or depreciations on futures-style options contracts are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures-style options contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Forward foreign exchange contracts** - Unexpired forward foreign exchange contracts are valued at the exchange rates applicable on the valuation date or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Valuation of options and swaptions** - Options officially listed on a stock market or any other regulated market, operating in a regular manner, recognised and open to the public, are valued on the basis of their closing prices on the valuation day or, in the absence of such prices, on the basis of the last-known prices available. OTC options including swaptions are marked-to-market based on the elements laid down in their contracts. If the last known prices for listed options or the calculated price for OTC options are not representative, the valuation will be based on the potential realisation value estimated by the Board of Directors of the SICAV with prudence and in good faith. Net realised and net change in unrealised gain/(loss) on OTC options and swaptions are recorded in the Statement of Operations and Changes in Net Assets.
- **Swaps** - The Fund is authorised to enter into variance swaps, credit default swaps, total return swaps, inflation swaps, asset swaps, interest rate swaps or currency swaps. Those swaps are recorded at market value based on the valuation elements laid down in the contracts. The unrealised net gain is included in the item "Unrealised net appreciation on swaps and CFD" in the Statement of Net Assets and the unrealised net loss is included in the item "Unrealised net depreciation on swaps and CFD" in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on swaps are recorded in the Statement of Operations and Changes in Net Assets.
- **Money market instruments** - The money market is a financial instrument with high liquidity and very short maturities. It is used by participants as a means for borrowing and lending in the short term, with maturities that usually range from overnight to just under a year. For the money market instruments, the accretion (difference between cost and amortised value), is reported under "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements" in the Statement of Operations and Changes in Net Assets for securities held at year end. If the instruments have been sold or reimbursed, this result is considered as "Net realised profit/(loss) on securities sold" in the Statement of Operations and Changes in Net Assets.
- **To Be Announced securities (TBAs)** - TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised. TBA positions are disclosed in the Securities Portfolio. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Brokers payable" in the Statement of Net Assets. The realised profits/(losses) on TBAs and

changes in unrealised appreciation/depreciation are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings "Net realised profit/(loss) on securities sold" and "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements". MBS / ABS risk Mortgage-backed and asset-backed securities (MBSs and ABSs) typically carry prepayment and extension risk and can carry above-average liquidity, credit and interest rate risks.

- **Net realised profit/(loss) on securities sold** - The "Net realised profit/(loss) on securities sold" figure of the Statement of Operations and Changes in Net Assets reflects the difference between the cost and proceeds from securities sold, including the market as well as the currency impacts.
- **Transaction costs** - The transaction costs include broker fees and fees charged by the custodian for securities and derivatives transactions. The transaction fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "Broker and transaction fees" in Statement of Operations and Changes in Net Assets. Refer to note 13 which describes the reception and transmission of orders fees.
- **Contracts for difference (CFD)** - At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss under captions Net realised profit/(loss) on swaps and CFD in Statement of Operations and Changes in Net Assets. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.
- **Securities lending** - In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

5 PERFORMANCE FEES

The performance fee is calculated separately for each Class of Shares. It shall be accrued daily, deducted and paid annually for each Class of Shares. The performance fee is calculated by comparing the NAV of the sub-fund relevant Class of Shares and the reference asset.

The mechanism applied is further detailed on the website www.amundi.lu/Amundi-Funds

The sub-funds and the Classes of Shares subject to a performance fee are listed on the website www.amundi.lu/Amundi-Funds.

For all the classes authorized in Hong Kong please note that no performance fees are applied.

6 TAXATION OF THE FUND - TAXE D'ABONNEMENT

The Fund is further liable in Luxembourg to a tax of 0.05% per annum in respect of the Equity Sub-Funds, Bond Sub-Funds, Multi Asset Sub-Funds, Protected Sub-Funds and Absolute Return Sub-Funds (except on investments by these Sub-Funds in other undertakings for collective investment established in Luxembourg for which no tax is applied) and of 0.01% per annum in respect of the Cash Sub-Funds, the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category of all the Sub-Funds ("Taxe d'Abonnement"), such tax being payable quarterly on the basis of the NAV of the Fund at the end of the relevant calendar quarter.

The benefit of the 0.01% per annum Taxe d'Abonnement is available to those Shareholders admitted in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category on the basis of the Luxembourg legal, regulatory and tax provisions as these are known to the Fund at the time of admission of an Investor in such class of shares.

However, no guarantee can be given for the past and for the future and such assessment is subject to interpretations on the status of an eligible Investor in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category by any competent authorities as will exist from time to time. Any such reclassification made by an authority as to the status of an Investor may submit the entire class of shares to a Taxe d'Abonnement rate of 0.05% per annum.

7 OTHER INCOME

Amounts of other income in the Statement of Operations and Changes in Net Assets include mainly revenues from securities lending and recovery of provisions on performance fees.

INTEREST RATE SWAPS

The Fund has concluded Interest rate swap contracts in which the counterparties exchange respective engagements for the payment or receipt of interest on a specific nominal reference amount. These amounts are calculated and booked for every time the NAV is calculated. The interests receivable are included in the item "Interest receivable" of the Statement of Net Assets and the interests payable are included in the item "Other liabilities" of the Statement of Net Assets.

CREDIT DEFAULT SWAPS

The Fund has concluded "Credit Default Swaps" contracts designed to transfer the credit exposure of fixed income instruments between parties. The amounts of fixed income exchanged with an income tied to the evolution of credit events of either an index or a bond, are calculated and accounted for every time the NAV is calculated.

INFLATION SWAPS

The Fund has concluded "Inflation Swaps" which are contracts offering the difference between an inflation level, applied on a given nominal amount agreed at the contract inception, and a fixed interest rate applied on the same nominal amount. These amounts are calculated and booked for every time the NAV is calculated.

20 MASTER-FEEDER STRUCTURE

Amundi Funds Global Total Return Bond

The objective of the Sub-Fund Amundi Funds Global Total Return Bond is to achieve a combination of income and capital growth (total return).

Specifically, the Sub-Fund invests as a feeder fund in Amundi Oblig Internationales (master fund) that seeks to outperform (after applicable fees) the JP Morgan Global Government Bond Index Broad index over any given 3-year period.

The master fund invests mainly in OECD bonds and convertible bonds. Investments may include mortgage-backed securities (MBS) and asset-backed securities (ABS). Specifically, the Sub-Fund invests at least 85% of its net assets in units of the master fund (OR-D class). The Sub-Fund may invest up to 15% in deposits and derivatives that are used for hedging only.

Amundi Oblig Internationales is a SICAV constituted under French law and qualifies as a master fund under Directive 2009/65/EC.

The master fund invests up to 100% in:

- bonds issued or guaranteed by OECD member states,
- investment-grade bonds and convertible bonds issued by companies that are headquartered, or do substantial business, in the OECD,
- MBSs and ABSs rated AAA (S&P) or Aaa (Moody's) at the time of the purchase and downgraded not less than AA or Aa2 when held.

The mortgages underlying the MBSs may be commercial or residential, and the MBSs may or may not come with any form of government credit backing.

The master fund's exposure to contingent convertible bonds is limited to 10% of net assets.

The master fund actively manages its exposure to interest rate and foreign exchange markets.

While complying with the above policies, the master fund may also invest in money market instruments, deposits, and up to 10% of its net assets in UCITS/UCIs.

Derivatives are integral to the master fund's investment strategies. The master fund may use derivatives for arbitrage, hedging and efficient portfolio management, and to increase its net exposure.

In addition to core derivatives, the master fund may use credit derivatives (on single issuer and on indices).

The master fund may enter into temporary acquisitions and sales of securities (repurchase and reverse repurchase agreements).

The master fund's net income is automatically distributed and its net realised capital gains are automatically reinvested or distributed each year, as the management company of the master fund may determine.

The master fund's investment team uses a wide range of strategic and tactical positions, including arbitrage among credit, interest rate and currency markets, in assembling a highly diversified portfolio.

The Investment manager of the both Sub-Funds is Amundi (UK) Limited.

Fees directly charged to Amundi Funds Global Total Return Bond amount to EUR 1,541,222 which is summarized in the table below in terms of percentages of the average NAV of Amundi Funds Global Total Return Bond share-classes:

Fees indirectly charged through fees accrued in the master fund (OR-D Class) amount to EUR 232,755.20 or 0.26% of the average NAV of the master fund (OR-D Class) Amundi Oblig Internationales.

The annual and semi-annual reports of the master fund are available upon request at the Registered Office of the Fund.

Amundi Funds Global Total Return Bond also indirectly pays for fees of underlying funds held in the master fund.

Amundi Funds Target Coupon

The objective of the Sub-Fund Amundi Funds Target Coupon is to achieve a combination of income and capital growth (total return). Specifically, the Sub-Fund invests as a feeder fund in Amundi Revenus (master fund).

The master fund invests mainly in debt instruments (bonds and money market instruments) of all types that are issued by governments or companies around the world and denominated in one of the OECD currencies, with diversification among currencies and equity markets.

Specifically, the Sub-Fund invests at least 85% of its net assets in units of the master fund (OR class). The Sub-Fund may invest up to 15% in deposits and derivatives that are used for hedging only.

Amundi Revenus is an FCP that is constituted under French law and qualifies as a master fund under Directive 2009/65/EC.

The master fund invests at least 70% of its net assets in debt instruments. The master fund may invest in

- below-investment-grade bonds (high-yield bonds),
- subordinated corporate bonds (including contingent convertible bonds up to 50% of net assets) and
- up to 20% of net assets in mortgage-backed securities (MBS) and asset-backed securities (ABS).

The master fund may also invest in equities of companies of all capitalisations and sectors around the world. The master fund's exposure to the equity market may range from 0% to 20% of net assets, and its exposure to the currency market may range from 0% to 100% of net assets.

The master fund may also invest up to 10% of net assets in UCITS/UCIs.

Derivatives are integral to the master fund's investment strategies. The master fund may use derivatives for hedging and efficient portfolio management, and to increase its net exposure.

In addition to core derivatives, the master fund may use credit derivatives (on single issuer and on indices).

The master fund may enter into temporary acquisitions and sales of securities (repurchase and reverse repurchase agreements).

The amount of the distributed income will be set annually by the management company of the master fund, based on the expected returns of the assets in the portfolio. The master fund does not compare its performance to any particular index.

The master fund's investment team seeks to exploit yield premiums from a broad investment universe (primarily bonds), using a management approach that is flexible and is based on high-conviction choices. It analyses interest rate and economic trends (top-down) to identify strategies and country and asset class allocations that appear likely to offer the best risk-adjusted returns. The investment team then uses both technical and fundamental analysis, including risk premium and credit analysis, to select securities based on their potential to generate income (bottom-up) and to construct a highly diversified portfolio that can provide a regular return.

The Investment manager of the both Sub-Funds is Amundi Asset management.

Amundi Funds Impact Green Bonds

The objective of the Sub-Fund Amundi Funds Impact Green Bonds is to achieve a combination of income and capital growth (total return) over the recommended holding period through investment in Sustainable Investments pursuant to Article 9 of the Disclosure Regulation.

Specifically, the Sub-Fund invests as a feeder fund in Amundi Responsible Investing - Impact Green Bonds (master fund) that seeks to provide performance linked to Sustainable Investments pursuant to Article 9 of the Disclosure Regulation, by investing in green bonds whose impact on the environment is positive, assessed on the basis of estimated greenhouse gas emissions avoided and using the tonnes of CO2 equivalent emissions (tCO2e) avoided as indicator.

The master fund invests mainly in OECD investment grade green bonds issued by any issuer around the world and denominated in any currency.

Non-Euro currency exposure is limited to 10% of net assets.

Specifically, the Sub-Fund invests at least 85% of net assets in units of the master fund (OR-D class). The Sub-Fund may invest up to 15% in deposits.

The Impact Green Bonds master fund is a Sub-Fund of the Amundi Responsible Investing SICAV constituted under French law and qualifies as a master fund under Directive 2009/65/EC.

The master fund may invest up to 100% of its net assets in all of the following types of green bonds traded on a regulated market and issued by governments, supra-national organizations, and private or public companies around the world, including up to 15% of the assets in emerging markets:

- fixed-rate and variable-rate bonds;
- indexed bonds: inflation, CMR (Constant Maturity Rate);
- subordinated securities issued by any type of bank, corporation or insurance company;
- Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) up to a maximum of 10% of net assets.

The master fund will invest a minimum of 50% of the net assets in green bonds from issuers with an ESG rating of between A and D (meeting the criteria and guidelines of the Green Bond Principles, as published by the ICMA).

At least 90% of the securities held in the portfolio are subject to a non-financial analysis.

The master fund may invest up to 15% of net assets in unrated or below investment grade securities.

The currency risk will be hedged up to a total exposure to currencies other than the euro of 10% of the net assets.

While complying with the above policies, the master fund may also invest:

- up to 30% of its net assets in money market instruments;
- up to 10% of net assets in UCITS/UCIs;
- in deposits;

The master fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on interest rates, credit and foreign exchange).

The master fund is actively managed. The Barclays MSCI Global Green Bond Index (coupons reinvested), hedged in euro (the "Index") serves a posteriori as an indicator for assessing the master fund's performance.

There are no constraints relative to the Index restraining portfolio construction. The master fund has not designated the Index as a reference benchmark for the purpose of the Disclosure Regulation.

The master fund's sustainable investment is focused primarily on environmental objectives by investing in so-called "green bonds" which fund eligible projects (i) meeting the criteria and guidelines of the Green Bond Principles (as published by the ICMA) and (ii) for which the positive impact on energy transition and the environment of the projects it finances can be assessed.

The Investment manager of the both Sub-Funds are Amundi Asset Management.

23 RECEPTION AND TRANSMISSION OF ORDERS FEES

Reception and transmission of orders fees are:

- paid to Amundi Intermediation or to Amundi (UK) Ltd, for their services rendered to sub-funds managed by Amundi which consist in centralizing orders and in supporting their best execution.
- accrued daily and paid quarterly on the basis of the transactions handled by Amundi's related parties.

Compared to an investment manager negotiating transactions on his own, the centralization of order enables namely to negotiate better prices with the brokers thanks to an increase of transactions volume, to have access to a larger number of brokers and to more market information, to benefit from the know-how of trading specialists and dedicated trading controllers.

These fees are recorded under caption "Reception and transmission of orders fees" in the Statement of Operations and Changes in Net Assets.

24 OPERATION WITH RELATED PARTIES

The related parties, in their capacity as brokers, may also carry out operations or invest in currencies or other financial products on behalf of each sub-fund for which the related parties act as broker or on their own behalf or as counterpart for their clients, including cases where the related parties or their clients are able to carry out transactions on their own behalf at the same time as on behalf of each sub-fund. The transactions as listed on the table have been entered into ordinary course of business and on normal commercial terms.

The Fund considers that the commissions, premiums and reductions billed by related parties will be competitive, even though it is in the interest of the related parties to obtain favourable commission rates, together with premiums and reductions for each sub-fund.

During the year, transactions for a total amount of EUR 23,533,130,289.98 i.e. 9.36% of the total transactions carried out over the year, were carried out by such related parties.

During the year ended on 30 June 2022, Amundi Funds carried out transactions with related parties amounting to:

27 SWING PRICING

Since January 2016, a Swing Pricing policy has been implemented in the Fund.

Significant net inflows or outflows in a Sub-Fund cause the Investment Manager to trade the Sub-Funds' securities, thereby incurring trading costs.

With Swing Pricing, a Sub-Fund's Net Asset Value per share is adjusted to account for trading costs incurred where shareholders' subscriptions or redemptions activity exceeds a Sub-Fund's predetermined threshold. Swing Pricing is a mechanism of valuation which adjusts (swings) a Sub-Fund's Net Asset Value per share to account for these trading costs.

The aim is to protect the interests of non-dealing shareholders by ensuring the shareholders making significant subscriptions or redemptions contribute to the cost of their transactions.

Market conditions, trading costs and other Sub-Fund's data are used by the Management Company to determine which Sub-Fund's Net Asset Value per unit may be affected by Swing Pricing, and the appropriate threshold and swing factor to be applied for each Sub-Fund. These are reviewed by the Board of Directors of the Management Company on a periodic basis.

The Swing Factor may not exceed 2% of Net Asset Value as outlined in the prospectus.

During July 2021 – June 2022, Swing Pricing adjustments were applicable on the Net Asset Value per unit of the following Sub-Funds:

28 RUSSIAN SECURITIES

As a consequence of the Russian invasion on Ukraine on 24 February 2022 and its impact on the Russian markets and securities, the Board of Directors and the Management Company decided from the end of February to daily review and fair value Russian equities (including ADR/GDR) and bonds.

Fair valuation takes into consideration the sanctions regimes in force and their impact on the tradability and settlement process of the concerned securities.

As at the time of writing, the fair valuation process in respect of these securities remains in place.

Here below the list of securities fair valued as of 30 June 2022:

Audit report

To the Shareholders of
Amundi Funds

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Amundi Funds (the “Fund”) and of each of its sub-funds as at 30 June 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the statement of net assets as at 30 June 2022;
- the securities portfolio as at 30 June 2022;
- the statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Emphasis of Matter

We draw attention to Note 1 to these financial statements, which indicates that the Board of Directors of the Fund decided to suspend the calculation of the net asset value, the issue and redemption and conversion of shares of the sub-funds Russian Equity effective 28 February 2022 and Emerging Europe and Mediterranean Equity effective 1 March 2022 following the ongoing geopolitical tensions and sanctions imposed on Russia which made impossible to trade or value the majority of assets of the sub-funds. Our opinion is not modified in respect of this matter.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d'entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

To the shareholders of Amundi Funds

We hereby confirm that, in our opinion, the Management Company of the Fund, has in all material respects, managed Amundi Funds in accordance with the provisions of the legal documentation of the Fund, as amended, for the year ended 30 June 2022.

For and on behalf of
CACEIS Bank Luxembourg S.A.

If required by the Law, notices to shareholders will be published in the Luxembourg "Mémorial", the Luxemburger Wort and in such other newspapers as the Directors may determine.

SFT REGULATION

Following the Regulation 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions, only transactions on reverse repurchase agreements, repurchase agreements, securities lending and performance swaps were subject to this Regulation as at 30 June 2022.

Sub-funds respect at all time the constraint "Cash received as collateral of OTC contracts and repurchase agreements has to be higher than the sum of deposits with credit institutions, investments in high-quality government bonds, reverse repurchase transactions with credit institutions and investments in short term money market funds". Cash is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash. Collateral granted by the sub-funds in the context of repurchase agreements are held on segregated accounts.

All transactions are bilateral transactions.

Sub-funds respect at all time the constraint "Cash received as collateral of OTC contracts and repurchase agreements has to be higher than the sum of deposits with credit institutions, investments in high-quality government bonds, reverse repurchase transactions with credit institutions and investments in short term money market funds". Cash is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash. Collateral granted by the sub-funds in the context of repurchase agreements are held on segregated accounts.

The interest received and paid under reverse repurchase agreements and repurchase agreements are disclosed in the Statement of Operations and Changes in Net Assets, for each Sub-Fund under the captions "Interest received on Repos/Reverse Repos" and "Interest paid on Repos/Reverse Repos".

* The total does not include the collateral cash.

All transactions are bilateral transactions.

For each counterparty and each sub-fund, collateral positions are followed-up globally for all OTC instrument types.

Cash collateral is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash.

Returns and costs incurred from performance swaps transactions during the year ended 30 June 2022 are included in the valuation of the swaps.

REMUNERATION POLICY AND PRACTICES

Amundi Luxembourg S.A. remuneration policy is compliant with the requirements detailed in the European Directive 2014/91/EU that come into force on 18 March 2016, and was transposed into Luxembourg Law of 10 May 2016.

The remuneration policy is based on Amundi group remuneration framework, and it is reviewed annually and approved by the Board of Amundi Luxembourg S.A.. The policy is subject to independent review by the internal Compliance function.

In 2021 there were no material changes to the remuneration policy adopted for previous years.

The 2021 review took place on February 9th, 2021.

The policy applicable for 2021 was approved by Amundi Luxembourg S.A. Board on April 15th, 2021.

Amundi group Remuneration Committee reviews on an annual basis the group remuneration policy.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of academic qualification, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and Amundi group as a whole, and it is based on both financial and non-financial criteria.

Amundi Luxembourg S.A. and Amundi group have defined all identified staff having authority or influence on the funds Amundi manages, and who consequently are likely to have an impact on the performance or the risk profile of our the funds.

DISCLOSURE REGULATION

On 18 December 2019, the European Council and European Parliament announced that they had reached a political agreement on the Disclosure Regulation, thereby seeking to establish a pan-European framework to facilitate Sustainable Investment. The Disclosure Regulation provides for a harmonised approach in respect of sustainability-related disclosures to investors within the European Economic Area's financial services sector.

For the purposes of the Disclosure Regulation, the Management Company meets the criteria of a "financial market participant", whilst each Sub-Fund qualifies as a "financial product".

Under the Amundi Responsible Investment Policy, Amundi has developed its own ESG rating approach. The Amundi ESG rating aims to measure the ESG performance of an issuer, i.e. its ability to anticipate and manage Sustainability Risks and opportunities inherent to its industry and individual circumstances. By using the Amundi ESG ratings, portfolio managers are taking into account Sustainability Risks in their investment decisions. Amundi applies targeted exclusion policies to all Amundi's active investing strategies by excluding companies in contradiction with the Responsible Investment Policy, such as those which do not respect international conventions, internationally recognized frameworks or national regulations.

For further details on how a Sub-Fund complies with the requirements of the Disclosure Regulation please refer to the supplement for that Sub-Fund. Please also refer to the section on 'Sustainable Investment' in the Prospectus of the Fund and the Amundi Responsible Investment Policy available on www.amundi.com.

As required by Art.11 of the Disclosure Regulation the Fund makes the following statements.

■ Article 6 Sub-Funds

Given the investment focus and the asset classes/sectors they invest in, the investment managers of all other Sub-Funds, not classified pursuant to article 8 or 9 of the Disclosure Regulation did not integrate a consideration of environmentally sustainable economic activities into the investment process for the Sub-Fund. Therefore it should be noted that the investments underlying these Sub-Funds did not take into account the EU criteria for environmentally sustainable economic activities.
